PHYSICAL REVIEW E

THIRD SERIES, VOLUME 60, NUMBER 5

NOVEMBER 1999

Field theoretical representation of the Hohenberg-Kohn free energy for fluids H. Frusawa and R. Hayakawa	R5048
---	-------

Plasma physics

Landau damping of an electron plasma wave in a plasma with modulated density Manuel Curtet and Guy Bonnaud	R5052
---	-------

Classical physics, including nonlinear media

Two-color multistep cascading and parametric soliton-induced waveguides Yuri S. Kivshar, Andrey A. Sukhorukov, and Solomon M. Saltiel	R5056
Ultraresolution in optical imaging using spatiotemporal scanning Guy Indebetouw and Prapong Klysubun	R5060
Engineered nonlinear lattices C. Balslev Clausen, P. L. Christiansen, L. Torner, and Yu. B. Gaididei	R5064

ARTICLES

General methods of statistical physics

Glassy dynamics and aging in an exactly solvable spin model M. E. J. Newman and Christopher Moore	5068
Theory of spiral wave dynamics in weakly excitable media: Asymptotic reduction to a kinematic model and applications Vincent Hakim and Alain Karma	5073
Exact solution of a Z(4) gauge Potts model on planar lattices N. S. Ananikian, R. G. Ghulghazaryan, N. Sh. Izmailian, and R. Shcherbakov	5106
Scale invariance and invariant scaling in a mixed hierarchical system M. G. Shnirman and E. M. Blanter	5111
Relation between fractal dimension and roughness index for fractal surfaces C. W. Lung, J. Jiang, E. K. Tian, and C. H. Zhang	5121
Pair contact process in two dimensions Jafferson Kamphorst Leal da Silva and Ronald Dickman	5126
Theoretical model of diatomic molecules interacting on a two-dimensional lattice E. E. Mola, V. Ranea, and J. L. Vicente	5130
Calculation of ground states of four-dimensional $\pm J$ Ising spin glasses Alexander K. Hartmann	5135
Metastable states of an Ising-like thermally bistable system Isidor Shteto, Kamel Boukheddaden, and François Varret	5139
Evolution of speckle during spinodal decomposition Gregory Brown, Per Arne Rikvold, Mark Sutton, and Martin Grant	5151
Critical adsorption near edges A. Hanke, M. Krech, F. Schlesener, and S. Dietrich	5163
Numerical evidence for divergent Burnett coefficients Russell K. Standish	5175
Oscillatory behavior in a lattice prey-predator system Adam Lipowski	5179
