THIRD SERIES, VOLUME 59, NUMBER 6 ***CONTENTS*** **JUNE 1999**

RAPID COMMUNICATIONS

General methods of statistical physics

Efficiency of Brownian heat engines R6219
Imre Derényi and R. Dean Astumian

Spatial multistability and nonvariational effects R6223
M. Bachir, P. Borckmans, and G. Dewel

Universal asymptotic eigenvalue distribution of density matrices and corner transfer matrices in the thermodynamic limit R6227
Kouichi Okunishi, Yasuhiro Hieida, and Yasuhiro Akutsu

Scale invariance and intermittency in a creep-slip model of earthquake faults R6231
Peter Hähner and Yannis Drossinos

Effect of correlation between additive and multiplicative noises on the activation from a double well R6235
Hai-xiang Fu, Li Cao, and Da-jin Wu

Resistance of Feynman diagrams and the percolation backbone dimension R6239
H. K. Janssen, O. Stenull, and K. Oerding

Chaos and nonlinear dynamical systems

Robustness of supersensitivity to small signals in nonlinear dynamical systems R6243
Changsong Zhou and C.-H. Lai

Observability of lag synchronization of coupled chaotic oscillators R6247
Saeed Taherion and Ying-Cheng Lai

Classical fluids

Three-dimensional organization of electrical turbulence in the heart R6251
A. V. Panfilov

Complex fluids, polymers, and granular materials

Spontaneous patterning of quantum dots at the air-water interface R6255
Richard P. Sear, Sung-Wook Chung, Gil Markovich, William M. Gelbart, and James R. Heath

Stress in conic piles determined by a centrifuge experiment: Breakdown of scaling hypothesis R6259
P. Evesque, S. Noblet, and G. Rault

Fast coarsening in unstable epitaxy with desorption R6263
P. Šmilauer, M. Rost, and J. Krug

ARTICLES

General methods of statistical physics

Control-parameter-dependent Swift-Hohenberg equation as a model for bioconvection patterns 6267
J. Lega and N. H. Mendelson
Effects of quenched disorder in the two-dimensional Potts model: A Monte Carlo study 6275
Ricardo Paredes V. and Johnny Valbuena
Some consequences of exchangeability in random-matrix theory 6281
G. Le Caër and R. Delannay
Spin of Dirac's relativistic membrane 6286
E. Stedile
Surface restructuring, kinetic oscillations, and chaos in heterogeneous catalytic reactions 6292
V. P. Zhdanov
Nature of transitions in augmented discrete nonlinear Schrödinger equations 6306
R. E. Amritkar and V. M. Kenkre
Equation of states for classical Coulomb systems: Use of the Hubbard-Schofield approach 6312
J. Ortner
Macroscopic dynamics of multilane traffic 6328
Vladimir Shvetsov and Dirk Helbing
Dynamical regimes in the dissipative particle dynamics model 6340
Pep Español and Mar Serrano
Solution of lattice gas models in the generalized ensemble on the Bethe lattice 6348
Emilia La Nave, Srikanth Sastry, Francesco Sciortino, and Piero Tartaglia
Exactly solvable sandpile with fractal avalanching 6356
P. Helander, S. C. Chapman, R. O. Dendy, G. Rowlands, and N. W. Watkins
Theory of the NO+CO surface-reaction model 6361
Adriana G. Dickman, Bartira C. S. Grandi, Wagner Figueiredo, and Ronald Dickman
Entropy of classical histories 6370
Todd A. Brun and James B. Hartle
Nonequilibrium critical behavior in unidirectionally coupled stochastic processes 6381
Yadin Y. Goldschmidt, Haye Hinrichsen, Martin Howard, and Uwe C. Täuber
Precursor phenomena in frustrated systems 6409
Giancarlo Franzese and Antonio Coniglio
Residence time distribution for a class of Gaussian Markov processes 6413
Abhishek Dhar and Satya N. Majumdar
Emergence of cooperation among interacting individuals 6419
J. R. N. Chiappin and M. J. de Oliveira
Intrawell relaxation of overdamped Brownian particles 6422
Martin Bier, Imre Derényi, Marcin Kostur, and R. Dean Astumian
Non-Hermitian localization and delocalization 6433
Joshua Feinberg and A. Zee
Semianalytic solution of the Kramers exit problem for a small ferromagnetic particle 6444
I. Klik and Y. D. Yao
Feynman's ratchet and pawl: An exactly solvable model 6448
C. Jarzynski and O. Mazonka
Scale invariant dynamics of surface growth 6460
C. Castellano, M. Marsili, M. A. Muñoz, and L. Pietronero
Large deviation function of the partially asymmetric exclusion process 6476
Deok-Sun Lee and Doochul Kim

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 59, NUMBER 6** **JUNE 1999**

Nucleation theorems applied to the Ising model 6483
Hanna Vehkamäki and Ian J. Ford
Exact phase diagrams for an Ising model on a two-layer Bethe lattice 6489
Chin-Kun Hu, N. Sh. Izmailian, and K. B. Oganesyan
Slow algebraic relaxation in quartic potentials and related results 6497
Robert S. Sinkovits, Surajit Sen, James Christopher Phillips, and Soumya Chakravarti
Critical behavior of a random diode network 6513
N. Inui, H. Kakuno, A. Yu. Tretyakov, G. Komatsu, and K. Kameoka
Persistent random walk model for transport through thin slabs 6517
Marián Boguñá, Josep M. Porrà, and Jaume Masoliver
Signal and background separation 6527
W. von der Linden, V. Dose, J. Padayachee, and V. Prozesky
Nonlinear Langevin equations and the time dependent density functional method 6535
Akira Yoshimori

Chaos and nonlinear dynamical systems

Spectral correlations in systems undergoing a transition from periodicity to disorder 6541
T. Dittrich, B. Mehlig, H. Schanz, Uzy Smilansky, Péter Pollner, and Gábor Vattay
Relationships among coefficients in deterministic and stochastic transient diffusion 6552
Z. Kaufmann
Bifurcations and chaos in a parametrically damped two-well Duffing oscillator subjected to symmetric periodic pulses 6558
R. Chacón and A. Martínez García-Hoz
Wavelet-based fractal analysis of airborne pollen 6569
M. E. Degaudenzi and C. M. Arizmendi
Controlling and synchronizing space time chaos 6574
S. Boccaletti, J. Bragard, and F. T. Arecchi
Influence of phase-space localization on the energy diffusion in a quantum chaotic billiard 6579
D. A. Wisniacki and E. Vergini
Bicritical behavior of period doublings in unidirectionally coupled maps 6585
Sang-Yoon Kim
Recovering smooth dynamics from time series with the aid of recurrence plots 6593
Fatihcan M. Atay and Yiğit Altıntaş
Magnetic effect for electrochemically driven cellular convection 6599
Seiichiro Nakabayashi, Kiyoshi Inokuma, and Antonis Karantonis
Measuring scars of periodic orbits 6609
L. Kaplan and E. J. Heller
Decoding information by following parameter modulation with parameter adaptive control 6629
Changsong Zhou and C.-H. Lai
Theory of circle maps and the problem of one-dimensional optical resonator with a periodically moving wall 6637
Rafael de la Llave and Nikola P. Petrov
Streaminglike diffusion in the low-dimensional stochastic pump model 6652
G. Corso and A. J. Lichtenberg
Bi-instability as a precursor to global mixed-mode chaos 6658
Ira B. Schwartz and Thomas W. Carr

Classical fluids

Investigating one-dimensional diffusion by quasielastic neutron scattering: A theoretical approach 6662
K. Hahn, H. Jobic, and J. Kärger

PHYSICAL REVIEW E THIRD SERIES, VOLUME 59, NUMBER 6 JUNE 1999

Combined action of different mechanisms of convective instability in multilayer systems 6672
Alexander A. Nepomnyashchy and Ilya B. Simanovskii
Determination of the quench velocity and rewetting temperature of hot surfaces: Formulation of a nonisothermal microscale hydrodynamic model 6687
M. Ben David, Y. Zvirin, and Y. Zimmels
Spreading dynamics of terraced droplets 6699
Santiago Betelú, Bruce M. Law, and C. C. Huang
Model for single-particle dynamics in supercooled water 6708
S. H. Chen, C. Liao, F. Sciortino, P. Gallo, and P. Tartaglia
Analysis of energy cascade models of turbulence 6715
R. Badii and P. Talkner
Magnetic helicity tensor for an anisotropic turbulence 6724
N. Kleeorin and I. Rogachevskii
Onset of oscillatory binary fluid convection in finite containers 6730
Oriol Batiste, Isabel Mercader, Marta Net, and Edgar Knobloch
Droplet formation by rapid expansion of a liquid 6742
Wm. T. Ashurst and Brad Lee Holian
Correlation functions in isotropic and anisotropic turbulence: The role of the symmetry group 6753
Itai Arad, Victor S. L'vov, and Itamar Procaccia
Effective Hamiltonian for liquid-vapor interfaces 6766
K. R. Mecke and S. Dietrich

Liquid crystals

Symmetries and induced effects in bilayer and multilayer antiferroelectric and ferrielectric liquid crystal phases 6785
P. Tolédano, A. M. Figueiredo Neto, A. A. Boulbitch, and A. Roy
Photon transmission technique for studying multiple phase transitions in a liquid crystal 6798
Haluk Özbek, Sevtap Yıldız, and Önder Pekcan
Rotational viscosity in a nematic liquid crystal: A theoretical treatment and molecular dynamics simulation 6802
A. V. Zakharov, A. V. Komolkin, and A. Maliniak
Organization of cyanobiphenyl liquid crystal molecules in prewetting films spreading on silicon wafers 6808
S. Bardon, R. Ober, M. P. Valignat, F. Vandenbrouck, A. M. Cazabat, and J. Daillant

Complex fluids, polymers, and granular materials

Trapping and mobilization of residual fluid during capillary desaturation in porous media 6819
Lucian Anton and R. Hilfer
Freezing and glass transition of hard spheres in cavities 6824
Z. T. Németh and H. Löwen
Density fluctuations in a model for vibrated granular media 6830
Mario Nicodemi, Antonio Coniglio, and Hans J. Herrmann
Low-temperature interface between the gas and solid phases of hard spheres with a short-ranged attraction 6838
Richard P. Sear
Viscoelastic model of phase separation in colloidal suspensions and emulsions 6842
Hajime Tanaka
Polymer depletion effects near mesoscopic particles 6853
A. Hanke, E. Eisenriegler, and S. Dietrich
Kinetic model for a step edge in epitaxial growth 6879
Russel E. Caflisch, Weinan E, Mark F. Gyure, Barry Merriman, and Christian Ratsch

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 59, NUMBER 6** **JUNE 1999**

Dielectric investigation of the temperature dependence of the nonexponentiality of the dynamics of polymer melts 6888
A. Alegría, J. Colmenero, P. O. Mari, and I. A. Campbell
Evolution of avalanche conducting states in electrorheological liquids 6896
A. Bezryadin, R. M. Westervelt, and M. Tinkham
Crystallization by settling in suspensions of hard spheres 6903
Bruce J. Ackerson, S. E. Paulin, Benjamin Johnson, William van Megen, and Sylvia Underwood
Multifractality of Brownian motion near absorbing polymers 6914
C. von Ferber and Yu. Holovatch
Broadband dielectric spectroscopy on glass-forming propylene carbonate 6924
U. Schneider, P. Lunkenheimer, R. Brand, and A. Loidl
Thermodynamic perturbation theory for polydisperse colloidal suspensions using orthogonal polynomial expansions 6937
Sabine Leroch, Gerhard Kahl, and Fred Lado
Impurity mediated nucleation in hexadecane-in-water emulsions 6946
Amy B. Herhold, Deniz Ertaş, Alex J. Levine, and H. E. King, Jr.
Bethe lattice representation for sandpiles 6956
Oscar Sotolongo-Costa, Alexei Vazquez, and J. C. Antoranz
Characteristics of slow and fast ion dynamics in a lithium metasilicate glass 6962
Junko Habasaki and Yasuaki Hiwatari
Hydrodynamics of resonance oscillations of columns of inelastic particles 6967
A. Goldshtein, A. Alexeev, and M. Shapiro

Biological physics

Theory of ocular dominance pattern formation 6977
O. Scherf, K. Pawelzik, F. Wolf, and T. Geisel
Simple central pattern generator model using phasic analog neurons 6994
David R. McMillen, Gabriele M. T. D'Eleuterio, and Janet R. P. Halperin
Genetic correlations in mutation processes 7000
E. Ben-Naim and A. S. Lapedes
Markov analysis of stochastic resonance in a periodically driven integrate-and-fire neuron 7008
Hans E. Plesser and Theo Geisel
Absence of a vestigial vapor pressure paradox 7018
John F. Nagle and John Katsaras
Lubricating bacteria model for branching growth of bacterial colonies 7025
Yonathan Kozlovsky, Inon Cohen, Ido Golding, and Eshel Ben-Jacob
Modeling of spatiotemporal patterns in bacterial colonies 7036
A. M. Lacasta, I. R. Cantalapiedra, C. E. Auguet, A. Peñaranda, and L. Ramírez-Piscina

Plasma physics

Self-focusing, channel formation, and high-energy ion generation in interaction of an intense short laser pulse with a He jet 7042
G. S. Sarkisov, V. Yu. Bychenkov, V. N. Novikov, V. T. Tikhonchuk, A. Maksimchuk, S.-Y. Chen, R. Wagner, G. Mourou, and D. Umstadter
Theory of dust voids in plasmas 7055
J. Goree, G. E. Morfill, V. N. Tsytovich, and S. V. Vladimirov
Time correlation of momentum in a collisionless plasma due to large fluctuations 7068
Chushun Tian and Quankang Lu
Discharge impedance of solenoidal inductively coupled plasma discharge 7074
K.-I. You and N. S. Yoon

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 59, NUMBER 6 JUNE 1999

Subpicosecond pulse laser absorption by an overdense plasma with variable ionization 7085
Alexei Zhidkov and Akira Sasaki
Superconfiguration accounting approach versus average-atom model in local-thermodynamic-equilibrium highly ionized plasmas 7096
G. Faussurier
Formation of plasma channels in the interaction of a nanosecond laser pulse at moderate intensities with helium gas jets 7110
E. De Wispelaere, V. Malka, S. Hüller, F. Amiranoff, S. Baton, R. Bonadio, M. Casanova, F. Dorchies, R. Haroutunian, and A. Modena
Confinement physics for thermal, neutral, high-charge-state plasmas in nested-well solenoidal traps 7121
D. D. Dolliver and C. A. Ordonez

Physics of beams

Spatial coherence of bending magnet radiation and application limit of the van Cittert–Zernike theorem 7128
Y. Takayama and S. Kamada

Classical physics, including nonlinear media

Conservation law for multimoded nonlinear optical waveguide interactions and its physical interpretation 7141
David R. Rowland
Optical gap solitons in nonresonant quadratic media 7148
Takeshi Iizuka and Yuri S. Kivshar
Geometrical and wave optics of paraxial beams 7152
M. Meron, P. J. Viccaro, and B. Lin
Delay-time statistics for diffuse waves 7166
B. A. van Tiggelen, P. Sebbah, M. Stoytchev, and A. Z. Genack
Exact solitary-wave solutions of $\chi^{(2)}$ Ginzburg-Landau equations 7173
Lucian-Cornel Crasovan, Boris Malomed, Dumitru Mihalache, and Falk Lederer
Time-dependent equation for the intensity in the diffusion limit using a higher-order angular expansion 7178
Meir Gershenson

Computational physics

Structural and flow properties of binary media generated by fractional Brownian motion models 7185
E. S. Kikkinides and V. N. Burganos
Lagrange meshes from nonclassical orthogonal polynomials 7195
D. Baye and M. Vincke
Framework for testing random numbers in parallel calculations 7200
I. Vattulainen
Voronoi-Delaunay analysis of voids in systems of nonspherical particles 7205
V. A. Luchnikov, N. N. Medvedev, L. Oger, and J.-P. Troadec

BRIEF REPORTS

General methods of statistical physics

Simple equation for earthquake distribution 7213
L. Anton
Some properties of multifractality at solid-on-solid growth processes 7216
A. Bershadskii

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 59, NUMBER 6 JUNE 1999

Unified algebraic Bethe ansatz for two-dimensional lattice models 7220
M. J. Martins
Effect of symmetry on volume conserving surface models 7224
Youngkyun Jung and In-mook Kim

Chaos and nonlinear dynamical systems

Test of semiclassical amplitudes for quantum ray-splitting systems 7228
A. Kohler and R. Blümel
Anomalous transport and quantum-classical correspondence 7231
Bala Sundaram and G. M. Zaslavsky

Classical fluids

Peak position of dissipation spectrum in turbulent boundary layers 7235
Yoshiyuki Tsuji

Complex fluids, polymers, and granular materials

Percolation-enhanced nonlinear scattering from metal-dielectric composites 7239
Andrey K. Sarychev, V. A. Shubin, and Vladimir M. Shalaev
Solidity of viscous liquids. II. Anisotropic flow events 7243
Jeppe C. Dyre

Biological physics

Output of a neuronal population code 7246
Jianfeng Feng and Rita Cassia-Moura

Classical physics, including nonlinear media

Generation of soliton oscillations in nonlinear quadratic materials 7250
D. E. Pelinovsky, J. E. Sipe, and J. Yang

ERRATA

Erratum: Nature of crossover from classical to Ising-like critical behavior [Phys. Rev. E **58**, R4060 (1998)] 7254
Erik Luijten and Kurt Binder

Cumulative Author Index 7255

CORRECTION

The March (Part B) Table of Contents contained an error. In the print version, the section heading ″Plasma Physics″ was omitted and an incorrect page number appeared for the first article in the section. The online Table of Contents does not contain the error. The corrected page follows:

PHYSICAL REVIEW E THIRD SERIES, VOLUME 59, NUMBER 3 MARCH 1999

Plasma physics

Accuracy of simplified methods for ion dynamics in Stark profile calculations 3499
S. Alexiou, P. Sauvan, A. Poquérusse, E. Leboucher-Dalimier, and R. W. Lee
Parametric coupling of a light wave and surface plasma waves 3503
Hee J. Lee and Sang-Hoon Cho
Effect of configuration interaction on shift widths and intensity redistribution of transition arrays 3512
A. Bar-Shalom, J. Oreg, M. Klapisch, and T. Lehecka
uv continuum emission and diagnostics of hydrogen-containing nonequilibrium plasmas 3526
Boris P. Lavrov, Alexei S. Melnikov, Marko Käning, and Jürgen Röpcke
Electron densities, temperatures, and the dielectric function of femtosecond-laser-produced plasmas 3544
W. Theobald, R. Häßner, R. Kingham, R. Sauerbrey, R. Fehr, D. O. Gericke, M. Schlanges, W.-D. Kraeft, and K. Ishikawa
Green's-function calculation of electron screening in a plasma 3554
M. J. Watrous, L. Wilets, and J. J. Rehr
Polarization measurements of the Al XII resonance line emitted from micropinch plasmas of a vacuum spark discharge 3562
F. Walden, H.-J. Kunze, A. Petoyan, A. Urnov, and J. Dubau
Numerical modeling of the constriction of the dc positive column in rare gases 3571
G. M. Petrov and C. M. Ferreira
Model for transmission of ultrastrong laser pulses through thin foil targets 3583
Wei Yu, Z. M. Sheng, M. Y. Yu, J. Zhang, Z. M. Jiang, and Z. Xu

Physics of beams

Tunable fluid-loaded free-electron laser in the low-electron-energy and long-wavelength extreme 3588
R. Drori and E. Jerby
Three-dimensional laser cooling method based on resonant linear coupling 3594
T. Kihara, H. Okamoto, Y. Iwashita, K. Oide, G. Lamanna, and J. Wei
Transverse beam stability with an ''electron lens'' 3605
A. Burov, V. Danilov, and V. Shiltsev
Propagation of finite length laser pulses in plasma channels 3614
P. Sprangle, B. Hafizi, and P. Serafim

Classical physics, including nonlinear media

Density of states for a dielectric superlattice: TE polarization 3624
I. Alvarado-Rodríguez, P. Halevi, and J. J. Sánchez-Mondragón
Transition from diffusing to dynamic light scattering in solutions of monodisperse polystyrene spheres 3631
Matthew F. Clapper, Joseph S. Collura, Daniel Harrison, and Michael R. Fisch
Finite-time singularity in the vortex dynamics of a string 3637
A. Thess, O. Zikanov, and A. Nepomnyashchy
Mode instability in one-dimensional anharmonic lattices: Variational equation approach 3641
K. Yoshimura
Anderson localization of electromagnetic waves in confined dielectric media 3655
Marian Rusek and Arkadiusz Orłowski
Resonant enhancement of the field within a single ground-plane cavity: Comparison of different rectangular shapes 3661
Diana C. Skigin and Ricardo A. Depine
Electromagnetic fields in ferrofluids 3669
Mario Liu
