THIRD SERIES, VOLUME 61, NUMBER 4
PARTS A AND B

CONTENTS

APRIL 2000

The Table of Contents is a total listing of Parts A and B.
Part A consists of pages R3283–3984, and Part B pages 3985–4674.

PART A

Note to Reader i

RAPID COMMUNICATIONS

General methods of statistical physics

Multifractal properties of the random resistor network R3283
M. Barthélémy, S. V. Buldyrev, S. Havlin, and H. E. Stanley

Fault tolerance in noise-enhanced propagation R3287
R. Perazzo, L. Romanelli, and R. Deza

Chaos and nonlinear dynamical systems

Spontaneous symmetry breaking in $U(N)$ invariant ensembles with a soft confinement potential R3291
M. P. Pato

Thermodynamic cross effects from dynamical systems R3295
László Mátyás, Tamás Tél, and Jürgen Vollmer

Analytic Lyapunov exponents in a classical nonlinear field equation R3299
Roberto Franzosi, Raoul Gatto, Giulio Pettini, and Marco Pettini

Complexity and Fisher information R3303
P.-M. Binder

Classical fluids

Numerical temperature measurement in far from equilibrium model systems R3306
András Baranyai

Liquid crystals

Alignment of liquid crystals on a photosensitive substrate studied by surface optical second-harmonic generation R3310
I. Drevenšek Olenik, M. W. Kim, A. Rastegar, and Th. Rasing

Computational physics

Calculating response functions in time domain with nonorthonormal basis sets R3314
Toshiaki Iitaka and Toshikazu Ebisuzaki

Copyright 2000 by The American Physical Society

ARTICLES

General methods of statistical physics

Friction and noise-induced coherent structures in boundary lubrication 3318
I. Tovstopyat-Nelip and H. G. E. Hentschel
von Neumann equations with time-dependent Hamiltonians and supersymmetric quantum mechanics 3325
Marek Czachor, Heinz-Dietrich Doebner, Monika Syty, and Krzysztof Wasylka
Universal critical behavior of aperiodic ferromagnetic models 3330
T. A. S. Haddad, S. T. R. Pinho, and S. R. Salinas
Pulsating wave propagation in reactive flows: Flow-distributed oscillations 3334
Mads Kærn and Michael Menzinger
Renormalization-group approach to the vulcanization transition 3339
Weiqun Peng and Paul M. Goldbart
Partition function of a spinor gas 3358
L. F. Lemmens, F. Brosens, and J. T. Devreese
Hard-spin mean-field theory: A systematic derivation and exact correlations in one dimension 3366
Alkan Kabakçıoğlu
Fluctuation dissipation ratio in the one-dimensional kinetic Ising model 3369
E. Lippiello and M. Zannetti
Discrete spin variables and critical temperature in deterministic models with glassy behavior 3375
Cristian Giardinà
Effect of anisotropy on the instability of crack propagation 3378
Péter Szelestey, Pekka Heino, János Kertész, and Kimmo Kaski
Finite-size scaling and conformal anomaly of the Ising model in curved space 3384
J. González
Kinetics of stochastically gated diffusion-limited reactions and geometry of random walk trajectories 3388
O. Bénichou, M. Moreau, and G. Oshanin
Self-healing pulse solution in a continuum model of fracture propagation 3407
Hiizu Nakanishi
Probability of dimer reassociation in two dimensions 3411
F. Montalenti and R. Ferrando
Statistical models for carbon-nitrogen film growth 3417
F. D. A. Aarão Reis and D. F. Franceschini
Single species diffusion-influenced reaction $A+A\rightarrow\alpha A$: Validity of the Smoluchowski approach 3426
Hyojoon Kim and Kook Joe Shin
Dependence of conductance on percolation backbone mass 3435
Gerald Paul, Sergey V. Buldyrev, Nikolay V. Dokholyan, Shlomo Havlin, Peter R. King, Youngki Lee, and H. Eugene Stanley
Proton model of ferroelectrics with tunneling in the static fluctuation approximation 3441
R. R. Nigmatullin, A. A. Khamzin, and H. B. Ghassib
Semiclassical time evolution of the density matrix and tunneling 3450
Joachim Ankerhold and Hermann Grabert
Self-organized evolution in a socioeconomic environment 3466
A. Arenas, A. Díaz-Guilera, C. J. Pérez, and F. Vega-Redondo
Variational density matrix method for warm, condensed matter: Application to dense hydrogen 3470
Burkhard Militzer and E. L. Pollock
Lattice-independent approach to thermal phase mixing 3483
Carmen J. Gagne and Marcelo Gleiser
Stochastic model of hysteresis 3490
L. Pál

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 61, NUMBER 4 APRIL 2000

Recursive graphical construction of Feynman diagrams in ϕ^4 theory: Asymmetric case and effective energy . . . 3501
Boris Kastening
Similarities of multiple fracturing on a neutron star and on the Earth . . . 3529
Vladimir G. Kossobokov, Vladimir I. Keilis-Borok, and Baolian Cheng
Traffic jams induced by fluctuation of a leading car . . . 3534
Takashi Nagatani
Nonequilibrium molecular dynamics simulations of heat flow in one-dimensional lattices . . . 3541
Fei Zhang, Dennis J. Isbister, and Denis J. Evans
Self-consistent effective-medium approximations with path integrals . . . 3547
Yves-Patrick Pellegrini and Marc Barthélémy
Interfaces with superroughness . . . 3559
Ning-Ning Pang and Wen-Jer Tzeng
Density waves in traffic flow . . . 3564
Takashi Nagatani
Heisenberg, Langevin, and current equations via the recurrence relations approach . . . 3571
M. Howard Lee
Dynamical temperature for spin systems . . . 3579
Wira Bahari Nurdin and Klaus-Dieter Schotte
Concentration profiles and reaction fronts in $A+B\rightarrow C$ type processes: Effect of background ions . . . 3583
T. Unger and Z. Rácz

Chaos and nonlinear dynamical systems

Communication through chaotic modeling of languages . . . 3590
Murilo S. Baptista, Epaminondas Rosa , Jr., and Celso Grebogi
Quality factor control in a lasing microcavity model . . . 3601
Ioana Triandaf and Ira B. Schwartz
Probabilistic-based approach to optimal filtering . . . 3610
A. Hannachi
Quantum transport through cantori . . . 3620
N. T. Maitra and E. J. Heller
Homoclinic chaos in vacuum Rabi oscillations of moving two-level atoms . . . 3632
S. V. Prants and L. E. Kon'kov
Intermittency transitions to strange nonchaotic attractors in a quasiperiodically driven Duffing oscillator . . . 3641
A. Venkatesan, M. Lakshmanan, A. Prasad, and R. Ramaswamy
Microwave study of quantum *n*-disk scattering . . . 3652
Wentao Lu, Lorenza Viola, Kristi Pance, Michael Rose, and S. Sridhar
Relaxation oscillations and negative strain rate sensitivity in the Portevin–Le Chatelier effect . . . 3664
S. Rajesh and G. Ananthakrishna
Relation between coupled map lattices and kinetic Ising models . . . 3675
Frank Schmüser, Wolfram Just, and Holger Kantz
Chaos and experimental resolution . . . 3685
P.-M. Binder and Milena C. Cuéllar
Diffractive corrections in the trace formula for polygonal billiards . . . 3689
E. Bogomolny, N. Pavloff, and C. Schmit
Synchronization of chaotic structurally nonequivalent systems . . . 3712
S. Boccaletti, D. L. Valladares, J. Kurths, D. Maza, and H. Mancini

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 61, NUMBER 4 APRIL 2000

Robust synchronization of chaotic systems 3716
Ljupco Kocarev, Ulrich Parlitz, and Reggie Brown
Stabilization of an unstable steady state in intracavity frequency-doubled lasers 3721
K. Pyragas, F. Lange, T. Letz, J. Parisi, and A. Kittel
Subharmonic autoresonance 3732
L. Friedland
Synchronization and control of coupled Ginzburg-Landau equations using local coupling 3736
Lutz Junge and Ulrich Parlitz
Farey sequences of spatiotemporal patterns in video feedback 3743
B. Essevaz-Roulet, P. Petitjeans, M. Rosen, and J. E. Wesfreid
Efficient implementation of the Gaussian kernel algorithm in estimating invariants and noise level from noisy time series data 3750
Dejin Yu, Michael Small, Robert G. Harrison, and Cees Diks
Traveling waves, two-phase fingers, and eutectic colonies in thin-sample directional solidification of a ternary eutectic alloy 3757
Silvère Akamatsu and Gabriel Faivre

Classical fluids

Convective structures in a two-layer gel-liquid excitable medium 3771
Vicente Pérez-Villar, Alberto P. Muñuzuri, and Vicente Pérez-Muñuzuri
Passive particle transport in three-vortex flow 3777
Leonid Kuznetsov and George M. Zaslavsky
Influence of through flow on binary fluid convection 3793
P. Büchel and M. Lücke
Hard-sphere solids near close packing: Testing theories for crystallization 3811
Benito Groh and Bela Mulder
Fluid Lagrangian approach to the classical-quantum transition 3823
Tzihong Chiueh
Heat conduction in one-dimensional nonintegrable systems 3828
Bambi Hu, Baowen Li, and Hong Zhao
Extensive experimental mapping of sonoluminescence parameter space 3832
Jeffrey A. Ketterling and Robert E. Apfel
Structure and thermodynamics of a ferrofluid monolayer 3838
E. Lomba, F. Lado, and J. J. Weis
Power law mass dependence of diffusion: A mode coupling theory analysis 3850
Sarika Bhattacharyya and Biman Bagchi
Multifractal structure of chaotically advected chemical fields 3857
Zoltán Neufeld, Cristóbal López, Emilio Hernández-García, and Tamás Tél
Lattice Boltzmann method for compressible flows with high Mach numbers 3867
Huidan Yu and Kaihua Zhao
Cumulant solution of the elastic Boltzmann transport equation in an infinite uniform medium 3871
W. Cai, M. Lax, and R. R. Alfano
Desorption transition at charged interfaces: Theoretical approach and experimental evidence 3877
J. Stafiej, D. di Caprio, and J. P. Badiali
Molecular approach to the interpretation of the dielectric relaxation spectrum of a molecular glass former 3884
M. A. González, E. Enciso, F. J. Bermejo, M. Jiménez-Ruiz, and M. Bée
Density-functional theory for an electrolyte confined by thin charged walls 3896
Douglas Henderson, Paweł Bryk, Stefan Sokołowski, and Darsh T. Wasan
Velocity-fluctuation-induced anomalous kinetics of the $A+A\rightarrow\varnothing$ reaction 3904
M. Hnatich and J. Honkonen

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 61, NUMBER 4 APRIL 2000

Burgers' turbulence with self-consistently evolved pressure 3912
J. Fleischer and P. H. Diamond

Liquid crystals

Intermolecular and intramolecular reorientations in nonchiral smectic liquid-crystalline phases studied by broadband dielectric spectroscopy 3926
J. Schacht, P. Zugenmaier, M. Buivydas, L. Komitov, B. Stebler, S. T. Lagerwall, F. Gouda, and F. Horii
Spontaneous deformations of the uniform director ground state induced by the surfacelike elastic terms in a thin planar nematic layer 3936
V. M. Pergamenshchik
Channel flow of smectic films 3942
T. Franosch, Shilpa Jain, and David R. Nelson
Computer simulation evidence of the transient planar state during the homeotropic to focal conic transition in cholesteric liquid crystals 3951
J. E. Anderson, P. Watson, T. Ernst, and P. J. Bos
Lifshitz point in the phase diagram of a ferroelectric liquid crystal in an external magnetic field 3961
M. Škarabot, R. Blinc, I. Muševič, A. Rastegar, and Th. Rasing
Growth and melting of the nematic phase: Sample thickness dependence of the Mullins-Sekerka instability 3969
Jordi Ignés-Mullol and Patrick Oswald
Chiral twisting of a smectic-*A* liquid crystal 3977
M. S. Spector, S. K. Prasad, B. T. Weslowski, R. D. Kamien, J. V. Selinger, B. R. Ratna, and R. Shashidhar

PART B

Note to Reader i

Complex fluids, polymers, and granular materials

Geometry and dynamics of invasion percolation with correlated buoyancy 3985
Jean Schmittbuhl, Alex Hansen, Harold Auradou, and Knut Jørgen Måløy
Three-dimensional dendrite-tip morphology at low undercooling 3996
Alain Karma, Youngyih H. Lee, and Mathis Plapp
Phase-separated composite films: Experiment and theory 4007
Tiezheng Qian, Jae-Hoon Kim, Satyendra Kumar, and P. L. Taylor
Fluid flow induced by nonuniform ac electric fields in electrolytes on microelectrodes. I. Experimental measurements 4011
N. G. Green, A. Ramos, A. González, H. Morgan, and A. Castellanos
Fluid flow induced by nonuniform ac electric fields in electrolytes on microelectrodes. II. A linear double-layer analysis 4019
A. González, A. Ramos, N. G. Green, A. Castellanos, and H. Morgan
Persistence exponents in a three-dimensional symmetric binary fluid mixture 4029
V. M. Kendon, M. E. Cates, and J.-C. Desplat
Melting transition in a quasi-two-dimensional colloid suspension: Influence of the colloid-colloid interaction 4036
Pallop Karnchanaphanurach, Binhua Lin, and Stuart A. Rice
Interpretation of static and dynamic neutron and light scattering from microemulsion droplets: Effects of shape fluctuations 4045
V. Lisy and B. Brutovsky
Grains and gas flow: Molecular dynamics with hydrodynamic interactions 4054
Sean McNamara, Eirik G. Flekkøy, and Knut Jørgen Måløy
Mechanisms for slow strengthening in granular materials 4060
W. Losert, J.-C. Géminard, S. Nasuno, and J. P. Gollub

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 61, NUMBER 4** **APRIL 2000**

Swirling granular solidlike clusters 4069
Michael A. Scherer, Karsten Kötter, Mario Markus, Eric Goles, and Ingo Rehberg
Topological effects in ring polymers. II. Influence of persistence length 4078
M. Müller, J. P. Wittmer, and M. E. Cates
Structural stability of simple classical fluids: Universal properties of the Lyapunov-exponent measure 4090
G. Malescio, P. V. Giaquinta, and Y. Rosenfeld
Depletion forces in colloidal mixtures 4095
J. M. Méndez-Alcaraz and R. Klein
Hierarchical model in multiphase flow 4100
Tohru Okuzono, Hirohisa Shibuya, and Masao Doi
Calculated properties of field-induced aggregates in ferrofluids 4107
F. Marty Ytreberg and Susan R. McKay
Structure and dynamics of magnetorheological fluids in rotating magnetic fields 4111
Sonia Melle, Gerald G. Fuller, and Miguel A. Rubio
Density mismatch in thin diblock copolymer films 4118
S. Martins, W. A. M. Morgado, M. S. O. Massunaga, and M. Bahiana
Orientational phase transitions in the hexagonal phase of a diblock copolymer melt under shear flow 4125
A. N. Morozov, A. V. Zvelindovsky, and J. G. E. M. Fraaije
Universal and nonuniversal features of glassy relaxation in propylene carbonate 4133
W. Götze and Th. Voigtmann
Clipped random wave analysis of isometric lamellar microemulsions 4148
Dawen Choy and Sow-Hsin Chen
Branching morphogenesis in a reaction-diffusion model 4156
Vincent Fleury
Spatiotemporal growth of faceted and curved single crystals 4161
Thein Kyu, Rujul Mehta, and Hao-Wen Chiu
Ferromagnetic liquid thin films under applied field 4171
S. Banerjee and M. Widom
Nonlinear waves in reaction-diffusion systems: The effect of transport memory 4177
K. K. Manne, A. J. Hurd, and V. M. Kenkre
Molecular dynamics study of the behavior of a single long chain polyethylene on a solid surface 4185
H. X. Guo, X. Z. Yang, and T. Li

Biological physics

Importance of quantum decoherence in brain processes 4194
Max Tegmark
Stochastic resonance tuned by correlations in neural models 4207
Jianfeng Feng and Brunello Tirozzi
Global exponential stability and periodic solutions of cellular neural networks with delay 4212
Hui Fang and Jibin Li
Method for efficient shape parametrization of fluid membranes and vesicles 4218
Malcolm I. G. Bloor and Michael J. Wilson
Stable tubular microexovesicles of the erythrocyte membrane induced by dimeric amphiphiles 4230
V. Kralj-Iglič, A. Iglič, H. Hägerstrand, and P. Peterlin
Fisher information and temporal correlations for spiking neurons with stochastic dynamics 4235
Jan Karbowski
Adhesive switching of membranes: Experiment and theory 4253
Robijn Bruinsma, Almuth Behrisch, and Erich Sackmann
Exact results and scaling properties of small-world networks 4268
R. V. Kulkarni, E. Almaas, and D. Stroud

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 61, NUMBER 4 APRIL 2000

Stochastic resonance in ion channels characterized by information theory 4272
Igor Goychuk and Peter Hänggi
Effect of protein shape on multibody interactions between membrane inclusions 4281
K. S. Kim, John Neu, and George Oster
Stochastic resonance in a statistical model of a time-integrating detector 4286
Ursula U. Müller and Lawrence M. Ward
Near-field diffraction tomography with diffuse photon density waves 4295
Xingde Li, Deva N. Pattanayak, Turgut Durduran, Joseph P. Culver, Britton Chance, and Arjun G. Yodh
Microwave-enhanced folding and denaturation of globular proteins 4310
Henrik Bohr and Jakob Bohr

Plasma physics

Dust-acoustic wave instabilities in collisional plasmas 4315
K. N. Ostrikov, S. V. Vladimirov, M. Y. Yu, and G. E. Morfill
Long range dicorrelated stopping of relativistic electrons in ultradense plasmas 4322
C. Deutsch and P. Fromy
Large scale instabilities in two-dimensional magnetohydrodynamics 4329
G. Boffetta, A. Celani, and R. Prandi
Induced plasma nonuniformities and wave vector cascade in the strong wave-plasma interaction 4336
Maurizio Lontano and Francesco Califano
Plasma rotation in a plasma generator 4347
H. Meyer, S. Klose, E. Pasch, and G. Fussmann
Nonrelativistic electromagnetic surface waves: Dispersion properties in a magnetized dusty electron-positron plasma 4357
Sang-Hoon Cho, Hee J. Lee, and Yong-soo Kim
Parametric instabilities of intense lasers from interaction with relativistic hot plasmas 4362
Z.-M. Sheng, K. Mima, Y. Sentoku, and K. Nishihara
Plasma formation in metallic wire *Z* pinches 4370
J. P. Chittenden, S. V. Lebedev, J. Ruiz-Camacho, F. N. Beg, S. N. Bland, C. A. Jennings, A. R. Bell, M. G. Haines, S. A. Pikuz, T. A. Shelkovenko, and D. A. Hammer
Laser pulse modulation instabilities in plasma channels 4381
P. Sprangle, B. Hafizi, and J. R. Peñano
Dosimetric measurements of electron and photon yields from solid targets irradiated with 30 fs pulses from a 14 TW laser 4394
M. Schnürer, R. Nolte, A. Rousse, G. Grillon, G. Cheriaux, M. P. Kalachnikov, P. V. Nickles, and W. Sandner
Time-resolved experimental and computational study of two-photon laser-induced fluorescence in a hydrogen plasma 4402
H. W. P. van der Heijden, M. G. H. Boogaarts, S. Mazouffre, J. A. M. van der Mullen, and D. C. Schram
Magnetic field generation from self-consistent collective neutrino-plasma interactions 4410
A. J. Brizard, H. Murayama, and J. S. Wurtele
Rapid dissipation of magnetic fields due to the Hall current 4422
S. I. Vainshtein, S. M. Chitre, and A. V. Olinto

Physics of beams

Effectiveness of rf phase modulation for increasing bunch length in electron storage rings 4431
F. Orsini and A. Mosnier
Integral method to study transition radiation from surfaces with arbitrary profile 4441
Y. Takakura and O. Haeberlé

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 61, NUMBER 4 APRIL 2000

Coupling of symmetric and asymmetric modes in a high-power, high-efficiency traveling-wave amplifier 4445
S. Banna, L. Schächter, J. A. Nation, and P. Wang
High efficiency and wideband gyro-traveling-wave-tube amplifier 4450
Yunyuan Yang and Wu Ding

Classical physics, including nonlinear media

Kinks in the discrete sine-Gordon model with Kac-Baker long-range interactions 4454
Serge F. Mingaleev, Yuri B. Gaididei, Eva Majerníková, and Serge Shpyrko
Plane-wave superpositions defined by orthonormal scalar functions on two- and three-dimensional manifolds 4462
G. N. Borzdov
Resonant modes of a bottle-shaped cavity and their effects in the response of finite and infinite gratings 4479
Ricardo A. Depine and Diana C. Skigin
Corrections to coupled mode theory for deep gratings 4491
Takeshi Iizuka and C. Martijn de Sterke
Amplification of a magnetic field in systems with a finite electric conductivity 4500
Yu. Dolinsky and T. Elperin
Dynamics of helical strips 4508
Alain Goriely and Patrick Shipman
Multiple scattering efficiency and optical extinction 4518
N. L. Swanson and D. B. Billard
Evidence of scattering anisotropy effects on boundary conditions of the diffusion equation 4523
G. Popescu, C. Mujat, and A. Dogariu
Approximate solutions and scaling transformations for quadratic solitons 4530
Andrey A. Sukhorukov
Femtosecond pulse propagation in air: Variational analysis 4540
N. Aközbek, C. M. Bowden, A. Talebpour, and S. L. Chin
Solitonic energy transfer in a coupled exciton-vibron system 4550
Dirk Hennig
Coherent backscattering of light in a magnetic field 4556
D. Lacoste and B. A. van Tiggelen

Computational physics

Diffusion Monte Carlo methods with a fixed number of walkers 4566
Roland Assaraf, Michel Caffarel, and Anatole Khelif
Theory of collision algorithms for gases and plasmas based on the Boltzmann equation and the Landau-Fokker-Planck equation 4576
A. V. Bobylev and K. Nanbu
Shadow mass and the relationship between velocity and momentum in symplectic numerical integration 4587
Jason Gans and David Shalloway
Monte Carlo simulations of the periodically forced autocatalytic $A+B\rightarrow 2B$ reaction 4593
G. Zvejnieks and V. N. Kuzovkov

BRIEF REPORTS

General methods of statistical physics

Nonlinear noninertial response of a Brownian particle in a tilted periodic potential to a strong ac force 4599
W. T. Coffey, J. L. Déjardin, and Yu. P. Kalmykov
Stochastic resonance in the Brusselator model 4603
V. V. Osipov and E. V. Ponizovskaya

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 61, NUMBER 4 APRIL 2000

Self-organized growth model for the quenched Herring-Mullin equation 4606
Kwangho Park and In-mook Kim
Barkhausen avalanches in anisotropic ferromagnets with 180° domain walls 4610
Bosiljka Tadić and Ulrich Nowak

Chaos and nonlinear dynamical systems

Numerical studies on the dynamics of the globally coupled maps with sequential updating 4614
Y. Jiang, A. Antillón, and J. Escalona
Desynchronization in coupled systems with quasiperiodic driving 4618
T. E. Vadivasova, O. V. Sosnovtseva, A. G. Balanov, and V. V. Astakhov
Stationary and drifting localized structures near a multiple bifurcation point 4622
Yu. A. Logvin, B. Schäpers, and T. Ackemann
Numerical study of a three-dimensional generalized stadium billiard 4626
Thomas Papenbrock

Classical fluids

Pressure of fluids and solids composed of particles interacting with a short-range repulsive potential 4629
Siegfried Hess and Martin Kröger

Liquid crystals

Mechanical theory of structural disjoining pressure in liquid crystal films 4632
Alejandro D. Rey
Structural force in a presmectic liquid 4636
P. Ziherl

Complex fluids, polymers, and granular materials

Structure of diblock copolymers in supercritical carbon dioxide and critical micellization pressure 4640
R. Triolo, A. Triolo, F. Triolo, D. C. Steytler, C. A. Lewis, R. K. Heenan, G. D. Wignall, and
J. M. DeSimone

Biological physics

Elimination of spiral waves in cardiac tissue by multiple electrical shocks 4644
A. V. Panfilov, Stefan C. Müller, Vladimir S. Zykov, and James P. Keener
Spatial curvature effects on molecular transport by diffusion 4648
J. Balakrishnan

Classical physics, including nonlinear media

Localized excitations and their thresholds 4652
P. G. Kevrekidis, K. Ø. Rasmussen, and A. R. Bishop
Interference phenomena in radiation of a charged particle moving in a system with one-dimensional
randomness 4656
Zh. S. Gevorkian and Th. M. Nieuwenhuizen

COMMENTS

Comment on ‘‘Walker diffusion method for calculation of transport properties of composite materials’’ 4659
In Chan Kim, Dinko Cule, and Salvatore Torquato
Comment on ‘‘Dynamically maintained steady-state pressure gradients’’ 4661
Todd L. Duncan

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 61, NUMBER 4** **APRIL 2000**

Reply to ''Comment on 'Dynamically maintained steady-state pressure gradients''' 4662
D. P. Sheehan

ERRATA

Erratum: Spin of Dirac's relativistic membrane [Phys. Rev. E **59**, 6286 (1999)] 4666
E. Stedile

Cumulative Author Index 4667
