THIRD SERIES, VOLUME 60, NUMBER 2
PARTS A AND B

CONTENTS

AUGUST 1999

The Table of Contents is a total listing of Parts A and B.
Part A consists of pages R111–1664, and Part B pages 1665–2436.

PART A

Note to Reader i

RAPID COMMUNICATIONS

General methods of statistical physics

Levy-nearest-neighbors Bak-Sneppen model R1111
R. Cafiero, P. De Los Rios, A. Valleriani, and J. L. Vega
Sign-time distributions for interface growth R1115
Z. Toroczkai, T. J. Newman, and S. Das Sarma
Characterization and control of small-world networks R1119
S. A. Pandit and R. E. Amritkar
Scaling for the critical percolation backbone R1123
M. Barthélémy, S. V. Buldyrev, S. Havlin, and H. E. Stanley

Chaos and nonlinear dynamical systems

Alternative algorithm for the computation of Lyapunov spectra of dynamical systems R1126
K. Ramasubramanian and M. S. Sriram
Origin of coherent structures in a discrete chaotic medium R1130
Mikhail I. Rabinovich, Joaquín J. Torres, Pablo Varona, Ramón Huerta, and Patrick Weidman
Intrinsic localized modes and chaos in damped driven rotator lattices R1134
D. Bonart and J. B. Page

Classical fluids

Passive scalar intermittency in compressible flow R1138
A. Celani, A. Lanotte, and A. Mazzino

Liquid crystals

Statistical-mechanical study of the pair correlations for the dipolar Gay-Berne model R1142
A. V. Zakharov, S. Romano, and A. Maliniak

Complex fluids, polymers, and granular materials

Fast relaxation of a hexagonal Poiseuille shear-induced near-surface phase in a threadlike micellar solution R1146
W. A. Hamilton, P. D. Butler, L. J. Magid, Z. Han, and T. M. Slawecki
Phase separation with multiple length scales in polymer mixtures induced by autocatalytic reactions R1150
Qui Tran-Cong, Junji Kawai, Yukihiro Nishikawa, and Hiroshi Jinnai

Copyright 1999 by The American Physical Society

(Continued)

1063-651X(199908)60:2:A;1-8

PHYSICAL REVIEW E THIRD SERIES, VOLUME 60, NUMBER 2 AUGUST 1999

Coexistence of ordered and disordered phases in a nearly symmetric diblock copolymer near an order-disorder transition point R1154
Tadanori Koga, Tsuyoshi Koga, and Takeji Hashimoto
Periodicity-dependent stiffness of periodic hydrophilic-hydrophobic heteropolymers R1158
Debashish Chowdhury, Dietrich Stauffer, and Reinhard Strey
Numerical study of grid turbulence in two dimensions and comparison with experiments on turbulent soap films . . . R1162
C. H. Bruneau, O. Greffier, and H. Kellay

Biological physics

Direct measurement of the viscoelasticity of adsorbed protein layers using atomic force microscopy R1166
Cs. Nemes, N. Rozlosnik, and J. J. Ramsden

Classical physics, including nonlinear media

Suppression of transverse instabilities for vector solitons R1170
Ziad H. Musslimani, Mordechai Segev, Alexander Nepomnyashchy, and Yuri S. Kivshar

Computational physics

Tensile water transport in a porous gel R1174
Paulo Loureiro de Sousa, M. Engelsberg, and F. G. Brady Moreira
Efficient algorithm for calculating two-photon absorption spectra R1178
Toshiaki Iitaka and Toshikazu Ebisuzaki

ARTICLES

General methods of statistical physics

Corrections to scaling in the phase-ordering dynamics of a vector order parameter 1181
N. P. Rapapa and A. J. Bray
Generalization of Metropolis and heat-bath sampling for Monte Carlo simulations 1189
Bruce M. Boghosian
Breathers and multibreathers in a periodically driven damped discrete nonlinear Schrödinger equation 1195
Michael Kollmann, Hans W. Capel, and Tassos Bountis
Reaction diffusion models in one dimension with disorder 1212
Pierre Le Doussal and Cécile Monthus
Dynamical real space renormalization group applied to sandpile models 1239
Eugene V. Ivashkevich, Alexander M. Povolotsky, Alessandro Vespignani, and Stefano Zapperi
Polymorphic phase transitions in systems evolving in a two-dimensional discrete space 1252
A. Gadomski
Growth kinetics and morphology of a ballistic deposition model that incorporates surface diffusion for two species 1262
Hassan F. El-Nashar and Hilda A. Cerdeira
Wandering of a contact line at thermal equilibrium 1269
Anusha Hazareesing and Marc Mézard
Atomic diffusion, step relaxation, and step fluctuations 1279
B. Blagojević and P. M. Duxbury
Propagator representation of anomalous diffusion: The orientational structure factor formalism in NMR 1292
Tatiana Zavada, Norbert Südland, Rainer Kimmich, and T. F. Nonnenmacher
Power-law distributions and Lévy-stable intermittent fluctuations in stochastic systems of many autocatalytic elements 1299
Ofer Malcai, Ofer Biham, and Sorin Solomon

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 60, NUMBER 2** **AUGUST 1999**

Diffusion in discrete ratchets 1304
Jan A. Freund and Lutz Schimansky-Geier
Diffusion in lattice Lorentz gases with a percolation threshold 1310
L. Acedo and A. Santos
Resonant activations for a fluctuating barrier system driven by dichotomous noise and Gaussian white noise 1324
J. H. Li, D. Y. Xing, J. M. Dong, and B. Hu
Roughening transition of a restricted solid-on-solid model in the directed percolation universality class 1329
J. Ricardo G. de Mendonça
High resolution description of a crack front in a heterogeneous Plexiglas block 1337
Arnaud Delaplace, Jean Schmittbuhl, and Knut Jørgen Måløy
Universal critical coupling constants for the three-dimensional *n*-vector model from field theory 1344
A. I. Sokolov, E. V. Orlov, V. A. Ul'kov, and S. S. Kashtanov
Analysis of spatiotemporal signals: A method based on perturbation theory 1350
A. Hutt, C. Uhl, and R. Friedrich
Spinodals, scaling, and ergodicity in a threshold model with long-range stress transfer 1359
C. D. Ferguson, W. Klein, and John B. Rundle
Trichotomous noise-induced transitions 1374
Romi Mankin, Ain Ainsaar, and Eerik Reiter
Diffusion of particles moving with constant speed 1381
S. Anantha Ramakrishna and N. Kumar
Statistical properties of the volatility of price fluctuations 1390
Yanhui Liu, Parameswaran Gopikrishnan, Pierre Cizeau, Martin Meyer, Chung-Kang Peng, and H. Eugene Stanley
Thermostating by deterministic scattering: Heat and shear flow 1401
C. Wagner, R. Klages, and G. Nicolis
Highly optimized tolerance: A mechanism for power laws in designed systems 1412
J. M. Carlson and John Doyle
Functional integration approach to hysteresis 1428
G. Bertotti, I. D. Mayergoyz, V. Basso, and A. Magni
Microscopic analysis of currency and stock exchange markets 1441
L. Kador
Binary data corruption due to a Brownian agent. II. Two dimensions, competing agents, and generalized couplings 1450
Wannapong Triampo and T. J. Newman
Analytical results for random walks in the presence of disorder and traps 1464
Clément Sire
Transient nonlinear dielectric relaxation and dynamic Kerr effect from sudden changes of a strong dc electric field: Polar and polarizable molecules 1475
J. L. Déjardin, P. M. Déjardin, Yu. P. Kalmykov, and S. V. Titov
Possible experimental measure theory for the *XXX*-Heisenberg chain 1486
Jing-Ling Chen, Mo-Lin Ge, and Kang Xue
Stochastic resonance in linear systems subject to multiplicative and additive noise 1494
V. Berdichevsky and M. Gitterman
Inverse Mermin-Wagner theorem for classical spin models on graphs 1500
Raffaella Burioni, Davide Cassi, and Alessandro Vezzani
Orientational relaxation in Brownian rotors with frustrated interactions on a square lattice 1503
Sung Jong Lee and Bongsoo Kim
Spontaneous spiral formation in two-dimensional oscillatory media 1512
Petteri Kettunen, Takashi Amemiya, Takao Ohmori, and Tomohiko Yamaguchi

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 60, NUMBER 2 AUGUST 1999

Model of biological evolution with threshold dynamics and infinitely many absorbing states 1516
Adam Lipowski and Małgorzata Łopata
Thermodynamic framework for discrete optimal control in multiphase flow systems 1520
Stanislaw Sieniutycz
Chaotic jam and phase transition in traffic flow with passing 1535
Takashi Nagatani

Chaos and nonlinear dynamical systems

Signatures of chaos in the entanglement of two coupled quantum kicked tops 1542
Paul A. Miller and Sarben Sarkar
Semiconductor laser with optical feedback: From excitable to deterministic low-frequency fluctuations 1551
Manuel C. Eguia and G. B. Mindlin
Transient fractal behavior in snapshot attractors of driven chaotic systems 1558
Ying-Cheng Lai
Estimating the Lyapunov spectrum of time delay feedback systems from scalar time series 1563
Rainer Hegger
Noise-induced phase space transport in two-dimensional Hamiltonian systems 1567
Ilya V. Pogorelov and Henry E. Kandrup
Mutual synchronization and clustering in randomly coupled chaotic dynamical networks 1579
Susanna C. Manrubia and Alexander S. Mikhailov
Pauli principle and chaos in a magnetized disk 1590
R. Badrinarayanan, A. Góngora-T, and Jorge V. José
Structure selection for global vector field reconstruction by using the identification of fixed points 1600
L. Le Sceller, C. Letellier, and G. Gouesbet
Classical and quantum chaos in a circular billiard with a straight cut 1607
Suhan Ree and L. E. Reichl
Multidimensional quasiperiodic antiphase dynamics 1616
A. G. Vladimirov, E. A. Viktorov, and Paul Mandel
Semiclassical non-trace-type formulas for matrix-element fluctuations and weighted densities of states 1630
Jörg Main and Günter Wunner
Semiclassical spectra and diagonal matrix elements by harmonic inversion of cross-correlated periodic orbit sums 1639
Jörg Main, Kirsten Weibert, Vladimir A. Mandelshtam, and Günter Wunner
Decoherence and correspondence in conservative chaotic dynamics 1643
Jiangbin Gong and Paul Brumer
Multichannel digital communications by the synchronization of globally coupled chaotic systems 1648
K. Yoshimura
Map from one-dimensional quantum field theory to quantum chaos on a two-dimensional torus 1658
Tomaž Prosen

PART B

Note to Reader i

Classical fluids

Simulations of fluid hydrogen: Comparison of a dissociation model with tight-binding molecular dynamics 1665
Thomas J. Lenosky, Joel D. Kress, Lee A. Collins, Ronald Redmer, and Hauke Juranek
Scaling properties of particle density fields formed in simulated turbulent flows 1674
Robert C. Hogan, Jeffrey N. Cuzzi, and Anthony R. Dobrovolskis
Mechanism of low-threshold hypersonic cavitation stimulated by broadband laser pump 1681
N. F. Bunkin, A. V. Lobeyev, G. A. Lyakhov, and B. W. Ninham

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 60, NUMBER 2 AUGUST 1999

Planar isotropy of passive scalar turbulent mixing with a mean perpendicular gradient 1691
L. Danaila, J. Dusek, P. Le Gal, F. Anselmet, C. Brun, and A. Pumir
Possibility of breakdown of overdamped and narrowing limits in low-frequency Raman spectra: Phenomenological band-shape analysis using the multiple-random-telegraph model 1708
Yuko Amo and Yasunori Tominaga
Distribution functions of a simple fluid under shear: Low shear rates 1716
Yu. V. Kalyuzhnyi, S. T. Cui, P. T. Cummings, and H. D. Cochran
Phase-field model for Hele-Shaw flows with arbitrary viscosity contrast. I. Theoretical approach 1724
R. Folch, J. Casademunt, A. Hernández-Machado, and L. Ramírez-Piscina
Phase-field model for Hele-Shaw flows with arbitrary viscosity contrast. II. Numerical study 1734
R. Folch, J. Casademunt, A. Hernández-Machado, and L. Ramírez-Piscina
Time-modulated convection with zero mean temperature gradient 1741
A. C. Or and R. E. Kelly
Stable elliptical vortices in a circular disk 1748
Peilong Chen
Mechanism of single-bubble sonoluminescence 1754
Kyuichi Yasui
Effect of a magnetic field on sonoluminescence 1759
Kyuichi Yasui
Turbulent Dufour effect and Onsager-type relations 1762
Pedro Sancho
Effect of lattice defects on Hele-Shaw flow over an etched lattice 1767
E. L. Decker, Jordi Ignés-Mullol, A. Baratt, and J. V. Maher
Simple model for linear and nonlinear mixing at unstable fluid interfaces in spherical geometry 1775
John D. Ramshaw
Subharmonic instabilities of Tollmien-Schlichting waves in two-dimensional Poiseuille flow 1781
A. Drissi, M. Net, and I. Mercader

Liquid crystals

Molecular reorientation of a nematic glass by laser-induced heat flow 1792
R. Elschner, R. Macdonald, H. J. Eichler, S. Hess, and A. M. Sonnet
Twist modulated phases in chiral smectic liquid crystals 1799
Jonathan J. Stott and Rolfe G. Petschek
Pseudonematic order fluctuations of the director in the smectic phase of thermotropic liquid crystals 1808
R. H. Acosta and D. J. Pusiol
Kinetics of phase ordering of nematic liquid crystals confined in porous media 1812
Vlad Popa-Nita and Doru-Cosmin Constantin
Time dependence of the magnetic grain concentration and secondary grain aggregation in ferronematic lyotropic liquid crystals subjected to magnetic field gradients 1815
C. Y. Matuo and A. M. Figueiredo Neto
Equilibrium structures and pretransitional fluctuations in a very thin hybrid nematic film 1821
A. Šarlah and S. Žumer
Magnetic field induced alignment of the directors of a smectic-*A* liquid crystal 1831
J. W. Emsley, J. E. Long, G. R. Luckhurst, and P. Pedrielli
Improper orientational ordering regime and tricritical behavior in a lyotropic liquid crystal 1840
V. P. Dmitriev and G. R. Ouriques
Polydomain-monodomain transition in nematic elastomers 1847
S. V. Fridrikh and E. M. Terentjev
Biaxial torus around nematic point defects 1858
S. Kralj, E. G. Virga, and S. Žumer

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 60, NUMBER 2 AUGUST 1999

Anticlinic coupling between layers of an antiferroelectric liquid crystal 1867
Munehiro Kimura, Daeseung Kang, and Charles Rosenblatt
Electromechanical Fredericks effects in nematic gels 1872
E. M. Terentjev, M. Warner, R. B. Meyer, and J. Yamamoto
Expansion in width for domain walls in nematic liquid crystals in an external magnetic field 1880
H. Arodź
Layer undulations induced by a magnetic or electric field in concentric cylindrical layers of smectic-*A* liquid crystals 1888
I. W. Stewart

Complex fluids, polymers, and granular materials

Spatiotemporal irregularity in an excitable medium with shear flow 1897
V. N. Biktashev, I. V. Biktasheva, A. V. Holden, M. A. Tsyganov, J. Brindley, and N. A. Hill
Intrinsic instability of the concentration field in diffusion-limited growth and its effect on crystallization 1901
Mu Wang, Xiao-Bo Yin, Peter G. Vekilov, Ru-Wen Peng, and Nai-Ben Ming
Microscopic basis of free-volume concept as studied by quasielastic neutron scattering and positron annihilation lifetime spectroscopy 1906
T. Kanaya, T. Tsukushi, K. Kaji, J. Bartos, and J. Kristiak
Phase and solute fields across the solid-liquid interface of a binary alloy 1913
Massimo Conti
Intermolecular structure factors of macromolecules in solution: Integral equation results 1921
M. Fuchs and M. Müller
Polymerization-induced phase separation 1930
J. C. Lee
Enhanced structural correlations accelerate diffusion in charge-stabilized colloidal suspensions 1936
Ekkehard Overbeck, Christian Sinn, and Martin Watzlawek
Cracking piles of brittle grains 1940
František Slanina
Mechanism of the onset of axial segregation in a rotating cylindrical drum filled with binary granular mixtures . . . 1946
T. Elperin and A. Vikhansky
Temperature scaling in a dense vibrofluidized granular material 1951
P. Sunthar and V. Kumaran
Buckling, fluctuations, and collapse in semiflexible polyelectrolytes 1956
Per Lyngs Hansen, Daniel Svenšek, V. Adrian Parsegian, and Rudi Podgornik
Cylindrically symmetric Green's function approach for modeling the crystal growth morphology of ice 1967
Kenneth G. Libbrecht
Continuum theory of axial segregation in a long rotating drum 1975
I. S. Aranson, L. S. Tsimring, and V. M. Vinokur
Linear viscoelasticity of hard sphere colloidal crystals from resonance detected with dynamic light scattering 1988
See-Eng Phan, Min Li, William B. Russel, Jixiang Zhu, Paul M. Chaikin, and Chris T. Lant
Force distribution in a scalar model for noncohesive granular material 1999
Matthew G. Sexton, Joshua E. S. Socolar, and David G. Schaeffer
Thick surface flows of granular materials: Effect of the velocity profile on the avalanche amplitude 2009
Achod Aradian, Elie Raphaël, and Pierre-Gilles de Gennes
Convection and thermodiffusion of colloidal gold tracers by laser light scattering 2020
Wolfgang Schaertl and Christopher Roos
Auto-oscillation of surface tension 2029
V. I. Kovalchuk, H. Kamusewitz, D. Vollhardt, and N. M. Kovalchuk
Diffusiophoresis of two-dimensional liquid droplets in a phase-separating system 2037
Natalia Vladimirova, Andrea Malagoli, and Roberto Mauri

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 60, NUMBER 2 AUGUST 1999

Vertical free-standing films of amphiphilic associating polyelectrolytes 2045
F. Millet, J. J. Benattar, and P. Perrin
Simulations of aerosol aggregation including long-range interactions 2051
V. Arunachalam, R. R. Lucchese, and W. H. Marlow
Configurational entropy and collective modes in normal and supercooled liquids 2065
U. Zürcher and T. Keyes
Θ-point behavior of diluted polymer solutions: Can one observe the universal logarithmic corrections predicted by field theory? 2071
Johannes Hager and Lothar Schäfer

Biological physics

Mode locking and Arnold tongues in integrate-and-fire neural oscillators 2086
S. Coombes and P. C. Bressloff
Correlations between hidden units in multilayer neural networks and replica symmetry breaking 2097
D. Malzahn and A. Engel
Discretized torsional dynamics and the folding of an RNA chain 2105
Ariel Fernández, Rodolfo Salthú, and Hernán Cendra
Dynamic feedback in an aggregation-disaggregation model 2120
B. Urbanc, L. Cruz, S. V. Buldyrev, S. Havlin, B. T. Hyman, and H. E. Stanley
Energy transduction of isothermal ratchets: Generic aspects and specific examples close to and far from equilibrium 2127
Andrea Parmeggiani, Frank Jülicher, Armand Ajdari, and Jacques Prost
Information theoretical performance measure for associative memories and its application to neural networks 2141
Mathias Schlüter, Oliver Kerschhaggl, and Friedrich Wagner
Polyion character of globular proteins detected by translational and rotational diffusion 2148
Giuseppe Chirico and Sabrina Beretta
Adaptive walks on time-dependent fitness landscapes 2154
Claus O. Wilke and Thomas Martinetz
Mean-field theory of globally coupled integrate-and-fire neural oscillators with dynamic synapses 2160
P. C. Bressloff
Electrical recordings from rat cardiac muscle cells using field-effect transistors 2171
Christoph Sprössler, Morgan Denyer, Steve Britland, Wolfgang Knoll, and Andreas Offenhäusser
Multistability analysis of phase locking patterns in an excitatory coupled neural system 2177
Seon Hee Park, Seunghwan Kim, Hyeon-Bong Pyo, and Sooyeul Lee
Response of coupled noisy excitable systems to weak stimulation 2182
Seiji Tanabe, Tetsuya Shimokawa, Shunsuke Sato, and K. Pakdaman
Chaos in neural networks with a nonmonotonic transfer function 2186
D. Caroppo, M. Mannarelli, G. Nardulli, and S. Stramaglia

Plasma physics

Partially ionized hydrogen plasma in strong magnetic fields 2193
Alexander Y. Potekhin, Gilles Chabrier, and Yuri A. Shibanov
Comparison of measured and calculated x-ray and hot-electron production in short-pulse laser-solid interactions at moderate intensities 2209
Th. Schlegel, S. Bastiani, L. Grémillet, J.-P. Geindre, P. Audebert, J.-C. Gauthier, E. Lefebvre, G. Bonnaud, and J. Delettrez
Generation of periodic accelerating structures in plasma by colliding laser pulses 2218
G. Shvets, N. J. Fisch, A. Pukhov, and J. Meyer-ter-Vehn

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 60, NUMBER 2 AUGUST 1999

Effect of excited states on the ionization balance in plasmas via the enhancement of ionization and recombination rate coefficients 2224
Kitae Lee and Dong-Eon Kim
Charged-particle transport in gases in electric and magnetic fields crossed at arbitrary angles: Multiterm solution of Boltzmann's equation 2231
R. D. White, K. F. Ness, R. E. Robson, and B. Li
Formation mechanisms of radial electron fluxes in a positive column 2250
G. Mümken, H. Schlüter, and L. D. Tsendin
Coulomb logarithm in femtosecond-laser–matter interaction 2260
E. Bésuelle, R. R. E. Salomaa, and D. Teychenné

Physics of beams

Wiggler-field effects on the space-charge waves of a Raman free-electron laser 2264
B. Maraghechi, B. Farrokhi, J. E. Willett, B. Bolon, and H. Mehdian
Thomson scattering of coherent diffraction radiation by an electron bunch 2272
A. P. Potylitsyn
Thermalization of an intense, space-charge-dominated electron beam in a long focusing channel 2280
Bruce E. Carlsten
Cyclotron-resonance maser in a periodically loaded quadrupole transmission line 2290
Y. Leibovitch and E. Jerby

Classical physics, including nonlinear media

Growing-and-decaying mode solution to the Davey-Stewartson equation 2297
Masayoshi Tajiri and Takahito Arai
Existence of optical solitons on wavelength division multiplexed beams in a nonlinear fiber 2306
C. Yeh and L. A. Bergman
Bifurcation picture for gap solitons in nonlinear modulated systems 2309
A. S. Kovalev, O. V. Usatenko, and A. V. Gorbatch
Suppression and enhancement of soliton switching during interaction in periodically twisted birefringent fibers 2317
R. Radhakrishnan and M. Lakshmanan
Nonlinearity of Pancharatnam's geometric phase in polarizing interferometers 2322
Bernhard Hils, Wolfgang Dultz, and Werner Martienssen
Soliton evolution and radiation loss for the sine-Gordon equation 2330
Noel F. Smyth and Annette L. Worthy
Reshaping of femtosecond pulses by the Gouy phase shift 2337
Z. L. Horváth and Zs. Bor
Calculation of the heat-source function in photophoresis of aggregated spheres 2347
Yu-lin Xu, B. Å. S. Gustafson, F. Giovane, J. Blum, and S. Tehranian
Generalized Griffith criterion for dynamic fracture and the stability of crack motion at high velocities 2366
M. Adda-Bedia, R. Arias, M. Ben Amar, and F. Lund
Asymmetric partially coherent solitons in saturable nonlinear media 2377
Natalia M. Litchinitser, Wiesław Królikowski, Nail N. Akhmediev, and Govind P. Agrawal

Computational physics

Algorithms for Brownian dynamics computer simulations: Multivariable case 2381
A. C. Brańka and D. M. Heyes

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 60, NUMBER 2 AUGUST 1999

Monte Carlo dynamics in global optimization 2388
C. N. Chen, C. I. Chou, C. R. Hwang, J. Kang, T. K. Lee, and S. P. Li

BRIEF REPORTS

General methods of statistical physics

Self-averaging of random and thermally disordered diluted Ising systems 2394
Manuel I. Marqués and Julio A. Gonzalo
Nonextensive foundation of Lévy distributions 2398
Domingo Prato and Constantino Tsallis

Classical fluids

Generalized Stokes-Einstein relation for liquid metals near freezing 2402
N. H. March and M. P. Tosi

Liquid crystals

Coarse-graining analysis of the Berreman anchoring 2404
J.-B. Fournier and P. Galatola

Complex fluids, polymers, and granular materials

Dense suspensions and supercooled liquids: Dynamic similarities 2408
M. Papoular

Physics of beams

Cyclotron-resonance maser in a magnetic mirror 2411
Ronen Caspi and Eli Jerby
Longitudinal instability for a purely inductive wake function 2414
Yoshihiro Shobuda and Kohji Hirata

Classical physics, including nonlinear media

Long-wave and short-wave asymptotics in nonlinear dispersive systems 2418
R. A. Kraenkel, M. A. Manna, and V. Merle

Computational physics

Improved numerical approach for the time-independent Gross-Pitaevskii nonlinear Schrödinger equation 2421
A. Gammal, T. Frederico, and Lauro Tomio
Stationary state in a two-temperature model with competing dynamics 2425
Attila Szolnoki

ERRATA

Erratum: Tricritical behavior in the Sherrington-Kirkpatrick spin glass under a bimodal random field [Phys. Rev. E **57**, 5079 (1998)] 2429
E. Nogueira , Jr., F. D. Nobre, F. A. da Costa, and S. Coutinho
Erratum: Integral equation and simulation studies of the Heisenberg spin fluid in an external magnetic field [Phys. Rev. E **58**, 3478 (1998)] 2429
F. Lado, E. Lomba, and J. J. Weis
