PHYSICAL REVIEW E **THIRD SERIES, VOLUME 61, NUMBER 1** **JANUARY 2000**

Liquid crystals

Bilayer-by-bilayer antiferroelectric ordering in freely suspended films of an achiral polymer-monomer liquid crystal mixture R37
D. R. Link, N. A. Clark, B. I. Ostrovskii, and E. A. Soto Bustamante

Complex fluids, polymers, and granular materials

Apparent finite-size effects in the dynamics of supercooled liquids R41
Kang Kim and Ryoichi Yamamoto
Pumping liquids using asymmetric electrode arrays R45
Armand Ajdari
Velocity and shape selection of dendritic crystals in a forced flow R49
X. Tong, C. Beckermann, and A. Karma
Reductions of the glass transition temperature in thin polymer films: Probing the length scale of cooperative dynamics R53
James A. Forrest and Johan Mattsson

Biological physics

Phase separation and shape deformation of two-phase membranes R57
Y. Jiang, T. Lookman, and A. Saxena

ARTICLES

General methods of statistical physics

Path integrals for the quantum microcanonical ensemble 61
John W. Lawson
Collective modes in an open microwave billiard 66
P. Šeba, I. Rotter, M. Müller, E. Persson, and K. Pichugin
Optical properties of nonequilibrium low-dimensional systems 71
Sergio A. Hassan, Aurea R. Vasconcellos, Marcus V. Mesquita, and Roberto Luzzi
Roughening and preroughening transitions in crystal surfaces with double-height steps 77
Jae Dong Noh
Scaling of waves in the Bak-Tang-Wiesenfeld sandpile model 81
D. V. Ktitarev, S. Lübeck, P. Grassberger, and V. B. Priezzhev
Lévy scaling in random walks with fluctuating variance 93
P. Santini
Generation of compound non-Gaussian random processes with a given correlation function 100
S. Primak
Nonlinear measures for characterizing rough surface morphologies 104
Jané Kondev, Christopher L. Henley, and David G. Salinas
Crossover between a displacive and an order-disorder phase transition 126
A. N. Rubtsov, J. Hlinka, and T. Janssen
From continuous time random walks to the fractional Fokker-Planck equation 132
E. Barkai, R. Metzler, and J. Klafter
Ratchet driven by quasimonochromatic noise 139
M. Arrayás, R. Mannella, P. V. E. McClintock, A. J. McKane, and N. D. Stein
Correlation-length–exponent relation for the two-dimensional random Ising model 147
Péter Lajkó and Ferenc Iglói
Deterministic equations of motion and phase ordering dynamics 153
B. Zheng
