Guidelines for Estimating Length xii

RAPID COMMUNICATIONS

General methods of statistical physics

Universal equivalence of mean first-passage time and Kramers rate R1
P. Reimann, G. J. Schmid, and P. Hänggi

Dilute Bose gas revised R5
A. Yu. Cherny and A. A. Shanenko

Plasma-insulator transition of spin-polarized hydrogen R9
Hong Xu and Jean-Pierre Hansen

Liquid crystals

Elastic effects in disordered nematic networks R13
Nariya Uchida

Complex fluids, polymers, and granular materials

Nonlinear effects in the electrophoresis of a spherical colloidal particle R17
Marcelo Lozada-Cassou, Enrique González-Tovar, and Wilmer Olivares

Ergodicity-breaking transition and high-frequency response in a simple free-energy landscape R21
M. Ignatiev and Bulbul Chakraborty

Theoretical model of adsorption in a templated porous material R25
Paul R. Van Tassel

Effect of ordering on spinodal decomposition of liquid-crystal/polymer mixtures R29
Amelia M. Lapeña, Sharon C. Glotzer, Stephen A. Langer, and Andrea J. Liu

Biological physics

Mean discharge frequency locking in the response of a noisy neuron model to subthreshold periodic stimulation R33
Tetsuya Shimokawa, K. Pakdaman, and Shunsuke Sato

Copyright 1999 by The American Physical Society

(Continued)

1063-651X(199907)60:1;1-J

PHYSICAL REVIEW E THIRD SERIES, VOLUME 60, NUMBER 1 JULY 1999

Classical physics, including nonlinear media

Soliton tunneling with sub-barrier kinetic energies R37
J. A. González, A. Bellorín, and L. E. Guerrero
Two-color nonlinear localized photonic modes R41
Andrey A. Sukhorukov, Yuri S. Kivshar, and Ole Bang
Dark solitary waves in the nonlinear Schrödinger equation with third order dispersion, self-steepening, and self-frequency shift R45
S. L. Palacios, A. Guinea, J. M. Fernández-Díaz, and R. D. Crespo

ARTICLES

General methods of statistical physics

Fisher-based thermodynamics: Its Legendre transform and concavity properties 48
B. R. Frieden, A. Plastino, A. R. Plastino, and B. H. Soffer
Using weak impulses to suppress traveling waves in excitable media 54
Grigory V. Osipov and James J. Collins
Continuous phase transition in a spin-glass model without time-reversal symmetry 58
G. Parisi, M. Picco, and F. Ritort
Recent results on multiplicative noise 69
Walter Genovese and Miguel A. Muñoz
Exact solution of the asymmetric exclusion model with particles of arbitrary size 79
F. C. Alcaraz and R. Z. Bariev
Random deposition of two annihilating species in the (1+1) dimension 89
Raúl H. López, S. Manzi, F. Romá, and R. J. Faccio
Quantum kinetics and thermalization in a particle bath model 94
S. M. Alamoudi, D. Boyanovsky, and H. J. de Vega
Phase transitions in open quantum systems 114
C. Jung, M. Müller, and I. Rotter
Statistical mechanics of image restoration and error-correcting codes 132
Hidetoshi Nishimori and K. Y. Michael Wong
Exact solutions of some urn models of relaxation in glassy dynamics 145
D. Arora, D. P. Bhatia, and M. A. Prasad
Cellular automaton models of driven diffusive Frenkel-Kontorova-type systems 149
B. H. Wang, Y. R. Kwong, P. M. Hui, and Bambi Hu
Fluctuation theorem for stochastic systems 159
Debra J. Searles and Denis J. Evans
Thermodynamics of boson and fermion systems with fractal distribution functions 165
Marcelo R. Ubriaco
Anomalous jumping in a double-well potential 172
P. D. Ditlevsen
Soliton and kink jams in traffic flow with open boundaries 180
Masakuni Muramatsu and Takashi Nagatani
Analytic approach to the critical density in cellular automata for traffic flow 188
M. Gerwinski and J. Krug
Exact results for deterministic cellular automata traffic models 197
Henryk Fukś
Dissipative multistate systems in the scaling limit 203
Manfred Winterstetter

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 60, NUMBER 1** **JULY 1999**

Dynamical scaling: The two-dimensional XY model following a quench 212
F. Rojas and A. D. Rutenberg
Overdamped sine-Gordon kink in a thermal bath 222
Niurka R. Quintero, Angel Sánchez, and Franz G. Mertens
Thermodynamics of quantum dissipative many-body systems 231
Alessandro Cuccoli, Andrea Fubini, Valerio Tognetti, and Ruggero Vaia
Theory of spike spiral waves in a reaction-diffusion system 242
C. B. Muratov and V. V. Osipov
Lifetime statistics for a Bloch particle in ac and dc fields 247
M. Glück, A. R. Kolovsky, and H. J. Korsch
Universality and self-similarity of an energy-constrained sandpile model with random neighbors 259
Shu-dong Zhang
Thermodynamically reversible generalization of diffusion limited aggregation 264
Raissa M. D'Souza and Norman H. Margolus
Site percolation thresholds for Archimedean lattices 275
Paul N. Suding and Robert M. Ziff
Synchronization of noisy systems by stochastic signals 284
Alexander Neiman, Lutz Schimansky-Geier, Frank Moss, Boris Shulgin, and James J. Collins
Nonlocal Kardar-Parisi-Zhang equation with spatially correlated noise 293
Amit Kr. Chattopadhyay
Stationary space-periodic structures with equal diffusion coefficients 297
Peter Andresén, Morten Bache, Erik Mosekilde, Guy Dewel, and Pierre Borckmanns
Diffusion on curved, periodic surfaces 302
R. Hołyst, D. Plewczyński, A. Aksimentiev, and K. Burdzy

Chaos and nonlinear dynamical systems

Nonlinear dynamics of giant resonances in atomic nuclei 308
D. Vretenar, N. Paar, P. Ring, and G. A. Lalazissis
Extracting messages masked by chaotic signals of time-delay systems 320
Changsong Zhou and C.-H. Lai
Dynamical ansatz for path integrals and nonperturbative trace formulas 324
Yu. A. Dabaghian
Semiclassical interaction of moving two-level atoms with a cavity field: From integrability to Hamiltonian chaos 335
S. V. Prants, L. E. Kon'kov, and I. L. Kirilyuk
Measure-theoretical properties of the unstable foliation of two-dimensional differentiable area-preserving systems 347
A. Adrover and M. Giona
Computing with distributed chaos 363
Sudeshna Sinha and William L. Ditto
Box-counting dimension without boxes: Computing D_0 from average expansion rates 378
Paul So, Ernest Barreto, and Brian R. Hunt
Noise-amplitude dependence of the invariant density for noisy, fully chaotic one-dimensional maps 386
S. Seshadri, V. Balakrishnan, and S. Lakshmibala
Correlation decay in quantum chaotic billiards with bulk or surface disorder 391
E. Louis, J. A. Vergés, and E. Cuevas
Stabilization of unstable fixed points in the dynamics of a laser with feedback 398
M. Ciofini, A. Labate, R. Meucci, and M. Galanti
Theory of oscillations in average crisis-induced transient lifetimes 403
Krzysztof Kacperski and Janusz A. Hołyst

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 60, NUMBER 1** **JULY 1999**

Distribution of Husimi zeros in polygonal billiards 408
Debabrata Biswas and Sudeshna Sinha
Improving the false nearest neighbors method with graphical analysis 416
T. Aittokallio, M. Gyllenberg, J. Hietarinta, T. Kuusela, and T. Multamäki
Large deviation properties of on-off intermittency 422
H. Suetani and T. Horita
Synchronization in chaotic Hamiltonian systems and a geophysical application 429
A. Hannachi
Lyapunov exponents in unstable systems 444
M. Colonna and A. Bonasera
Semi-Poisson statistics and beyond 449
H. Hernández-Saldaña, J. Flores, and T. H. Seligman
Localization and fluctuations in quantum kicked rotors 453
Indubala I. Satija, Bala Sundaram, and Jukka A. Ketoja
Finite statistical complexity for sofic systems 459
Nicolás Perry and P.-M. Binder

Classical fluids

Rayleigh-Bénard simulation using the gas-kinetic Bhatnagar-Gross-Krook scheme in the incompressible limit 464
Kun Xu and Shiu Hong Lui
Linear response theory for thermodynamic properties 471
Johannes K. Nielsen
Cavitation induced by explosion in an ideal fluid model 482
Christophe Josserand
Self-consistent turbulence in the two-dimensional nonlinear Schrödinger equation with a repulsive potential 492
Igor A. Ivonin, Vladimir P. Pavlenko, and Hans Persson
Surface-induced ordering of a molecular fluid of flat hexagonal structure in a narrow graphite slit 500
J. Chakrabarti and P. J. A. M. Kerkhof
Differential criterion of a bubble collapse in viscous liquids 504
Vladislav A. Bogoyavlenskiy
Transition to turbulence in a shear flow 509
Bruno Eckhardt and Alois Mersmann
Fingering instability in combustion: An extended view 518
Ory Zik and Elisha Moses
Electric-field-induced front deformation of Belousov-Zhabotinsky waves 532
Hana Ševčíková and Stefan C. Müller
Convection in the presence of a first-order phase change 539
Shinichi Sakurai, Armin Tschammer, Werner Pesch, and Guenter Ahlers
Dynamic properties of Lennard-Jones fluids and liquid metals 551
M. Canales and J. A. Padró
Amplitude equation and pattern selection in Faraday waves 559
Peilong Chen and Jorge Viñals
Extended self-similarity and dissipation range dynamics of three-dimensional turbulence 571
Anirban Sain and J. K. Bhattacharjee

Liquid crystals

Quantum theory of chiral interactions in cholesteric liquid crystals 578
S. A. Issaenko, A. B. Harris, and T. C. Lubensky

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 60, NUMBER 1** **JULY 1999**

Smectic-A^*–smectic-C^* transition in a ferroelectric liquid crystal without smectic layer shrinkage 598
F. Giesselmann, P. Zugenmaier, I. Dierking, S. T. Lagerwall, B. Stebler, M. Kašpar, V. Hamplová, and M. Glogarová
Dynamics of soft and semisoft nematic elastomers 603
P. I. C. Teixeira and M. Warner
Turbulence to turbulence transition in homeotropically aligned nematic liquid crystals 610
D. E. Lucchetta, N. Scaramuzza, G. Strangi, and C. Versace
Biaxial modeling of the structure of the chevron interface in smectic liquid crystals 613
N. J. Mottram, N. Ul Islam, and S. J. Elston
Experimental observation of multicritical behaviors in pressure-temperature diagrams of pure compounds with twist grain boundary phases 620
A. Anakkar, N. Isaert, M. Ismaili, J.-M. Buisine, and H. T. Nguyen
Nematic ordering in a cell with modulated surface anchoring: Effects of flexoelectricity 628
G. Barbero, G. Skačej, A. L. Alexe-Ionescu, and S. Zumer
Nematic order in nanoscopic liquid crystal droplets 638
Mesfin Tsige, Milind P. Mahajan, C. Rosenblatt, and P. L. Taylor

Complex fluids, polymers, and granular materials

Nuclear magnetic relaxation without spin diffusion in polymers at interfaces 645
T. Tabti, J. Chikina, J.-F. Jacquinot, and M. Daoud
Granular cooling of hard needles 654
Martin Huthmann, Timo Aspelmeier, and Annette Zippelius
Structural rearrangement of solid surfaces due to competing adsorbate-substrate interactions 660
E. V. Vakarin, A. E. Filippov, J. P. Badiali, and M. F. Holovko
Statistics of shock waves in a two-dimensional granular flow 671
S. Hørlück and P. Dimon
Stress propagation through frictionless granular material 687
Alexei V. Tkachenko and Thomas A. Witten
Kramers potential study of the Rouse-like dynamics of short alkane chains 697
W. Paul and H. L. Frisch
Thermodynamic basis for a variational model for crystal growth 705
Bayard K. Johnson, Robert F. Sekerka, and Robert Almgren
Instability of the Kolmogorov flow in a soap film 715
John M. Burgess, C. Bizon, W. D. McCormick, J. B. Swift, and Harry L. Swinney
Irreversible adsorption of diffusing hard disks: An effective medium approach 722
Jordi Faraudo and Javier Bafaluy
Nonlinear dynamics of Aeolian sand ripples 729
Leonid Prigozhin
Elasticity effects on domain coarsening of the lamellar-gyroid transition observed in a nonionic surfactant system 734
Masayuki Imai, Kaori Nakaya, and Tadashi Kato
Neutron scattering and molecular correlations in a supercooled liquid 740
Christoph Theis and Rolf Schilling
Dynamics of spherical particles on a surface: Collision-induced sliding and other effects 751
Ljubinko Kondic
Extended (n/v)-Stillinger cluster for use in the theory of homogeneous nucleation 771
P. Schaaf, B. Senger, J.-C. Voegel, and H. Reiss
Frequency-dependent shear viscosity, sound velocity, and sound attenuation near the critical point in liquids. III. The shear viscosity 779
G. Flossmann, R. Folk, and G. Moser

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 60, NUMBER 1 JULY 1999

Percolation phenomenon of calcium bis(2-ethylhexyl) sulfosuccinate water-in-oil microemulsions by conductivity and dielectric spectroscopy measurements 792
Giulia Capuzzi, Piero Baglioni, Cecilia M. C. Gambi, and Eric Y. Sheu

Biological physics

Confidence in prediction by neural networks 799
Liat Ein-Dor and Ido Kanter
Counterion-mediated, non-pairwise-additive attractions in bundles of like-charged rods 803
B.-Y. Ha and Andrea J. Liu
Translational diffusion of flexible lipid chains in a Langmuir monolayer: A dynamic Monte Carlo study 814
T. Sintes, A. Baumgaertner, and Y. K. Levine
Kinetic properties of multiquanta Davydov-like solitons in molecular chains 821
Jasmina Tekić, Zoran Ivić, Slobodan Zeković, and Željko Pržulj
Parameter dependence of stochastic resonance in the stochastic Hodgkin-Huxley neuron 826
Sang-Gui Lee and Seunghwan Kim
Test for low-dimensional determinism in electroencephalograms 831
Jaeseung Jeong, Moo Seong Kim, and Soo Yong Kim
Model for spatial microtubule oscillations 838
D. Sept
Mass extinction in a dynamical system of evolution with variable dimension 842
Kei Tokita and Ayumu Yasutomi
Depletion interaction of casein micelles and an exocellular polysaccharide 848
R. Tuinier, E. ten Grotenhuis, C. Holt, P. A. Timmins, and C. G. de Kruif
Synchronization in the human cardiorespiratory system 857
Carsten Schäfer, Michael G. Rosenblum, Hans-Henning Abel, and Jürgen Kurths
Energetic stabilization of *d*-camphor via weak neutral currents 871
Paolo Lazzeretti, Riccardo Zanasi, and Francesco Faglioni

Plasma physics

Self-consistent axial modeling of surface-wave-produced discharges at low and intermediate pressures 875
Ts. Petrova, E. Benova, G. Petrov, and I. Zhelyazkov
Modeling of particulate coagulation in low pressure plasmas 887
U. Kortshagen and U. Bhandarkar
Magnetic flux generation and wave emissions during coalescence of magnetic islands in pair plasmas 899
J. I. Sakai, T. Haruki, and Y. Kazimura
Beam-plasma coupling effects on the stopping power of dense plasmas 904
D. O. Gericke and M. Schlanges
Soft-x-ray laser interferometry of a pinch discharge using a tabletop laser 911
C. H. Moreno, M. C. Marconi, K. Kanizay, J. J. Rocca, Yu. A. Uspenskii, A. V. Vinogradov, and Yu. A. Pershin

Physics of beams

Multiple scattering from gyrotropic bianisotropic cylinders of arbitrary cross sections using the modeling technique 918
Wen-Yan Yin and Le-Wei Li
Vacuum electron acceleration by coherent dipole radiation 926
A. L. Troha, J. R. Van Meter, E. C. Landahl, R. M. Alvis, Z. A. Unterberg, K. Li, N. C. Luhmann, Jr., A. K. Kerman, and F. V. Hartemann

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 60, NUMBER 1 JULY 1999

Theory and design of a free-electron maser with two-dimensional feedback driven by a sheet electron beam 935
N. S. Ginzburg, N. Yu. Peskov, A. S. Sergeev, A. D. R. Phelps, I. V. Konoplev, G. R. M. Robb, A. W. Cross, A. V. Arzhannikov, and S. L. Sinitsky

Continuously tunable, high-power, single-mode radiation from a short-pulse free-electron laser 946
H. H. Weits and D. Oepts

Synchrotron radiation of crystallized beams 957
Harel Primack and Reinhold Blümel

xuv resonant transition radiations from periodic stratified media 968
J.-M. André, B. Pardo, and C. Bonnelle

Classical physics, including nonlinear media

Stability of solitary wave trains in Hamiltonian wave systems 979
J. M. Arnold

Scaling theory for homogenization of the Maxwell equations 987
A. P. Vinogradov and A. V. Aivazyan

Generation of optical domain-wall structures from modulational instability in a bimodal fiber 994
S. Pitois, G. Millot, P. Grelu, and M. Haelterman

Stationary dark localized modes: Discrete nonlinear Schrödinger equations 1001
V. V. Konotop and S. Takeno

Multicomponent photorefractive cnoidal waves: Stability, localization, and soliton asymptotics 1009
V. M. Petnikova, V. V. Shuvalov, and V. A. Vysloukh

Modulational instability of bright solitary waves in incoherently coupled nonlinear Schrödinger equations 1019
Dmitry V. Skryabin and William J. Firth

Femtosecond measurements of the time of flight of photons in a three-dimensional photonic crystal 1030
Yu. A. Vlasov, S. Petit, G. Klein, B. Hönerlage, and Ch. Hirlimann

Wigner rotations and Iwasawa decompositions in polarization optics 1036
D. Han, Y. S. Kim, and Marilyn E. Noz

Modulational instability of electromagnetic waves in birefringent fibers with periodic and random dispersion 1042
F. Kh. Abdullaev and J. Garnier

Electromagnetic shocks on the optical cycle of ultrashort pulses in triple-resonance Lorentz dielectric media with subfemtosecond nonlinear electronic Debye relaxation 1051
L. Gilles, J. V. Moloney, and L. Vázquez

BRIEF REPORTS

General methods of statistical physics

Randomly amplified discrete Langevin systems 1060
Nobuko Fuchikami

Ion association in model ionic fluids 1063
Philip J. Camp and G. N. Patey

Scaling behavior in a proportional voting process 1067
R. N. Costa Filho, M. P. Almeida, J. S. Andrade, Jr., and J. E. Moreira

Chaos and nonlinear dynamical systems

Self-sustained oscillations and chaos in space charge limited currents 1069
Yu. N. Gartstein and P. S. Ramesh

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 60, NUMBER 1 JULY 1999

Reconstructing bifurcation diagrams from noisy time series using nonlinear autoregressive models 1073
Epifanio Bagarinao, K. Pakdaman, Taishin Nomura, and Shunsuke Sato

Liquid crystals

Tension gradients and Marangoni flows in nematic interfaces 1077
Alejandro D. Rey

Complex fluids, polymers, and granular materials

Absence of simulation evidence for critical depletion in slit pores 1081
Nigel B. Wilding and Martin Schoen

Structure of supercooled and glassy water under pressure 1084
Francis W. Starr, Marie-Claire Bellissent-Funel, and H. Eugene Stanley

Biological physics

Multiscale analysis of blood pressure signals 1088
A. Marrone, A. D. Polosa, G. Scioscia, S. Stramaglia, and A. Zenzola

COMMENTS

Comment on ''Corresponding states of periodic structures in nematic liquid crystals'' 1092
Maren Grigutsch and Ralf Stannarius

Reply to ''Comment on 'Corresponding states of periodic structures in nematic liquid crystals' '' 1096
A. J. Palangana, M. Simões, L. R. Evangelista, and A. A. Arrotéia

Comment on ''Merging of the α and β relaxations in polybutadiene: A neutron spin echo and dielectric study'' 1099
E. Donth, K. Schröter, and S. Kahle

Reply to ''Comment on 'Merging of the α and β relaxations in polybutadiene: A neutron spin echo and dielectric study' '' 1103
A. Arbe, J. Colmenero, D. Gómez, D. Richter, and B. Farago

Erratum: Influence of a periodic field on two-level classical systems [Phys. Rev. E **59**, R9 (1999)] 1106
V. Berdichevsky and M. Gitterman

Erratum: Simulation of a two-dimensional shear cell [Phys. Rev. E **59**, 889 (1999)] 1106
S. Schöllmann
