THIRD SERIES, VOLUME 60, NUMBER 6
PARTS A AND B

CONTENTS

DECEMBER 1999

The Table of Contents is a total listing of Parts A and B.
Part A consists of pages R6255–6863, and Part B pages 6865–7662.

PART A

Note to Reader i

RAPID COMMUNICATIONS

General methods of statistical physics

Dimensional reduction in a model with infinitely many absorbing states R6255
Adam Lipowski

Properties of the crossover from nonclassical to classical chemical kinetics in a reversible $A+B\leftrightarrow C$ reaction diffusion process R6259
Misha Sinder and Joshua Pelleg

Spreading and shortest paths in systems with sparse long-range connections R6263
Cristian F. Moukarzel

Dynamical renormalization group calculation of a two-phase sharp interface model R6267
G. Caginalp

Phase transition and symmetry breaking in the minority game R6271
Damien Challet and Matteo Marsili

Nonequilibrium first-order phase transition induced by additive noise R6275
A. A. Zaikin, J. García-Ojalvo, and L. Schimansky-Geier

Chaos and nonlinear dynamical systems

Controlling Hamiltonian chaos via Gaussian curvature R6279
Atta Oloumi and Denis Teychenné

Abrupt bifurcation to chaotic scattering with discontinuous change in fractal dimension R6283
Ying-Cheng Lai

Rescaling invariance and anomalous transport in a stochastic layer R6287
S. S. Abdullaev and K. H. Spatschek

Classical fluids

Density-functional theory for soft interactions by dimensional crossover R6291
Matthias Schmidt

Exit time of turbulent signals: A way to detect the intermediate dissipative range R6295
L. Biferale, M. Cencini, D. Vergni, and A. Vulpiani

Coherent structures in random shell models for passive scalar advection R6299
Luca Biferale, Isabelle Daumont, Thierry Dombre, and Alessandra Lanotte

Copyright 1999 by The American Physical Society

(Continued)

1063-651X(199912)60:6:A;1-L

PHYSICAL REVIEW E THIRD SERIES, VOLUME 60, NUMBER 6 DECEMBER 1999

Differential light scattering: Technique for probing sonoluminescence R6303
G. Vacca, R. D. Morgan, and R. B. Laughlin
Liquid flow through aqueous foams: From the plateau border-dominated regime to the node-dominated regime . . . R6307
M. Durand, G. Martinoty, and D. Langevin

Liquid crystals

Disorder effects in low concentration dispersions of small quartz spheres in cyanobiphenyl liquid crystals R6309
F. Mercuri, A. K. Ghosh, and M. Marinelli

Classical physics, including nonlinear media

High-frequency dynamics of wave localization R6313
C. W. J. Beenakker, K. J. H. van Bemmel, and P. W. Brouwer
Large two-dimensional sonic band gaps R6316
D. Caballero, J. Sánchez-Dehesa, C. Rubio, R. Mártinez-Sala, J. V. Sánchez-Pérez, F. Meseguer, and J. Llinares

Computational physics

Tetrahedral global minimum for the 98-atom Lennard-Jones cluster R6320
Robert H. Leary and Jonathan P. K. Doye

ARTICLES

General methods of statistical physics

Identity of the universal repulsive-core singularity with Yang-Lee edge criticality 6323
Youngah Park and Michael E. Fisher
Noise-induced oscillation and stochastic resonance in an autonomous chemical reaction system 6329
Zhonghuai Hou and Houwen Xin
Decay of unstable equilibrium and nonequilibrium states with inverse probability current taken into account 6333
N. V. Agudov and A. N. Malakhov
Effective action for stochastic partial differential equations 6343
David Hochberg, Carmen Molina-París, Juan Pérez-Mercader, and Matt Visser
Percolation thresholds, critical exponents, and scaling functions on planar random lattices and their duals 6361
H.-P. Hsu and M.-C. Huang
Purity and decoherence in the theory of a damped harmonic oscillator 6371
A. Isar, A. Sandulescu, and W. Scheid
Two-particle problem in a nonequilibrium many-particle system 6382
Th. Bornath, D. Kremp, and M. Schlanges
Stabilization and enhancement of traffic flow by the next-nearest-neighbor interaction 6395
Takashi Nagatani
Nonequilibrium noise in coupled phase oscillators 6402
P. Reimann, C. Van den Broeck, and R. Kawai
Coherence resonance in excitable and oscillatory systems: The essential role of slow and fast dynamics 6407
Joël R. Pradines, Grigory V. Osipov, and James J. Collins
Bosonization, vicinal surfaces, and hydrodynamic fluctuation theory 6411
Herbert Spohn
Mobility and stochastic resonance in spatially inhomogeneous systems 6421
Debasis Dan, M. C. Mahato, and A. M. Jayannavar
Interacting spiral waves in the Oregonator model of the light-sensitive Belousov-Zhabotinskii reaction 6429
I. Schebesch and H. Engel

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 60, NUMBER 6** **DECEMBER 1999**

Lévy diffusion as an effect of sporadic randomness 6435
Mauro Bologna, Paolo Grigolini, and Juri Riccardi
Escape over a fluctuating barrier with additive and multiplicative noise 6443
J. H. Li, B. Hu, D. Y. Xing, and J. M. Dong
Fracture patterns induced by desiccation in a thin layer 6449
So Kitsunezaki
Exactly solvable two-way traffic model with ordered sequential update 6465
M. E. Fouladvand and H.-W. Lee
Single-vehicle data of highway traffic: A statistical analysis 6480
L. Neubert, L. Santen, A. Schadschneider, and M. Schreckenberg
Geometry, thermodynamics, and finite-size corrections in the critical Potts model 6491
Chin-Kun Hu, Jau-Ann Chen, N. Sh. Izmailian, and P. Kleban
Percolation threshold of correlated two-dimensional lattices 6496
Kenneth S. Mendelson
Thermally activated escape rates of uniaxial spin systems with transverse field: Uniaxial crossovers 6499
D. A. Garanin, E. C. Kennedy, D. S. F. Crothers, and W. T. Coffey
Sorting single events: Mean arrival times of *N* random walkers 6503
Julia Dräger and Joseph Klafter
Potential energy landscape of a model glass former: Thermodynamics, anharmonicities, and finite size effects ... 6507
Stephan Büchner and Andreas Heuer
Scaling of the distribution of price fluctuations of individual companies 6519
Vasiliki Plerou, Parameswaran Gopikrishnan, Luís A. Nunes Amaral, Martin Meyer, and H. Eugene Stanley
Long-range electrostatic interactions between like-charged colloids: Steric and confinement effects 6530
Emmanuel Trizac and Jean-Luc Raimbault
Universal renormalization of saddle-point integrals for condensed Bose gases 6534
Martin Holthaus and Eva Kalinowski
Cyclotron resonance line shape function from the equilibrium density projection operator technique 6538
Joung Young Sug, Sang Gyu Jo, and Sang Don Choi
Electrolytic depletion interactions 6549
M. N. Tamashiro and P. Pincus

Chaos and nonlinear dynamical systems

Loss of lag synchronization in coupled chaotic systems 6560
O. V. Sosnovtseva, A. G. Balanov, T. E. Vadivasova, V. V. Astakhov, and E. Mosekilde
Coupling of low-frequency modes with the complex Ginzburg-Landau equation:
Generalized Zakharov equations 6566
R. Erichsen, L. G. Brunnet, and F. B. Rizzato
Frozen spatial chaos induced by boundaries 6571
Víctor M. Eguíluz, Emilio Hernández-García, Oreste Piro, and Salvador Balle
Excitability and coherence resonance in lasers with saturable absorber 6580
Johan L. A. Dubbeldam, Bernd Krauskopf, and Daan Lenstra
Chaotic alternation of waves in ring lasers 6589
M. Clerc and P. Coullet
Recovery process of low-frequency fluctuations in laser diodes with external optical feedback 6595
Yun Liu, Peter Davis, and Yoshiro Takiguchi

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 60, NUMBER 6 DECEMBER 1999

Numerical evidence for the existence of a low-dimensional attractor and its implications in the rheology of dilute suspensions of periodically forced slender bodies 6602
K. Radhakrishnan, K. Asokan, J. Dasan, C. Chandrashekara Bhat, and T. R. Ramamohan
Dependence of thermal conductivity on discrete breathers in lattices 6610
G. P. Tsironis, A. R. Bishop, A. V. Savin, and A. V. Zolotaryuk
Computation of a Lyapunov spectrum for continuous-time dynamical systems and discrete maps 6614
T. M. Janaki, Govindan Rangarajan, Salman Habib, and Robert D. Ryne
Phase synchronization in the forced Lorenz system 6627
Eun-Hyoung Park, Michael A. Zaks, and Jürgen Kurths
Escape from intermittent repellers: Periodic orbit theory for crossover from exponential to algebraic decay 6639
Per Dahlqvist

Classical fluids

Kinetic and transport equations for localized excitations in the sine-Gordon model 6645
I. V. Baryakhtar, V. G. Baryakhtar, and E. N. Economou
Continued fraction representation of temporal multiscaling in turbulence 6656
David Daems, Siegfried Grossmann, Victor S. L'vov, and Itamar Procaccia
Shell model for time-correlated random advection of passive scalars 6663
K. H. Andersen and P. Muratore-Ginanneschi
Structure of gaseous Kr in the low-q region by neutron scattering and interaction potentials 6682
E. Guarini, G. Casanova, U. Bafile, and F. Barocchi
Anomalous scaling regimes of a passive scalar advected by the synthetic velocity field 6691
N. V. Antonov
Capillary waves at liquid-vapor interfaces: A molecular dynamics simulation 6708
Scott W. Sides, Gary S. Grest, and Martin-D. Lacasse
Waterlike anomalies for core-softened models of fluids: One dimension 6714
M. Reza Sadr-Lahijany, Antonio Scala, Sergey V. Buldyrev, and H. Eugene Stanley
Corresponding-states approach to small-angle scattering from polydisperse ionic colloidal fluids 6722
Domenico Gazzillo, Achille Giacometti, and Flavio Carsughi
Pair dispersion in synthetic fully developed turbulence 6734
G. Boffetta, A. Celani, A. Crisanti, and A. Vulpiani
Percolation in ionic fluids and formation of a fractal structure 6742
Tetsuo Kaneko
Dynamics of simulated water under pressure 6757
Francis W. Starr, Francesco Sciortino, and H. Eugene Stanley
Critical behavior of vorticity in two-dimensional turbulence 6769
Denis Boyer
Model for dynamics in supercooled water 6776
C. Y. Liao, F. Sciortino, and S. H. Chen

Liquid crystals

Slow mode of the smectic-A–smectic-C_α phase transition 6788
Abbas Rastegar, Theo Rasing, Igor Muševič, and Gerd Heppke
Structures of chiral smectic-C mesophases revealed by polarization-analyzed resonant x-ray scattering 6793
P. Mach, R. Pindak, A.-M. Levelut, P. Barois, H. T. Nguyen, H. Baltes, M. Hird, K. Toyne, A. Seed, J. W. Goodby, C. C. Huang, and L. Furenlid
Tensorial x-ray structure factor in smectic liquid crystals 6803
Anne-Marie Levelut and Brigitte Pansu
Structure of the chiral smectic-C^*_α phase 6816
D. Schlauf, Ch. Bahr, and H. T. Nguyen

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 60, NUMBER 6 DECEMBER 1999

Microscopic origins of heliclinic phases in smectic liquid crystals 6826
Jonathan J. Stott and Rolfe G. Petschek
Phase-ordering dynamics of the Gay-Berne nematic liquid crystal 6831
Jeffrey L. Billeter, Alexander M. Smondyrev, George B. Loriot, and Robert A. Pelcovits
Material-independent determination of anchoring properties on rubbed polyimide surfaces 6841
Bharat R. Acharya, Jae-Hoon Kim, and Satyendra Kumar
Surface breaking in lyotropic nematic liquid crystals induced by a magnetic field 6847
A. L. Alexe-Ionescu, L. M. Vega, J. J. Bonvent, and E. A. Oliveira
Photonic defect modes of cholesteric liquid crystals 6852
Young-Chol Yang, Chul-Sik Kee, Jae-Eun Kim, Hae Yong Park, Jong-Cheon Lee, and Young-Jae Jeon
Molecular theory of ferroelectric ordering in enantiomeric mixtures of smectic-*C** liquid crystals 6855
M. A. Osipov and D. Guillon

PART B

Note to Reader i

Complex fluids, polymers, and granular materials

Eutectic colony formation: A stability analysis 6865
Mathis Plapp and Alain Karma
Rigidity phase transition in granular packings 6890
Einat Aharonov and David Sparks
Influence of charge fluctuations on the critical behavior of electrolyte solutions 6897
V. L. Koulinskii, N. P. Malomuzh, and V. A. Tolpekin
Compression of a polymer chain by a small obstacle: The effect of fluctuations on the escape transition 6906
J. Ennis, E. M. Sevick, and D. R. M. Williams
Wetting films on chemically heterogeneous substrates 6919
C. Bauer and S. Dietrich
Self-motion in glass-forming polymers: A molecular dynamics study 6942
A. van Zon and S. W. de Leeuw
Coupling between a first-order gas-liquid phase transition and a second-order orientational transition in Langmuir monolayers 6951
J. Wang, D. Y. Xing, M. Jiang, Jinming Dong, and Fan Zhong
Transient rheology of a polyethylene melt under shear 6956
J. D. Moore, S. T. Cui, H. D. Cochran, and P. T. Cummings
Theory of creeping gravity currents of a non-Newtonian liquid 6960
Julio Gratton, Fernando Minotti, and Swadesh M. Mahajan
Two-dimensional model of phase segregation in liquid binary mixtures 6968
Natalia Vladimirova, Andrea Malagoli, and Roberto Mauri
Rate-and-state theory of plastic deformation near a circular hole 6978
J. S. Langer and Alexander E. Lobkovsky
Polyelectrolyte brushes: Counterion distribution and complexation properties 6984
Y. Tran, P. Auroy, L-T. Lee, and M. Stamm
Mechanical and structural model of fractal networks of fat crystals at low deformations 6991
Suresh S. Narine and Alejandro G. Marangoni
Dissipation in ferrofluids: Mesoscopic versus hydrodynamic theory 7001
Hanns Walter Müller and Andreas Engel
Different statistical mechanical ensembles for a stretched polymer 7010
J. T. Titantah, C. Pierleoni, and J.-P. Ryckaert
Transitions in the horizontal transport of vertically vibrated granular layers 7022
Z. Farkas, P. Tegzes, A. Vukics, and T. Vicsek

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 60, NUMBER 6** **DECEMBER 1999**

Negative electrostatic contribution to the bending rigidity of charged membranes and polyelectrolytes screened by multivalent counterions 7032
T. T. Nguyen, I. Rouzina, and B. I. Shklovskii
Exact Poisson-Boltzmann solution for the interaction of dissimilar charge-regulating surfaces 7040
Sven Holger Behrens and Michal Borkovec
Application of liquid dynamics theory to the glass transition 7049
Duane C. Wallace
Interfacial free energy of hard-sphere fluids and solids near a hard wall 7057
Martin Heni and Hartmut Löwen
Self-diffusion of grains in a two-dimensional vibrofluidized bed 7066
R. D. Wildman, J. M. Huntley, and J.-P. Hansen
Interaction and percolation in the *L*64 triblock copolymer micellar system 7076
Laurent Lobry, Norberto Micali, Francesco Mallamace, Ciya Liao, and Sow-Hsin Chen
Lattice model results for lamellar phases in slits 7088
M. Tasinkevych and A. Ciach
Computer simulation of random packing of unequal particles 7098
D. He, N. N. Ekere, and L. Cai
Effects of confinement on critical adsorption: Absence of critical depletion for fluids in slit pores 7105
A. Maciołek, R. Evans, and N. B. Wilding
Pattern formation in the instability of a vicinal surface by the drift of adatoms 7120
Masahide Sato and Makio Uwaha
Dynamics of a shallow fluidized bed 7126
Lev S. Tsimring, Ramakrishna Ramaswamy, and Philip Sherman
Single-particle dynamics of water molecules confined in a lecithin-based gel 7131
F. Aliotta, M. E. Fontanella, R. E. Lechner, M. Pieruccini, B. Ruffle, and C. Vasi
Granular collapse as a percolation transition 7137
Jan Tobochnik
Size distribution effect on the power law regime of the structure factor of fractal aggregates 7143
C. M. Sorensen and G. M. Wang
Stress fluctuations in continuously sheared dense granular materials 7149
Piroz Zamankhan, Tero Tynjälä, William Polashenski, Jr., Parsa Zamankhan, and Pertti Sarkomaa
Crystallization in quasi-two-dimensional colloidal systems at an air-water interface 7157
Takamichi Terao and Tsuneyoshi Nakayama
Negative effective surface viscosities in insoluble fatty acid monolayers: Effect of phase transitions on dilational viscoelasticity 7163
Joanna Giermanska-Kahn, Francisco Monroy, and Dominique Langevin
Brownian motion in a granular gas 7174
J. Javier Brey, M. J. Ruiz-Montero, R. García-Rojo, and James W. Dufty
Shell structures with ''magic numbers'' of spheres in a swirled dish 7182
Karsten Kötter, Eric Goles, and Mario Markus
Phase-field model for binary alloys 7186
Seong Gyoon Kim, Won Tae Kim, and Toshio Suzuki
Phase transitions of colloid-polymer systems in two dimensions 7198
J.-T. Lee and M. Robert
Size segregation of granular matter in silo discharges 7203
Azadeh Samadani, A. Pradhan, and A. Kudrolli
Linear stability analysis of a vertically oscillated granular layer 7210
C. Bizon, M. D. Shattuck, and J. B. Swift

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 60, NUMBER 6 DECEMBER 1999

Experimental measurements of sidebranching in thermal dendrites under terrestrial-gravity and microgravity conditions 7217
D. P. Corrigan, M. B. Koss, J. C. LaCombe, K. D. de Jager, L. A. Tennenhouse, and M. E. Glicksman
Competition between correlated buoyancy and uncorrelated capillary effects during drainage 7224
Harold Auradou, Knut Jørgen Måløy, Jean Schmittbuhl, Alex Hansen, and Daniel Bideau

Biological physics

Response of an ensemble of noisy neuron models to a single input 7235
Seiji Tanabe, Shunsuke Sato, and K. Pakdaman
Conformations of closed DNA 7239
Boris Fain and Joseph Rudnick
Chemically driven traveling waves in DNA 7253
Tomasz Lipniacki
Dynamics of lattice spins as a model of arrhythmia 7262
S. Khlebnikov
Analytical approach to the stochastic FitzHugh-Nagumo system and coherence resonance 7270
B. Lindner and L. Schimansky-Geier
Proteins *in vacuo*: A molecular dynamics study of the unfolding behavior of highly charged disulfide-bond-intact lysozyme subjected to a temperature pulse 7277
C. T. Reimann, I. Velázquez, M. Bittner, and O. Tapia
Specular and diffuse scattering of highly aligned phospholipid membranes 7285
T. Salditt, C. Münster, J. Lu, M. Vogel, W. Fenzl, and A. Souvorov
Simple model to study insertion of a protein into a membrane 7290
Riccardo Bonaccini and Flavio Seno
Theoretical electroencephalogram stationary spectrum for a white-noise-driven cortex: Evidence for a general anesthetic-induced phase transition 7299
Moira L. Steyn-Ross, D. A. Steyn-Ross, J. W. Sleigh, and D. T. J. Liley
Independent statistical observables for ultrametric disordered populations 7312
B. G. Giraud
Categorization in fully connected multistate neural network models 7321
R. Erichsen, Jr., W. K. Theumann, and D. R. C. Dominguez
Scaling and percolation in the small-world network model 7332
M. E. J. Newman and D. J. Watts
Statistical analysis of ionic current fluctuations in membrane channels 7343
Szymon Mercik, Karina Weron, and Zuzanna Siwy
Role of soft and hard aggregates in the thermodynamics of lipid dispersions 7349
Carla Goldman, Karin A. Riske, and M. Teresa Lamy-Freund
Power-law fluctuations in phase-separated lipid membranes 7354
R. Winter, A. Gabke, C. Czeslik, and P. Pfeifer

Plasma physics

Electron kinetic effects in atmosphere breakdown by an intense electromagnetic pulse 7360
A. A. Solovyev, V. A. Terekhin, V. T. Tikhonchuk, and L. L. Altgilbers
Equilibrium and oscillations of grains in the dust-plasma crystal 7369
S. V. Vladimirov, N. F. Cramer, and P. V. Shevchenko
Absorption of subpicosecond uv laser pulses during interaction with solid targets 7374
M. Borghesi, A. J. Mackinnon, R. Gaillard, O. Willi, and D. Riley
Space-dependent aspects of electron degradation 7382
A. V. Vasenkov

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 60, NUMBER 6 DECEMBER 1999

Theory of beam-plasma instability in a periodic plasma-filled waveguide 7391
G. I. Zaginaylov, A. A. Rozhkov, and J.-Y. Raguin
Quasilinear theory of collisionless Fermi acceleration in a multicusp magnetic confinement geometry 7400
R. L. Dewar and C. I. Ciubotariu
Kinetic theory of Jeans instability of a dusty plasma 7412
B. P. Pandey, G. S. Lakhina, and Vinod Krishan
High negative charge of a dust particle in a hot cathode discharge 7420
C. Arnas, M. Mikikian, and F. Doveil
Self-organization in a dissipative three-wave interaction 7426
M. M. Škorić, T. Sato, A. Maluckov, and M. S. Jovanović
Stationary periodic and solitary waves induced by a strong short laser pulse 7435
L. N. Tsintsadze, K. Nishikawa, T. Tajima, and J. T. Mendonca
Laser-assisted stopping power of a hot plasma for a system of correlated ions 7441
C. A. B. Silva and R. M. O. Galvão
Ion-molecule reactions and ion energies in a CF_4 discharge 7449
B. L. Peko, I. V. Dyakov, R. L. Champion, M. V. V. S. Rao, and J. K. Olthoff
Nonconservative charged-particle swarms in ac electric fields 7457
R. D. White, R. E. Robson, and K. F. Ness

Physics of beams

High-intensity laser-induced electron acceleration in vacuum 7473
J. X. Wang, Y. K. Ho, L. Feng, Q. Kong, P. X. Wang, Z. S. Yuan, and W. Scheid
Effects of resonances on halo formation in high-intensity storage rings 7479
D. Jeon, J. A. Holmes, V. V. Danilov, J. D. Galambos, and D. K. Olsen

Classical physics, including nonlinear media

Dissipative lattice model with exact traveling discrete kink-soliton solutions: Discrete breather generation and reaction diffusion regime 7484
J. C. Comte, P. Marquié, and M. Remoissenet
Dynamics of a misaligned astigmatic twisted Gaussian beam in a Kerr-nonlinear parabolic waveguide 7490
L. A. Melnikov, V. L. Derbov, and A. I. Bychenkov
Matrix formulation for the propagation of light beams with orbital and spin angular momenta 7497
L. Allen, J. Courtial, and M. J. Padgett
Linear stability analysis of walking vector solitons 7504
Dumitru Mihalache, Dumitru Mazilu, and Lucian-Cornel Crasovan
Role of internal and continuum modes in modulational instability of quadratic solitons 7511
Dmitry V. Skryabin
Modulational instability of multiple-charged optical vortex solitons under saturation of the nonlinearity 7518
A. Dreischuh, G. G. Paulus, F. Zacher, F. Grasbon, D. Neshev, and H. Walther
Motion of compactonlike kinks 7525
P. Tchofo Dinda, T. C. Kofane, and M. Remoissenet

Computational physics

Group theory used to improve the efficiency of transfer-matrix computations 7533
A. Mayer and J.-P. Vigneron
Monte Carlo simulations of non-Fickian water transport in a saturated porous gel 7541
P. Loureiro de Sousa and M. Engelsberg

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 60, NUMBER 6 DECEMBER 1999

BRIEF REPORTS

General methods of statistical physics

van der Waals type loop in microcanonical caloric curves of finite systems 7550
I. H. Umirzakov

Surface restructuring and kinetic oscillations in heterogeneous catalytic reactions 7554
V. P. Zhdanov

Test of renormalization predictions for universal finite-size scaling functions 7558
Erik Luijten

Diffusion through piecewise washboard potential 7562
V. Berdichevsky and M. Gitterman

Modified renormalization strategy for sandpile models 7565
Y. Moreno, J. B. Gómez, and A. F. Pacheco

Arrested cracks in nonlinear lattice models of brittle fracture 7569
David A. Kessler and Herbert Levine

Broad-band colored noise: Digital simulation and dynamical effects 7572
J. D. Bao and S. J. Liu

Chaos and nonlinear dynamical systems

Hamiltonian for a restricted isoenergetic thermostat 7576
C. P. Dettmann

Absence of chaos in Bohmian dynamics 7578
Sheldon Goldstein

Immense delocalization from fractional kinetics 7580
A. Iomin and G. M. Zaslavsky

Coupled modified baker's transformations for the Ising model 7584
Hidetsugu Sakaguchi

Classical fluids

Electro-aerodynamic instability of a thin dielectric liquid sheet sprayed with an air stream 7588
M. F. El-Sayed

Simple and accurate theory for strong shock waves in a dense hard-sphere fluid 7592
J. M. Montanero, M. López de Haro, A. Santos, and V. Garzó

Liquid crystals

Fluctuation modes in confined nematic liquid crystals in a regime of critical wetting 7596
N. B. Ivanov

Complex fluids, polymers, and granular materials

Dynamics of pinned interfaces with inertia 7600
Ö. Kayalar and A. Erzan

Biological physics

Proton glass freezing in hydrated lysozyme powders 7604
Adrijan Levstik, Cene Filipič, Zdravko Kutnjak, Giorgio Careri, Giuseppe Consolini, and Fabio Bruni

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 60, NUMBER 6 DECEMBER 1999

Stability of neural networks and solitons of field theory 7608
Sang-Hee Han and In Gyu Koh

Plasma physics

Electromagnetic convective cells in a nonuniform dusty plasma 7612
H. Saleem and Q. Haque

Classical physics, including nonlinear media

Calculation of electromagnetic properties of regular and random arrays of metallic and dielectric cylinders 7614
R. C. McPhedran, L. C. Botten, A. A. Asatryan, N. A. Nicorovici, P. A. Robinson, and C. M. de Sterke
Soliton-breather reaction pathways 7618
P. Maniadis, G. P. Tsironis, A. R. Bishop, and A. V. Zolotaryuk
Spatiotemporal dynamics of electromagnetic pulses in saturating nonlinear optical media with normal group velocity dispersion 7622
V. Skarka, V. I. Berezhiani, and R. Miklaszewski

Computational physics

Efficient Monte Carlo simulations using a shuffled nested Weyl sequence random number generator 7626
K. V. Tretiakov and K. W. Wojciechowski

ERRATA

Erratum: Crossover from *XY* critical to tricritical behavior of heat capacity at the smectic-*A*–chiral-smectic-*C* liquid crystal transition [Phys. Rev. E **57**, 6677 (1998)] 7629
Kenji Ema and Haruhiko Yao

Cumulative Author Index 7630
