THIRD SERIES, VOLUME 61, NUMBER 6
PARTS A AND B

CONTENTS

JUNE 2000

*The Table of Contents is a total listing of Parts A and B.
Part A consists of pages R6045–6654, and Part B pages 6655–7292.*

PART A

Note to Reader i

RAPID COMMUNICATIONS

General methods of statistical physics

- Domain segregation in a two-dimensional system in the presence of drift R6045
J. Bragard, P. L. Ramazza, F. T. Arecchi, S. Boccaletti, and L. Kramer
- Capillary-wave effects at critical wetting in type-I superconductors R6049
H. T. Dobbs and R. Blossey
- Synchronized traffic flow from a modified Lighthill-Whitman model R6052
Paul Nelson
- Simple deterministic self-organized critical system R6056
Maria de Sousa Vieira
- Multiscaling of energy correlations in the random-bond Potts model R6060
Jesper Lykke Jacobsen

Chaos and nonlinear dynamical systems

- Universal algebraic relaxation of velocity and phase in pulled fronts generating periodic or chaotic states R6063
Cornelis Storm, Willem Spruijt, Ute Ebert, and Wim van Saarloos

Classical fluids

- Density expansion for particle-particle correlations in time-dependent physical clusters R6067
Luis A. Pagnaloni and Fernando Vericat
- Scaling theory of three-dimensional spinodal turbulence R6071
V. M. Kendon
- Large-scale coherent rotation and oscillation in turbulent thermal convection R6075
X.-L. Qiu, S. H. Yao, and P. Tong

Complex fluids, polymers, and granular materials

- Generalizing the Debye-Hückel equation in terms of density functional integral R6079
H. Frusawa and R. Hayakawa
- Colloid-liquid-crystal composites: An unusual soft solid R6083
S. P. Meeker, W. C. K. Poon, J. Crain, and E. M. Terentjev

ARTICLES

General methods of statistical physics

High-temperature expansions of Bures and Fisher information priors	6087
Paul B. Slater	
Langevin equations with multiplicative noise: Resolution of time discretization ambiguities for equilibrium systems	6091
Peter Arnold	
Symmetric path integrals for stochastic equations with multiplicative noise	6099
Peter Arnold	
Coherence and stochastic resonance in a two-state system	6103
Benjamin Lindner and Lutz Schimansky-Geier	
Quantum tunneling fragmentation model	6111
Borko D. Stojić, M. A. F. Gomes, and Sadhan K. Adhikari	
Dynamic fracture in a discrete model of a brittle elastic solid	6120
Teresa Martín, Pep Español, Miguel A. Rubio, and Ignacio Zúñiga	
Random energy model at complex temperatures	6132
D. B. Saakian	
Statistical characterization of random electrostatic potentials	6136
M. Aldana, H. Larralde, and G. Martínez-Mekler	
Dynamic scaling in a ballistic deposition model for a binary system	6149
Hassan F. El-Nashar and Hilda A. Cerdeira	
Excitations for lattice ferromagnetic classical spin systems at high temperature: Noneven single-spin distributions	6156
Ricardo S. Schor and Michael O'Carroll	
Constrained systems and statistical distribution	6165
Simone Melchionna	
Binary collision model for quantum Brownian motion	6171
Stefan Tsonchev and Philip Pechukas	
Transport in two-dimensional scattering stochastic media: Simulations and models	6183
O. Haran, D. Shvarts, and R. Thieberger	
Interfacial coarsening dynamics in epitaxial growth with slope selection	6190
Dorel Moldovan and Leonardo Golubovic	
Experimental study of critical exponents of electrical conductivity in a two-dimensional continuum percolation system	6215
A. Okazaki, K. Horibe, K. Maruyama, and S. Miyazima	
Dynamical decimation renormalization-group technique: Kinetic Gaussian model on nonbranching, branching, and multibranching Koch curves	6219
Jian-Yang Zhu and Z. R. Yang	
Quantum phase transitions studied within the interacting boson model	6237
Pavel Cejnar and Jan Jolie	
Continued fraction solution for the radiative transfer equation in three dimensions	6248
Marián Boguñá, Josep M. Porrà, and Jaume Masoliver	
Thermodynamic properties of a solid exhibiting the energy spectrum given by the logistic map	6255
E. M. F. Curado and M. A. Rego-Monteiro	
Learning strategies for the maximally stable diluted binary perceptron	6261
D. Malzahn	
Thermodynamics of self-gravitating systems with softened potentials	6270
Eduardo Follana and Victor Laliena	

Correlated random band matrices: Localization-delocalization transitions	6278
Martin Janssen and Krystian Pracz	
Negative resistance and anomalous hysteresis in a collective molecular motor	6287
J. Buceta, J. M. Parrondo, C. Van den Broeck, and F. J. de la Rubia	
Elastic moduli, dislocation core energy, and melting of hard disks in two dimensions	6294
Surajit Sengupta, Peter Nielaba, and K. Binder	
Trapping by clusters of traps	6302
Yu. A. Makhnovskii, A. M. Berezhkovskii, D.-Y. Yang, S.-Y. Sheu, and S. H. Lin	
Subdiffusive transport close to thermal equilibrium: From the Langevin equation to fractional diffusion	6308
Ralf Metzler and Joseph Klafter	
Scaling of interfaces in brittle fracture and perfect plasticity	6312
Eira T. Seppälä, Vilho I. Räsänen, and Mikko J. Alava	
Evaluation of the smallest nonvanishing eigenvalue of the Fokker-Planck equation for Brownian motion in a potential: The continued fraction approach	6320
Yu. P. Kalmykov	
Critical behavior of a two-species reaction-diffusion problem	6330
J. E. de Freitas, L. S. Lucena, L. R. da Silva, and H. J. Hilhorst	
Phase transition in the Takayasu model with desorption	6337
Satya N. Majumdar, Supriya Krishnamurthy, and Mustansir Barma	
Long jumps in the strong-collision model	6344
R. Ferrando, F. Montalenti, R. Spadacini, and G. E. Tommei	
Nonequilibrium statistical mechanics of drifting particles	6351
Eric Bringuier	
Current reversals in ratchets driven by trichotomous noise	6359
Romi Mankin, Ain Ainsaar, and Eerik Reiter	
Long-time tracer diffusion of nonspherical Brownian particles	6368
F. de J. Guevara-Rodríguez and M. Medina-Noyola	
Cooling-rate effects in a model of glasses	6375
A. Lipowski and D. Johnston	
Potts fully frustrated model: Thermodynamics, percolation, and dynamics in two dimensions	6383
Giancarlo Franzese	
Semiclassical approximation to the partition function of a particle in D dimensions	6392
C. A. A. de Carvalho, R. M. Cavalcanti, E. S. Fraga, and S. E. Jorás	
Correlated molecular-field theory for Ising models	6399
G. M. Wysin and J. Kaplan	
Critical behavior of the annihilating random walk of two species with exclusion in one dimension	6404
Géza Ódor and Nóra Menyhár	
Floquet exponents of underdamped Josephson ladders: A comparison with predictions of the discrete sine-Gordon equation	6415
B. R. Trees and N. Hussain	
Effective field theory of the zero-temperature triangular-lattice antiferromagnet: A Monte Carlo study	6426
Hui Yin, Bulbul Chakraborty, and Nicholas Gross	
Chaos and nonlinear dynamical systems	
Quantum algorithmic integrability: The metaphor of classical polygonal billiards	6434
Giorgio Mantica	
Spectral properties of atoms in fields: A semiclassical analysis	6444
P. N. Walker and T. S. Monteiro	
Spatiotemporal chaos and nonequilibrium transitions in a model excitable medium	6448
Ashwin Pande and Rahul Pandit	

Dynamic algorithm for parameter estimation and its applications	6461
Anil Maybhate and R. E. Amritkar	
Phase dynamics of nearly stationary patterns in activator-inhibitor systems	6471
Aric Hagberg, Ehud Meron, and Thierry Passot	
Complete reduction of oscillators in resonance $p:q$	6477
Antonio Elipe	
Detecting unstable periodic orbits from transient chaotic time series	6485
Mukeshwar Dhamala, Ying-Cheng Lai, and Eric J. Kostelich	
Distribution of interspike times in noise-driven excitable systems	6490
M. C. Eguia and G. B. Mindlin	
Amplification of near-resonant signals via stochastic resonance in a chaotic CO ₂ laser	6500
V. N. Chizhevsky, R. Vilaseca, and R. Corbalán	
Chaos and fractals in geodesic motions around a nonrotating black hole with halos	6506
Alessandro P. S. de Moura and Patricio S. Letelier	
Dynamic stabilization in the double-well Duffing oscillator	6517
Sang-Yoon Kim and Youngtae Kim	
Quasiperiodicity and transition to chaos	6521
Junzhong Yang	
Fredholm methods for billiard eigenfunctions in the coherent state representation	6527
Fernando P. Simonotti and Marcos Saraceno	
Learning dynamics from nonstationary time series: Analysis of electroencephalograms	6538
Dmitrii Gribkov and Valentina Gribkova	
Classical fluids	
Theory of the lattice Boltzmann method: Dispersion, dissipation, isotropy, Galilean invariance, and stability	6546
Pierre Lallemand and Li-Shi Luo	
Multiscale correlation functions in strong turbulence	6563
Jahanshah Davoudi and M. Reza Rahimi Tabar	
Universality of probability distributions among two-dimensional turbulent flows	6568
Norbert Schorghofer	
Energy spectra of steady two-dimensional turbulent flows	6572
Norbert Schorghofer	
Effect of particle inertia on the viscous-convective subrange	6578
Christopher A. Jeffery	
Persistence of small-scale anisotropies and anomalous scaling in a model of magnetohydrodynamics turbulence ...	6586
N. V. Antonov, A. Lanotte, and A. Mazzino	
Structure and particle transport in second-order Stokes flow	6606
Russell G. Keanini	
Structure and rheology of binary mixtures in shear flow	6621
F. Corberi, G. Gonnella, and A. Lamura	
Viscous fingering in liquid crystals: Anisotropy and morphological transitions	6632
R. Folch, J. Casademunt, and A. Hernández-Machado	
Transition radiation and the origin of sonoluminescence	6639
Bjørn Jensen and Iver Brevik	

Numerical renormalization group of vortex aggregation in two-dimensional decaying turbulence: The role of three-body interactions	6644
Clément Sire and Pierre-Henri Chavanis	

PART B

Note to Reader	i
--------------------------	---

Liquid crystals

Exact banded patterns from a Doi-Marrucci-Greco model of nematic liquid crystal polymers	6655
M. Gregory Forest, Qi Wang, and Hong Zhou	
Magnetic-field-induced periodic deformations in planar nematic layers	6663
D. Krzyżański and G. Derfel	
Analysis of compression-induced chiral phase separation in Langmuir monolayers	6669
Wei Zhao, Chen-Xu Wu, and Mitsumasa Iwamoto	
Behavior of frustrated phase in ferroelectric and antiferroelectric liquid crystalline mixtures	6674
D. Pociecha, M. Glogarová, E. Gorecka, and J. Mieczkowski	
Complex nonlinear behavior in optically excited nematic liquid crystals	6678
G. Demeter	
Kinetics of layer-thinning transitions in overheated smectic films	6689
S. Pankratz, P. M. Johnson, A. Paulson, and C. C. Huang	
Model for the planar-homeotropic anchoring transition induced by <i>trans-cis</i> isomerization	6696
G. Barbero and V. Popa-Nita	
Optically guided mode study of nematic liquid crystal alignment on a zero-order grating	6699
B. T. Hallam and J. R. Sambles	

Complex fluids, polymers, and granular materials

Phase-field modeling of eutectic growth	6705
François Drolet, K. R. Elder, Martin Grant, and J. M. Kosterlitz	
Processes of microstructure coarsening at liquid phase sintering	6721
L. Anestiev and L. Froyen	
Micromechanics of magnetorheological suspensions	6732
Eric M. Furst and Alice P. Gast	
Binding of molecules to DNA and other semiflexible polymers	6740
Haim Diamant and David Andelman	
Surface instability in windblown sand	6750
Douglas A. Kurtze, Joseph A. Both, and Daniel C. Hong	
Nonhomogeneous textures and banded flow in a soft cubic phase under shear	6759
E. Eiser, F. Molino, G. Porte, and O. Diat	
Avalanches at rough surfaces	6765
G. C. Barker and Anita Mehta	
Morphological characterization of bicontinuous structures in polymer blends and microemulsions by the inverse-clipping method in the context of the clipped-random-wave model	6773
Hiroshi Jinnai, Yukihiro Nishikawa, Sow-Hsin Chen, Satoshi Koizumi, and Takeji Hashimoto	
Colloidal aggregation with mobile impurities	6781
A. AlSunaidi, M. Lach-hab, Estela Blaisten-Barojas, and Agustín E. González	
Probability distribution of the free energy of a directed polymer in a random medium	6789
Eric Brunet and Bernard Derrida	
Geometric origin of mechanical properties of granular materials	6802
Jean-Noël Roux	

Simulation of field-induced structural formation and transition in electromagnetorheological suspensions	6837
Zuowei Wang, Haiping Fang, Zhifang Lin, and Luwei Zhou	
Solid-phase structures of the Dzugutov pair potential	6845
J. Roth and A. R. Denton	
Multifractal behavior of linear polymers in disordered media	6858
Anke Ordemann, Markus Porto, H. Eduardo Roman, Shlomo Havlin, and Armin Bunde	
Longer time kinetics of collapse transition of polymer-surfactant complexes at interfaces near to collapse temperatures	6866
Peng Wei Zhu and Donald H. Napper	
Avoidance model for soft particles. II. Positional ordering of charged rods	6872
Eric M. Kramer and Judith Herzfeld	
Molecular wall effects: Are conditions at a boundary “boundary conditions”?	6879
Howard Brenner and Venkat Ganesan	
Cooperativity and spatial correlations near the glass transition: Computer simulation results for hard spheres and disks	6898
B. Doliwa and A. Heuer	
Long-range density fluctuations in orthoterphenyl as studied by means of ultrasmall-angle x-ray scattering	6909
A. Patkowski, Th. Thurn-Albrecht, E. Banachowicz, W. Steffen, P. Bösecke, T. Narayanan, and E. W. Fischer	
Compaction of rods: Relaxation and ordering in vibrated, anisotropic granular material	6914
Fernando X. Villarruel, Benjamin E. Lauderdale, Daniel M. Mueth, and Heinrich M. Jaeger	
Surprisingly short-ranged interactions in highly charged colloidal suspensions	6922
Richard V. Durand and Carl Franck	
Reorientational relaxation of a linear probe molecule in a simple glassy liquid	6934
W. Götze, A. P. Singh, and Th. Voigtmann	
Development and geometry of isotropic and directional shrinkage-crack patterns	6950
Kelly A. Shorlin, John R. de Bruyn, Malcolm Graham, and Stephen W. Morris	
Biological physics	
Descriptive parameter for photon trajectories in a turbid medium	6958
Amir H. Gandjbakhche and George H. Weiss	
Decay and slowing down of the multiquanta Davydov-like solitons in molecular chains	6963
Zoran Ivić, Željko Pržulj, and Dragan Kostić	
Unsupervised learning of binary vectors: A Gaussian scenario	6971
Mauro Copelli and Christian Van den Broeck	
Modeling study on the validity of a possibly simplified representation of proteins	6981
Jun Wang and Wei Wang	
Physics of the rhythmic applause	6987
Z. Nédá, E. Ravasz, T. Vicsek, Y. Brechet, and A. L. Barabási	
Simultaneous measurements of mobility, dispersion, and orientation of DNA during steady-field gel electrophoresis coupling a fluorescence recovery after photobleaching apparatus with a fluorescence detected linear dichroism setup	6993
B. Tinland, L. Meistermann, and G. Weill	
Plasma physics	
Multiscale recursion in dense hydrogen plasmas	6999
Stéphane Bagnier, Pierre Dallot, and Gilles Zérah	
Nonlinear magnetic electron tripolar vortices in streaming plasmas	7009
J. Vranješ, G. Marić, and P. K. Shukla	

Simulations of a meter-long plasma wakefield accelerator	7014
S. Lee, T. Katsouleas, R. Hemker, and W. B. Mori	
Stopping power of ions in a magnetized two-temperature plasma	7022
H. B. Nersisyan, M. Walter, and G. Zwicknagel	
Frequency modulation of the ion-acoustic instability	7034
H. Klostermann and Th. Pierre	

Physics of beams

Resonant diffraction radiation from an ultrarelativistic particle moving close to a tilted grating	7039
A. P. Potylitsyn, P. V. Karataev, and G. A. Naumenko	
Equilibrium orbit analysis in a free-electron laser with a coaxial wiggler	7046
B. Maraghechi, B. Farrokhi, J. E. Willett, and U.-H. Hwang	
Pulse propagation and optical-klystron free-electron-laser devices	7052
G. Dattoli, L. Mezi, and L. Bucci	
Optimization of Smith-Purcell radiation at very high energies	7057
Seth R. Trotz, J. H. Brownell, John E. Walsh, and George Doucas	

Classical physics, including nonlinear media

Solitons in spiral polymeric macromolecules	7065
A. V. Savin and L. I. Manevitch	
Role of pump diffraction on the stability of localized structures in degenerate optical parametric oscillators	7076
V́ctor J. Sánchez-Morcillo and Kestutis Staliunas	
Analytical estimate of stochasticity thresholds in Fermi-Pasta-Ulam and φ^4 models	7081
Antonio Ponno, Luigi Galgani, and Francesco Guerra	
Material equations for electromagnetism with toroidal polarizations	7087
V. M. Dubovik, M. A. Martsenyuk, and Bijan Saha	
Canonical perturbative approach to nonlinear systems with application to optical waves in layered Kerr media ...	7098
T. A. Laine and A. T. Friberg	
Transverse and longitudinal dynamics of nonlinear intramolecular excitations on multileg ladder lattices	7110
Oleksiy O. Vakhnenko and Michael J. Velgakis	
Soliton interactions in perturbed nonlinear Schrödinger equations	7121
James A. Besley, Peter D. Miller, and Nail N. Akhmediev	
Orthogonality relation for a three-dimensional scattering electromagnetic field in a dispersive medium	7134
Masahiro Agu and Jingbo Li	
Three-dimensional spinning solitons in the cubic-quintic nonlinear medium	7142
D. Mihalache, D. Mazilu, L.-C. Crasovan, B. A. Malomed, and F. Lederer	

Computational physics

Navier-Stokes simulation with constraint forces: Finite-difference method for particle-laden flows and complex geometries	7146
Kai Höfler and Stefan Schwarzer	
Concepts in computation of preequilibrium neutron emission from heavy ion reactions	7161
P. K. Sarkar and Maitreyee Nandy	
Computational method for general multicenter electronic structure calculations	7169
P. F. Batcho	

BRIEF REPORTS**General methods of statistical physics**

Nonlinearly coupled flows	7184
Martin Bier, Marcin Kostur, Imre Derényi, and R. Dean Astumian	
Exact equilibrium statistical mechanics of two particles interacting via Lennard-Jones and Morse potentials	7188
I. H. Umirzakov	
Cooperativity and resonances in periodically driven spin-boson systems	7192
Feng Shuang, Chen Yang, Houyu Zhang, and YiJing Yan	
Detailed characterization of log-periodic oscillations for an aperiodic Ising model	7196
R. F. S. Andrade	
Scaling transformation of random walk distributions in a lattice	7200
Fernando A. Oliveira, Bernardo A. Mello, and Isaac M. Xavier Jr.	
Short-time critical dynamics for the transverse Ising model	7204
M. Santos	
Origin of quasiperiodic dynamics in excitable media	7208
Ira B. Schwartz, Ioana Triandaf, Joseph M. Starobin, and Yuri B. Chernyak	

Chaos and nonlinear dynamical systems

Phase transition in globally coupled Rössler oscillators	7212
Hidetsugu Sakaguchi	
ac-driven phase-dependent directed diffusion	7215
Oleg Yevtushenko, Sergej Flach, and Klaus Richter	
Controlling global stochasticity in the standard map	7219
Ying Zhang and Yugui Yao	
Recovery of classically chaotic behavior in a noise-driven quantum system	7223
V. Milner, D. A. Steck, W. H. Oskay, and M. G. Raizen	

Classical fluids

Transition from the Couette-Taylor system to the plane Couette system	7227
Holger Faisst and Bruno Eckhardt	
Computer simulations of phase equilibrium for a fluid confined in a disordered porous structure	7231
L. Sarkisov and P. A. Monson	

Liquid crystals

Coupling between molecular vibrations and liquid crystalline order parameters	7235
M. Nöllmann and P. Etchegoin	

Complex fluids, polymers, and granular materials

Phase transition of n -alkane layers adsorbed on mica	7239
Nobuo Maeda, Mika M. Kohonen, and Hugo K. Christenson	

Biological physics

Spatial-temporal correlations in the process to self-organized criticality	7243
C. B. Yang, X. Cai, and Z. M. Zhou	

Plasma physics

Effect of a dipole moment on the wake potential of a dust grain in a flowing plasma	7246
Osamu Ishihara, S. V. Vladimirov, and N. F. Cramer	
Dust acoustic wave in a thermal dusty plasma	7249
P. K. Shukla	

Physics of beams

Laser-driven electron cyclotron autoresonance accelerator with production of an optically chopped electron beam	7252
J. L. Hirshfield and Changbiao Wang	

COMMENTS

Comment on "Photon transmission technique for studying multiple phase transitions in a liquid crystal"	7256
P. Etchegoin and M. Nöllmann	

ERRATA

Erratum: Aging of porous media following fluid invasion, freezing, and thawing [Phys. Rev. E 55 , R6348 (1997)]	7259
E. Salmon, M. Ausloos, and N. Vandewalle	
Erratum: Experimental observations of non-Gaussian behavior and stringlike cooperative dynamics in concentrated quasi-two-dimensional colloidal liquids [Phys. Rev. E 60 , 5725 (1999)]	7260
Andrew H. Marcus, Jeremy Schofield, and Stuart Rice	
Erratum: Dependence on the scattering angle of the electron temperature and electron density in Thomson-scattering measurements on an atmospheric-pressure plasma jet [Phys. Rev. E 61 , 1920 (2000)]	7261
S. C. Snyder, D. M. Crawford, and J. R. Fincke	

Cumulative Author Index	7262
