THIRD SERIES, VOLUME 59, NUMBER 5
PARTS A AND B

CONTENTS

MAY 1999

The Table of Contents is a total listing of Parts A and B.
Part A consists of pages R4709–5406, and Part B pages 5407–6218.

PART A

Note to Reader i

RAPID COMMUNICATIONS

General methods of statistical physics

Stabilizing coherent destruction of tunneling R4709
Jürgen T. Stockburger

Pattern formation and a clustering transition in power-law sequential adsorption R4713
Ofer Biham, Ofer Malcai, Daniel A. Lidar (Hamburger), and David Avnir

Length and time scale divergences at the magnetization-reversal transition in the Ising model R4717
R. B. Stinchcombe, A. Misra, and B. K. Chakrabarti

Survival-time distribution for inelastic collapse R4721
Michael R. Swift and Alan J. Bray

Boundary effects in reaction-diffusion processes R4725
M. J. E. Richardson and Y. Kafri

Rigorous forward-backward semiclassical formulation of many-body dynamics R4729
Keiran Thompson and Nancy Makri

Fragmentation of percolation clusters in general dimensions R4733
Mookyung Cheon, Muyoung Heo, Iksoo Chang, and Dietrich Stauffer

Tuning friction with noise and disorder R4737
Y. Braiman, H. G. E. Hentschel, F. Family, C. Mak, and J. Krim

Classical fluids

Phase separation in two-dimensional fluids: The role of noise R4741
G. Gonnella, E. Orlandini, and J. M. Yeomans

Effect of a random noise on scaling laws of finite Prandtl number rotating convection near threshold R4745
D. Laveder, T. Passot, Y. Ponty, and P. L. Sulem

Liquid crystals

Effect of director fluctuations on the surface tension of nematic liquid crystals R4749
F. N. Braun

Nonlinear theory of dislocations in smectic crystals: An exact solution R4752
Efim A. Brener and V. I. Marchenko

Copyright 1999 by The American Physical Society

(Continued)

1063-651X(199905)59:5:B;1-7

PHYSICAL REVIEW E THIRD SERIES, VOLUME 59, NUMBER 5 MAY 1999

Measurement of the surface-induced order in polymer dispersed liquid crystals: An approach by NMR relaxometry R4754
M. Vilfan, N. Vrbančič-Kopač, B. Zalar, S. Žumer, and G. P. Crawford

Complex fluids, polymers, and granular materials

Aggregation kinetics and stability of structures formed by magnetic microspheres R4758
Weijia Wen, F. Kun, K. F. Pál, D. W. Zheng, and K. N. Tu
Off-equilibrium dynamics of the frustrated Ising lattice gas R4762
Daniel A. Stariolo and Jeferson J. Arenzon

Plasma physics

Thermodynamics of photons in relativistic $e^+e^-\gamma$ plasmas R4766
M. V. Medvedev
High efficiency guiding of terawatt subpicosecond laser pulses in a capillary discharge plasma channel R4769
D. Kaganovich, A. Ting, C. I. Moore, A. Zigler, H. R. Burris, Y. Ehrlich, R. Hubbard, and P. Sprangle
Model of space- and energy-dependent electron flux density R4773
A. V. Vasenkov

Classical physics, including nonlinear media

Dark incoherent soliton splitting and ''phase-memory'' effects: Theory and experiment R4777
Tamer H. Coskun, Demetrios N. Christodoulides, Zhigang Chen, and Mordechai Segev

ARTICLES

General methods of statistical physics

Correct microcanonical ensemble in molecular dynamics 4781
John R. Ray and Hongwei Zhang
Effect of angular momentum conservation in the phase transitions of collapsing systems 4786
Victor Laliena
Random walkers in one-dimensional random environments: Exact renormalization group analysis 4795
Pierre Le Doussal, Cécile Monthus, and Daniel S. Fisher
Stochastic resonance in threshold systems 4841
M. M. Alibegov
Coefficient scaling 4847
Gerald Paul
Jamming transition in a two-dimensional traffic flow model 4857
Takashi Nagatani
Unified view of scaling laws for river networks 4865
Peter Sheridan Dodds and Daniel H. Rothman
Deterministic transport in ratchets 4878
Antonio Sarmiento and Hernán Larralde
Adding and multiplying random matrices: A generalization of Voiculescu's formulas 4884
P. Zinn-Justin
Variational principle for limit cycles of the Rayleigh–van der Pol equation 4889
R. D. Benguria and M. C. Depassier
Reversing the perturbation in nonequilibrium molecular dynamics: An easy way to calculate the shear viscosity of fluids 4894
Florian Müller-Plathe

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 59, NUMBER 5** **MAY 1999**

Exact stationary state for an asymmetric exclusion process with fully parallel dynamics 4899
Jan de Gier and Bernard Nienhuis
Transport in the *XX* chain at zero temperature: Emergence of flat magnetization profiles 4912
T. Antal, Z. Rácz, A. Rákos, and G. M. Schütz
Critical exponents for diluted resistor networks 4919
O. Stenull, H. K. Janssen, and K. Oerding
Generalized quantum Langevin equations from the forward-backward path integral 4931
Kazuhiro Tsusaka
Cluster-approximation mean-field theory of a class of cellular automaton models 4939
Bo-tao Zhang and Cheng-hong Liu
Stochastic multiplicative processes with reset events 4945
Susanna C. Manrubia and Damián H. Zanette
Dynamic behavior of driven interfaces in models with two absorbing states 4949
Sungchul Kwon, WonMuk Hwang, and Hyunggyu Park
Chord-distribution functions of three-dimensional random media: Approximate first-passage times of Gaussian processes 4953
A. P. Roberts and S. Torquato
Robustness of scale invariance in models with self-organized criticality 4964
Osame Kinouchi and Carmen P. C. Prado
Noise stabilization of self-organized memories 4970
M. L. Povinelli, S. N. Coppersmith, L. P. Kadanoff, S. R. Nagel, and S. C. Venkataramani
Superadditive correlation 4983
B. G. Giraud, John M. Heumann, and Alan S. Lapedes
Monte Carlo simulation of an antiferromagnetic Ising model at two competing temperatures 4992
B. C. S. Grandi and W. Figueiredo
Critical properties of the three-dimensional equivalent-neighbor model and crossover scaling in finite systems . . . 4997
Erik Luijten
Cyclostationarity and stochastic resonance in threshold devices 5009
Pierre-Olivier Amblard and Steeve Zozor
Trapping reactions for mobile particles and a trap in the laboratory frame 5021
A. D. Sánchez
Multidimensional advection and fractional dispersion 5026
Mark M. Meerschaert, David A. Benson, and Boris Bäumer
Temperature dependence of facet ridges in crystal surfaces 5029
Douglas Davidson and Marcel den Nijs
Wave front for a reaction-diffusion system and relativistic Hamilton-Jacobi dynamics 5040
Sergei Fedotov
Mechanical and Langevin thermostats: Gulton staircase problem 5045
Toyonori Munakata
Avalanches in breakdown and fracture processes 5049
Stefano Zapperi, Purusattam Ray, H. Eugene Stanley, and Alessandro Vespignani
Emergence of order in textured patterns 5058
Gemunu H. Gunaratne, Anuradha Ratnaweera, and K. Tennekone
Canonical phase-space approach to the noisy Burgers equation: Probability distributions 5065
Hans C. Fogedby
Critical adsorption on curved objects 5081
A. Hanke and S. Dietrich
Dynamic states of a continuum traffic equation with on-ramp 5101
H. Y. Lee, H.-W. Lee, and D. Kim

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 59, NUMBER 5** **MAY 1999**

Up and down cascade in a dynamo model: Spontaneous symmetry breaking 5112
E. M. Blanter, C. Narteau, M. G. Shnirman, and J.-L. Le Mouël
Analytical approach to time lag in binary nucleation 5124
P. Demo, Z. Kožíšek, and R. Šášik
Onsager-Casimir reciprocity relation for the gyrothermal effect with polyatomic gases 5128
Felix Sharipov
Kinetic roughening in electrodissolution of copper 5133
Atsushi Iwamoto, Tatsuo Yoshinobu, and Hiroshi Iwasaki
Quantum stochastic resonance in symmetric systems 5137
Igor Goychuk and Peter Hänggi
Stochastic resonance in extended bistable systems: The role of potential symmetry 5142
S. Bouzat and H. S. Wio
Self-organized growth model for a driven interface in random media 5150
Kwangho Park and In-Mook Kim
Steady-state cracks in viscoelastic lattice models 5154
David A. Kessler and Herbert Levine
Problems with the definition of renormalized Hamiltonians for momentum-space renormalization transformations 5165
Aernout C. D. van Enter and Roberto Fernández
Binary data corruption due to a Brownian agent 5172
T. J. Newman and Wannapong Triampo
Ising spin glass with arbitrary spin beyond the mean field theory 5187
K. Walasek, K. Lukierska-Walasek, and M. Wodawski
Spiral drift and core properties 5192
M. Wellner, A. M. Pertsov, and J. Jalife

Chaos and nonlinear dynamical systems

Universal level dynamics of complex systems 5205
Pragya Shukla
Dynamical delocalization in one-dimensional disordered systems with oscillatory perturbation 5214
Hiroaki Yamada and Kensuke S. Ikeda
Traces and determinants of strongly stochastic operators 5231
C. P. Dettmann
Surrogates for finding unstable periodic orbits in noisy data sets 5235
Kevin Dolan, Annette Witt, Mark L. Spano, Alexander Neiman, and Frank Moss
Double autoresonance in two-dimensional dynamical systems 5242
U. Rokni and L. Friedland
Preference of attractors in noisy multistable systems 5253
Suso Kraut, Ulrike Feudel, and Celso Grebogi
Universal behavior in the parametric evolution of chaotic saddles 5261
Ying-Cheng Lai, Karol Życzkowski, and Celso Grebogi
Stabilization of unstable steady states and periodic orbits in an electrochemical system using delayed-feedback control 5266
P. Parmananda, R. Madrigal, M. Rivera, L. Nyikos, I. Z. Kiss, and V. Gáspár
Phase space localization and matrix element distributions in systems with mixed classical phase space 5272
Bernhard Mehlig, Kirsten Müller, and Bruno Eckhardt
Trapped to free: A mechanism to spatiotemporal chaos 5278
Kaifen He
Multiphase patterns in periodically forced oscillatory systems 5285
Christian Elphick, Aric Hagberg, and Ehud Meron

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 59, NUMBER 5 MAY 1999

Calculation of relaxation rates from microscopic equations of motion 5292
Roger Haydock, C. M. M. Nex, and B. D. Simons
Synchronizing chaos in an experimental chaotic pendulum using methods from linear control theory 5303
Sander Kaart, Jaap C. Schouten, and Cor M. van den Bleek
Controlling chaos in low- and high-dimensional systems with periodic parametric perturbations 5313
K. A. Mirus and J. C. Sprott
Scar and antiscar quantum effects in open chaotic systems 5325
L. Kaplan
Simple approach to the creation of a strange nonchaotic attractor in any chaotic system 5338
J. W. Shuai and K. W. Wong
Analytical approach for the Floquet theory of delay differential equations 5344
C. Simmendinger, A. Wunderlin, and A. Pelster
Information operations with an excitable field 5354
Ikuko Motoike and Kenichi Yoshikawa
Simple deterministic dynamical systems with fractal diffusion coefficients 5361
R. Klages and J. R. Dorfman
Quantum-classical correspondence in localization of eigenstates for a system having mixed-type classical dynamics 5384
Sang Wook Kim and Hai-Woong Lee
Efficient strategy for the occasionally proportional feedback method in controlling chaos 5393
Tsung-Hsun Yang, Shyh-Feng Chen, and Yih-Shun Gou
Numerical statistics of power dropouts based on the Lang-Kobayashi model 5400
Josep Mulet and Claudio R. Mirasso

PART B

Note to Reader i

Classical fluids

Marangoni convection on an inhomogeneous substrate 5407
Kausik S. Das and Jayanta K. Bhattacharjee
Dispersion of passive particles by a quasi-two-dimensional turbulent flow 5412
I. M. Sokolov and R. Reigada
Nature of the energy transfer process in compressible turbulence 5417
F. Bataille and Ye Zhou
Time-dependent geometry and energy distribution in a spiral vortex layer 5427
J. R. Angilella and J. C. Vassilicos
Frozen wave induced by high frequency horizontal vibrations on a CO_2 liquid-gas interface near the critical point 5440
R. Wunenburger, P. Evesque, C. Chabot, Y. Garrabos, S. Fauve, and D. Beysens
Parametrically excited surface waves: Two-frequency forcing, normal form symmetries, and pattern selection 5446
Mary Silber and Anne C. Skeldon
Velocity structure functions, scaling, and transitions in high-Reynolds-number Couette-Taylor flow 5457
Gregory S. Lewis and Harry L. Swinney
Chemical or biological activity in open chaotic flows 5468
György Károlyi, Áron Péntek, Zoltán Toroczkai, Tamás Tél, and Celso Grebogi
Variational principle for the Navier-Stokes equations 5482
R. R. Kerswell
Experimental observations of bubble response and light intensity near the threshold for single bubble sonoluminescence in an air-water system 5495
D. Felipe Gaitan and R. Glynn Holt

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 59, NUMBER 5 MAY 1999

Hydrodynamic fluctuations in the Kolmogorov flow: Linear regime 5503
I. Bena, M. Malek Mansour, and F. Baras
Testing a random phase approximation for bounded turbulent flow 5511
Mark Ulitsky, Tim Clark, and Leaf Turner

Liquid crystals

Photopolarimetric characterization of the transition between two turbulent states in a nematic liquid crystal film 5523
G. Strangi, C. Versace, N. Scaramuzza, D. E. Lucchetta, V. Carbone, and R. Bartolino
Systematic approach to bicontinuous cubic phases in ternary amphiphilic systems 5528
U. S. Schwarz and G. Gompper
Experimental test of the Warren-Langer model in nematic-isotropic planar interfaces 5542
O. A. Gomes, N. B. Viana, J. M. A. Figueiredo, and O. N. Mesquita
Influence of substrate microrelief on the Fréedericksz transition in a thin nematic cell 5549
L. V. Mirantsev
Quasicritical behavior of dielectric permittivity in the isotropic phase of *n*-hexyl-cyanobiphenyl in a large range of temperatures and pressures 5556
Aleksandra Drozd-Rzoska
Looped finger transformation in frustrated cholesteric liquid crystals 5562
J. Baudry, S. Pirkl, and P. Oswald
Dielectric and high-pressure investigations on a thermotropic cubic mesophase 5572
D. S. Shankar Rao, S. Krishna Prasad, Veena Prasad, and Sandeep Kumar

Complex fluids, polymers, and granular materials

Neutron reflectivity studies of critical adsorption: The correspondence between a critical adsorption profile and specular neutron reflection 5577
Jonathan R. Howse, James Bowers, Emilio Manzanares-Papayanopoulos, Ian A. McLure, and Roland Steitz
Kinetic approach to granular gases 5582
A. Puglisi, V. Loreto, U. Marini Bettolo Marconi, and A. Vulpiani
Reconstruction of random media using Monte Carlo methods 5596
C. Manwart and R. Hilfer
Fractal growth of epitaxial surface clusters with elastic interaction 5600
J. Steinbrecher, H. Müller-Krumbhaar, E. Brener, C. Misbah, and P. Peyla
Vesicles in solutions of hard rods 5606
B. Groh
Why all crystals need not be bcc: Symmetry breaking at the liquid-solid transition revisited 5613
B. Groh and B. Mulder
Polymer shape anisotropy and the depletion interaction 5621
Mario Triantafillou and Randall D. Kamien
Depolarized light scattering spectroscopy of $Ca_{0.4}K_{0.6}(NO_3)_{1.4}$: A reexamination of the ''knee'' 5625
H. C. Barshilia, G. Li, G. Q. Shen, and H. Z. Cummins
Steps, kinetic anisotropy, and long-wavelength instabilities in directional solidification 5629
H. P. Grimm, S. H. Davis, and G. B. McFadden
Geometrical model for a particle on a rough inclined surface 5641
Giovani L. Vasconcelos and J. J. P. Veerman

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 59, NUMBER 5** **MAY 1999**

Effects of polymer chains on structure and dynamics of supercooled water in poly(vinyl alcohol) 5647
Yoshinori Tamai and Hideki Tanaka
Universal surface scaling function for critical adsorption 5655
J. H. Carpenter, B. M. Law, and D. S. P. Smith
Tubular phase of self-avoiding anisotropic crystalline membranes 5659
Mark Bowick and Alex Travesset
Magnetic-field-induced optical transmittance in colloidal suspensions 5676
James E. Martin, Kimberly M. Hill, and Chris P. Tigges
Molecular weight distribution and the electrorheological response for anisotropic solutions of poly(γ-benzyl-L-glutamate) induced by the convection of the electrohydrodynamic instability 5693
Katsufumi Tanaka, Akio Takahashi, Ryuichi Akiyama, and Noriyuki Kuramoto
Wetting at nonplanar substrates: Unbending and unbinding 5697
C. Rascón, A. O. Parry, and A. Sartori
Analytic model for the ballistic adsorption of polydisperse mixtures 5701
Romualdo Pastor-Satorras
Nonergodicity transitions in colloidal suspensions with attractive interactions 5706
J. Bergenholtz and M. Fuchs
Heap corrugation and hexagon formation of powder under vertical vibrations 5716
Éric Falcon, Krishna Kumar, Kapil M. S. Bajaj, and Jayanta K. Bhattacharjee
Stability and structure of a supercooled liquid mixture in two dimensions 5721
Donna N. Perera and Peter Harrowell
Phase diagram of highly asymmetric binary hard-sphere mixtures 5744
Marjolein Dijkstra, René van Roij, and Robert Evans
Photoacoustic generation for a spherical absorber with impedance mismatch with the surrounding media 5772
J. M. Sun and Bernard S. Gerstman
Off-lattice model for the phase behavior of lipid-cholesterol bilayers 5790
Morten Nielsen, Ling Miao, John H. Ipsen, Martin J. Zuckermann, and Ole G. Mouritsen
Late stage kinetics of a phase separation induced by a cw laser wave in binary liquid mixtures 5804
J. P. Delville, C. Lalaude, S. Buil, and A. Ducasse
Hysteresis and avalanches in two-dimensional foam rheology simulations 5819
Yi Jiang, Pieter J. Swart, Avadh Saxena, Marius Asipauskas, and James A. Glazier
Free energy of a long, flexible, self-avoiding polymer chain in a tube 5833
Theodore W. Burkhardt and Ihnsouk Guim
Scaling properties of maximally compact chains 5839
K. W. Foreman
Surface fractals probed by adsorbate spin-lattice relaxation dispersion 5848
Tatiana Zavada and Rainer Kimmich
Propagating front in an excited granular layer 5855
W. Losert, D. G. W. Cooper, and J. P. Gollub
Electrostriction of a near-critical fluid in microgravity 5862
G. A. Zimmerli, R. A. Wilkinson, R. A. Ferrell, and M. R. Moldover
Properties of layer-by-layer vector stochastic models of force fluctuations in granular materials 5870
M. L. Nguyen and S. N. Coppersmith
Frictional mechanics of wet granular material 5881
Jean-Christophe Géminard, Wolfgang Losert, and Jerry P. Gollub
Anisotropic scattering profiles of charged gels in a deformed state 5891
Y. Shiwa and M. Shibayama

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 59, NUMBER 5** **MAY 1999**

Dense fluid transport for inelastic hard spheres 5895
V. Garzó and J. W. Dufty
Asymptotic solution for solitary waves in a chain of elastic spheres 5912
Anindya Chatterjee

Biological physics

Noise and periodic modulations in neural excitable media 5920
J. M. G. Vilar, R. V. Solé, and J. M. Rubí
Folding a protein by discretizing its backbone torsional dynamics 5928
Ariel Fernández
Global stability analysis in delayed cellular neural networks 5940
Jinde Cao
^{13}C-^{13}C rotational resonance in a transmembrane peptide: A comparison of the fluid and gel phases 5945
Denis B. Langlais, Robert S. Hodges, and James H. Davis
Charge optimization leads to favorable electrostatic binding free energy 5958
Erik Kangas and Bruce Tidor
Comparison between the role of discontinuities in cardiac conduction and in a one-dimensional hardware model 5962
M. deCastro, E. Hofer, A. P. Muñuzuri, M. Gómez-Gesteira, G. Plank, I. Schafferhofer, V. Pérez-Muñuzuri, and V. Pérez-Villar
Fractal ion-channel behavior generates fractal firing patterns in neuronal models 5970
Steven B. Lowen, Larry S. Liebovitch, and John A. White
Unfolded *in vacuo* lysozyme folds into native, quasinative, and compact structures 5981
Gustavo A. Arteca, I. Velázquez, C. T. Reimann, and O. Tapia
Collective membrane motions in the mesoscopic range and their modulation by the binding of a monomolecular protein layer of streptavidin studied by dynamic light scattering 5987
Rainer Hirn, Roland Benz, and Thomas M. Bayerl
Simplified calculation of folding energies and residue coordination numbers in random heteropolymers 5995
A. E. Carlsson
Large-scale optimization of neuron arbors 6001
Christopher Cherniak, Mark Changizi, and Du Won Kang

Plasma physics

Electronic transmission properties in a mesoscopic necklace with inhomogeneous magnetic flux 6010
Zhiwen Pan, Chang-De Gong, Mak Hon Lung, and Haiqing Lin
Dynamical properties of random charge fluctuations in a dusty plasma with different charging mechanisms 6017
S. A. Khrapak, A. P. Nefedov, O. F. Petrov, and O. S. Vaulina
Effects of entropy inhomogeneity on density-temperature correlation in solar wind 6023
Francesco Malara, Leonardo Primavera, and Pierluigi Veltri
Magnetic focusing and trapping of high-intensity laser-generated fast electrons at the rear of solid targets 6032
J. R. Davies, A. R. Bell, and M. Tatarakis
Generation of ultrashort electron bunches by colliding laser pulses 6037
C. B. Schroeder, P. B. Lee, J. S. Wurtele, E. Esarey, and W. P. Leemans
Relativistic pondermotive Hamiltonian for electrons in an intense laser field 6048
X. Li
Hot, dense, millimeter-scale, high-*Z* plasmas for laser-plasma interactions studies 6053
B. H. Failor, J. C. Fernandez, B. H. Wilde, A. L. Osterheld, J. A. Cobble, and P. L. Gobby

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 59, NUMBER 5 MAY 1999

Physics of beams

High-power electrostatic free-electron maser as a future source for fusion plasma heating: Experiments in the short-pulse regime 6058
W. H. Urbanus, W. A. Bongers, C. A. J. van der Geer, P. Manintveld, J. Plomp, J. Pluygers, A. J. Poelman, P. H. M. Smeets, A. G. A. Verhoeven, V. L. Bratman, G. G. Denisov, A. V. Savilov, M. Yu. Shmelyov, M. Caplan, A. A. Varfolomeev, S. V. Tolmachev, and S. N. Ivanchenkov

Classical physics, including nonlinear media

Theory of modulational instability in Bragg gratings with quadratic nonlinearity 6064
H. He, Awdah Arraf, C. Martijn de Sterke, P. D. Drummond, and Boris A. Malomed
Partially coherent solitons of variable shape in a slow Kerr-like medium: Exact solutions 6079
Adrian Ankiewicz, Wiesław Królikowski, and Nail N. Akhmediev
Hamiltonian-versus-energy diagrams in soliton theory 6088
Nail Akhmediev, Adrian Ankiewicz, and Roger Grimshaw
Resonant optical tunnel effect through dielectric structures of subwavelength cross sections 6097
Christian Girard, Alain Dereux, and Christian Joachim
Moving lattice kinks and pulses: An inverse method 6105
S. Flach, Y. Zolotaryuk, and K. Kladko
Simulation of the temporal behavior of soliton propagation in photorefractive media 6116
J. Maufoy, N. Fressengeas, D. Wolfersberger, and G. Kugel
Three-wave interaction solitons in optical parametric amplification 6122
E. Ibragimov, A. A. Struthers, D. J. Kaup, J. D. Khaydarov, and K. D. Singer

Computational physics

Bayesian inference analysis of ellipsometry data 6138
N. P. Barradas, J. L. Keddie, and R. Sackin
Rosenbluth chain cluster growth in the study of micelle self-assembly 6152
T. Dalby and C. M. Care
Higher-order probabilistic perceptrons as Bayesian inference engines 6161
J. W. Clark, K. A. Gernoth, S. Dittmar, and M. L. Ristig

BRIEF REPORTS

General methods of statistical physics

Avalanche and spreading exponents in systems with absorbing states 6175
Miguel A. Muñoz, Ronald Dickman, Alessandro Vespignani, and Stefano Zapperi
Generalized Landauer equation: Absorption-controlled diffusion processes 6180
Salvador Godoy, L. S. García-Colín, and Victor Micenmacher
Numerical test of the damping time of layer-by-layer growth on stochastic models 6184
S. Park, H. Jeong, and B. Kahng

Liquid crystals

Temperature difference between bulk and surface transition in freely suspended smectic films 6188
D. Schlauf, Ch. Bahr, M. Glogarová, M. Kašpar, and V. Hamplová

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 59, NUMBER 5 MAY 1999

Biological physics

Theory for the bending anisotropy of lipid membranes and tubule formation 6192
C.-M. Chen

Plasma physics

Electron magnetohydrodynamic approximations and the magnetic drift wave 6196
H. Saleem
Influence of ion temperature on Lyman-α intensity ratios 6198
J. M. A. Ashbourn

Computational physics

Finite-volume lattice Boltzmann method 6202
Haowen Xi, Gongwen Peng, and So-Hsiang Chou

ERRATA

Erratum: Computer simulation study of the structure of the liquid-vapor interface of mercury at 20, 100, and 200 °C [Phys. Rev. E **59**, 479 (1999)] 6206
Dmitriy S. Chekmarev, Meishan Zhao, and Stuart A. Rice

Cumulative Author Index 6207
