THIRD SERIES, VOLUME 60, NUMBER 5
PARTS A AND B

CONTENTS

NOVEMBER 1999

*The Table of Contents is a total listing of Parts A and B.
Part A consists of pages R5005–5646, and Part B pages 5647–6254.*

PART A

Note to Reader i

RAPID COMMUNICATIONS

General methods of statistical physics

- Critical states in a dissipative sandpile model R5005
S. S. Manna, A. D. Chakrabarti, and R. Cafiero
- Topological aspects of geometrical signatures of phase transitions R5009
Roberto Franzosi, Lapo Casetti, Lionel Spinelli, and Marco Pettini
- Two-finger selection theory in the Saffman-Taylor problem R5013
F. X. Magdaleno and J. Casademunt
- Jarzynski equality for the transitions between nonequilibrium steady states R5017
Takahiro Hatano

Chaos and nonlinear dynamical systems

- Phase ordering in chaotic map lattices with conserved dynamics R5021
Leonardo Angelini, Mario Pellicoro, and Sebastiano Stramaglia

Classical fluids

- Convection-driven quadrupolar dynamos in rotating spherical shells R5025
E. Grote, F. H. Busse, and A. Tilgner

Liquid crystals

- Traveling-wave relaxation in elongated liquid crystal cells R5029
R. H. Self, C. P. Please, and T. J. Sluckin
- Layer-by-layer crystallization and the role of fluctuations in free standing smectic films R5033
Andrea Fera, Boris I. Ostrovskii, Daniel Sentenac, Ivan Samoilenko, and Wim H. de Jeu
- Dislocation profile in cholesteric finger texture R5037
T. Ishikawa and O. D. Lavrentovich

Complex fluids, polymers, and granular materials

- Memories in sand: Experimental tests of construction history on stress distributions under sandpiles R5040
Loic Vanel, Daniel Howell, D. Clark, R. P. Behringer, and Eric Clément
- Critical angle of wet sandpiles R5044
T. G. Mason, A. J. Levine, D. Ertaş, and T. C. Halsey

Field theoretical representation of the Hohenberg-Kohn free energy for fluids	R5048
H. Frusawa and R. Hayakawa	

Plasma physics

Landau damping of an electron plasma wave in a plasma with modulated density	R5052
Manuel Curtet and Guy Bonnaud	

Classical physics, including nonlinear media

Two-color multistep cascading and parametric soliton-induced waveguides	R5056
Yuri S. Kivshar, Andrey A. Sukhorukov, and Solomon M. Saltiel	
Ultraresolution in optical imaging using spatiotemporal scanning	R5060
Guy Indebetouw and Prapong Klysubun	
Engineered nonlinear lattices	R5064
C. Balslev Clausen, P. L. Christiansen, L. Torner, and Yu. B. Gaididei	

ARTICLES

General methods of statistical physics

Glassy dynamics and aging in an exactly solvable spin model	5068
M. E. J. Newman and Cristopher Moore	
Theory of spiral wave dynamics in weakly excitable media: Asymptotic reduction to a kinematic model and applications	5073
Vincent Hakim and Alain Karma	
Exact solution of a Z(4) gauge Potts model on planar lattices	5106
N. S. Ananikian, R. G. Ghulghazaryan, N. Sh. Izmailian, and R. Shcherbakov	
Scale invariance and invariant scaling in a mixed hierarchical system	5111
M. G. Shnirman and E. M. Blanter	
Relation between fractal dimension and roughness index for fractal surfaces	5121
C. W. Lung, J. Jiang, E. K. Tian, and C. H. Zhang	
Pair contact process in two dimensions	5126
Jafferson Kamphorst Leal da Silva and Ronald Dickman	
Theoretical model of diatomic molecules interacting on a two-dimensional lattice	5130
E. E. Mola, V. Ranea, and J. L. Vicente	
Calculation of ground states of four-dimensional $\pm J$ Ising spin glasses	5135
Alexander K. Hartmann	
Metastable states of an Ising-like thermally bistable system	5139
Isidor Shteto, Kamel Boukheddaden, and François Varret	
Evolution of speckle during spinodal decomposition	5151
Gregory Brown, Per Arne Rikvold, Mark Sutton, and Martin Grant	
Critical adsorption near edges	5163
A. Hanke, M. Krech, F. Schlesener, and S. Dietrich	
Numerical evidence for divergent Burnett coefficients	5175
Russell K. Standish	
Oscillatory behavior in a lattice prey-predator system	5179
Adam Lipowski	

General methods of statistical physics

Thermodynamics of a two-dimensional unbounded self-gravitating system	5185
Jean-Jacques Aly and Jérôme Perez	
Correlation functions in the two-dimensional random-field Ising model	5191
S. L. A. de Queiroz and R. B. Stinchcombe	
Universality in the off-equilibrium critical dynamics of the three-dimensional diluted Ising model	5198
G. Parisi, F. Ricci-Tersenghi, and J. J. Ruiz-Lorenzo	
Depinning transition and thermal fluctuations in the random-field Ising model	5202
L. Roters, A. Hucht, S. Lübeck, U. Nowak, and K. D. Usadel	
Harmonic potential driven by long-range correlated noise	5208
Manuel O. Cáceres	
Models of competitive learning: Complex dynamics, intermittent conversions, and oscillatory coarsening	5218
Anita Mehta and J. M. Luck	
Speed of wave-front solutions to hyperbolic reaction-diffusion equations	5231
Vicenç Méndez, Joaquim Fort, and Jordi Farjas	
Metastable states in spin glasses and disordered ferromagnets	5244
C. M. Newman and D. L. Stein	
Angle-angular-momentum entropic bounds and optimal entropies for quantum scattering of spinless particles . . .	5261
D. B. Ion and M. L. D. Ion	
Statistical mechanics of nonrelativistic charged particles in a constant magnetic field	5275
Guy B. Standen and David J. Toms	
Nonuniversality of compact support probability distributions in random matrix theory	5287
G. Akemann, G. M. Cicuti, L. Molinari, and G. Vernizzi	
Exactly soluble hierarchical clustering model: Inverse cascades, self-similarity, and scaling	5293
A. Gabrielov, W. I. Newman, and D. L. Turcotte	
Phase diagram of the Biham-Middleton-Levine traffic model in three dimensions	5301
H. F. Chau and K. Y. Wan	
Scaling of the distribution of fluctuations of financial market indices	5305
Parameswaran Gopikrishnan, Vasiliki Plerou, Luís A. Nunes Amaral, Martin Meyer, and H. Eugene Stanley	
Enhanced pulse propagation in nonlinear arrays of oscillators	5317
Antonio Sarmiento, Ramon Reigada, Aldo H. Romero, and Katja Lindenberg	
Lévy random walks with fluctuating step number and multiscale behavior	5327
K. I. Hopcraft, E. Jakeman, and R. M. J. Tanner	
Vortex dynamics and entropic forces in antiferromagnets and antiferromagnetic Potts models	5344
Cristopher Moore, Mats G. Nordahl, Nelson Minar, and Cosma Rohilla Shalizi	
Finite-connectivity systems as error-correcting codes	5352
Renato Vicente, David Saad, and Yoshiyuki Kabashima	
Competitive dynamics in a three-dimensional Ising model	5367
J. R. S. Leão, B. C. S. Grandi, and W. Figueiredo	

Chaos and nonlinear dynamical systems

Wigner surmise for high-order level spacing distributions of chaotic systems	5371
A. Y. Abul-Magd and M. H. Simbel	
Nonintegrable dynamics of the triplet-triplet spatiotemporal interaction	5375
S. R. Lopes and F. B. Rizzato	
Approach to Gaussian stochastic behavior for systems driven by deterministic chaotic forces	5385
Angela Hilgers and Christian Beck	

Experimental observation of a torus-doubling transition to chaos near the ferroelectric phase transition of a KH_2PO_4 crystal	5394
Jong Cheol Shin	
Emergence of on-off intermittency in systems nonlinearly coupled to a nonequilibrium bath	5402
J. Plata	
Rapid decoherence in integrable systems: A border effect	5407
R. M. Angelo, K. Furuya, M. C. Nemes, and G. Q. Pellegrino	
Approximate renormalization-group transformation for Hamiltonian systems with three degrees of freedom	5412
C. Chandre, H. R. Jauslin, G. Benfatto, and A. Celletti	
Analysis of the bifurcation diagram of a hybrid bistable system with feedback controls of chaos	5422
Zhi-Ren Zheng, Jian Huang, and Jin-Yue Gao	
Control of chaotic spatiotemporal spiking by time-delay autosynchronization	5426
G. Franceschini, S. Bose, and E. Schöll	
Multiple forms of intermittency in partial differential equation dynamo models	5435
Eurico Covas and Reza Tavakol	
Sign-independent synchronization in unidirectionally coupled chaotic systems	5439
Mingkai Nan, Kim-fung Tsang, Chak-nam Wong, and Xiangquan Shi	
Unstable dimension variability in coupled chaotic systems	5445
Ying-Cheng Lai, David Lerner, Kaj Williams, and Celso Grebogi	
Crossover from chaotic to self-organized critical dynamics in jerky flow of single crystals	5455
G. Ananthakrishna, S. J. Noronha, C. Fressengeas, and L. P. Kubin	
Improvement of the local prediction of chaotic time series	5463
Gong Xiaofeng and C. H. Lai	
Using unstable periodic orbits to overcome distortion in chaotic signals	5469
T. L. Carroll	
Riddling, bubbling, and Hopf bifurcation in coupled map systems	5474
H. L. Yang and A. S. Pikovsky	
Passage through resonance and autoresonance in x^{2n} -type potentials	5479
E. Nakar and L. Friedland	
Classical fluids	
Fluid flow through ramified structures	5486
M. P. Almeida, J. S. Andrade, Jr., S. V. Buldyrev, F. S. A. Cavalcante, H. E. Stanley, and B. Suki	
Monte Carlo approach to the gas-liquid transition in porous materials	5495
M. Álvarez, D. Levesque, and J.-J. Weis	
Viscoelastic behavior of water in the terahertz-frequency range: An inelastic x-ray scattering study	5505
G. Monaco, A. Cunsolo, G. Ruocco, and F. Sette	
Towards a computational chemical potential for nonequilibrium steady-state systems	5522
András Baranyai and Peter T. Cummings	
Two-particle dispersion by correlated random velocity fields	5528
I. M. Sokolov	
Thermodynamically self-consistent theories of fluids interacting through short-range forces	5533
C. Caccamo, G. Pellicane, D. Costa, D. Pini, and G. Stell	
Two-dimensional turbulence in the inverse cascade range	5544
Victor Yakhot	
Phase loops in density-functional-theory calculations of adsorption in nanoscale pores	5552
G. L. Aranovich and M. D. Donohue	

Liquid crystals

Nonequilibrium-molecular-dynamics investigation of the presmectic behavior of the viscosities of a Gay-Berne nematic liquid crystal	5561
Loris Bennett and Siegfried Hess	
Dynamics of solitary waves in smectic- C^* liquid crystals	5568
E. N. Tsoy, I. W. Stewart, and F. Kh. Abdullaev	
Electric-field-induced chiral separation in liquid crystals	5575
G. Heppke, A. Jáklí, S. Rauch, and H. Sawade	
Non-Debye screening of a surface charge and a bulk-ion-controlled anchoring transition in a nematic liquid crystal	5580
V. G. Nazarenko, V. M. Pergamenshchik, O. V. Koval'chuk, A. B. Nych, and B. I. Lev	
Monte Carlo simulation of smectic liquid crystals and the electroclinic effect: The role of molecular shape	5584
Jianling Xu, Robin L. B. Selinger, Jonathan V. Selinger, B. R. Ratna, and R. Shashidhar	
Frequency-induced structure transition of nematic electroconvection in twist cells	5591
H. Bohatsch and R. Stannarius	
Electro-optic response of surface-induced nematic order above the nematic-isotropic phase transition temperature	5600
Jong-Hyun Kim, Rolfe G. Petschek, and Charles Rosenblatt	
Effects of quenched disorder on the orientational order of the octylcyanobiphenyl liquid crystal	5607
Huairan Zeng, Bostjan Zalar, Germano S. Iannacchione, and Daniele Finotello	
Theoretical model for layer rotations in smectic-A liquid crystals subject to asymmetric electric fields	5619
T. Carlsson and M. A. Osipov	
Deuteron NMR study of a long-chain smectic liquid crystal: Molecular order and dynamics	5631
Ronald Y. Dong	
Nematic kink states in a laser field	5639
S. K. Srivatsa and G. S. Ranganath	

PART B

Note to Reader	i
--------------------------	---

Complex fluids, polymers, and granular materials

Drying of capillary porous media with a stabilized front in two dimensions	5647
M. Prat and F. Bouleux	
Viscoelasticity of randomly branched polymers in the vulcanization class	5657
Charles P. Lusignan, Thomas H. Mourey, John C. Wilson, and Ralph H. Colby	
Multiple scattering suppression in static light scattering by cross-correlation spectroscopy	5670
A. Moussaïd and P. N. Pusey	
Self-consistent expansion for the Kardar-Parisi-Zhang equation with correlated noise	5677
Eytan Katzav and Moshe Schwartz	
Quantitative measurements of Ostwald ripening using time-resolved small-angle neutron scattering	5681
S. Egelhaaf, U. Olsson, P. Schurtenberger, J. Morris, and H. Wennerström	
Simple model with facilitated dynamics for granular compaction	5685
J. Javier Brey, A. Prados, and B. Sánchez-Rey	
Molecular dynamics of a liquid drop spreading in a corner formed by two planar substrates	5693
Chi-Chuan Hwang, Jeng-Rong Ho, and Shio-Chao Lee	
Directed rigidity and bootstrap percolation in $1+1$ dimensions	5699
Marcio Argollo de Menezes and Cristian F. Moukarzel	
Homogeneous cooling state for a granular mixture	5706
Vicente Garzó and James Dufty	

Dynamic entropy as a measure of caging and persistent particle motion in supercooled liquids	5714
Paolo Allegrini, Jack F. Douglas, and Sharon C. Glotzer	
Experimental observations of non-Gaussian behavior and stringlike cooperative dynamics in concentrated quasi-two-dimensional colloidal liquids	5725
Andrew H. Marcus, Jeremy Schofield, and Stuart A. Rice	
Minimal relaxation law for compaction of tapped granular matter	5737
Stefan J. Linz and Annekathrin Döhle	
Aspects of the dynamics of colloidal suspensions: Further results of the mode-coupling theory of structural relaxation	5742
M. Fuchs and M. R. Mayr	
Computer simulation of microphase separation in ionic copolymers	5753
M. Banaszak and J. H. R. Clarke	
Effects of bead-bead interactions on the static and dynamical properties of model polymer solutions	5757
C. Xiao and D. M. Heyes	
Molecular mode-coupling theory for supercooled liquids: Application to water	5768
L. Fabbian, A. Latz, R. Schilling, F. Sciortino, P. Tartaglia, and C. Theis	
Effects of physisorption of xenon on the thermal conductivity of resorcinol-formaldehyde aerogels	5778
Jianyu Lou, Steven Harrington, and Da-Ming Zhu	
Generating moment equations in the Doi model of liquid-crystalline polymers	5783
P. Ilg, I. V. Karlin, and H. C. Öttinger	
Microstructure functions for random media with impenetrable particles	5788
J. Quintanilla	
Monte Carlo simulations of liquid spreading on a solid surface: Effect of end-group functionality	5795
X. Ma, C. L. Bauer, M. S. Jhon, J. Gui, and B. Marchon	
Screening of a macroion by multivalent ions: Correlation-induced inversion of charge	5802
B. I. Shklovskii	
Filler-induced composition waves in phase-separating polymer blends	5812
Benjamin P. Lee, Jack F. Douglas, and Sharon C. Glotzer	
Liquid-induced transitions in granular media	5823
P. Tegzes, R. Albert, M. Paskvan, A.-L. Barabási, T. Vicsek, and P. Schiffer	
Diffusivelike buffering and saturation of large rivers	5827
F. Métivier	
Confined water in hydrophobic nanopores: Dynamics of freezing into bilayer ice	5833
Jan Slovák, Kenichiro Koga, Hideki Tanaka, and Xiao C. Zeng	
Thin diblock copolymer films on patterned surfaces: Computer simulations and the Frenkel-Kontorowa model . . .	5841
G. G. Pereira and D. R. M. Williams	
Pressure of correlated layer-charge and counterion fluctuations in charged thin films	5848
D. B. Lukatsky and S. A. Safran	
Experimental evidence of power-law trapping-time distributions in porous media	5858
German Drazer and Damián H. Zanette	
Fluids of hard ellipsoids: Phase diagram including a nematic instability from Percus-Yevick theory	5865
M. Letz and A. Latz	
Force measurements on static granular materials	5872
Grunde Løvøll, Knut Jørgen Måløy, and Eirik G. Flekkøy	

Biological physics

Extended Eden model reproduces growth of an acellular slime mold	5879
Geri Wagner, Ragnhild Halvorsrud, and Paul Meakin	
Energy-level statistics in the fine conformational resolution of RNA folding dynamics	5888
Ariel Fernández, Teresita Burastero, Rodolfo Salthú, and Ana Tablar	
Reaction-diffusion waves of advance in the transition to agricultural economics	5894
Joaquim Fort and Vicenç Méndez	
On-line learning of unrealizable tasks	5902
Silvia Scarpetta and David Saad	
Diversity and extinction in a lattice model of a population with fluctuating environment	5912
F. V. De Blasio	
Modeling the effect of an external electric field on the velocity of spike propagation in a nerve fiber	5918
John M. Myers	
Receiver operating characteristics of perceptrons: Influence of sample size and prevalence	5926
Ansgar Freking, Michael Biehl, Christian Braun, Wolfgang Kinzel, and Malte Meesmann	
Statistics of DNA sequences: A low-frequency analysis	5932
Maria de Sousa Vieira	
Modified self-consistent harmonic approach to thermal fluctuational disruption of disulfide bonds in proteins	5938
Y. Z. Chen	
Minimal model for complex dynamics in cellular processes	5943
C. Suguna, Kanchan K. Chowdhury, and Somdatta Sinha	

Plasma physics

Energy gain of injected electrons subjected to an intense laser field and its magnetic field induced in plasma	5950
Guihua Zeng	
Charge-fluctuation-induced heating of dust particles in a plasma	5959
O. S. Vaulina, S. A. Khrapak, A. P. Nefedov, and O. F. Petrov	
Nonhomogeneity of dusty crystals and plasma diagnostics	5965
L. I. Podloubny, P. P. J. M. Schram, and S. A. Trigger	
Self-consistent model of a positive column in a glow discharge under free-flight and collisional regimes of charged-particle motion	5971
V. S. Egorov, Yu. B. Golubovskii, E. Kindel, I. B. Mekhov, and C. Schimke	
Forward and backward stimulated Brillouin scattering of crossed laser beams	5978
C. J. McKinstrie and E. A. Startsev	
Ion explosion and multi-mega-electron-volt ion generation from an underdense plasma layer irradiated by a relativistically intense short-pulse laser	5987
M. Yamagiwa, J. Koga, L. N. Tsintsadze, Y. Ueshima, and Y. Kishimoto	
Small-scale electron density and magnetic-field structures in the wake of an ultraintense laser pulse	5991
T. V. Liseikina, F. Califano, V. A. Vshivkov, F. Pegoraro, and S. V. Bulanov	
Radiation field in a superstrong magnetoactive electron plasma	5998
Chih-Kang Chou	
Optical measurements of paired luminous rings in capacitive radio-frequency hydrogen discharges	6007
Y. Sakawa, M. Hori, T. Shoji, and T. Sato	
Trace rare gases optical emission spectroscopy: Nonintrusive method for measuring electron temperatures in low-pressure, low-temperature plasmas	6016
M. V. Malyshev and V. M. Donnelly	

Physics of beams

Beam coupling impedances for perforated beam pipes with general shape from impedance boundary conditions . . . Stefania Petracca	6030
Role of semiclassical description in the quantumlike theory of light rays R. Fedele and V. I. Man'ko	6042
Effects of overlapping parametric resonances on the particle diffusion process C. M. Chu, M. Ball, B. Brabson, J. Budnick, M. Ellison, K. M. Fung, B. Hamilton, W. C. Hsi, D. Jeon, X. Kang, L. L. Kiang, S. Y. Lee, K. Y. Ng, A. Pei, A. Riabko, and T. Sloan	6051
Wakefield excitation in multimode structures by a train of electron bunches J. G. Power, Wei Gai, and Paul Schoessow	6061

Classical physics, including nonlinear media

Addition formulas and the Rayleigh identity for arrays of elliptical cylinders J. G. Yardley, R. C. McPhedran, N. A. Nicorovici, and L. C. Botten	6068
Resonances and localization of classical waves in random systems with correlated disorder Gregory Samelsohn, Sergey A. Gredeskul, and Reuven Mazar	6081
Crescent singularities and stress focusing in a buckled thin sheet: Mechanics of developable cones Sahraoui Chaïeb and Francisco Melo	6091
Three-wave interaction in two-component quadratic nonlinear lattices V. V. Konotop, M. D. Cunha, P. L. Christiansen, and C. Balslev Clausen	6104
Generation of multiple-charged optical vortex solitons in a saturable nonlinear medium A. Dreischuh, G. G. Paulus, F. Zacher, F. Grasbon, and H. Walther	6111
Effects of disorder on wave propagation in two-dimensional photonic crystals A. A. Asatryan, P. A. Robinson, L. C. Botten, R. C. McPhedran, N. A. Nicorovici, and C. Martijn de Sterke	6118
Multiparticle breathers for a chain with double-quadratic on-site potential S. Neusüß and R. Schilling	6128
Dark and bright solitons in resonantly absorbing gratings Tomáš Opatrný, Boris A. Malomed, and Gershon Kurizki	6137

Computational physics

Discrete approximation of the linear Boolean model of heterogeneous materials John C. Handley	6150
--	------

BRIEF REPORTS

General methods of statistical physics

Stability of localized structures in the Swift-Hohenberg equation V́ctor J. Sánchez-Morcillo and Kestutis Staliunas	6153
Oscillon formation as an initial pattern state Arik Yochelis, Barak Galanti, and Zeev Olami	6157
Nonequilibrium roughening transition in an interface growth model with two species of particles S. Park and B. Kahng	6160
Relativistic quantum thermodynamics of ideal gases in two dimensions H. Blas, B. M. Pimentel, and J. L. Tomazelli	6164
Irreversible thermodynamics of Poisson processes with reaction Vicenç Méndez and Joaquim Fort	6168

Chaos and nonlinear dynamical systems

Efficient algorithm for detecting unstable periodic orbits in chaotic systems	6172
Ruslan L. Davidchack and Ying-Cheng Lai	
Unstable periodic orbits and the natural measure of nonhyperbolic chaotic saddles	6176
Mukeshwar Dhamala and Ying-Cheng Lai	

Classical fluids

Asymptotic analysis of particle engulfment	6180
L. Hadji	
Three-point velocity correlation functions in two-dimensional forced turbulence	6184
Denis Bernard	
Multistability and symmetry breaking in the two-dimensional flow around a square cylinder	6188
Yuo-Hsien Shiau, Yih-Feng Peng, Robert R. Hwang, and Chin-Kun Hu	
General solution for the Couette flow profile	6192
Michael C. Wendl	

Liquid crystals

Micellar shape anisotropy and elastic constants in discotic lyotropic liquid crystals	6195
P. A. de Castro, A. J. Palangana, and L. R. Evangelista	

Complex fluids, polymers, and granular materials

Granular boycott effect: How to mix granulates	6199
J. Duran and T. Mazozi	
Influence of particle size on diffusion-limited aggregation	6202
Zhi-Jie Tan, Xian-Wu Zou, Wen-Bing Zhang, and Zhun-Zhi Jin	
Addendum to "Quantitative measure of folding in two-dimensional polymers"	6206
Gustavo A. Arteca	

Plasma physics

Excitation of nonlinear two-dimensional wake waves in radially nonuniform plasma	6210
Arsen G. Khachatryan	

Physics of beams

Grating transition radiation: A source of quasimonochromatic radiation	6214
P. Henri, O. Haeberlé, P. Rullhusen, N. Maene, and W. Mondelaers	

Classical physics, including nonlinear media

Breather compactons in nonlinear Klein-Gordon systems	6218
P. Tchofo Dinda and M. Remoissenet	
Dynamics of formation and interaction of photorefractive screening solitons	6222
C. Denz, W. Królikowski, J. Petter, C. Weillnau, T. Tschudi, M. R. Belić, F. Kaiser, and A. Stepken	
Time diffraction of evanescent waves	6226
Mufei Xiao	

Metastability for delayed differential equations	6230
C. Grotta-Ragazzo, K. Pakdaman, and C. P. Malta	

COMMENTS

Comment on “Model for transmission of ultrastrong laser pulses through thin foil targets”	6234
Andrea Macchi, Fulvio Cornolti, and Enrique Conejero Jarque	
Reply to “Comment on ‘Model for transmission of ultrastrong laser pulses through thin foil targets’ ”	6236
Wei Yu, Z. M. Sheng, M. Y. Yu, J. Zhang, Z. M. Jiang, and Z. Xu	
Line shape measurement and isolated line width calculations: Quantal versus semiclassical methods	6238
Spiros Alexiou, Siegfried Glenzer, and Richard W. Lee	
Reply to “Line shape measurement and isolated line width calculations: Quantal versus semiclassical methods”	6241
Hans R. Griem, Yuri V. Ralchenko, and Igor Bray	

ERRATA

Erratum: Spin of Dirac’s relativistic membrane [Phys. Rev. E 59 , 6286 (1999)]	6242
E. Stedile	
Erratum: Modulational instability of bright solitary waves in incoherently coupled nonlinear Schrödinger equations [Phys. Rev. E 60 , 1019 (1999)]	6242
Dmitry V. Skryabin and William J. Firth
