THIRD SERIES, VOLUME 62, NUMBER 2
PARTS A AND B

CONTENTS

AUGUST 2000

The Table of Contents is a total listing of Parts A and B.
Part A consists of pages R1461–2352, and Part B pages 2353–3018.

PART A

Note to Reader i

RAPID COMMUNICATIONS

General methods of statistical physics

Cluster update algorithm and recognition R1461
C. von Ferber and F. Wörgötter
Effective interactions between like-charged macromolecules R1465
Emmanuel Trizac
Multiplicity of ordered phases in frustrated systems obtained from hard-spin mean-field theory R1469
Hüseyin Kaya and A. Nihat Berker

Chaos and nonlinear dynamical systems

One-dimensional pattern formation with Galilean invariance near a stationary bifurcation R1473
P. C. Matthews and S. M. Cox

Liquid crystals

Tensor and complex anchoring in liquid crystals R1477
S. V. Shiyanovskii, A. Glushchenko, Yu. Reznikov, O. D. Lavrentovich, and J. L. West
Analysis of weak-anchoring effect in nematic liquid crystals R1481
Wei Zhao, Chen-Xu Wu, and Mitsumasa Iwamoto
Structural characterization of surface hexatic behavior in free-standing 4O.8 liquid-crystal films R1485
C. Y. Chao, T. C. Pan, C. F. Chou, and J. T. Ho

Complex fluids, polymers, and granular materials

Non-Gaussian velocity distributions in excited granular matter in the absence of clustering R1489
A. Kudrolli and J. Henry
Adsorption hysteresis in nanopores R1493
Alexander V. Neimark, Peter I. Ravikovitch, and Aleksey Vishnyakov
Further evidence of spinodal decomposition during the induction period of polymer crystallization: Time-resolved small-angle x-ray scattering prior to crystallization of poly(ethylene naphthalate) R1497
G. Matsuba, T. Kanaya, M. Saito, K. Kaji, and K. Nishida

Copyright 2000 by The American Physical Society

(Continued)

1063-651X(200008)62:2:A;1-V

PHYSICAL REVIEW E THIRD SERIES, VOLUME 62, NUMBER 2 AUGUST 2000

Classical physics, including nonlinear media

Undulated blistering during thin film delamination R1501
Philippe Peyla
Azimuthal instability of spinning spatiotemporal solitons R1505
D. Mihalache, D. Mazilu, L.-C. Crasovan, B. A. Malomed, and F. Lederer

ARTICLES

General methods of statistical physics

Damped stochastic system driven by colored noise: Analytical solution by a path integral approach 1509
Chitralekha Mahanta and T. G. Venkatesh
Bound states in the transfer matrix spectrum for general lattice ferromagnetic spin systems at high temperature 1521
Ricardo S. Schor and Michael O'Carroll
Distribution of the determinant of a random real-symmetric matrix from the Gaussian orthogonal ensemble 1526
R. Delannay and G. Le Caër
Recursive graphical construction of Feynman diagrams and their multiplicities in ϕ^4 and $\phi^2 A$ theory 1537
Hagen Kleinert, Axel Pelster, Boris Kastening, and Michael Bachmann
Dynamics of structural models with a long-range interaction: Glassy versus nonglassy behavior 1560
V. G. Rostiashvili and T. A. Vilgis
Statistical physics of regular low-density parity-check error-correcting codes 1577
Tatsuto Murayama, Yoshiyuki Kabashima, David Saad, and Renato Vicente
Equilibrium and dynamical properties of the axial next-nearest-neighbor Ising chain at the multiphase point 1592
Abhishek Dhar, B. Sriram Shastry, and Chandan Dasgupta
Ordering dynamics of Heisenberg spins with torque: Crossover, spin waves, and defects 1601
Jayajit Das and Madan Rao
Scale-dependent dimension in the forest fire model 1613
Kan Chen and Per Bak
Learning and generation of long-range correlated sequences 1617
A. Priel and I. Kanter
Distributions and size scalings for strength in a one-dimensional random lattice with load redistribution to nearest and next-nearest neighbors 1622
S. Leigh Phoenix and Irene J. Beyerlein
Short-range particle correlations in a dilute Bose gas 1646
A. Yu. Cherny and A. A. Shanenko
Largest cluster in subcritical percolation 1660
Martin Z. Bazant
Elastic behavior in a supercooled liquid: Analysis of viscoelasticity using an extended mode coupling model 1670
Shankar P. Das
Class of integrable diffusion-reaction processes 1674
M. Alimohammadi and N. Ahmadi
Nonlinear Dirac and diffusion equations in $1+1$ dimensions from stochastic considerations 1683
K. Maharana
Amorphous thin film growth: Minimal deposition equation 1691
Martin Raible, Stefan J. Linz, and Peter Hänggi
Conformal dynamics of fractal growth patterns without randomness 1706
Benny Davidovitch, M. J. Feigenbaum, H. G. E. Hentschel, and Itamar Procaccia
Interface dynamics from experimental data 1716
Achille Giacometti and Maurice Rossi

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 62, NUMBER 2** **AUGUST 2000**

Spin-type model for interacting agents with memory 1725
Y. Kamp
Slip pulses at a sheared frictional viscoelastic/nondeformable interface 1729
C. Caroli
Thermal, nonequilibrium phase space for networked computers 1738
Mark Burgess
Lévy diffusion in a force field, Huber relaxation kinetics, and nonequilibrium thermodynamics: *H* theorem for enhanced diffusion with Lévy white noise 1743
Marcel O. Vlad, John Ross, and Friedemann W. Schneider
Dynamics of fractal dimension during phase ordering of a geometrical multifractal 1764
Avner Peleg and Baruch Meerson
Generalized Langevin equation and recurrence relations 1769
M. Howard Lee
Singularity spectra of rough growing surfaces from wavelet analysis 1773
M. Ahr and M. Biehl
Competing spatial and temporal instabilities in a globally coupled bistable semiconductor system near a codimension-two bifurcation 1778
S. Bose, P. Rodin, and E. Schöll
Canonical deformations of surfaces of equilibrium states in thermodynamic phase space 1790
Jacek Jurkowski
Short-time dynamics of a metamagnetic model 1799
M. Santos and W. Figueiredo
Congested traffic states in empirical observations and microscopic simulations 1805
Martin Treiber, Ansgar Hennecke, and Dirk Helbing
Universal features of the order-parameter fluctuations: Reversible and irreversible aggregation 1825
Robert Botet and Marek Płoszajczak
Evolution of networks with aging of sites 1842
S. N. Dorogovtsev and J. F. F. Mendes
Coherent resonance in a one-way coupled system 1846
Yongjun Jiang and Houwen Xin
Noise in hysteretic systems and stochastic processes on graphs 1850
M. I. Freidlin, I. D. Mayergoyz, and R. Pfeiffer
Test of molecular mode coupling theory for general rigid molecules 1856
C. Theis, F. Sciortino, A. Latz, R. Schilling, and P. Tartaglia
Relevance of memory in minority games 1862
Damien Challet and Matteo Marsili
Stochastic resonance in a bistable system subject to multiplicative and additive noise 1869
Ya Jia, Si-ning Yu, and Jia-rong Li
Variational theory of activated rate processes for an arbitrary barrier 1879
Alexander N. Drozdov
Renormalization group analysis of the anisotropic nonlocal Kardar-Parisi-Zhang equation with spatially correlated noise 1893
Youngkyun Jung, Kwangho Park, Hyun-Joo Kim, and In-mook Kim

Chaos and nonlinear dynamical systems

Analyzing symmetry breaking within a chaotic quantum system via Bayesian inference 1897
C. I. Barbosa and H. L. Harney
Inverse cascade avalanche model with limit cycle exhibiting period doubling, intermittency, and self-similarity 1905
S. C. Chapman

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 62, NUMBER 2** **AUGUST 2000**

Symbolic approach for measuring temporal ''irreversibility'' 1912
C. S. Daw, C. E. A. Finney, and M. B. Kennel
Frequency and width crossing of two interacting resonances in a microwave cavity 1922
M. Philipp, P. von Brentano, G. Pascovici, and A. Richter
Fluctuation-dissipation relationship in chaotic dynamics 1927
Bidhan Chandra Bag and Deb Shankar Ray
Impact of isospin breaking on the distribution of transition probabilities 1936
C. I. Barbosa, T. Guhr, and H. L. Harney
Optimal periodic orbits of continuous time chaotic systems 1950
Tsung-Hsun Yang, Brian R. Hunt, and Edward Ott
Accuracy of chaos synchronization in Nd:YVO_4 microchip lasers 1960
A. Uchida, T. Ogawa, M. Shinozuka, and F. Kannari
Chaos-hyperchaos transition 1972
Tomasz Kapitaniak, Yuri Maistrenko, and Svitlana Popovych
Leading Ruelle resonances of chaotic maps 1977
Galya Blum and Oded Agam
Symmetry-breaking on-off intermittency under modulation: Robustness of supersensitivity, resonance, and information gain 1983
Bambi Hu and Changsong Zhou
Phase locking effect and current reversals in deterministic underdamped ratchets 1988
Maria Barbi and Mario Salerno
Critical point of tori collision in quasiperiodically forced systems 1995
Sergey P. Kuznetsov, Eireen Neumann, Arkady Pikovsky, and Igor R. Sataev
Signatures of quantum integrability and nonintegrability in the spectral properties of finite Hamiltonian matrices 2008
Vyacheslav V. Stepanov and Gerhard Müller
Dynamical entropy for systems with stochastic perturbation 2018
Andrzej Ostruszka, Prot Pakoński, Wojciech Słomczyński, and Karol Życzkowski[1,3,]
Grazing impact oscillations 2030
John de Weger, Willem van de Water, and Jaap Molenaar
Statistics of wave functions in coupled chaotic systems 2042
A. Tschersich and K. B. Efetov
Square billiard with a magnetic flux 2046
R. Narevich, R. E. Prange, and Oleg Zaitsev
Simple dynamical system with discrete bound states 2060
Jayme De Luca
Newhouse sinks in the self-similar bifurcation structure 2068
Binoy Krishna Goswami
Signature of dynamical localization in the resonance width distribution of wave-chaotic dielectric cavities 2078
Oleg A. Starykh, Philippe R. J. Jacquod, Evgenii E. Narimanov, and A. Douglas Stone
Escape from noisy intermittent repellers 2085
Debabrata Biswas
Fast nearest-neighbor searching for nonlinear signal processing 2089
Christian Merkwirth, Ulrich Parlitz, and Werner Lauterborn
Alternative technique for complex spectra analysis 2098
Pragya Shukla
Phase synchronization of two-dimensional lattices of coupled chaotic maps 2114
Bambi Hu and Zonghua Liu
Theory and applications of the systematic detection of unstable periodic orbits in dynamical systems 2119
Detlef Pingel, Peter Schmelcher, Fotis K. Diakonos, and Ofer Biham

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 62, NUMBER 2 AUGUST 2000

Controlling Hamiltonian chaos by adaptive integrable mode coupling 2135
Ying Zhang, Shigang Chen, and Yugui Yao

Classical fluids

Foundations of dissipative particle dynamics 2140
Eirik G. Flekkøy, Peter V. Coveney, and Gianni De Fabritiis
Single-bubble sonoluminescence: Shape stability analysis of collapse dynamics in a semianalytical approach 2158
Vladislav A. Bogoyavlenskiy
Nature of sonoluminescence: Noble gas radiation excited by hot electrons in cold water 2168
N. García, A. P. Levanyuk, and V. V. Osipov
Two-dimensional lattice liquids 2177
Santi Prestipino
Generalized hydrodynamics of binary liquids: Transverse collective modes 2188
Taras Bryk and Ihor Mryglod
Fixed points, stability, and intermittency in a shell model for advection of passive scalars 2200
Julien Kockelkoren and Mogens H. Jensen
Anisotropic scaling contributions to high-order structure functions in high-Reynolds-number turbulence 2206
Susan Kurien and Katepalli R. Sreenivasan
Anomalous diffusion associated with nonlinear fractional derivative Fokker-Planck-like equation: Exact time-dependent solutions 2213
Mauro Bologna, Constantino Tsallis, and Paolo Grigolini
Lattice Boltzmann method on composite grids 2219
Ching-Long Lin and Yong G. Lai
Cluster Monte Carlo study of multicomponent fluids of the Stillinger-Helfand and Widom-Rowlinson type 2226
Rongfeng Sun, Harvey Gould, J. Machta, and L. W. Chayes
Role of very-high-frequency excitation in single-bubble sonoluminescence 2233
Francisco J. Moraga, Rusi P. Taleyarkhan, Richard T. Lahey , Jr., and Fabian J. Bonetto
Electro-osmotically induced convection at a permselective membrane 2238
I. Rubinstein and B. Zaltzman

Liquid crystals

Deuteron NMR investigation of a photomechanical effect in a smectic-*A* liquid crystal 2252
Boštjan Zalar, Oleg D. Lavrentovich, Huairen Zeng, and Daniele Finotello
Electrical and electro-optical investigations of liquid crystal cells containing WO_3 thin films 2263
G. Strangi, E. Cazzanelli, N. Scaramuzza, C. Versace, and R. Bartolino
Ferrielectric liquid crystal subphase studied by polarized Fourier-transform infrared spectroscopy 2269
A. A. Sigarev, J. K. Vij, Yu. P. Panarin, and J. W. Goodby
Field-induced phase transitions in an antiferroelectric liquid crystal using the pyroelectric effect 2279
N. M. Shtykov, J. K. Vij, R. A. Lewis, M. Hird, and J. W. Goodby
Simulations of flow-induced director structures in nematic liquid crystals through Leslie-Ericksen equations. I. Computational methodology in two dimensions 2288
Antonino Polimeno, Laura Orian, Assis F. Martins, and Alexandre E. Gomes
Simulations of flow-induced director structures in nematic liquid crystals through Leslie-Ericksen equations. II. Interpretation of NMR experiments in liquid crystal polymers 2301
Assis F. Martins, Alexandre E. Gomes, Antonino Polimeno, and Laura Orian
Phase diagrams and morphology of polymer dispersed liquid crystals based on nematic-liquid-crystal–monofunctional-acrylate mixtures 2310
Frédérick Roussel, Jean-Marc Buisine, Ulrich Maschke, Xavier Coqueret, and Farida Benmouna
Influence of an external electric field on structure in surface-stabilized smectic-*C* chevron cells 2317
Nataša Vaupotič, Vladimir Grubelnik, and Martin Čopič

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 62, NUMBER 2 AUGUST 2000

Wetting behavior above the liquid-crystal–isotropic transition in a homologous series 2324
R. Lucht, Ch. Bahr, and G. Heppke
Comparison between the switching dynamics of homeotropic and planar cells of chiral smectic-*C* liquid crystals 2334
N. Pereda, J. Ortega, C. L. Folcia, and J. Etxebarria
Molecular theory of helical sense inversions in chiral nematic liquid crystals 2340
A. V. Emelyanenko, M. A. Osipov, and D. A. Dunmur

PART B

Note to Reader i

Complex fluids, polymers, and granular materials

Hydrodynamic theory of density relaxation in near-critical fluids 2353
Didier Bailly and Bernard Zappoli
Order parameter and interfacial tension of a colloid-polymer system 2369
B.-H. Chen, B. Payandeh, and M. Robert
Dynamical structure factor in disordered systems 2373
V. Martín-Mayor, G. Parisi, and P. Verrocchio
Dynamics of two-particle granular collisions on a surface 2380
Benjamin Painter and R. P. Behringer
Molecular correlations in a supercooled liquid 2388
L. Fabbian, A. Latz, R. Schilling, F. Sciortino, P. Tartaglia, and C. Theis
Using x-ray reflectivity to determine the structure of surfactant monolayers 2405
B. B. Luokkala, S. Garoff, and R. M. Suter
Numerical studies of domains and bubbles of Langmuir monolayers 2416
Kok-Kiong Loh and Joseph Rudnick
Shapes, contact angles, and line tensions of droplets on cylinders 2428
C. Bauer and S. Dietrich
Phenomenological glass model for vibratory granular compaction 2439
D. A. Head
Experimental study of the collision process of a grain on a two-dimensional granular bed 2450
François Rioual, Alexandre Valance, and Daniel Bideau
Critical light scattering in liquids 2460
G. Flossmann and R. Folk
Computation of dendritic microstructures using a level set method 2471
Yung-Tae Kim, Nigel Goldenfeld, and Jonathan Dantzig
Fluctuations in dispersion rheology 2475
T. S. Chow
Disjoining potential and spreading of thin liquid layers in the diffuse-interface model coupled to hydrodynamics 2480
Len M. Pismen and Yves Pomeau
Eccentric Poisson-Boltzmann cell model 2493
H. H. von Grünberg and L. Belloni
Phase behavior of a model of colloidal particles with a fluctuating internal state 2501
Richard P. Sear
Stress in frictionless granular material: Adaptive network simulations 2510
Alexei V. Tkachenko and Thomas A. Witten
Crystallization in a horizontally vibrated monolayer of spheres 2517
G. Straßburger and I. Rehberg

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 62, NUMBER 2 AUGUST 2000

Hydrodynamic theory for granular gases 2521
Rosa Ramírez, Dino Risso, Rodrigo Soto, and Patricio Cordero
Diffusion-limited aggregation as a Markovian process: Bond-sticking conditions 2531
Boaz Kol and Amnon Aharony

Biological physics

Analysis of a ''phase transition'' from tumor growth to latency 2547
P. P. Delsanto, A. Romano, M. Scalerandi, and G. P. Pescarmona
Interacting neural networks 2555
R. Metzler, W. Kinzel, and I. Kanter
Noise improves three-dimensional perception: Stochastic resonance and other impacts of noise to the perception of autostereograms 2566
T. Ditzinger, M. Stadler, D. Strüber, and J. A. S. Kelso
Electrostatic interaction between long, rigid helical macromolecules at all interaxial angles 2576
A. A. Kornyshev and S. Leikin
Analysis of correlations and search for evidence of deterministic chaos in rhythmic motor control by the human brain 2597
Sean Roberts, R. Eykholt, and Michael H. Thaut
Charge-reversal instability in mixed bilayer vesicles 2608
Yi Chen and Philip Nelson
Three-state neural network: From mutual information to the Hamiltonian 2620
David R. Carreta Dominguez and Elka Korutcheva
Associative memory retrieval induced by fluctuations in a pulsed neural network 2629
Takashi Kanamaru and Yoichi Okabe
Stochastic spreading of intracellular Ca^{2+} release 2636
Martin Falcke, Lev Tsimring, and Herbert Levine
Synchronous behavior of two coupled electronic neurons 2644
R. D. Pinto, P. Varona, A. R. Volkovskii, A. Szücs, Henry D. I. Abarbanel, and M. I. Rabinovich

Plasma physics

Cherenkov radiation of electromagnetic waves by electron beams in the absence of an external magnetic field . . . 2657
G. S. Nusinovich and Yu. P. Bliokh
Highly nonlinear, sign-varying shift of hydrogen spectral lines in dense plasmas 2667
A. Escarguel, E. Oks, J. Richou, and D. Volodko
Evidence of relativistic laser beam filamentation in back-reflected images 2672
K. A. Tanaka, M. M. Allen, A. Pukhov, R. Kodama, H. Fujita, Y. Kato, T. Kawasaki, Y. Kitagawa, K. Mima, N. Morio, H. Shiraga, M. Iwata, T. Miyakoshi, and T. Yamanaka
Model for cw laser collisionally induced fluorescence in low-temperature discharges 2678
R. S. Stewart, D. J. Smith, I. S. Borthwick, and A. M. Paterson
Time-resolved and time-averaged determination of the electron-ion collision frequency and electron stopping force in an intense laser field at critical plasma density 2684
Ahmed M. Al-khateeb
Model of particle growth in silane discharges 2690
Alan Gallagher
Nonlocal electron kinetics and densities of excited atoms in *S* and *P* striations 2707
Yu. B. Golubovskii, R. V. Kozakov, V. A. Maiorov, J. Behnke, and J. F. Behnke
Soft-x-ray emission dynamics in picosecond laser-produced plasmas 2721
L. A. Gizzi, A. Giulietti, O. Willi, and D. Riley

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 62, NUMBER 2 AUGUST 2000

Accuracy of K-shell spectra modeling in high-density plasmas 2728
S. H. Glenzer, K. B. Fournier, C. Decker, B. A. Hammel, R. W. Lee, L. Lours, B. J. MacGowan, and A. L. Osterheld
Influence of charge variation on particle oscillations in the plasma sheath 2739
A. V. Ivlev, U. Konopka, and G. Morfill
Parametric resonance in ideal magnetohydrodynamics 2745
T. V. Zaqarashvili
Equilibrium and levitation of dust in a collisional plasma with ionization 2754
S. V. Vladimirov and N. F. Cramer
Multistream model for quantum plasmas 2763
F. Haas, G. Manfredi, and M. Feix
Spatiotemporal laser perturbation of competing ionization waves in a neon glow discharge 2773
K.-D. Weltmann, M. E. Koepke, and C. A. Selcher

Physics of beams

Vortices in relativistic electron beams 2782
D. Jovanović, R. Fedele, and P. K. Shukla
Cold-fluid equilibrium for a corkscrewing elliptic beam in a variably focusing channel 2789
Renato Pakter and Chiping Chen
Nonlinear-resonance analysis of halo formation excited by beam-core oscillation 2797
Yoshito Shimosaki and Ken Takayama

Classical physics, including nonlinear media

Spontaneous symmetry breaking and switching in planar nonlinear optical antiwaveguides 2804
Boris V. Gisin, Arkady Kaplan, and Boris A. Malomed
Self-trapping of ''necklace-ring'' beams in self-focusing Kerr media 2810
Marin Soljačić and Mordechai Segev
Criteria for existence and stability of soliton solutions of the cubic-quintic nonlinear Schrödinger equation 2821
H. W. Schürmann and V. S. Serov
Dynamics of coupled gap solitons in diatomic lattices with cubic and quartic nonlinearities 2827
Bambi Hu, Guoxiang Huang, and Manuel G. Velarde
Photonic Hall effect of inactive Mie scatterers in a Faraday active matrix 2840
G. Düchs, A. Sparenberg, G. L. J. A. Rikken, and B. A. van Tiggelen
Electron-vibron–breather interaction 2846
Dirk Hennig
Diversity of discrete breathers observed in a Josephson ladder 2858
P. Binder, D. Abraimov, and A. V. Ustinov
Two-wave mixing in (111)-cut $Bi_{12}SiO_{20}$ and $Bi_{12}TiO_{20}$ crystals: Characterization and comparison with the general orientation 2863
V. P. Kamenov, Yi Hu, E. Shamonina, K. H. Ringhofer, and V. Ya. Gayvoronsky
Wave-beam coupling in quadratic nonlinear optical waveguides: Effects of nonlinearly induced diffraction 2871
A. D. Boardman, K. Marinov, D. I. Pushkarov, and A. Shivarova
Roughening of a propagating planar crack front 2878
J. A. Åström, M. J. Alava, and J. Timonen
Propagation of nonlinear pulses in chirped fiber gratings 2882
E. N. Tsoy and C. M. de Sterke
Electrostatic interaction between two charged dielectric spheres in contact 2891
James Q. Feng

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 62, NUMBER 2 AUGUST 2000

Computational physics

Two-dimensional hydrodynamic lattice-gas simulations of binary immiscible and ternary amphiphilic fluid flow through porous media 2898
J.-B. Maillet and Peter V. Coveney
Fast and stable method for simulating quantum electron dynamics 2914
Naoki Watanabe and Masaru Tsukada
Analysis and optimization of a diffuse photon optical tomography of turbid media 2924
David L. Everitt, Sung-po Wei, and X. D. Zhu
Numerical study of the spherically symmetric Gross-Pitaevskii equation in two space dimensions 2937
Sadhan K. Adhikari

BRIEF REPORTS

General methods of statistical physics

Quantum hopping models for kinetic processes 2945
Subinay Dasgupta
Nonlocal effects in the conserved Kardar-Parisi-Zhang equation 2949
Youngkyun Jung and In-mook Kim
Random bond Ising systems on a general hierarchical lattice: Exact inequalities 2952
Avishay Efrat and Moshe Schwartz
Depinning of an anisotropic interface in random media: The tilt effect 2955
K.-I. Goh, H. Jeong, B. Kahng, and D. Kim
Finite-size effects of two-particle diffusion-limited reactions 2959
Jae Woo Lee

Chaos and nonlinear dynamical systems

Synchronization of chaos in coupled systems 2963
Meng Zhan, Gang Hu, and Junzhong Yang

Classical fluids

Analytic solutions of the Rayleigh equation for linear density profiles 2967
C. Cherfils and O. Lafitte
Viscosity of liquid water from computer simulations with a polarizable potential model 2971
Umberto Balucani, John P. Brodholt, Pál Jedlovszky, and Renzo Vallauri

Liquid crystals

Spinodal dewetting of a nematic liquid crystal film 2974
F. N. Braun and H. Yokoyama

Complex fluids, polymers, and granular materials

Sol-gel particle growth studied using fluorescence anisotropy: An alternative to scattering techniques 2977
David J. S. Birch and Chris D. Geddes
Charge fluctuations on membrane surfaces in water 2981
Rebecca Menes, Philip Pincus, and Bean Stein
Rotating Hele-Shaw cells with ferrofluids 2985
José A. Miranda
