THIRD SERIES, VOLUME 62, NUMBER 6
PARTS A AND B

CONTENTS

DECEMBER 2000

The Table of Contents is a total listing of Parts A and B.
Part A consists of pages R7563–8158, and Part B pages 8159–8890.

PART A

Announcement: New Sectioning Scheme	i
Announcement: Electronic-First Publication and Article Numbers	ii
Note to Reader	iv

RAPID COMMUNICATIONS

General methods of statistical physics

Anomalous scaling in depinning transitions	R7563
Onuttom Narayan	
Glassy dynamics near zero temperature	R7567
Federico Ricci-Tersenghi and Riccardo Zecchina	

Chaos and nonlinear dynamical systems

Dynamical clustering in large populations of Rössler oscillators under the action of noise	R7571
Damián H. Zanette and Alexander S. Mikhailov	
Scaling near the quantum chaos border in interacting Fermi systems	R7575
Pil Hun Song	
Self-exciting chaos as a dynamic model for irregular neural spiking	R7579
Gerold Baier, Gerardo J. Escalera Santos, Héctor Perales, M. Rivera, Markus Müller, Ron Leder, and P. Parmananda	
Beyond the first recurrence in scar phenomena	R7583
D. A. Wisniacki, F. Borondo, E. Vergini, and R. M. Benito	

Classical fluids

Statistics of local temperature dissipation in high Rayleigh number convection	R7587
Emily S. C. Ching and C. Y. Kwok	
Finite-amplitude double-component convection due to different boundary conditions for two compensating horizontal gradients	R7591
N. Tsitverblit	
Intramolecular origin of the fast relaxations observed in the Brillouin light scattering spectra of molecular glass formers	R7595
G. Monaco, S. Caponi, R. Di Leonardo, D. Fioretto, and G. Ruocco	

Liquid crystals

- Critical fluctuations at the untilted-tilted phase transition in chiral smectic liquid crystals R7599
Seiji Shibahara, Jun Yamamoto, Yoichi Takanishi, Ken Ishikawa, and Hideo Takezoe

Plasma physics

- Tubular plasma generation with a high-power hollow Bessel beam R7603
J. Fan, E. Parra, I. Alexeev, K. Y. Kim, H. M. Milchberg, L. Ya. Margolin, and L. N. Pyatnitskii

Classical physics, including nonlinear media

- Multistability and hysteresis phenomena in passive mode-locked lasers R7607
A. K. Komarov and K. P. Komarov

Computational physics

- Towards better integrators for dissipative particle dynamics simulations R7611
Gerhard Besold, Ilpo Vattulainen, Mikko Karttunen, and James M. Polson
- Taxonomy of stock market indices R7615
Giovanni Bonanno, Nicolas Vandewalle, and Rosario N. Mantegna

ARTICLES**General methods of statistical physics**

- Coarsening of a class of driven striped structures 7619
M. R. Evans, Y. Kafri, E. Levine, and D. Mukamel
- Target waves in the complex Ginzburg-Landau equation 7627
Matthew Hendrey, Keeyeol Nam, Parvez Guzdar, and Edward Ott
- Interface scaling in the contact process 7632
Ronald Dickman and Miguel A. Muñoz
- Invasion percolation with temperature and the nature of self-organized criticality in real systems 7638
Andrea Gabrielli, Guido Caldarelli, and Luciano Pietronero
- Path-integral formulation of stochastic processes for exclusive particle systems 7642
Su-Chan Park, Doochul Kim, and Jeong-Man Park
- Equilibrium shapes and faceting for ionic crystals of body-centered-cubic type 7646
Enrico Carlon and Henk van Beijeren
- Dimensionality effects in restricted bosonic and fermionic systems 7658
Dragoş-Victor Anghel
- Biased diffusion in anisotropic disordered systems 7664
S. Bustingorry, E. R. Reyes, and Manuel O. Cáceres
- Glassiness and constrained dynamics of a short-range nondisordered spin model 7670
Juan P. Garrahan and M. E. J. Newman
- Growth of a driven interface in isotropic and anisotropic random media 7679
Kwangho Park, Hyun-Joo Kim, and In-mook Kim
- Stochastic resonance and noise-enhanced order with spatiotemporal periodic signal 7683
A. Krawiecki, A. Sukiennicki, and R. A. Kosiński
- Spin glasses without time-reversal symmetry and the absence of a genuine structural glass transition 7690
Barbara Drossel, Hemant Bokil, and M. A. Moore
- Steady states of a Boltzmann equation for driven granular media 7700
J. A. Carrillo, C. Cercignani, and I. M. Gamba
- Absolute versus convective instability of spiral waves 7708
Björn Sandstede and Arnd Scheel

Glass transition in the quenched and annealed version of the frustrated lattice gas model	7715
Annalisa Fierro, Antonio de Candia, and Antonio Coniglio	
Dynamics of Lennard-Jones clusters: A characterization of the activation-relaxation technique	7723
Rachid Malek and Normand Mousseau	
Anomalous diffusion of particles driven by correlated noise	7729
S. I. Denisov and Werner Horsthemke	
Extremal paths on a random Cayley tree	7735
Satya N. Majumdar and P. L. Krapivsky	
Analytic results for scaling function and moments for a different type of avalanche in the Bak-Sneppen evolution model	7743
W. Li and X. Cai	
Random walk with an exponentially varying step	7748
A. C. de la Torre, A. Maltz, H. O. Martín, P. Catuogno, and I. García-Mata	
Persistence in higher dimensions: A finite size scaling study	7755
G. Manoj and P. Ray	
Carnot's cycle for small systems: Irreversibility and cost of operations	7759
Ken Sekimoto, Fumiko Takagi, and Tsuyoshi Hondou	
Landauer equation in three-dimensional amorphous materials	7769
Salvador Godoy	
Tricritical behavior in deterministic aperiodic Ising systems	7773
T. A. S. Haddad, Angsula Ghosh, and S. R. Salinas	
Nearest pattern interaction and global pattern formation	7778
Seong-Ok Jeong, Hie-Tae Moon, and Tae-Wook Ko	
Phase diagram of an Ising model with long-range frustrating interactions: A theoretical analysis	7781
M. Grousson, G. Tarjus, and P. Viot	
Free-volume kinetic models of granular matter	7793
Mauro Sellitto and Jeferson J. Arenzon	
Nonconservative Abelian sandpile model with the Bak-Tang-Wiesenfeld toppling rule	7797
Alexei Vázquez	
Emergence of approximate translation invariance in finite intervals as a speed selection mechanism for propagating fronts	7802
Stavros Theodorakis and Epameinondas Leontidis	
Two scaling domains in multiple cracking phenomena	7807
U. A. Handge, Y. Leterrier, G. Rochat, I. M. Sokolov, and A. Blumen	
Chaos and nonlinear dynamical systems	
Asymptotic properties of Lévy flights in quenched random fields	7811
Juha Honkonen	
Regular dendritic patterns induced by nonlocal time-periodic forcing	7817
T. Börzsönyi, T. Tóth-Katona, Á. Buka, and L. Gránásy	
Experimental observation of dynamics near the torus-doubling terminal critical point	7828
Boris P. Bezruchko, Sergey P. Kuznetsov, and Yevgeniy P. Seleznev	
Muonic helium atom as a classical three-body problem	7831
T. J. Stuchi, A. C. B. Antunes, and M. A. Andreu	
Temporal modulation of the control parameter in electroconvection in the nematic liquid crystal I52	7842
Michael Dennin	
Local (in time) maximal Lyapunov exponents of fragmenting drops	7848
P. Balenzuela, C. A. Bonasera, and C. O. Dorso	
Asymmetric unimodal maps: Some results from q -generalized bit cumulants	7857
Uğur Tirnakli	

Chaos and coherence in the conservative three-mode decay interaction	7861
M. Frichembruder, R. Pakter, G. Gerhardt, and F. B. Rizzato	
Semiclassical cross section correlations	7867
Bruno Eckhardt, Shmuel Fishman, and Imre Varga	
Adaptive box-assisted algorithm for correlation-dimension estimation	7872
Angelo Corana	
Generalized synchronization versus phase synchronization	7882
Zhigang Zheng and Gang Hu	
Influence of noise on statistical properties of nonhyperbolic attractors	7886
Vadim S. Anishchenko, Andrey S. Kopeikin, Tatjana E. Vadivasova, Galina I. Strelkova, and Jürgen Kurths	
Breaking conjugate pairing in thermostated billiards by a magnetic field	7894
M. Dolowschiák and Z. Kovács	
Synchronization of hyperchaotic harmonics in time-delay systems and its application to secure communication	7898
Liu Yaowen, Ge Guangming, Zhao Hong, Wang Yinghai, and Gao Liang	
Classical fluids	
Entropy, dynamics, and instantaneous normal modes in a random energy model	7905
T. Keyes	
Phase turbulence in Rayleigh-Bénard convection	7909
Hao-wen Xi, Xiao-jun Li, and J. D. Gunton	
Causal implications of viscous damping in compressible fluid flows	7918
P. M. Jordan, Martin R. Meyer, and Ashok Puri	
Kinetic theory of dense fluids of rigid biaxial ellipsoids	7927
G. S. Singh and B. Kumar	
Rayleigh-Taylor instability with magnetic fluids: Experiment and theory	7941
G. Pacitto, C. Flament, J.-C. Bacri, and M. Widom	
Dielectric response of a polarizable system with quenched disorder	7949
Xueyu Song and David Chandler	
Absolute and convective instabilities of the natural convection in a vertical heated slot	7957
Jianjun Tao and Fenggan Zhuang	
Mean-field fluid behavior of the Gaussian core model	7961
A. A. Louis, P. G. Bolhuis, and J. P. Hansen	
Symbolic sequence statistical analysis for free liquid jets	7973
J. Godelle and C. Letellier	
Stability of postulated, self-similar, hydrodynamic blowup solutions	7982
J. M. Greene and R. B. Pelz	
Convective rolls and heat transfer in finite-length Rayleigh-Bénard convection: A two-dimensional numerical study	7987
S. Kenjereš and K. Hanjalić	
Stabilization of the lattice Boltzmann method by the H theorem: A numerical test	7999
Santosh Ansumali and Iliya V. Karlin	
Molecular mode-coupling theory applied to a liquid of diatomic molecules	8004
A. Winkler, A. Latz, R. Schilling, and C. Theis	
Free energy surface of supercooled water	8016
A. Scala, F. W. Starr, E. La Nave, H. E. Stanley, and F. Sciortino	
Kinetic equation for liquids with a multistep potential of interaction: Calculation of transport coefficients	8021
M. V. Tokarchuk, I. P. Omelyan, and A. E. Kobryn	

Analytic calculation of the anomalous exponents in turbulence: Using the fusion rules to flush out a small parameter	8037
Victor S. L'vov and Itamar Procaccia	
Fingering in a driven Hele-Shaw cell	8058
Steven N. Rauseo	
Phase separation of binary mixtures in shear flow: A numerical study	8064
F. Corberi, G. Gonnella, and A. Lamura	
Shear viscosity studies above and below the critical consolute point in a nitrobenzene-decane mixture	8071
Aleksandra Drozd-Rzoska	
Permeability of self-affine rough fractures	8076
German Drazer and Joel Koplik	
Effect of initial conditions on the mean energy dissipation rate and the scaling exponent	8086
R. A. Antonia and B. R. Pearson	

Liquid crystals

Surface and flexoelectric polarization in a nematic liquid crystal directly measured by a pyroelectric technique ...	8091
L. M. Blinov, M. I. Barnik, M. Ozaki, N. M. Shtykov, and K. Yoshino	
Vogel-Fulcher dependence of relaxation rates in a nematic monomer and elastomer	8100
D. Shenoy, S. Filippov, F. Aliev, P. Keller, D. Thomsen, and B. Ratna	
Ellipsometric studies of synclinic and anticlinic arrangements in liquid crystal films	8106
P. M. Johnson, D. A. Olson, S. Pankratz, Ch. Bahr, J. W. Goodby, and C. C. Huang	
Three-dimensional pattern formation, multiple homogeneous soft modes, and nonlinear dielectric electroconvection	8114
Axel G. Rossberg	
Edge dislocation in a vertical smectic-A film: Line tension versus temperature and film thickness near the nematic phase	8133
A. Zywockinski, F. Picano, P. Oswald, and J. C. G��minard	
Effect of long range order on sheared liquid crystalline materials: Flow regimes, transitions, and rheological phase diagrams	8141
Tomohiro Tsuji and Alejandro D. Rey	
Fr��edericksz transition in an anticlinic liquid crystal	8152
Bing Wen, Shiyong Zhang, S. S. Keast, M. E. Neubert, P. L. Taylor, and Charles Rosenblatt	

PART B

Note to Reader	i
----------------------	---

Complex fluids, polymers, and granular materials

Semimicroscopic theory of elasticity near the vulcanization transition	8159
Horacio E. Castillo and Paul M. Goldbart	
Granule-by-granule reconstruction of a sandpile from x-ray microtomography data	8175
G. T. Seidler, G. Martinez, L. H. Seeley, K. H. Kim, E. A. Behne, S. Zaranek, B. D. Chapman, S. M. Heald, and D. L. Brewster	
NMR study of translational and rotational dynamics in monoolein-water mesophases: Obstruction and hydration effects	8182
Thorsten Feiweier, Burkhard Geil, Eva-Maria Pospiech, Franz Fujara, and Roland Winter	
Portevin-Le Chatelier effect	8195
Scott V. Franklin, F. Mertens, and M. Marder	
Wetting-driven structure formation of a binary mixture in the presence of a mobile particle pinning potential	8207
Yu-qiang Ma	

Effective viscosity of dense colloidal crystals	8212
J. M. A. Hofman, H. J. H. Clercx, and P. P. J. M. Schram	
Scaled structures in late stages of microphase separation of binary paraffin mixtures	8234
Peng Wei Zhu, J. W. White, and J. E. Epperson	
Stripes ordering in self-stratification experiments of binary and ternary granular mixtures	8241
N. Lecocq and N. Vandewalle	
Structure and dynamics of fluorescently labeled complex fluids by Fourier imaging correlation spectroscopy	8245
Tyler J. Grassman, Michelle K. Knowles, and Andrew H. Marcus	
Structure and dynamics of concentrated dispersions of polystyrene latex spheres in glycerol: Static and dynamic x-ray scattering	8258
D. Lumma, L. B. Lurio, M. A. Borthwick, P. Falus, and S. G. J. Mochrie	
Flow between two sites on a percolation cluster	8270
José S. Andrade, Jr., Sergey V. Buldyrev, Nikolay V. Dokholyan, Shlomo Havlin, Peter R. King, Youngki Lee, Gerald Paul, and H. Eugene Stanley	
Lattice-Boltzmann model for interacting amphiphilic fluids	8282
Maziar Nekovee, Peter V. Coveney, Hudong Chen, and Bruce M. Boghosian	
Liquid-solid transition of hard spheres under gravity	8295
Paul V. Quinn and Daniel C. Hong	
Dynamics of a grain on a sandpile model	8299
L. Quartier, B. Andreotti, S. Douady, and A. Daerr	
Aging in a filled polymer: Coherent small angle x-ray and light scattering	8308
Erik Geissler, Anne-Marie Hecht, Cyrille Rochas, Françoise Bley, Frédéric Livet, and Mark Sutton	
Pattern formation in a vibrated granular layer: The pattern selection issue	8314
E. Clément and L. Labous	
Mean-field theory of acentric order of dipolar chromophores in polymeric electro-optic materials	8324
Yuriy V. Pereverzev and Oleg V. Prezhdo	
Multiple contact kernel for diffusionlike aggregation	8335
A. Schmitt, G. Odriozola, A. Moncho-Jordá, J. Callejas-Fernández, R. Martínez-García, and R. Hidalgo-Álvarez	
Spin-1 aggregation model in one dimension	8344
M. Girardi and W. Figueiredo	
Frictional-collisional regime for granular suspension flows down an inclined channel	8349
Christophe Ancey and Pierre Evesque	
Thermal diffusion and Soret feedback of gold-doped polyorganosiloxane nanospheres in toluene	8361
R. Spill, W. Köhler, G. Lindenblatt, and W. Schaertl	
Microscopic and macroscopic effects of surface lubricant films in granular shear	8369
Robert G. Cain, Neil W. Page, and Simon Biggs	

Biological physics

Kulback-Leibler and renormalized entropies: Applications to electroencephalograms of epilepsy patients	8380
R. Quian Quiroga, J. Arnhold, K. Lehnertz, and P. Grassberger	
Optimal pruning in neural networks	8387
Daniela M. L. Barbato and Osame Kinouchi	
Parity-violating effects in asymmetric chemical reactions: A theoretical study on the CHFCIBr molecule	8395
Alessandro Soncini, Andrea Ligabue, Paolo Lazzeretti, and Riccardo Zanasi	
Interaction of local anesthetics with phospholipids in Langmuir monolayers	8400
Suzanne Amador Kane and Samuel D. Floyd	
Percolation with long-range correlations for epidemic spreading	8409
Zhi-Jie Tan, Xian-Wu Zou, and Zhun-Zhi Jin	

Comparison of current-driven and conductance-driven neocortical model neurons with Hodgkin-Huxley voltage-gated channels	8413
P. H. E. Tiesinga, Jorge V. José, and Terrence J. Sejnowski	
Excitable calcium wave propagation in the presence of localized stores	8420
C. S. Pencea and H. G. E. Hentschel	
Effect of spatial extension on noise-enhanced phase locking in a leaky integrate-and-fire model of a neuron	8427
Roger Rodriguez and Petr Lánský	
Similarities between principal components of protein dynamics and random diffusion	8438
Berk Hess	
Putting proteins back into water	8449
Paolo De Los Rios and Guido Caldarelli	
Thermodynamics and mechanics of bilayer membranes	8453
S. M. Oversteegen and F. A. M. Leermakers	
Spatiotemporal pattern formation in neural systems with heterogeneous connection topologies	8462
V. K. Jirsa and J. A. S. Kelso	
Mean-field stochastic theory for species-rich assembled communities	8466
Alan McKane, David Alonso, and Ricard V. Solé	

Plasma physics

VUV absorption spectroscopy measurements of the role of fast neutral atoms in a high-power gap breakdown	8485
A. B. Filuk, J. E. Bailey, M. E. Cuneo, P. W. Lake, T. J. Nash, D. D. Noack, and Y. Maron	
Parametric excitation of Alfvén waves by gravitational radiation	8493
M. Servin, G. Brodin, M. Bradley, and M. Marklund	
Dust acoustic waves in strongly coupled dissipative plasmas	8501
B. S. Xie and M. Y. Yu	
Interactions of disparate scales in drift-wave turbulence	8508
John A. Krommes and Chang-Bae Kim	
Sheath model for radio-frequency-biased, high-density plasmas valid for all ω/ω_i	8540
Mark A. Sobolewski	
Equation of state of fully ionized electron-ion plasmas. II. Extension to relativistic densities and to the solid phase	8554
Alexander Y. Potekhin and Gilles Chabrier	
Velocity space scattering coefficients with applications in antihydrogen recombination studies	8564
Yongbin Chang and C. A. Ordonez	
Foam-induced smoothing studied through laser-driven shock waves	8573
Dimitri Batani, Wigen Nazarov, Tom Hall, Thorsten Löwer, Michel Koenig, Bernard Faral, Alessandra Benuzzi-Mounaix, and Nicolas Grandjean	

Physics of beams

Self-collimation in an atomic beam evaporated from a superfluid ^4He film	8583
H. H. Hjort and D. O. Edwards	
Radio-frequency measurements of coherent transition and Cherenkov radiation: Implications for high-energy neutrino detection	8590
Peter W. Gorham, David P. Saltzberg, Paul Schoessow, Wei Gai, John G. Power, Richard Konecny, and M. E. Conde	
Observation of coherent Čerenkov radiation from a solid dielectric with short bunches of electrons	8606
Toshiharu Takahashi, Yukio Shibata, Kimihiro Ishi, Mikihiro Ikezawa, Masayuki Oyamada, and Yasuhiro Kondo	
Generation of very high-frequency waves by up-conversion in a plasma-loaded free-electron laser	8612
V. Petrillo and C. Maroli	

Helically symmetric astrophysical jets	8616
Oleg I. Bogoyavlenskij	
Classical physics, including nonlinear media	
Propagation speed of evanescent modes	8628
A. Pablo L. Barbero, Hugo E. Hernández-Figueroa, and Erasmo Recami	
Photonic Hall effect in absorbing media	8636
S. Wiebel, A. Sparenberg, G. L. J. A. Rikken, D. Lacoste, and B. A. van Tiggelen	
Radiative corrections in symmetrized classical electrodynamics	8640
J. R. Van Meter, A. K. Kerman, P. Chen, and F. V. Hartemann	
Shock wave dynamics in a discrete nonlinear Schrödinger equation with internal losses	8651
Mario Salerno, Boris A. Malomed, and Vladimir V. Konotop	
Optical spatial shock waves in photorefractive media	8657
M. I. Carvalho, A. G. Grandpierre, D. N. Christodoulides, and M. Segev	
Energy focusing inside a dynamical cavity	8663
K. Colanero and M.-C. Chu	
Stability criterion for multicomponent solitary waves	8668
Dmitry E. Pelinovsky and Yuri S. Kivshar	
Mode structure and ray dynamics of a parabolic dome microcavity	8677
Jens U. Nöckel, Guillaume Bourdon, Eric Le Ru, Richard Adams, Isabelle Robert, Jean-Marie Moison, and Izo Abram	
Self-focusing of a single laser pulse in a photorefractive medium	8700
D. Wolfersberger, N. Fressengeas, J. Maufroy, and G. Kugel	
Numerical solution of the time-dependent Maxwell's equations for random dielectric media	8705
W. Harshawardhan, Q. Su, and R. Grobe	
Bragg-grating solitons in a semilinear dual-core system	8713
Javid Atai and Boris A. Malomed	
Multisoliton solutions and integrability aspects of coupled higher-order nonlinear Schrödinger equations	8719
M. N. Vinoj and V. C. Kuriakose	
Cavity solitons in semiconductor microresonators: Existence, stability, and dynamical properties	8726
T. Maggipinto, M. Brambilla, G. K. Harkness, and W. J. Firth	
Computational physics	
High-precision, variational, bound-state calculations in Coulomb three-body systems	8740
Alexei M. Frolov	
Higher-order force gradient symplectic algorithms	8746
Siu A. Chin and Donald W. Kidwell	
Effect of compression on the global optimization of atomic clusters	8753
Jonathan P. K. Doye	
Enhanced sampling of rare events	8762
Simone Melchionna	
Kinetic phase transitions in a contaminated monomer-dimer reaction model	8768
V. Bustos, R. O. Uñac, and G. Zgrablich	
Fourier grid Hamiltonian method and Lagrange-mesh calculations	8777
Claude Semay	
Replica-exchange algorithm and results for the three-dimensional random field Ising model	8782
J. Machta, M. E. J. Newman, and L. B. Chayes	

Monte Carlo simulation of the mixed alkali effect with cooperative jumps	8790
Junko Habasaki and Yasuaki Hiwatari	

BRIEF REPORTS**General methods of statistical physics**

Power law distributions of burst duration and interburst interval in the solar wind: Turbulence or dissipative self-organized criticality?	8794
M. P. Freeman, N. W. Watkins, and D. J. Riley	
Double-logarithmic finite-size scaling behavior of the specific heat does not necessarily imply its divergence	8798
Jae-Kwon Kim	
Drift of spiral waves in the complex Ginzburg-Landau equation due to media inhomogeneities	8800
I. V. Biktasheva	
Stochastic resonance without an external periodic drive in a simple prey-predator model	8804
Renuka Rai and Harjinder Singh	
Positivity preserving non-Markovian master equations	8808
Joshua Wilkie	
Aspect-ratio dependence of percolation probability in a rectangular system	8811
Shinsuke Tsubakihara	
Lower bounds for the ground-state degeneracies of frustrated systems on fractal lattices	8814
Evaldo M. F. Curado and Fernando D. Nobre	
Shock structures in time-averaged patterns for the Kuramoto-Sivashinsky equation	8817
Hidetsugu Sakaguchi	
Symmetry breaking in one-dimensional diffusion	8820
M. Gitterman	

Chaos and nonlinear dynamical systems

Discrete homoclinic orbits in a laser with feedback	8823
A. N. Pisarchik, R. Meucci, and F. T. Arecchi	
Phase synchronization with type-II intermittency in chaotic oscillators	8826
Inbo Kim, Chil-Min Kim, Won-Ho Kye, and Young-Jai Park	

Liquid crystals

Nematic liquid-crystal director configuration for general elastic coefficients	8830
Elsebeth Schröder	

Biological physics

Stability properties of solitary waves and periodic wave trains in a two-dimensional network of spiking neurons	8834
Werner M. Kistler	

Plasma physics

Experiments on radiative collapse in laser-produced plasmas relevant to astrophysical jets	8838
K. Shigemori, R. Kodama, D. R. Farley, T. Koase, K. G. Estabrook, B. A. Remington, D. D. Ryutov, Y. Ochi, H. Azechi, J. Stone, and N. Turner	

Classical physics, including nonlinear media

Perturbation theory for the kink of the sine-Gordon equation	8842
Yi Tang and Wei Wang	

COMMENTS**Classical fluids**

Comment on “Algebraic perturbation theory for polar fluids: A model for the dielectric constant”	8846
István Szalai, Kwong-Yu Chan, and Douglas Henderson	
Reply to “Comment on ‘Algebraic perturbation theory for polar fluids: A model for the dielectric constant’ ” . . .	8851
V. I. Kalikmanov
