THIRD SERIES, VOLUME 59, NUMBER 4 ***CONTENTS*** **APRIL 1999**

RAPID COMMUNICATIONS

General methods of statistical physics

Irrelevance of memory in the minority game R3783
Andrea Cavagna

Fluctuation effects in steric reaction-diffusion systems R3787
Zoran Konkoli, Henrik Johannesson, and Benjamin P. Lee

Experimental observation of coherence resonance in cascaded excitable systems R3791
D. E. Postnov, Seung Kee Han, Tae Gyu Yim, and O. V. Sosnovtseva

Chaos and nonlinear dynamical systems

Trace formula of quantum Liouville operator R3795
Mitsusada M. Sano

Route to high-dimensional chaos R3799
Mary Ann Harrison and Ying-Cheng Lai

Quantum chaos induced by scaled disorder R3803
J. A. Vergés and E. Louis

Unstable dimension variability and complexity in chaotic systems R3807
Ying-Cheng Lai

Classical fluids

Turbulent decay of a passive scalar in the Batchelor limit: Exact results from a quantum-mechanical approach ... R3811
D. T. Son

Liquid crystals

Molecular motion in a smectic liquid crystal showing V-shaped switching as studied by optical second-harmonic generation R3815
Byoungchoo Park, Michi Nakata, San-seong Seomun, Yoichi Takanishi, Ken Ishikawa, and Hideo Takezoe

Complex fluids, polymers, and granular materials

Effect of an external magnetic field on the gas-liquid transition in the Heisenberg spin fluid R3819
T. G. Sokolovska and R. O. Sokolovskii

Switching transition of molecular nanotubes forming an inclusion complex with block copolymers in solutions . . R3823
Yasushi Okumura, Kohzo Ito, and Reinosuke Hayakawa

Copyright 1999 by The American Physical Society

1063-651X(199904)59:4;1-J

PHYSICAL REVIEW E THIRD SERIES, VOLUME 59, NUMBER 4 APRIL 1999

Biological physics

Simulation of embryonic cell self-organization: A study of aggregates with different concentrations of cell types R3827
José C. M. Mombach
Two-photon fluorescence imaging of impurity distributions in protein crystals R3831
C. L. Caylor, I. Dobrianov, C. Kimmer, R. E. Thorne, W. Zipfel, and W. W. Webb

Plasma physics

Measuring the charge on single particles by laser-excited resonances in plasma crystals R3835
A. Homann, A. Melzer, and A. Piel
High efficiency coupling and guiding of intense femtosecond laser pulses in preformed plasma channels in an elongated gas jet R3839
S. P. Nikitin, I. Alexeev, J. Fan, and H. M. Milchberg

Classical physics, including nonlinear media

Hamiltonian averaging in soliton-bearing systems with a periodically varying dispersion 3843
Sergei K. Turitsyn, Alejandro B. Aceves, Christopher K. R. T. Jones, Vadim Zharnitsky, and Vladimir K. Mezentsev

ARTICLES

General methods of statistical physics

Traveling wave solutions in the Burridge-Knopoff model 3847
C. B. Muratov
Logarithmic relaxations in a random-field lattice gas subject to gravity 3858
Marina Piccioni, Mario Nicodemi, and Serge Galam
Anomalous diffusion of charged particles in a lattice Lorentz gas in a transverse magnetic field 3864
Czesław Oleksy
Model of defect diffusion and development of the boson peak in an amorphous solid 3870
Shankar P. Das
Synchronous versus asynchronous updating in the ''game of Life'' 3876
Hendrik J. Blok and Birger Bergersen
Mean first-passage time of a bistable kinetic model driven by cross-correlated noises 3880
Dongcheng Mei, Guangzhong Xie, Li Cao, and Dajin Wu
Domain size effects in Barkhausen noise 3884
M. Bahiana, Belita Koiller, S. L. A. de Queiroz, J. C. Denardin, and R. L. Sommer
Dynamical phase diagram of a metamagnetic model subject to an oscillating magnetic field 3888
M. Santos and W. Figueiredo
Interfacial velocity corrections due to multiplicative noise 3893
Leonid Pechenik and Herbert Levine
Correlations and symmetry breaking in gapped matrix models 3901
E. Brézin and N. Deo
Confined harmonically interacting spin-polarized fermions in a magnetic field: Thermodynamics 3911
S. Foulon, F. Brosens, J. T. Devreese, and L. F. Lemmens
Velocity-curvature dependence for chemical waves in the Belousov-Zhabotinsky reaction: Theoretical explanation of experimental observations 3920
Pavel K. Brazhnik and John J. Tyson
Dispersion of passive tracers in a velocity field with non-δ-correlated noise 3926
P. Castiglione and A. Crisanti

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 59, NUMBER 4** **APRIL 1999**

Critical droplets in metastable states of probabilistic cellular automata 3935
Stephen Bigelis, Emilio N. M. Cirillo, Joel L. Lebowitz, and Eugene R. Speer
Annealing schedule from population dynamics 3942
Stefan Bornholdt
Collective behavior of asperities in dry friction at small velocities 3947
František Slanina
Quenching of a Brownian oscillator 3954
V. A. Shneidman and D. R. Uhlmann
Stochastic resonance in an asymmetric Schmitt trigger 3958
F. Marchesoni, F. Apostolico, and S. Santucci
Equation of state of the hard-sphere solid: The modified weighted-density approximation with a static solid reference state 3964
Dean C. Wang and Alice P. Gast
Small delay approximation of stochastic delay differential equations 3970
Steve Guillouzic, Ivan L'Heureux, and André Longtin
Relaxation in graph coloring and satisfiability problems 3983
Pontus Svenson and Mats G. Nordahl

Chaos and nonlinear dynamical systems

Entropy production and phase space volume contraction 4000
D. Daems and G. Nicolis
Simple driven maps as sensitive devices 4007
Changsong Zhou and C.-H. Lai
Robust method for periodicity detection and characterization of irregular cyclical series in terms of embedded periodic components 4013
P. P. Kanjilal, J. Bhattacharya, and G. Saha
Effects of bifurcations on the energy level statistics for oval billiards 4026
H. Makino, T. Harayama, and Y. Aizawa
Synchronization of chaos in an array of three lasers 4036
John R. Terry, K. Scott Thornburg Jr., David J. DeShazer, Gregory D. VanWiggeren, Shiqun Zhu, Peter Ashwin, and Rajarshi Roy
Testing for nonlinearity in unevenly sampled time series 4044
Andreas Schmitz and Thomas Schreiber
Time delayed chaotic systems and their synchronization 4048
Rong He and P. G. Vaidya
Border collision bifurcations in two-dimensional piecewise smooth maps 4052
Soumitro Banerjee and Celso Grebogi
Driving trajectories in complex systems 4062
Elbert E. N. Macau and Celso Grebogi
Level fluctuations in quantum systems with multifractal eigenstates 4071
J. X. Zhong and T. Geisel

Classical fluids

Parametrically excited hydrodynamic solitons 4075
Guoqing Miao and Rongjue Wei
Segment diffusion in polymers confined in nanopores: A fringe-field NMR diffusometry study 4079
Elmar Fischer, Rainer Kimmich, Uwe Beginn, Martin Möller, and Nail Fatkullin
Algebraic perturbation theory for polar fluids: A model for the dielectric constant 4085
V. I. Kalikmanov

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 59, NUMBER 4 APRIL 1999

Nonlinear traveling waves in rotating Rayleigh-Bénard convection: Stability boundaries and phase diffusion 4091
Yuanming Liu and Robert E. Ecke
Control of Kirchhoff vortices by a resonant strain 4106
L. Friedland
Advection of a passive scalar near two dimensions 4112
M. Hnatich, J. Honkonen, D. Horvath, and R. Semancik
Phase behavior of a simple fluid confined between chemically corrugated substrates 4122
Henry Bock and Martin Schoen

Liquid crystals

Hydrodynamic model for surface nematic viscosity 4137
Georges E. Durand and Epifanio G. Virga
Polarization in free standing chiral and nonchiral smectic films 4143
P. O. Andreeva, V. K. Dolganov, C. Gors, R. Fouret, and E. I. Kats
Axially twisted chiral nematic structures in cylindrical cavities 4153
M. Ambrožič and S. Žumer
Nematic-isotropic transition in a lattice model with quenched disordered impurities: A Monte Carlo study 4161
Jaroslav Ilnytskyi, Stefan Sokołowski, and Orest Pizio

Complex fluids, polymers, and granular materials

Tilted sandpiles, interface depinning, and earthquake models 4169
A. Malthe-Sørenssen
Theory of nucleation and growth during phase separation 4175
Celeste Sagui and Martin Grant
Velocity distribution for a dilute vibrated granular material 4188
V. Kumaran
Static structure and colloidal interactions in partially quenched quasibidimensional colloidal mixtures 4203
G. Cruz de León and J. L. Arauz-Lara
Quantitative measure of folding in two-dimensional polymers 4209
Gustavo A. Arteca and Shuangxi Zhang
Fluids of rodlike particles near curved surfaces 4216
B. Groh and S. Dietrich
Numerical pore-scale modeling of three-phase fluid flow: Comparison between simulation and experiment 4229
G. G. Pereira
Directed percolation depinning models: Evolution equations 4243
L. A. Braunstein, R. C. Buceta, N. Giovambattista, and A. Díaz-Sánchez
Short grafted chains: Monte Carlo simulations of a model for monolayers of amphiphiles 4248
Christoph Stadler, Harald Lange, and Friederike Schmid
Numerical bifurcation diagram for the two-dimensional boundary-fed chlorine-dioxide–iodine–malonic-acid system 4258
S. Setayeshgar and M. C. Cross
Percolation and conductivity of self-affine fractures 4265
V. V. Mourzenko, J.-F. Thovert, and P. M. Adler
Adsorption kinetics in the presence of external fields 4285
I. Pagonabarraga, J. Bafaluy, and J. M. Rubí
Influence of uniaxial stress on the lamellar spacing of eutectics 4298
Jens Kappey, Klaus Kassner, and Chaouqi Misbah
Shapes and shape transformations of two-component membranes of complex topology 4305
Wojciech T. Góźdź and Gerhard Gompper

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 59, NUMBER 4** **APRIL 1999**

Phase behavior, structural effects, and volumetric and transport properties in nonaqueous microemulsions 4317
S. K. Mehta, Kawaljit, and Kiran Bala
Randomly driven granular fluids: Large-scale structure 4326
T. P. C. van Noije, M. H. Ernst, E. Trizac, and I. Pagonabarraga
Morphology transitions in diffusion- and kinetics-limited solidification of a liquid crystal 4342
Jeffrey L. Hutter and John Bechhoefer
Scaling theory of drying in porous media 4353
I. N. Tsimpanogiannis, Y. C. Yortsos, S. Poulou, N. Kanellopoulos, and A. K. Stubos
Phase separation under shear in two-dimensional binary fluids 4366
A. J. Wagner and J. M. Yeomans
Mechanisms of exciton energy transfer in Scheibe aggregates 4374
J. A. Tuszyński, M. F. Jørgensen, and D. Möbius
Suspension of spherical particles in nematic solutions of disks and rods 4384
Philippe Poulin, Nathalie Francès, and Olivier Mondain-Monval
Strongly dipolar fluids at low densities compared to living polymers 4388
J. M. Tavares, J. J. Weis, and M. M. Telo da Gama
Stacking entropy of hard-sphere crystals 4396
Siun-Chuon Mau and David A. Huse
Computer simulations of the wetting properties of neon on heterogeneous surfaces 4402
Stefano Curtarolo, George Stan, Milton W. Cole, Mary J. Bojan, and William A. Steele
Mechanisms of granular spontaneous stratification and segregation in two-dimensional silos 4408
Pierre Cizeau, Hernán A. Makse, and H. Eugene Stanley
Dissipative properties of vibrated granular materials 4422
Clara Salueña, Thorsten Pöschel, and Sergei E. Esipov
Phase equilibria of asymmetric hard sphere mixtures 4426
N. G. Almarza and E. Enciso
Thermally driven collapse of a polymer brush in a polymer matrix 4434
Michele Sferrazza, Richard A. L. Jones, and David G. Bucknall
Nonuniversality of nucleation kinetics following a finite rate quench 4441
Vitaly A. Shneidman
Rheophysical classification of concentrated suspensions and granular pastes 4445
P. Coussot and C. Ancey
Short-time dynamics of colloidal suspensions in confined geometries 4458
I. Pagonabarraga, M. H. J. Hagen, C. P. Lowe, and D. Frenkel
High-frequency dynamics of glass-forming polybutadiene 4470
D. Fioretto, U. Buchenau, L. Comez, A. Sokolov, C. Masciovecchio, A. Mermet, G. Ruocco, F. Sette, L. Willner, B. Frick, D. Richter, and L. Verdini
Continuum description of vibrated sand 4476
Jens Eggers and Hermann Riecke
Capillary condensation transitions in a slab geometry 4484
Silvina M. Gatica, M. Mercedes Calbi, and Milton W. Cole

Biological physics

Nonadiabatic resonances in a noisy Fitzhugh-Nagumo neuron model 4490
S. Ripoll Massanés and C. J. Pérez Vicente
Hebbian learning and spiking neurons 4498
Richard Kempter, Wulfram Gerstner, and J. Leo van Hemmen
Image transfer in multilayered assemblies of lattices of bistable oscillators 4515
V. I. Nekorkin, V. B. Kazantsev, and M. G. Velarde

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 59, NUMBER 4 APRIL 1999

Analysis of natural gradient descent for multilayer neural networks 4523
Magnus Rattray and David Saad

Plasma physics

Elliptic representation of the Boltzmann equation with validity for all degrees of anisotropy 4533
Edward A. Richley
Thermal screening of Darwin interactions in a weakly relativistic plasma 4542
Walter Appel and Angel Alastuey
Nonlinear dynamics of an ordinary electromagnetic mode in a pair plasma 4552
G. Z. Machabeli, S. V. Vladimirov, and D. B. Melrose
Resonant coupling between surface and interface plasma waves in high-density sharp-edged plasmas produced by ultrafast laser pulses 4559
J. Kupersztych and M. Raynaud
Kinetic-energy distributions of positive and negative ions in Townsend discharges in oxygen 4565
M. V. V. S. Rao, R. J. Van Brunt, and J. K. Olthoff

Physics of beams

Transition free-electron laser (amplifier) driven by an electron bunch 4573
S. G. Oganesyan
Dynamic moment invariants for nonlinear Hamiltonian systems 4577
T. M. Janaki and Govindan Rangarajan
Measurement of colliding beam parameters with wide angle beamstrahlung 4584
G. Bonvicini, D. Cinabro, and E. Luckwald

Classical physics, including nonlinear media

Energy conservation law for randomly fluctuating electromagnetic fields 4594
Greg Gbur, Daniel James, and Emil Wolf
Fusion, collapse, and stationary bound states of incoherently coupled waves in bulk cubic media 4600
O. Bang, L. Bergé, and J. Juul Rasmussen
Quasielliptical motion of an electron in an electric dipole field 4614
Patrick L. Nash and Rafael Lopez-Mobilia
Stability of stationary gap solitary waves at periodically modulated surfaces 4618
J. Schöllmann, R. Scheibenzuber, A. S. Kovalev, A. P. Mayer, and A. A. Maradudin
Spatiotemporal evolution of focused single-cycle electromagnetic pulses 4630
Simin Feng, Herbert G. Winful, and Robert W. Hellwarth
Impact fracture of a three-dimensional cube with quenched disorder 4650
Jan Åström and Jussi Timonen
Collision-induced shape transformations of partially coherent solitons 4654
Wiesław Królikowski, Nail Akhmediev, and Barry Luther-Davies

Computational physics

Accuracy-control techniques applied to stable transfer-matrix computations 4659
A. Mayer and J.-P. Vigneron
Combinatorial optimization by iterative partial transcription 4667
A. Möbius, B. Freisleben, P. Merz, and M. Schreiber
Finite volume scheme for the lattice Boltzmann method on unstructured meshes 4675
Gongwen Peng, Haowen Xi, Comer Duncan, and So-Hsiang Chou

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 59, NUMBER 4 APRIL 1999

BRIEF REPORTS

General methods of statistical physics

Interacting monomer-dimer model with infinitely many absorbing states 4683
WonMuk Hwang and Hyunggyu Park

Chaos and nonlinear dynamical systems

Master-slave scheme and controlling chaos in the Braiman-Goldhirsch method 4687
Han-Tzong Su, Yaw-Hwang Chen, and Rue-Ron Hsu

Control perspective on synchronization and the Takens-Aeyels-Sauer reconstruction theorem 4691
Henri Huijberts, Torsten Lilge, and Henk Nijmeijer

Classical physics, including nonlinear media

Essential parameter in the formation of photonic band gaps 4695
Chul-Sik Kee, Jae-Eun Kim, Hae Yong Park, S. J. Kim, H. C. Song, Y. S. Kwon, N. H. Myung, S. Y. Shin, and H. Lim

ERRATA

Erratum: Partially polarized light-induced Fréedericksz transition in nematic liquid crystals [Phys. Rev. E **58**, 4605 (1998)] 4699
T. V. Galstyan, A. A. Yesayan, and V. Drnoyan

Erratum: Circular and helicoïdal standing-wave-induced Fréedericksz transition in nematic liquid crystals [Phys. Rev. E **58**, 4614 (1998)] 4699
E. Brasselet, T. V. Galstyan, and A. A. Yesayan

Cumulative Author Index 4700
