

CONTENTS - *Continued*

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 62, NUMBER 1

JULY 2000

Liquid crystals

- Interlayer molecular exchange in an antclinicly ordered chiral liquid crystal R37
Boštjan Zalar, Alan Gregorovič, and Robert Blinc

Complex fluids, polymers, and granular materials

- Stabilizing grafted colloids in a polymer melt: Favorable enthalpic interactions R41
Itamar Borukhov and Ludwik Leibler

Biological physics

- Unbinding transitions and phase separation of multicomponent membranes R45
Thomas R. Weikl, Roland R. Netz, and Reinhard Lipowsky

Plasma physics

- Intermittency and turbulence in a magnetically confined fusion plasma R49
V. Carbone, L. Sorriso-Valvo, E. Martines, V. Antoni, and P. Veltri

Classical physics, including nonlinear media

- Curvature-induced symmetry breaking in nonlinear Schrödinger models R53
Yu. B. Gaididei, S. F. Mingaleev, and P. L. Christiansen
Spatiotemporally localized solitons in resonantly absorbing Bragg reflectors R57
M. Blaauboer, G. Kurizki, and B. A. Malomed
Existence of internal modes of sine-Gordon kinks R60
Niurka R. Quintero, Angel Sánchez, and Franz G. Mertens

Computational physics

- Partitioning composite finite systems R64
A. S. Botvina, A. D. Jackson, and I. N. Mishustin

ARTICLES

General methods of statistical physics

- Precise determination of the void percolation threshold for two distributions of overlapping spheres 68
M. D. Rintoul
Probability distribution of the order parameter for the three-dimensional Ising-model universality class: A high-precision Monte Carlo study 73
M. M. Tsypin and H. W. J. Blöte
Three-dimensional Ising model in the fixed-magnetization ensemble: A Monte Carlo study 77
H. W. J. Blöte, J. R. Heringa, and M. M. Tsypin
Asymmetric exclusion process with next-nearest-neighbor interaction: Some comments on traffic flow and a nonequilibrium reentrance transition 83
T. Antal and G. M. Schütz
Lifetime enhancement of scroll rings by spatiotemporal fluctuations 94
V. Pérez-Muñuzuri, F. Sagués, and J. M. Sancho
Critical packing fraction of rectangular particles on the square lattice 100
Markus Porto and H. Eduardo Roman
Random walks in logarithmic and power-law potentials, nonuniversal persistence, and vortex dynamics in the two-dimensional XY model 103
A. J. Bray
