THIRD SERIES, VOLUME 62, NUMBER 4
PARTS A AND B

CONTENTS

OCTOBER 2000

The Table of Contents is a total listing of Parts A and B.
Part A consists of pages R4489–5172, and Part B pages 5173–5874.

PART A

Announcement: New Sectioning Scheme i
Announcement: Electronic-First Publication and Article Numbers ii
Note to Reader iv

RAPID COMMUNICATIONS

General methods of statistical physics

Selection of scales in pattern-forming dynamics R4489
Igor L. Kliakhandler

Statistical properties of share volume traded in financial markets R4493
Parameswaran Gopikrishnan, Vasiliki Plerou, Xavier Gabaix, and H. Eugene Stanley

Self-organization in populations of competing agents R4497
Alexei Vázquez

Reductive use of renormalization group R4501
K. Nozaki, Y. Oono, and Y. Shiwa

Chaos and nonlinear dynamical systems

Catastrophe of riddling R4505
Ying-Cheng Lai

One-side riddled basin below and beyond the blowout bifurcation R4509
H. L. Yang

Classical invariants and the quantum-classical link R4513
Diego A. Wisniacki and Eduardo Vergini

Gaussian unitary ensemble statistics in a time-reversal invariant microwave triangular billiard R4516
C. Dembowski, H.-D. Gräf, A. Heine, H. Rehfeld, A. Richter, and C. Schmit

Classical fluids

Effect of a vertical magnetic field on turbulent Rayleigh-Bénard convection R4520
S. Cioni, S. Chaumat, and J. Sommeria

Copyright 2000 by The American Physical Society

1063-651X(200010)62:4;A;1-F

PHYSICAL REVIEW E THIRD SERIES, VOLUME 62, NUMBER 4 OCTOBER 2000

Liquid crystals

Ferroelectric phases in a chiral bent-core smectic liquid crystal: Dielectric and optical second-harmonic generation measurements R4524
E. Gorecka, D. Pociecha, F. Araoka, D. R. Link, M. Nakata, J. Thisayukta, Y. Takanishi, K. Ishikawa, J. Watanabe, and H. Takezoe

Complex fluids, polymers, and granular materials

From waves to avalanches: Two different mechanisms of sandpile dynamics R4528
Mario De Menech and Attilio L. Stella

Plasma physics

Demonstration of ultrashort laser pulse amplification in plasmas by a counterpropagating pumping beam R4532
Y. Ping, I. Geltner, N. J. Fisch, G. Shvets, and S. Suckewer

Classical physics, including nonlinear media

Transmission regimes of periodic nonlinear optical structures R4536
Dmitry E. Pelinovsky, Lukasz Brzozowski, and Edward H. Sargent
Midinfrared scattering and absorption in Ge powder close to the Anderson localization transition R4540
J. Gómez Rivas, R. Sprik, A. Lagendijk, L. D. Noordam, and C. W. Rella

ARTICLES

General methods of statistical physics

Design of inhomogeneous materials with given structural properties 4544
I. S. Molchanov, S. N. Chiu, and S. A. Zuyev
Algorithmic complexity in the minority game 4553
R. Mansilla
Exact zeros of the partition function for a continuum system with double Gaussian peaks 4558
Julian Lee and Koo-Chul Lee
Absorbing-state phase transitions in fixed-energy sandpiles 4564
Alessandro Vespignani, Ronald Dickman, Miguel A. Muñoz, and Stefano Zapperi
Gravitational phase transitions in a one-dimensional spherical system 4583
V. Paige Youngkins and Bruce N. Miller
Calculation of ground-state entropies of highly frustrated systems on fractal lattices 4597
Fernando D. Nobre and Evaldo M. F. Curado
Nonmonotonic behavior of mobility in a multidimensional overdamped periodic system 4606
Jing-Dong Bao
Gauge cell method for simulation studies of phase transitions in confined systems 4611
Alexander V. Neimark and Aleksey Vishnyakov
Stochastic resonance driven by time-modulated correlated white noise sources 4623
Claudio J. Tessone, Horacio S. Wio, and Peter Hänggi
Systems with superabsorbing states 4633
Pablo I. Hurtado and Miguel A. Muñoz
Multispecies reaction-diffusion systems 4642
A. Aghamohammadi, A. H. Fatollahi, M. Khorrami, and A. Shariati
Ground-state entropy of the Potts antiferromagnet with next-nearest-neighbor spin-spin couplings on strips of the square lattice 4650
Shu-Chiuan Chang and Robert Shrock

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 62, NUMBER 4** **OCTOBER 2000**

Entropy and Wigner functions 4665
G. Manfredi and M. R. Feix
Phase transitions and noise cross-correlations in a model of directed polymers in a disordered medium 4675
Abhik Basu
Twist localizes three-dimensional patterns 4682
A. G. Rossberg
Effect of external force on the kinetics of diffusion-controlled escaping from a one-dimensional potential well ... 4688
A. I. Shushin
Polarizability fluctuations in dielectric materials with quenched disorder 4698
Z. G. Yu, Xueyu Song, and David Chandler
Ohta-Jasnow-Kawasaki approximation for nonconserved coarsening under shear 4702
Andrea Cavagna, Alan J. Bray, and Rui D. M. Travasso
Derivation of a two-generator framework of nonequilibrium thermodynamics for quantum systems 4720
Hans Christian Öttinger
Exact solution of return hysteresis loops in a one-dimensional random-field Ising model at zero temperature 4725
Prabodh Shukla
Relaxation processes in administered-rate pricing 4730
Raymond J. Hawkins and Michael R. Arnold
Phase diagram of congested traffic flow: An empirical study 4737
H. Y. Lee, H.-W. Lee, and D. Kim
Scaling behavior in explosive fragmentation 4742
A. Diehl, H. A. Carmona, L. E. Araripe, J. S. Andrade, Jr., and G. A. Farias
Bulk dynamics for interfacial growth models 4747
Cristóbal López, Pedro L. Garrido, and Francisco de los Santos
Dynamic scaling in one-dimensional cluster-cluster aggregation 4752
E. K. O. Hellén, T. P. Simula, and M. J. Alava
Microscopic expressions for the thermodynamic temperature 4757
Owen G. Jepps, Gary Ayton, and Denis J. Evans
Configurational temperature for systems with constraints 4764
L. Lue and D. J. Evans

Chaos and nonlinear dynamical systems

Relaxation to the invariant density for the kicked rotor 4769
Maxim Khodas, Shmuel Fishman, and Oded Agam
Scattering map for two black holes 4784
Alessandro P. S. de Moura and Patricio S. Letelier
High-order level-spacing distributions for mixed systems 4792
A. Y. Abul-Magd and M. H. Simbel
Complex dynamics of a spiral tip in the presence of an extrinsic local modulation 4799
Seong-min Hwang, Won Gyu Choe, and Kyoung J. Lee
Relation between stable orbits and quantum transmission resonance in ballistic cavities 4804
Y. Takagaki and K. H. Ploog
Coherence measure in Hamiltonian systems with many degrees of freedom 4809
Maira D'Alessandro, Andrea D'Aquino, and Alexander Tenenbaum
Linear and nonlinear measures predict swimming in the leech 4826
C. J. Cellucci, P. D. Brodfuehrer, R. Acera-Pozzi, H. Dobrovolny, E. Engler, J. Los, R. Thompson, and A. M. Albano
Integrated chaotic communication scheme 4835
Murilo S. Baptista, Elbert E. Macau, Celso Grebogi, Ying-Cheng Lai, and Epaminondas Rosa, Jr.

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 62, NUMBER 4 OCTOBER 2000

Straight-line stabilization 4846
Jian-min Mao, Liu Zengrong, and Yang Ling
Lyapunov spectra of Hamiltonian systems using reduced tangent dynamics 4850
K. Ramasubramanian and M. S. Sriram
Estimating the escape zone for a parametrically excited pendulum-type equation 4856
I. W. Stewart and T. R. Faulkner
Chapman-Enskog method and synchronization of globally coupled oscillators 4862
L. L. Bonilla
Bursts in the chaotic trajectory lifetimes preceding controlled periodic motion 4869
V. Paar and H. Buljan
Influence of diffraction on the spectrum and wave functions of an open system 4873
J. S. Hersch, M. R. Haggerty, and E. J. Heller
Nonlinear interaction of homogeneously oscillating domains in a planar gas discharge system 4889
C. Strümpel, Yu. A. Astrov, and H.-G. Purwins
Quantification of depth of anesthesia by nonlinear time series analysis of brain electrical activity 4898
G. Widman, T. Schreiber, B. Rehberg, A. Hoeft, and C. E. Elger

Classical fluids

Anomalous scaling in the anisotropic sectors of the Kraichnan model of passive scalar advection 4904
Itai Arad, Victor S. L'vov, Evgenii Podivilov, and Itamar Procaccia
Equilibrium and nonequilibrium fluctuations at the interface between two fluid phases 4920
Pietro Cicuta, Alberto Vailati, and Marzio Giglio
Pattern formation in Rayleigh-Bénard convection in a cylindrical container 4927
Sten Rüdiger and Fred Feudel
Nucleation burst in a coagulating system 4932
A. A. Lushnikov and M. Kulmala
Raman spectroscopy of hypersonic shock waves 4940
A. Ramos, B. Maté, G. Tejeda, J. M. Fernández, and S. Montero
Periodically kicked turbulence 4946
Detlef Lohse
Interaction of a vortex ring with the free surface of an ideal fluid 4950
V. P. Ruban
Localized finite-amplitude disturbances and selection of solitary waves 4959
I. L. Kliakhandler, A. V. Porubov, and M. G. Velarde
Heat capacity behavior in the critical region of the ionic binary mixture ethylammonium nitrate–*n*-octanol 4963
T. Heimburg, S. Z. Mirzaev, and U. Kaatze
Liquid drops and surface tension with smoothed particle applied mechanics 4968
S. Nugent and H. A. Posch
Fluid structure from density-functional theory 4976
Matthias Schmidt
Theory of the lattice Boltzmann method: Lattice Boltzmann models for nonideal gases 4982
Li-Shi Luo
Particle dispersion in synthetic turbulent flows 4997
R. Reigada, A. C. Martí, I. M. Sokolov, F. Sagués, and J. M. Sancho
Fluid of penetrable spheres: Testing the universality of the bridge functional 5006
Yaakov Rosenfeld, Matthias Schmidt, Martin Watzlawek, and Hartmut Löwen

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 62, NUMBER 4 OCTOBER 2000

Liquid crystals

Phase equilibria in an athermal solution of platelike particles 5011
Dagmara Sokolowska and Jozef K. Moscicki
Infrared spectroscopic study of molecular hydrogen bonding in chiral smectic liquid crystals 5027
Won Gun Jang, Cheol S. Park, K. H. Kim, Matthew A. Glaser, and Noel A. Clark
Nonlinear dynamics optically induced in nematic liquid crystals 5036
G. Russo, V. Carbone, and G. Cipparrone
Stability of equilibrium states for ferroelectric smectic-*C* liquid crystals in finite and infinite samples 5043
D. A. Anderson and I. W. Stewart
Bend elasticity of mixtures of V-shaped molecules in ordinary nematogens 5056
Mohammad Reza Dodge, Charles Rosenblatt, Rolfe G. Petschek, Mary E. Neubert, and Margaret E. Walsh
Shear-induced melting of smectic-*A* liquid crystals 5064
N. J. Mottram, T. J. Sluckin, S. J. Elston, and M. J. Towler
Topological defects in nematic droplets of hard spherocylinders 5081
Joachim Dzubiella, Matthias Schmidt, and Hartmut Löwen
Zigzag structures and domain walls in electroconvection of nematic liquid crystal 5092
H. Zhao and L. Kramer
Elasticity of rubber with smectic microstructure 5101
M. J. Osborne and E. M. Terentjev
Chiral hedgehog textures in two-dimensional *XY*-like ordered domains 5115
Kok-Kiong Loh, Isabelle Kraus, and Robert B. Meyer
Soft and nonsoft structural transitions in disordered nematic networks 5119
Nariya Uchida
Realignment of a smectic-*A* phase with applied electric field 5137
Alison Findon, Helen Gleeson, and John Lydon
Coupling between tilt and polar orders in liquid crystal phases formed from achiral bent shaped molecules 5143
Pierre Tolédano, Odair G. Martins, and Antonio M. Figueiredo Neto
Time-resolved infrared spectroscopy of molecule/binding site reorientation during ferroelectric liquid crystal electro-optic switching 5154
Won Gun Jang, Cheol S. Park, and Noel A. Clark
Nonlinear optical studies of liquid crystal alignment on a rubbed polyvinyl alcohol surface 5160
Xing Wei, Seok-Cheol Hong, Xiaowei Zhuang, Tomohisa Goto, and Y. R. Shen

PART B

Note to Reader i

Complex fluids, polymers, and granular materials

Ideal glass transitions for hard ellipsoids 5173
M. Letz, R. Schilling, and A. Latz
Axial and angular correlations between colloidal particles in narrow cylindrical pores 5179
M. Chávez-Páez, M. Medina-Noyola, and M. Valdez-Covarrubias
Quantifying glass transition behavior in ultrathin free-standing polymer films 5187
J. Mattsson, J. A. Forrest, and L. Börjesson
Casimir effect in critical films of binary liquid mixtures 5201
Ashis Mukhopadhyay and Bruce M. Law
Pore network as a model of porous media: Comparison between nonhierarchical and hierarchical organizations of pores 5216
Radim Vočka and Marc A. Dubois

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 62, NUMBER 4** **OCTOBER 2000**

Phase behavior of model mixtures of colloidal disks and polymers 5225
Martin A. Bates and Daan Frenkel
Herringbone ordering and lattice distortions in a planar-molecule model for Langmuir monolayers 5230
C. Buzano, A. Pelizzola, and M. Pretti
Casimir dispersion forces and orientational pairwise additivity 5242
Ramin Golestanian
Scalar model of inhomogeneous elastic and granular media 5248
M. L. Nguyen and S. N. Coppersmith
Long-range attraction between colloidal spheres at the air-water interface: The consequence of an irregular meniscus 5263
Dimitris Stamou, Claus Duschl, and Diethelm Johannsmann
Interaction between oppositely charged micelles or globular proteins 5273
J. Z. Wu, D. Bratko, H. W. Blanch, and J. M. Prausnitz
Symmetric polymer blend confined into a film with antisymmetric surfaces: Interplay between wetting behavior and the phase diagram 5281
M. Müller, E. V. Albano, and K. Binder
Hydration interactions: Aqueous solvent effects in electric double layers 5296
Yoram Burak and David Andelman
Controlling anomalous stresses in soft field-responsive systems 5313
D. Reguera, J. M. Rubí, and A. Pérez-Madrid
Polymer confinement in undulated membrane boxes and tubes 5318
Tomonari Dotera and Yasuo Y. Suzuki
Wetting-induced effective interaction potential between spherical particles 5324
C. Bauer, T. Bieker, and S. Dietrich
Boundary conditions and normal state for a vibrated granular fluid 5339
J. Javier Brey, M. J. Ruiz-Montero, and F. Moreno
Theoretical results for sandpile models of self-organized criticality with multiple topplings 5347
Maya Paczuski and Kevin E. Bassler
Model for water transport into powdered xanthan combining gel swelling and vapor diffusion 5353
U. Goerke, A. H. L. Chamberlain, E. A. Crilly, and P. J. McDonald
Depletion potential in hard-sphere mixtures: Theory and applications 5360
R. Roth, R. Evans, and S. Dietrich
Time scales for structural formation in an electrorheological suspension probed by optical and electrical responses 5378
Katsufumi Tanaka, Kenji Nakamura, and Ryuichi Akiyama
Long-time tails in the solid-body motion of a sphere immersed in a suspension 5383
B. Cichocki and B. U. Felderhof
Brownian motion in a single relaxation time Maxwell fluid 5389
John H. van Zanten and Karl P. Rufener
Phase behavior of a mixture of platelike colloids and nonadsorbing polymer 5397
F. M. van der Kooij, M. Vogel, and H. N. W. Lekkerkerker
Structure and scattering in colloidal ferrofluids 5403
Philip J. Camp and G. N. Patey
Size, flexibility, and scattering functions of semiflexible polyelectrolytes with excluded volume effects: Monte Carlo simulations and neutron scattering experiments 5409
Luigi Cannavacciuolo, Cornelia Sommer, Jan Skov Pedersen, and Peter Schurtenberger
Two-dimensional granular flow in a vibrated small-angle funnel 5420
K. Lindemann and P. Dimon

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 62, NUMBER 4 OCTOBER 2000

Stokesian dynamics study of quasi-two-dimensional suspensions confined between two parallel walls 5432
Raphaël Pesché and Gerhard Nägele

Biological physics

Dynamics of learning with restricted training sets 5444
A. C. C. Coolen and D. Saad
Statistical mechanics of semiflexible ribbon polymers 5488
Ramin Golestanian and Tanniemola B. Liverpool
Electronic structure of trypsin inhibitor from squash seeds in aqueous solution 5500
Haoping Zheng
Viscoelastic properties of semiflexible filamentous bacteriophage fd 5509
Frank G. Schmidt, Bernhard Hinner, Erich Sackmann, and Jay X. Tang
Symbolic dynamics of event-related brain potentials 5518
Peter beim Graben, J. Douglas Saddy, Matthias Schlesewsky, and Jürgen Kurths
Effective interaction between helical biomolecules 5542
E. Allahyarov and H. Löwen
Temporal correlations versus noise in the correlation matrix formalism: An example of the brain auditory response 5557
J. Kwapień, S. Drożdż, and A. A. Ioannides
Synchronization, diversity, and topology of networks of integrate and fire oscillators 5565
X. Guardiola, A. Díaz-Guilera, M. Llas, and C. J. Pérez

Plasma physics

Self-organized waves in annular rf weakly magnetized dusty plasmas 5571
Jeng-Mei Liu and Lin I
Modeling of low-pressure barium–rare-gas discharges 5576
G. G. Lister, J. J. Curry, and J. E. Lawler
Full Coulomb calculation of Stark broadened spectra from multielectron ions: A focus on the dense plasma line shift 5584
G. C. Junkel, M. A. Gunderson, C. F. Hooper, Jr., and D. A. Haynes, Jr.
Conservation of circulation in magnetohydrodynamics 5594
Jacob D. Bekenstein and Asaf Oron
Ionization waves in electron-beam-assisted, shielded capillary discharge 5603
I. Rutkevich, M. Mond, Y. Kaufman, P. Choi, and M. Favre
Hot-electron generation in copper and photopumping of cobalt 5618
G. Pretzler, Th. Schlegel, E. Fill, and D. Eder
Double layer effects in laser-ablation plasma plumes 5624
Nadezhda M. Bulgakova, Alexander V. Bulgakov, and Oleg F. Bobrenok
Dicluster stopping in a degenerate electron gas 5636
Hrachya B. Nersisyan and Amal K. Das
Long-wavelength limit of the dynamical local-field factor and dynamical conductivity of a two-component plasma 5648
H. Reinholz, R. Redmer, G. Röpke, and A. Wierling
Self-organized oscillations of strongly coupled dust Coulomb clusters in plasma traps 5667
Yuh-Chyi Wang, Wen-Tau Juan, and Lin I

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 62, NUMBER 4 OCTOBER 2000

Classical physics, including nonlinear media

Vector $k \cdot p$ approach for photonic band structures 5672
J. E. Sipe
Radiation of solitons described by a high-order cubic nonlinear Schrödinger equation 5678
V. I. Karpman
Normal-mode theory for cylinder arrays 5688
R. Rojas, F. Claro, and C. R. Proetto
Resonances in the dynamics of ϕ^4 kinks perturbed by ac forces 5695
Niurka R. Quintero, Angel Sánchez, and Franz G. Mertens
Collective proton transport with weak proton-proton coupling 5706
A. V. Zolotaryuk, M. Peyrard, and K. H. Spatschek
Effects of geometric and refractive index disorder on wave propagation in two-dimensional photonic crystals 5711
A. A. Asatryan, P. A. Robinson, L. C. Botten, R. C. McPhedran, N. A. Nicorovici, and C. Martijn de Sterke
Out-of-equilibrium dynamics of the Hopfield model in its spin-glass phase 5721
Marcelo A. Montemurro, Francisco A. Tamarit, Daniel A. Stariolo, and Sergio A. Cannas
Few-optical-cycle Bessel-Gauss pulsed beams in free space 5729
M. A. Porras, R. Borghi, and M. Santarsiero
Dromion interactions of $(2+1)$-dimensional nonlinear evolution equations 5738
Hang-yu Ruan and Yi-xin Chen
Light propagation through birefringent, nonlinear media with deep gratings 5745
Suresh Pereira and J. E. Sipe
Time-domain detection of superluminal group velocity for single microwave pulses 5758
Mohammad Mojahedi, Edl Schamiloglu, Frank Hegeler, and Kevin J. Malloy
Oscillations of a highly discrete breather with a critical regime 5767
E. Coquet, M. Remoissenet, and P. Tchofo Dinda
Long-range interaction and nonlinear localized modes in photonic crystal waveguides 5777
Serge F. Mingaleev, Yuri S. Kivshar, and Rowland A. Sammut
Mean field theory of spherical gravitating systems 5783
Peter J. Klinko and Bruce N. Miller
Collapse in a forced three-dimensional nonlinear Schrödinger equation 5793
P. M. Lushnikov and M. Saffman
Accurate and efficient computation of the Green's tensor for stratified media 5797
Michael Paulus, Phillipe Gay-Balmaz, and Olivier J. F. Martin

Computational physics

Iterative algorithm versus analytic solutions of the parametrically driven dissipative quantum harmonic oscillator . 5808
Michael Thorwart, Peter Reimann, and Peter Hänggi
Artificial neural network algorithm for analysis of Rutherford backscattering data 5818
N. P. Barradas and A. Vieira
Cluster algorithm for Potts models with fixed spin densities 5830
R. P. Bikker and G. T. Barkema

BRIEF REPORTS

Classical fluids

Bobylev's instability 5835
F. J. Uribe, R. M. Velasco, and L. S. García-Colín

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 62, NUMBER 4 OCTOBER 2000

Complex fluids, polymers, and granular materials

Critical micellization density: A small-angle-scattering structural study of the monomer-aggregate transition of block copolymers in supercritical CO_2 5839
A. Triolo, F. Triolo, F. Lo Celso, D. E. Betts, J. B. McClain, J. M. DeSimone, G. D. Wignall, and R. Triolo

How high can the temperature of a liquid be raised without boiling? 5843
Mala Das, B. K. Chatterjee, B. Roy, and S. C. Roy

Wetting-induced anisotropic structure at the interface of a glass and a sponge phase 5847
M. Magalhães, A. M. Figueiredo Neto, and P. Tolédano

Plasma physics

Structure stability of ultraintense laser pulse in transverse homogeneous cold plasma 5851
Hai. Lin

Achieving pure electric confinement of high-charge-state plasmas 5855
D. D. Dolliver and C. A. Ordonez

Hybrid model for the spectral density of the time development of the excitation energy of Langmuir waves in unmagnetized plasmas 5858
Ahmed M. Al-khateeb

ERRATA

Erratum: Elasticity of Poissonian fiber networks [Phys. Rev. E **61**, 5550 (2000)] 5862
J. A. Åström, J. P. Mäkinen, M. J. Alava, and J. Timonen

Erratum: Constrained systems and statistical distribution [Phys. Rev. E **61**, 6165 (2000)] 5864
Simone Melchionna
