THIRD SERIES, VOLUME 62, NUMBER 5

CONTENTS

NOVEMBER 2000

*The Table of Contents is a total listing of Parts A and B.
Part A consists of pages R5875–6680, and Part B pages 6681–7562.*

PART A

Announcement: New Sectioning Scheme	i
Announcement: Electronic-First Publication and Article Numbers	ii
Note to Reader	iv

RAPID COMMUNICATIONS

General methods of statistical physics

Field theory of absorbing phase transitions with a nondiffusive conserved field	R5875
Romualdo Pastor-Satorras and Alessandro Vespignani	

Chaos and nonlinear dynamical systems

Scaling behavior in a nonlocal and nonlinear diffusion equation	R5879
Fabio Cecconi, Jayanth R. Banavar, and Amos Maritan	
Nonregular languages in the kicked rotor	R5883
P.-M. Binder and Juan M. Pedraza	

Classical fluids

Interface dynamics in Hele-Shaw flows with centrifugal forces: Preventing cusp singularities with rotation	R5887
F. X. Magdaleno, A. Rocco, and J. Casademunt	
Manifestation of anisotropy persistence in the hierarchies of magnetohydrodynamical scaling exponents	R5891
N. V. Antonov, J. Honkonen, A. Mazzino, and P. Muratore-Ginanneschi	

Liquid crystals

Air-water interface-induced smectic bilayer	R5895
A. El Abed, E. Pouzet, M.-C. Fauré, M. Sanière, and O. Abillon	
Formation of string defects at thinning transitions in smectic- <i>C</i> free-standing films	R5899
P. Cluzeau, G. Joly, H. T. Nguyen, C. Gors, and V. K. Dolganov	
Observation of the soft mode in the Sm- C_{α}^{*} phase	R5903
V. Bourny, A. Fajar, and H. Orihara	
Nonlinear dielectric relaxation spectroscopy of ferroelectric liquid crystals	R5907
Yasuyuki Kimura, Shun Hara, and Reinosuke Hayakawa	

Electric field-induced acoustic-optic mode coupling in an anticlinic liquid crystal	R5911
Shiyong Zhang, S. S. Keast, M. E. Neubert, Rolfe G. Petschek, and Charles Rosenblatt	

Complex fluids, polymers, and granular materials

Slow dynamics of equilibrium density fluctuations in suspensions of colloidal hard spheres near the glass transition	R5915
Michio Tokuyama	
Convergent calculation of the asymptotic dimension of diffusion limited aggregates: Scaling and renormalization of small clusters	R5919
Benny Davidovitch, Anders Levermann, and Itamar Procaccia	

Biological physics

Approach to Monte Carlo calculation of the buckling of supercoiled DNA loops	R5923
Yang Zhang	

Plasma physics

Experimental evidence of electric inhibition in fast electron penetration and of electric-field-limited fast electron transport in dense matter	R5927
F. Pisani, A. Bernardinello, D. Batani, A. Antonicci, E. Martinolli, M. Koenig, L. Gremillet, F. Amiranoff, S. Baton, J. Davies, T. Hall, D. Scott, P. Norreys, A. Djaoui, C. Rousseaux, P. Fewes, H. Bandulet, and H. Pepin	

Physics of beams

X-ray and extreme ultraviolet emission induced by variable pulse-width irradiation of Ar and Kr clusters and droplets	R5931
E. Parra, I. Alexeev, J. Fan, K. Y. Kim, S. J. McNaught, and H. M. Milchberg	

ARTICLES

General methods of statistical physics

Phase transition in a traffic model with passing	5935
I. Ispolatov and P. L. Krapivsky	
Reaction-diffusion models describing a two-lane traffic flow	5940
M. Ebrahim Fouladvand	
Percolation parameter and percolation-threshold estimates for three-dimensional random ellipses with widely scattered distributions of eccentricity and size	5948
J.-R. de Dreuz, P. Davy, and O. Bour	
Quantum kinetic equation in the closed-time-path formalism	5953
Jun Koide	
Spinodal decomposition and the Tomita sum rule	5967
Gene F. Mazenko	
Dynamics of the frustrated Ising lattice gas	5978
Jefferson J. Arenzon, F. Ricci-Tersenghi, and Daniel A. Stariolo	
Feedback-controlled forcing of meandering spiral waves in an open gel reactor	5986
M. Braune and H. Engel	
Temperature of nonequilibrium steady-state systems	5989
András Baranyai	
Self-replicating pulses and Sierpinski gaskets in excitable media	5998
Yumino Hayase and Takao Ohta	

Cluster diversity and entropy on the percolation model: The lattice animal identification algorithm	6004
I. J. Tsang, I. R. Tsang, and D. Van Dyck	
First-order phase transition in a nonequilibrium growth process	6015
Lorenzo Giada and Matteo Marsili	
Unattainability of Carnot efficiency in the Brownian heat engine	6021
Tsuyoshi Hondou and Ken Sekimoto	
Nontrivial extension of the two-dimensional Ising model: The d -dimensional “molecular” model	6026
Fabio Siringo	
Self-organized localization of macrostates by additive noise in a fast-slow dynamical system: Effect of the slow nonreactive mode on the barrier crossing rate of the fast, bistable mode	6035
Vladimir Chinarov and Michael Menzinger	
Local minimal energy landscapes in river networks	6042
Achille Giacometti	
Strong-property-fluctuation theory for homogenization of bianisotropic composites: Formulation	6052
Tom G. Mackay, Akhlesh Lakhtakia, and Werner S. Weiglhofer	
Mean first passage time for anomalous diffusion	6065
M. Gitterman	
Reaction-controlled diffusion	6071
Steffen Trimper, Uwe C. Täuber, and Gunter M. Schütz	
Phase space geometry and stochasticity thresholds in Hamiltonian dynamics	6078
Monica Cerruti-Sola, Marco Pettini, and E. G. D. Cohen	
Order-parameter model for unstable multilane traffic flow	6082
Ihor A. Lubashevsky and Reinhard Mahnke	
Elasticity of Gaussian and nearly Gaussian phantom networks	6094
Oded Farago and Yacov Kantor	
Establishing the relation between detrended fluctuation analysis and power spectral density analysis for stochastic processes	6103
C. Heneghan and G. McDarby	
$1/f^\alpha$ noise from self-organized critical models with uniform driving	6111
Jörn Davidsen and Heinz Georg Schuster	
Kinetics of ordering in fluctuation-driven first-order transitions: Simulation and theory	6116
N. A. Gross, M. Ignatiev, and Bulbul Chakraborty	
Variety and volatility in financial markets	6126
Fabrizio Lillo and Rosario N. Mantegna	
Nonlinear relaxation field in charged systems under high electric fields	6135
K. Morawetz	
Crossover phenomenon in self-organized critical sandpile models	6149
S. Lübeck	
Nonlinear stochastic resonance: The saga of anomalous output-input gain	6155
Peter Hänggi, Mario E. Inchiosa, Dave Fogliatti, and Adi R. Bulsara	
Thermally activated breakdown in the fiber-bundle model	6164
Stéphane Roux	
Random networks created by biological evolution	6170
František Šlanina and Miroslav Kotrla	
Stochastic dynamics of time correlation in complex systems with discrete time	6178
Renat Yulmetyev, Peter Hänggi, and Fail Gafarov	
Critical behavior and conservation in directed sandpiles	6195
Romualdo Pastor-Satorras and Alessandro Vespignani	
Mesososcopic dynamics of microcracks	6206
P. Ván, C. Papenfuss, and W. Muschik	

Ziff-Gulari-Barshad model with random distribution of inert sites	6216
G. L. Hoenicke and W. Figueiredo	
Similarity solutions and collapse in the attractive Gross-Pitaevskii equation	6224
A. V. Rybin, G. G. Varzugin, M. Lindberg, J. Timonen, and R. K. Bullough	
Asymptotic step profiles from a nonlinear growth equation for vicinal surfaces	6229
Jouni Kallunki and Joachim Krug	
Generalized Chapman-Kolmogorov equation: A unifying approach to the description of anomalous transport in external fields	6233
Ralf Metzler	
Extremal-point densities of interface fluctuations in a quenched random medium	6246
Pui-Man Lam and Sovirith Tan	
Short-time dynamics of an Ising system on fractal structures	6253
Guang-Ping Zheng and Mo Li	
Scaling behaviors of branched polymers	6260
Hajime Aoki, Satoshi Iso, Hikaru Kawai, and Yoshihisa Kitazawa	
Small-world networks: Links with long-tailed distributions	6270
S. Jespersen and A. Blumen	
Finite-precision stationary states at and away from equilibrium	6275
Christoph Dellago and Wm. G. Hoover	
Surmounting oscillating barriers: Path-integral approach for weak noise	6282
Jörg Lehmann, Peter Reimann, and Peter Hänggi	
Chaos and nonlinear dynamical systems	
Characteristic relations of type-I intermittency in the presence of noise	6304
Won-Ho Kye and Chil-Min Kim	
Quantum recurrences: Probe to study quantum chaos	6308
Farhan Saif	
Symmetry breaking and dynamical independence in a multimode laser	6312
E. A. Viktorov, A. G. Vladimirov, and Paul Mandel	
Characteristics of the wave function of coupled oscillators in semiquantum chaos	6318
Y. W. Hui, Jinming Dong, and D. Y. Xing	
Modeling maps by using rational functions	6325
O. Ménard, C. Letellier, J. Maquet, and G. Gouesbet	
Hierarchy and stability of partially synchronous oscillations of diffusively coupled dynamical systems	6332
Vladimir N. Belykh, Igor V. Belykh, and Martin Hasler	
Integral behavior for localized synchronization in nonidentical extended systems	6346
J. Bragard and S. Boccaletti	
Phase-space structure of a thermoreceptor	6352
Wolfgang Braun, Bruno Eckhardt, Hans A. Braun, and Martin Huber	
Convergence to the critical attractor of dissipative maps: Log-periodic oscillations, fractality, and nonextensivity	6361
F. A. B. F. de Moura, U. Tirnakli, and M. L. Lyra	
Emergence of quantum chaos in the quantum computer core and how to manage it	6366
B. Georgeot and D. L. Shepelyansky	
Asymptotically stable phase synchronization revealed by autoregressive circle maps	6376
F. R. Drepper	
Spatiotemporal stability of one-way open coupled nonlinear systems	6383
Keiji Konishi, Hideki Kokame, and Kentaro Hirata	
Atoms in parallel fields: Analysis with diffractive periodic orbits	6388
S. M. Owen, T. S. Monteiro, and P. A. Dando	

Failure of chaos control	6398
Willem van de Water and John de Weger	
Synchronous chaos in coupled map lattices with small-world interactions	6409
Prashant M. Gade and Chin-Kun Hu	
Oscillatory clusters in a model of the photosensitive Belousov-Zhabotinsky reaction system with global feedback	6414
Lingfa Yang, Milos Dolnik, Anatol M. Zhabotinsky, and Irving R. Epstein	
Topology of high-dimensional chaotic scattering	6421
Ying-Cheng Lai, Alessandro P. S. de Moura, and Celso Grebogi	
Quasidiagonal approach to the estimation of Lyapunov spectra for spatiotemporal systems from multivariate time series	6429
R. Carretero-González, S. Ørstavik, and J. Stark	
Disorder can eliminate oscillator death	6440
Leonid Rubchinsky and Mikhail Sushchik	
Parametric resonance energy exchange and induction phenomenon in a one-dimensional nonlinear oscillator chain	6447
K. Yoshimura	
Phase synchronization and noise-induced resonance in systems of coupled oscillators	6462
H. Hong and M. Y. Choi	
Stochastic resonance on a circle without excitation: Physical investigation and peak frequency formula	6469
Min Qian, Guan-Xiang Wang, and Xue-Juan Zhang	
Classical statistical mechanics of a few-body interacting spin model	6475
Fausto Borgonovi and F. M. Izrailev	
Comparison of the bifurcation scenarios predicted by the single-mode and multimode semiconductor laser rate equations	6487
K. A. Corbett and M. W. Hamilton	
Estimation of the entropy of the solar wind flow	6496
Wiesław M. Macek and Stefano Redaelli	
Largest Lyapunov-exponent estimation and selective prediction by means of simplex forecast algorithms	6505
Rudolf M. Dünki	
Classical fluids	
Correlation between the Kolmogorov-Sinai entropy and the self-diffusion coefficient in simple liquids	6516
Hyunsoo Pang, Young-han Shin, Dongchul Ihm, Eok Kyun Lee, and Oyeon Kum	
Internal waves excited by the Marangoni effect	6522
A. Wierschem, H. Linde, and M. G. Velarde	
Multiple-scattering effects on smooth neutron-scattering spectra	6531
Joachim Wuttke	
Planform selection in two-layer Bénard-Marangoni convection	6540
A. Engel and J. B. Swift	
Toy model for the mean-field theory of hard-sphere liquids	6554
Giorgio Parisi and František Slanina	
Hydrodynamic fluctuations in the Kolmogorov flow: Nonlinear regime	6560
I. Bena, F. Baras, and M. Malek Mansour	
Density functional theory of long-range critical wetting	6571
A. González and M. M. Telo da Gama	
Density fluctuations and entropy	6577
J. A. Hernando and L. Blum	
Optical emissions in a sonoluminescing bubble	6584
T. W. Chen, P. T. Leung, and M.-C. Chu	

Nonlinear viscosity and velocity distribution function in a simple longitudinal flow	6597
Andrés Santos	
Molecular-dynamics simulation of two-dimensional thermophoresis	6608
Ricardo Paredes V., Vladimir Idler, Anwar Hasmy, Victoria Castells, and Robert Botet	
Correlation of stress and structure in a simple fluid confined to a pore with furrowed walls	6615
D. J. Diestler and M. Schoen	
Effect of natural convection in a horizontally oriented cylinder on NMR imaging of the distribution of diffusivity	6628
Aleš Mohorič and Janez Stepišnik	
Anomalous burning rates of flamelets induced by self-similar multiple scale (fractal and spiral) initial fields	6636
Nadeem A. Malik and J. C. H. Fung	
Shock wave profiles in the Burnett approximation	6648
F. J. Uribe, R. M. Velasco, L. S. García-Colín, and E. Díaz-Herrera	
Fluctuations of elastic interfaces in fluids: Theory, lattice-Boltzmann model, and simulation	6667
Davide Stelitano and Daniel H. Rothman	

PART B

Note to Reader	i
Time-resolved experiments on light diffusion in anisotropic random media	6681
Diederik S. Wiersma, Alessandro Muzzi, Marcello Colocci, and Roberto Righini	
Liquid crystal director fluctuations and surface anchoring by molecular simulation	6688
Denis Andrienko, Guido Germano, and Michael P. Allen	
Fine structure of defects in radial nematic droplets	6694
S. Mkaddem and E. C. Gartland, Jr.	

Liquid crystals

Isotropic-nematic interface of soft spherocylinders	6706
Muataz S. Al-Barwani and Michael P. Allen	
Thermal renormalization of the anchoring energy of nematic liquid crystals	6711
G. Barbero and A. K. Zvezdin	
Stimulated orientational and thermal scatterings and self-starting optical phase conjugation with nematic liquid crystals	6722
I. C. Khoo and Y. Liang	
Surface extrapolation length and director structures in confined nematics	6734
N. Priezjev and Robert A. Pelcovits	
Tiling the plane with noncongruent toric focal conic domains	6739
Christophe Blanc and Maurice Kleman	
Evolution of interfaces and expansion in width	6749
H. Arodź and R. Pełka	
Structural study of the smectic- <i>I</i> to smectic- <i>F</i> transition in freely suspended films	6760
J. A. Collett, P. T. Kondratko, and M. E. Neubert	
Orientational ordering in fluids with partially constrained molecule orientations	6771
T. G. Sokolovska, R. O. Sokolovskii, and M. F. Holovko	
Direct observation of a twist mode in electroconvection	6780
Michael Dennin	

Theoretical investigation into the effects of polar anchoring in antiferroelectric liquid crystal cells	6787
N. J. Mottram and S. J. Elston	
Complex fluids, polymers, and granular materials	
Determination of the interaction force between two adsorptive surfaces delimiting a critical binary polymer blend	6795
A. Saout-Elhak, R. Cherrabi, M. Benhamou, and M. Daoud	
Effects of electric charges on hydrophobic forces. II.	6799
D. Bulone, V. Martorana, P. L. San Biagio, and M. B. Palma-Vittorelli	
Shear response of a frictional interface to a normal load modulation	6810
L. Bureau, T. Baumberger, and C. Caroli	
Influence of the free-energy functional form on simulated morphology of spinodally decomposing blends	6821
Aleksij Aksimentiev and Robert Holyst	
Spatially patterned static roughness superimposed on thermal roughness in a condensed phospholipid monolayer	6831
W. R. Schief, S. B. Hall, and V. Vogel	
Ordering process in quenched block copolymers at low temperatures	6838
Y. Yokojima and Y. Shiwa	
Dynamic electrorheological effects and interparticle force between a pair of rotating spheres	6846
Jones T. K. Wan, K. W. Yu, and G. Q. Gu	
Avalanches in fine, cohesive powders	6851
Jose Manuel Valverde, Antonio Castellanos, Antonio Ramos, and P. Keith Watson	
Spreading dynamics of water droplets	6861
F. Rieutord, O. Rayssac, and H. Moriceau	
Fluctuations of lamellar structure prior to a lamellar→gyroid transition in a nonionic surfactant system	6865
Masayuki Imai, Ayako Kawaguchi, Akira Saeki, Kaori Nakaya, Tadashi Kato, Kazuki Ito, and Yoshiyuki Amemiya	
Magnetization of ferrofluids with dipolar interactions: A Born-Mayer expansion	6875
B. Huke and M. Lücke	
Interlayer interactions in enantiomeric anticlinic liquid crystalline mixtures	6891
Mohammad Reza Dodge and Charles Rosenblatt	
Kinetic pathways of multiphase surfactant systems	6895
M. Buchanan, L. Starrs, S. U. Egelhaaf, and M. E. Cates	
Permeation properties of three-dimensional self-affine reconstructions of porous materials	6906
E. S. Kikkinides and V. N. Burganos	
Dynamics and lateral interactions of dipolar chains	6916
Eric M. Furst and Alice P. Gast	
Binary hard-sphere fluids near a hard wall	6926
R. Roth and S. Dietrich	
Simulating formation of voids in charged colloids by Brownian dynamics	6937
K. G. Wang	
Nonequilibrium molecular dynamics simulations of transport and separation of gas mixtures in nanoporous materials	6942
Lifang Xu, Muhammad Sahimi, and Theodore T. Tsotsis	
Polydisperse star polymer solutions	6949
C. von Ferber, A. Jusufi, M. Watzlawek, C. N. Likos, and H. Löwen	
Phase behavior and material properties of hollow nanoparticles	6957
U. S. Schwarz and S. A. Safran	
General view of a liquid-liquid phase transition	6968
Hajime Tanaka	

Hard-core Yukawa model for charge-stabilized colloids	6977
B. Davoudi, M. Kohandel, M. Mohammadi, and B. Tanatar	
Surface stability of granular systems under horizontal and vertical vibration: The applicability of a coefficient of friction	6982
P. J. King, Michael R. Swift, K. A. Benedict, and A. Routledge	

Biological physics

Improvement of the Davydov theory of bioenergy transport in protein molecular systems	6989
Pang Xiao-feng	
Variational studies and replica symmetry breaking in the generalization problem of the binary perceptron	6999
Evaldo Botelho, Cristiano R. Mattos, and Nestor Caticha	
Renormalization group analysis of a quivering string model of posture control	7008
Francisco Alonso-Sánchez and David Hochberg	
Cellular automata model for citrus variegated chlorosis	7024
M. L. Martins, G. Ceotto, S. G. Alves, C. C. B. Bufon, J. M. Silva, and F. F. Laranjeira	
Molecular chirality and domain shapes in lipid monolayers on aqueous surfaces	7031
Peter Krüger and Mathias Lösche	
NaDNA–bipyridyl-(ethylenediamine)platinum (II) complex: Structure in oriented wet-spun films and fibers	7044
S. A. Lee, H. Grimm, W. Pohle, W. Scheiding, L. van Dam, Z. Song, M. H. Levitt, N. Korolev, A. Szabó, and A. Rupprecht	
Exact solution of site and bond percolation on small-world networks	7059
Christopher Moore and M. E. J. Newman	
Symmetry breaking and coarsening in spatially distributed evolutionary processes including sexual reproduction and disruptive selection	7065
Hiroki Sayama, Les Kaufman, and Yaneer Bar-Yam	
Phase transitions and steady-state microstructures in a two-temperature lattice-gas model with mobile active impurities	7070
Jonas R. Henriksen, Mads C. Sabra, and Ole G. Mouritsen	
Calculating the local solvent chemical potential in crystal hydrates	7077
Haluk Resat and Mihaly Mezei	
Force-velocity relation for growing biopolymers	7082
A. E. Carlsson	
Generalization properties of finite-size polynomial support vector machines	7092
Sebastian Risau-Gusman and Mirta B. Gordon	
Proteins with selected sequences: A heteropolymeric study	7100
J. Wilder and E. I. Shakhnovich	
Information transmission and recovery in neural communications channels	7111
M. C. Eguia, M. I. Rabinovich, and H. D. I. Abarbanel	
Single and multiple topologically driven structural transitions in DNA	7123
Igor Kulić	
Fluctuating filaments: Statistical mechanics of helices	7135
S. Panyukov and Y. Rabin	
Aggregation models at high packing fraction	7147
Pedro Tarazona, Daniel Duque, and Enrique Chacón	

Plasma physics

Nonlocal electron kinetics in a planar inductive helium discharge	7155
Sang-Hun Seo, Chin-Wook Chung, Jung-In Hong, and Hong-Young Chang	
Basic physics of laser propagation in hollow waveguides	7168
J. R. Davies and J. T. Mendonça	

Ball lightning as a force-free magnetic knot	7181
Antonio F. Rañada, Mario Soler, and José L. Trueba	
Transport coefficients for dense metal plasmas	7191
Sandra Kuhlbrodt and Ronald Redmer	
Measurement method for electric fields based on Stark spectroscopy of argon atoms	7201
V. P. Gavrilenko, H. J. Kim, T. Ikutake, J. B. Kim, Y. W. Choi, M. D. Bowden, and K. Muraoka	
Dynamics of a microcapillary discharge plasma using a soft x-ray laser backlighter	7209
M. C. Marconi, C. H. Moreno, J. J. Rocca, V. N. Shlyaptsev, and A. L. Osterheld	
Internally driven spatiotemporal irregularity in a dc glow discharge	7219
A. Dinklage, C. Wilke, G. Bonhomme, and A. Atipo	
Potential formalism for an axial energy cumulation process	7227
Shalom Eliezer and José M. Martínez-Val	
Prepulse effects on the interaction of intense femtosecond laser pulses with high-Z solids	7232
Alexei Zhidkov, Akira Sasaki, Takayuki Utsumi, Ichirou Fukumoto, Toshiki Tajima, Fumikazu Saito, Yoichiro Hironaka, Kazutaka G. Nakamura, Ken-ichi Kondo, and Masatake Yoshida	
On-off intermittency at the onset of the ion-acoustic instability in a laboratory plasma	7241
Th. Pierre, H. Klostermann, E. Floriani, and R. Lima	
Observation of spatial asymmetry of THz oscillating electron plasma wave in a laser wakefield	7247
Eiji Takahashi, Hiroshi Honda, Eisuke Miura, Noboru Yugami, Yasushi Nishida, Keisuke Katsura, and Kiminori Kondo	
Detailed-term-accounting-approximation simulation of x-ray transmission through laser-produced Al plasmas	7251
Jiaolong Zeng, Fengtao Jin, Jianmin Yuan, Qisheng Lu, and Yongsheng Sun	
Generation of one-cycle laser pulses by use of high-amplitude plasma waves	7258
Zheng-Ming Sheng, Yasuhiko Sentoku, Kunioki Mima, and Katsunobu Nishihara	
Diffusive alignment of the magnetic field in active regions of plasmas	7266
Manuel Núñez	
High density collimated beams of relativistic ions produced by petawatt laser pulses in plasmas	7271
Y. Sentoku, T. V. Liseikina, T. Zh. Esirkepov, F. Califano, N. M. Naumova, Y. Ueshima, V. A. Vshivkov, Y. Kato, K. Mima, K. Nishihara, F. Pegoraro, and S. V. Bulanov	
Cyclotron resonance maser experiments in a bifilar helical waveguide	7282
Alon Aharony, Rami Drori, and Eli Jerby	
Physics of beams	
Simulation of beam-beam effects in a circular e^+e^- collider	7287
Kazuhito Ohmi	
Three-dimensional analysis of harmonic generation in high-gain free-electron lasers	7295
Zhirong Huang and Kwang-Je Kim	
Classical physics, including nonlinear media	
Lorentz torque on a charged sphere rotating in a dielectric fluid in the presence of a uniform magnetic field	7309
H. J. Kroh and B. U. Felderhof	
Supersonic and multiple topological excitations in the driven Frenkel-Kontorova model with exponential interaction	7315
O. M. Braun	
Ansatz-independent solution of a soliton in a strong dispersion-management system	7320
A. Ferrando, M. Zacarés, and P. Fernández de Córdoba	
Energy-flux pattern in the Goos-Hänchen effect	7330
H. M. Lai, C. W. Kwok, Y. W. Loo, and B. Y. Xu	

Three-dimensional walking spatiotemporal solitons in quadratic media	7340
Dumitru Mihalache, Dumitru Mazilu, Lucian-Cornel Crasovan, Lluís Torner, Boris A. Malomed, and Falk Lederer	
Field and intensity correlation in random media	7348
P. Sebbah, R. Pnini, and A. Z. Genack	
Spontaneous pattern formation in driven nonlinear lattices	7353
Andrea Vanossi, K. Ø. Rasmussen, A. R. Bishop, Boris A. Malomed, and V. Bortolani	
Ground states of dispersion-managed nonlinear Schrödinger equation	7358
Vadim Zharnitsky, Emmanuel Grenier, Sergei K. Turitsyn, Christopher K. R. T. Jones, and Jan S. Hesthaven	
Diffusion of waves in a layer with a rough interface	7365
David H. Berman	
Optical addressing at the subwavelength scale	7381
J. C. Weeber, A. Dereux, Ch. Girard, G. Colas des Francs, J. R. Krenn, and J. P. Goudonnet	
Scattering-theory analysis of waveguide-resonator coupling	7389
Yong Xu, Yi Li, Reginald K. Lee, and Amnon Yariv	
General electromagnetic density of modes for a one-dimensional photonic crystal	7405
C. H. Raymond Ooi, T. C. Au Yeung, T. K. Lim, and C. H. Kam	
Stabilization of dark solitons in the cubic Ginzburg-Landau equation	7410
N. Efremidis, K. Hizanidis, H. E. Nistazakis, D. J. Frantzeskakis, and B. A. Malomed	
Superluminal tunneling of an electromagnetic X wave through a planar slab	7415
Amr M. Shaarawi and Ioannis M. Besieris	

Computational physics

Broad histogram method: Extension and efficiency test	7422
M. Kastner, M. Promberger, and J. D. Muñoz	
Second-order stochastic leapfrog algorithm for multiplicative noise Brownian motion	7430
Ji Qiang and Salman Habib	
Ground state of trapped interacting Bose-Einstein condensates by an explicit imaginary-time algorithm	7438
M. L. Chiofalo, S. Succi, and M. P. Tosi	
Approach to ergodicity in Monte Carlo simulations	7445
J. P. Neirotti, David L. Freeman, and J. D. Doll	

BRIEF REPORTS**General methods of statistical physics**

Naudts-like duality and the extreme Fisher information principle	7462
L. P. Chimento, F. Pennini, and A. Plastino	
Phase transitions in the kinetic Ising model with competing dynamics	7466
Attila Szolnoki	
Studying avalanches in the ground state of the two-dimensional random-field Ising model driven by an external field	7470
Carlos Frontera and Eduard Vives	
Branching annihilating random walk on random regular graphs	7474
György Szabó	
Fluctuation-induced transport in a spatially symmetric periodic potential	7478
Li Cao and Da-jin Wu	
Dynamic approach to weak first-order phase transitions	7482
L. Schülke and B. Zheng	

Analytical density functional theory of homogeneous vapor condensation	7486
L. Gránásy, Z. Jurek, and D. W. Oxtoby	
Rigorous solution for the elasticity of diluted Gaussian spring networks	7490
Z. Zhou, Pik-Yin Lai, and B. Joós	
Tsallis maximum entropy principle and the law of large numbers	7494
Brian R. La Cour and William C. Schieve	

Chaos and nonlinear dynamical systems

Characterization of intermittent lag synchronization	7497
S. Boccaletti and D. L. Valladares	
Enhancement of phase synchronization through asymmetric couplings	7501
Zhigang Zheng, Gang Hu, and Bambi Hu	
Experimental verification of the synchronization condition for chaotic external cavity diode lasers	7505
S. Sivaprakasam, E. M. Shahverdiev, and K. A. Shore	
Measuring statistical dependence and coupling of subsystems	7508
Andreas Schmitz	
Intermittent chaos in electron scattering	7512
George Schmidt, Erich E. Kunhardt, and Joseph L. Godino	

Classical fluids

Influence of neighboring bubbles on the primary Bjerknes force acting on a small cavitation bubble in a strong acoustic field	7516
Alexander A. Doinikov	
Equilibrium and nonequilibrium states in thermostated Gledzer-Ohkitani-Yamada shell models	7520
Hidetsugu Sakaguchi	
Excess-entropy and freezing-temperature scalings for transport coefficients: Self-diffusion in Yukawa systems	7524
Yaakov Rosenfeld	

Liquid crystals

Switching behavior and electro-optical properties of liquid crystals in nematic gels	7528
P. Gautier, M. Brunet, J. Grupp, J. L. Sauvajol, and E. Anglaret	

Biological physics

Fast quantum search algorithms in protein sequence comparisons: Quantum bioinformatics	7532
Lloyd C. L. Hollenberg	
Adsorption-assisted translocation of a chain molecule through a pore	7536
K. Kiran Kumar and K. L. Sebastian	

Classical physics, including nonlinear media

Compactlike breathers: Bridging the continuous with the anticontinuous limit	7540
M. Eleftheriou, B. Dey, and G. P. Tsironis	

COMMENTS

Comment on “Experimental proof of standard electrodynamics by measuring the self-force on a part of a current loop”	7544
A. K. T. Assis

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 62, NUMBER 5

NOVEMBER 2000

Reply to “Comment on ‘Experimental proof of standard electrodynamics by measuring the self-force on a part of a current loop’ ”	7545
G. Cavalleri and E. Tonni	

ERRATA

Erratum: Shock compression of condensed matter using intense beams of energetic heavy ions [Phys. Rev. E 61 , 1975 (2000)]	7546
N. A. Tahir, D. H. H. Hoffmann, A. Kozyreva, A. Shutov, J. A. Maruhn, U. Neuner, A. Tauschwitz, P. Spiller, and R. Bock	
Erratum: Molecular wall effects: Are conditions at a boundary “boundary conditions?” [Phys. Rev. E 61 , 6879 (2000)]	7547
Howard Brenner and Venkat Ganesan	
Erratum: Critical packing fraction of rectangular particles on the square lattice [Phys. Rev. E 62 , 100 (2000)] ..	7548
Markus Porto and H. Eduardo Roman	

Selected Abstracts From Other Physical Review Journals	7549
