THIRD SERIES, VOLUME 61, NUMBER 2 ***CONTENTS*** **FEBRUARY 2000**

RAPID COMMUNICATIONS

General methods of statistical physics

Excess noise in intracavity laser frequency modulation R989
S. Longhi and P. Laporta

Scale invariance and lack of self-averaging in fragmentation R993
P. L. Krapivsky, I. Grosse, and E. Ben-Naim

Voronoi analysis of the breakdown of order in spontaneous optical spot patterns R997
G. Schliecker and R. Neubecker

Phase synchronization in coupled nonidentical excitable systems and array-enhanced coherence resonance R1001
Bambi Hu and Changsong Zhou

Swelling-collapse transition of self-attracting walks R1005
A. Ordemann, G. Berkolaiko, S. Havlin, and A. Bunde

Chiral-glass transition and replica symmetry breaking of a three-dimensional Heisenberg spin glass R1008
K. Hukushima and H. Kawamura

Chaos and nonlinear dynamical systems

Stabilizing nonlinear dynamical systems by an adaptive adjustment mechanism R1012
Weihong Huang

Classical fluids

Relationships between a roller and a dynamic pressure distribution in circular hydraulic jumps R1016
Kensuke Yokoi and Feng Xiao

Time correlated single photon Mie scattering from a sonoluminescing bubble R1020
K. R. Weninger, P. G. Evans, and S. J. Putterman

Large deviation statistics of the energy-flux fluctuation in the shell model of turbulence R1024
Takeshi Watanabe, Yasuya Nakayama, and Hirokazu Fujisaka

Complex fluids, polymers, and granular materials

Crystallization and phase separation in nonadditive binary hard-sphere mixtures R1028
A. A. Louis, R. Finken, and J. P. Hansen

First-order phase transition in a $(1+1)$-dimensional nonequilibrium wetting process R1032
H. Hinrichsen, R. Livi, D. Mukamel, and A. Politi

Copyright 2000 by The American Physical Society

(Continued)

1063-651X(200002)61:2;1-K

PHYSICAL REVIEW E THIRD SERIES, VOLUME 61, NUMBER 2 FEBRUARY 2000

Evidence for dipole surface orientational order at critical interfaces R1036
A. Mukhopadhyay, C. L. Caylor, and B. M. Law

Biological physics

Glassy dynamics of protein folding R1040
Erkan Tüzel and Ayşe Erzan

Classical physics, including nonlinear media

Solitons in anharmonic chains with ultra-long-range interatomic interactions R1044
Serge F. Mingaleev, Yuri B. Gaididei, and Franz G. Mertens
Self-similarity and fractals in soliton-supporting systems R1048
Marin Soljacic, Mordechai Segev, and Curtis R. Menyuk

ARTICLES

General methods of statistical physics

Continuous probability distributions from finite data 1052
David M. Schmidt
Continuum approach to car-following models 1056
Peter Berg, Anthony Mason, and Andrew Woods
Self-organized criticality in a computer network model 1067
Jian Yuan, Yong Ren, and Xiuming Shan
Elastic constants from microscopic strain fluctuations 1072
Surajit Sengupta, Peter Nielaba, Madan Rao, and K. Binder
Invariant power law distribution of Langevin systems with colored multiplicative noise 1081
Aki-Hiro Sato, Hideki Takayasu, and Yasuji Sawada
Perturbation expansion in phase-ordering kinetics. II. *n*-vector model 1088
Gene F. Mazenko
Delocalization transition of a rough adsorption-reaction interface 1102
Hüseyin Kaya, Alkan Kabakçıoğlu, and Ayşe Erzan
Localized structures in nonlinear lattices with diffusive coupling and external driving 1106
Igor Mitkov, Konstantin Kladko, and A. R. Bishop
Diffusion-mediated reactions with a time-dependent absorption rate 1110
Miguel A. Ré and Carlos E. Budde
Ultrametricity in three-dimensional Edwards-Anderson spin glasses 1121
Silvio Franz and Federico Ricci-Tersenghi
Diffusion over a saddle with a Langevin equation 1125
Yasuhisa Abe, David Boilley, Bertrand G. Giraud, and Takahiro Wada
Competitive reactions among three monomers over a catalytic surface 1134
E. C. da Costa and W. Figueiredo
Inequivalence of dynamical ensembles in a generalized driven diffusive lattice gas 1139
Muktish Acharyya, Abhik Basu, Rahul Pandit, and Sriram Ramaswamy
Equilibrium and stationary nonequilibrium states in a chain of colliding harmonic oscillators 1144
Mitsusada M. Sano
Background estimation in experimental spectra 1152
R. Fischer, K. M. Hanson, V. Dose, and W. von der Linden
Renormalized field theory of driven lattice gases under infinitely fast drive 1161
F. de los Santos and Miguel A. Muñoz

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 61, NUMBER 2 FEBRUARY 2000

One-dimensional stochastic Lévy-Lorentz gas 1164
E. Barkai, V. Fleurov, and J. Klafter
Resonances while surmounting a fluctuating barrier 1170
J. Iwaniszewski, I. K. Kaufman, P. V. E. McClintock, and A. J. McKane
Diversity in liquid supercooling and glass formation phenomena illustrated by a simple model 1176
Daniela Kohen and Frank H. Stillinger
Proof of breaking of self-organized criticality in a nonconservative Abelian sandpile model 1183
Tomoko Tsuchiya and Makoto Katori
Evolution of fractal particles in systems with conserved order parameter 1189
S. V. Kalinin, D. L. Gorbachev, A. Yu. Borisevich, K. V. Tomashevitch, A. A. Vertegel, A. J. Markworth, and Yu. D. Tretyakov
Temperature and density extrapolations in canonical ensemble Monte Carlo simulations 1195
A. L. Ferreira and M. A. Barroso
Long-range magnetic order and the Darwin Lagrangian 1199
Vishal Mehra and Jayme De Luca
Adiabatic approximation and parametric stochastic resonance in a bistable system with periodically driven barrier 1206
Andrey L. Pankratov and Mario Salerno
Nonlinear dielectric relaxation of polar molecules in a strong ac electric field: Steady state response 1211
J. L. Déjardin and Yu. P. Kalmykov
Thermostatistics of a *q*-deformed boson gas 1218
A. Lavagno and P. Narayana Swamy
Damage-spreading dynamic scaling for the Ising model on the Sierpinski gasket fractal 1227
C. Argolo, A. Mariz, M. Lyra, and S. Miyazima
Reversible random sequential adsorption of dimers on a triangular lattice 1232
R. S. Ghaskadvi and Michael Dennin
Simulation of multilane freeway traffic with detailed rules deduced from microscopic driving behavior 1239
M. Goldbach, A. Eidmann, and A. Kittel
Delayed stochastic systems 1247
Toru Ohira and Toshiyuki Yamane
Analytical results for random walk persistence 1258
Clément Sire, Satya N. Majumdar, and Andreas Rüdinger
Static $A+B\rightarrow 0$ annihilation process in arbitrary dimension 1270
B. Bonnier

Chaos and nonlinear dynamical systems

Three-dimensional effects in directional solidification in Hele-Shaw cells: Nonlinear evolution and pattern selection 1275
V. S. Ajaev and S. H. Davis
Diagrammatic approach for open chaotic systems 1285
Oded Agam
Numerical investigation of the effects of classical phase space structure on a quantum system with decoherence 1299
G. Ball, K. Vant, and N. Christensen
Field-induced transitions and spatial chaos in the classical *XY* spin chain 1312
Radha Balakrishnan and Mitaxi Mehta
Strange attractor for the renormalization flow for invariant tori of Hamiltonian systems with two generic frequencies 1320
C. Chandre and H. R. Jauslin

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 61, NUMBER 2 FEBRUARY 2000

One-dimensional dynamics for traveling fronts in coupled map lattices 1329
R. Carretero-González, D. K. Arrowsmith, and F. Vivaldi
Lyapunov exponents and Kolmogorov-Sinai entropy for a high-dimensional convex billiard 1337
Thomas Papenbrock
Linear and nonlinear time series analysis of the black hole candidate Cygnus *X*-1 1342
Jens Timmer, Udo Schwarz, Henning U. Voss, Ingo Wardinski, Tomaso Belloni, Günther Hasinger, Michael van der Klis, and Jürgen Kurths
Estimating generating partitions of chaotic systems by unstable periodic orbits 1353
Ruslan L. Davidchack, Ying-Cheng Lai, Erik M. Bollt, and Mukeshwar Dhamala
Control of transient chaos in tent maps near crisis. I. Fixed point targeting 1357
C. M. Place and D. K. Arrowsmith
Control of transient chaos in tent maps near crisis. II. Periodic orbit targeting 1369
C. M. Place and D. K. Arrowsmith
Karhunen-Loève local characterization of spatiotemporal chaos in a reaction-diffusion system 1382
Matthias Meixner, Scott M. Zoldi, Sumit Bose, and Eckehard Schöll
Intermittency and dynamical chaos in reversible spontaneous emission 1386
S. V. Prants

Classical fluids

Extended local balance model of turbulence and Couette-Taylor flow 1390
A. M. Balonishnikov
Probability distribution functions of derivatives and increments for decaying Burgers turbulence 1395
J. Bec and U. Frisch
Logarithmically slow expansion of hot bubbles in gases 1403
Baruch Meerson, Pavel V. Sasorov, and Ken Sekimoto
Decaying magnetohydrodynamics: Effects of initial conditions 1407
Abhik Basu
Anomalous diffusion with absorption: Exact time-dependent solutions 1417
German Drazer, Horacio S. Wio, and Constantino Tsallis
Spinodal decomposition of two-dimensional fluid mixtures: A spectral analysis of droplet growth 1423
H. Furukawa
Structure and dynamics of nanofluids: Theory and simulations to calculate viscosity 1432
Liudmila A. Pozhar
Small scale intermittency and bursting in a turbulent channel flow 1447
Miguel Onorato, Roberto Camussi, and Gaetano Iuso
Shear-thinning-induced chaos in Taylor-Couette flow 1455
Nariman Ashrafi and Roger E. Khayat
Trapped Rossby waves 1468
Detlev Müller and Ernst Maier-Reimer
Effect of slow compression on the linear stability of an accelerated shear layer 1486
John D. Ramshaw
Ultrasound scattering and the study of vortex correlations in disordered flows 1491
Denis Boyer and Fernando Lund
Luminescence from acoustic-driven laser-induced cavitation bubbles 1497
Claus-Dieter Ohl
Cavity formation and the drying transition in the Lennard-Jones fluid 1501
David M. Huang and David Chandler
Thermal and inertial modes of convection in a rapidly rotating annulus 1507
David Pino, Isabel Mercader, and Marta Net

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 61, NUMBER 2 FEBRUARY 2000

Analysis of inelastic x-ray scattering spectra of low-temperature water 1518
C. Y. Liao, S. H. Chen, and F. Sette
Self-organization in nonlinear wave turbulence 1527
Richard Jordan and Christophe Josserand

Liquid crystals

Viscoelastic theory for nematic interfaces 1540
Alejandro D. Rey
Local measurement of the zenithal anchoring strength 1550
João G. Fonseca and Yves Galerne
Conformational dynamics of a metallomesogen studied by ^{2}H-NMR spectroscopy 1559
Ronald Y. Dong, C. R. Morcombe, L. Calucci, M. Geppi, and C. A. Veracini
Fréedericksz transition in polymer-stabilized nematic liquid crystals 1567
Rui-Qing Ma and Deng-Ke Yang
Curvature energy of a focal conic domain with arbitrary eccentricity 1574
Maurice Kleman and Oleg D. Lavrentovich
Electroclinic liquid crystals with large induced tilt angle and small layer contraction 1579
M. S. Spector, P. A. Heiney, J. Naciri, B. T. Weslowski, D. B. Holt, and R. Shashidhar
Effect of optical purity on the critical heat capacity at the smectic-*A*–(chiral)–smectic-*C* transition in an antiferroelectric liquid crystal 1585
Kenji Ema, Masashi Kanai, Haruhiko Yao, Yoichi Takanishi, and Hideo Takezoe
Synchrotron x-ray study of the smectic layer directional instability 1593
I. Dierking, B. Glüsen, S. T. Lagerwall, and C. K. Ober
Statistical mechanics of vacancy and interstitial strings in hexagonal columnar crystals 1599
Shilpa Jain and David R. Nelson
Effects of fluctuations in the orientational order parameter in the cyanobiphenyl (*n*CB) homologous series 1616
M. Marinelli and F. Mercuri
Dynamic light scattering as a probe of orientational dynamics in confined liquid crystals 1622
A. Mertelj and M. Čopič

Complex fluids, polymers, and granular materials

Diffusion-limited aggregation: A relationship between surface thermodynamics and crystal morphology 1629
Vladislav A. Bogoyavlenskiy and Natasha A. Chernova
Nonlinear Poisson-Boltzmann theory of a Wigner-Seitz model for swollen clays 1634
R. J. F. Leote de Carvalho, E. Trizac, and J.-P. Hansen
Strong phase separation in a model of sedimenting lattices 1648
Rangan Lahiri, Mustansir Barma, and Sriram Ramaswamy
Hydrodynamic-flow-driven wetting in thin film polymer blends: Growth kinetics and morphology 1659
Howard Wang and Russell J. Composto
Phase diagram for morphological transitions of wetting films on chemically structured substrates 1664
C. Bauer and S. Dietrich
Threshold criterion for wetting at the triple point 1670
S. Curtarolo, G. Stan, M. J. Bojan, M. W. Cole, and W. A. Steele
Photon correlation spectroscopy: X rays versus visible light 1676
Dirk O. Riese, Willem L. Vos, Gerard H. Wegdam, Frank J. Poelwijk, Douglas L. Abernathy, and Gerhard Grübel
Potential energy landscape and long-time dynamics in a simple model glass 1681
L. Angelani, G. Parisi, G. Ruocco, and G. Viliani

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 61, NUMBER 2 FEBRUARY 2000

Phase diagram of highly asymmetric binary mixtures: A study of the role of attractive forces from the effective one-component approach 1692
J. Clément-Cottuz, S. Amokrane, and C. Regnaut
Flexible polymers and thin rods far from equilibrium: Buckling dynamics 1703
Leonardo Golubovic, Dorel Moldovan, and Anatoli Peredera
Self-diffusion in granular gases 1716
Nikolai V. Brilliantov and Thorsten Pöschel
Heterogeneous relaxation patterns in supercooled liquids studied by solvation dynamics 1722
Hauke Wendt and Ranko Richert
Replica field theory for a polymer in random media 1729
Yadin Y. Goldschmidt
Glass transitions and dynamics in thin polymer films: Dielectric relaxation of thin films of polystyrene 1743
K. Fukao and Y. Miyamoto
Capacitive scanning dilatometry and frequency-dependent thermal expansion of polymer films 1755
C. Bauer, R. Böhmer, S. Moreno-Flores, R. Richert, H. Sillescu, and D. Neher
Cahn-Hilliard theory for unstable granular fluids 1765
T. P .C. van Noije and M. H. Ernst
Dynamic scaling approach to glass formation 1783
Ralph H. Colby
Characteristics of driven polymer surfaces: Growth and roughness 1793
Grace M. Foo and R. B. Pandey
Molecular mobility in polymer thin films 1800
K. C. Tseng, N. J. Turro, and C. J. Durning

Biological physics

Nonlinear modeling technique for the analysis of DNA chains 1812
J. Barral P., A. Hasmy, J. Jiménez, and A. Marcano
Aperiodic stochastic resonance in a hysteretic population of cardiac neurons 1816
G. C. Kember, G. A. Fenton, K. Collier, and J. A. Armour
Periodic oscillatory solution of bidirectional associative memory networks with delays 1825
Jinde Cao and Lin Wang
Exhibition of intrinsic properties of certain systems in response to external disturbances 1829
P. S. Landa and A. Rabinovitch
Thouless-Anderson-Palmer equations for neural networks 1839
Maoz Shamir and Haim Sompolinsky
Predicting filament drift in twisted anisotropy 1845
Marcel Wellner, Omer Berenfeld, and Arkady M. Pertsov
Large-scale cellular automata simulations of the immune system response 1851
M. Bernaschi, S. Succi, and F. Castiglione
Unifying framework for neuronal assembly dynamics 1855
J. Eggert and J. L. van Hemmen

Plasma physics

Electron Boltzmann kinetic equation averaged over fast electron bouncing and pitch-angle scattering for fast modeling of electron cyclotron resonance discharge 1875
I. Kaganovich, M. Mišina, S. V. Berezhnoi, and R. Gijbels
Rigid and differential plasma crystal rotation induced by magnetic fields 1890
U. Konopka, D. Samsonov, A. V. Ivlev, J. Goree, V. Steinberg, and G. E. Morfill
Measurement of the energy penetration depth into solid targets irradiated by ultrashort laser pulses 1899
M. Fraenkel, A. Zigler, Z. Henis, S. Eliezer, and N. E. Andreev

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 61, NUMBER 2 FEBRUARY 2000

Nitrogen atom energy distributions in a hollow-cathode planar sputtering magnetron 1904
Zhehui Wang, Samuel A. Cohen, David N. Ruzic, and M. J. Goeckner
Coulomb crystals in the harmonic lattice approximation 1912
D. A. Baiko, D. G. Yakovlev, H. E. De Witt, and W. L. Slattery
Dependence on the scattering angle of the electron temperature and electron density in Thomson-scattering measurements on an atmospheric-pressure plasma jet 1920
S. C. Snyder, D. M. Crawford, and J. R. Fincke
Variational principle approach to short-pulse laser-plasma interactions in three dimensions 1925
Brian J. Duda and W. B. Mori
Anomalous, quasilinear, and percolative regimes for magnetic-field-line transport in axially symmetric turbulence 1940
G. Zimbardo, P. Veltri, and P. Pommois
Experimental evidence of the effect of heat flux on Thomson scattering off ion acoustic waves 1949
F. Amiranoff, S. D. Baton, S. Hüller, V. Malka, A. Modena, Ph. Mounaix, N. Renard-Le Galloudec, C. Rousseaux, and M. Salvati
Optical mode structure of the plasma waveguide 1954
T. R. Clark and H. M. Milchberg
Measurement of the radiative cooling rates for high-ionization species of krypton using an electron beam ion trap 1966
R. Radtke, C. Biedermann, T. Fuchs, G. Fußmann, and P. Beiersdorfer

Physics of beams

Shock compression of condensed matter using intense beams of energetic heavy ions 1975
N. A. Tahir, D. H. H. Hoffmann, A. Kozyreva, A. Shutov, J. A. Maruhn, U. Neuner, A. Tauschwitz, P. Spiller, and R. Bock
Conditions for electron capture by an ultraintense stationary laser beam 1981
Q. Kong, Y. K. Ho, J. X. Wang, P. X. Wang, L. Feng, and Z. S. Yuan
Transition from amplified spontaneous emission to laser action in strongly scattering media 1985
H. Cao, J. Y. Xu, S.-H. Chang, and S. T. Ho

Classical physics, including nonlinear media

Exact description of photon migration in anisotropically scattering media 1990
V. N. Fomenko, F. M. Shvarts, and M. A. Shvarts
Stabilization of the Kerr effect by self-induced ionization: Formation of optical light spatially localized structures 1996
Thierry Lehner and Nicole Auby
Two-dimensional discrete breathers: Construction, stability, and bifurcations 2006
P. G. Kevrekidis, K. Ø. Rasmussen, and A. R. Bishop
Analytical solution for photorefractive screening solitons 2010
Wieslaw Królikowski, Barry Luther-Davies, Glen McCarthy, and Aleksander Bledowski
Coefficient of restitution for one-dimensional harmonic solids 2015
Anthony G. Basile and Randall S. Dumont
Parameters characterizing electromagnetic wave polarization 2024
T. Carozzi, R. Karlsson, and J. Bergman
Shaping of photorefractive two-wave coupling by fast phase modulation 2029
K. H. Ringhofer, V. P. Kamenov, B. I. Sturman, and A. Chernykh
Second-harmonic generation of the *n*th-order Bessel beam 2038
Desheng Ding and Jian-yu Lu

PHYSICAL REVIEW E THIRD SERIES, VOLUME 61, NUMBER 2 FEBRUARY 2000

Optical vortex solitons in parametric wave mixing 2042
Tristram J. Alexander, Yuri S. Kivshar, Alexander V. Buryak, and Rowland A. Sammut

Computational physics

Time step bias improvement in diffusion Monte Carlo simulations 2050
Massimo Mella, Gabriele Morosi, and Dario Bressanini
Optimized energy calculation in lattice systems with long-range interactions 2058
Michael Krech and Erik Luijten
Treatment of laser-induced thermal acoustics in the framework of discrete kinetic theory 2065
F. Hanser, W. Koller, and F. Schürrer
Solving the bound-state Schrödinger equation by reproducing kernel interpolation 2074
Xu-Guang Hu, Tak-San Ho, and Herschel Rabitz

BRIEF REPORTS

General methods of statistical physics

Coupled nonequilibrium growth equations: Self-consistent mode coupling using vertex renormalization 2086
Amit Kr. Chattopadhyay, Abhik Basu, and Jayanta K. Bhattacharjee
Ratio of canonical and microcanonical temperatures of a vibratory antiferromagnetic Ising chain 2089
Zhong-Zhu Liu, Jun Luo, and Cheng-Gang Shao
Large deviation function for the Eden model and universality within the one-dimensional Kardar-Parisi-Zhang class 2092
C. Appert
Coherent structure analysis of spatiotemporal chaos 2095
Peter Jung, Jichang Wang, Renate Wackerbauer, and Kenneth Showalter

Chaos and nonlinear dynamical systems

Ground state of a dipolar crystal 2099
Mark Gross and Cindy Wei

Classical fluids

Higher-order dynamics in lattice-based models using the Chapman-Enskog method 2103
Yue-Hong Qian and Ye Zhou
Structure of vortices in a Karman street behind a heated cylinder 2107
A. B. Ezersky, J. C. Lecordier, P. Paranthoën, and P. L. Soustov
Turbulent crossed fluxes in incompressible flows 2111
Pedro Sancho
Parallel flow in Hele-Shaw cells with ferrofluids 2114
José A. Miranda and Michael Widom
Time evolution of the eddy viscosity in two-dimensional Navier-Stokes flow 2118
Marta Chaves and Sílvio Gama

Complex fluids, polymers, and granular materials

Estimation of the intrinsic heterogeneity of ionic glass-forming melts 2121
V. Sh. Machavariani and A. Voronel

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 61, NUMBER 2 FEBRUARY 2000

Ultra-small-angle neutron scattering studies on phase separation of poly(vinyl alcohol) gels 2125
H. Takeshita, T. Kanaya, K. Nishida, K. Kaji, T. Takahashi, and M. Hashimoto

Plasma physics

Empirical bridge function for strongly coupled Yukawa systems 2129
William Daughton, Michael S. Murillo, and Lester Thode

Classical physics, including nonlinear media

Order parameter description of walk-off effect on pattern selection in degenerate optical parametric oscillators . . . 2133
Majid Taki, Maxi San Miguel, and Marco Santagiustina

Computational physics

Cascading parity-check error-correcting codes 2137
Ido Kanter and David Saad

COMMENTS

Comment on ''Critical behavior of the chain-generating function of self-avoiding walks on the Sierpinski gasket family: The Euclidean limit'' 2141
