PHYSICAL REVIEW E **THIRD SERIES, VOLUME 63, NUMBER 1** **JANUARY 2001**

Patterns formed by spiral pairs in oscillatory media *(5 pages)* 011103
S. Komineas, F. Heilmann, and L. Kramer
Lévy flights from a continuous-time process *(10 pages)* 011104
I. M. Sokolov
Territory covered by *N* random walkers on fractal media: The Sierpinski gasket and the percolation aggregate *(12 pages)* 011105
L. Acedo and S. B. Yuste
Molecular dynamics ensemble, equation of state, and ergodicity *(5 pages)* 011106
William W. Wood, Jerome J. Erpenbeck, George A. Baker Jr., and J. D. Johnson
General measures for signal-noise separation in nonlinear dynamical systems *(11 pages)* 011107
J. W. C. Robinson, J. Rung, A. R. Bulsara, and M. E. Inchiosa
Critical properties of a branched polymer growth model *(7 pages)* 011108
Sergio S. Botelho and F. D. A. Aarão Reis
Left-sided multifractality in a binary random multiplicative cascade *(9 pages)* 011109
W. G. Hanan, J. Gough, and D. M. Heffernan
Inherent structures enumeration for low-density materials *(6 pages)* 011110
Frank H. Stillinger
Dynamics of inelastic collapse *(5 pages)* 011111
Theodore W. Burkhardt
Enhanced diffusion in smoothly modulated superlattices *(14 pages)* 011112
Dmitry A. Rakhlin

Equilibrium and linear transport properties of fluids

Theory and computer simulation for the equation of state of additive hard-disk fluid mixtures *(8 pages)* 011201
C. Barrio and J. R. Solana
Computer simulations of liquid silica: Equation of state and liquid-liquid phase transition *(9 pages)* 011202
Ivan Saika-Voivod, Francesco Sciortino, and Peter H. Poole
Inhomogeneous integral equation approach to pair and triple correlations in a glass-forming simple liquid *(6 pages)* 011203
E. Lomba, S. Jorge, and M. Álvarez
Parametric Bragg resonances in waves on a shallow fluid over a periodically drilled bottom *(5 pages)* 011204
M. Torres, J. P. Adrados, F. R. Montero de Espinosa, D. García-Pablos, and J. Fayos
Molecular-dynamics investigation of tracer diffusion in a simple liquid: Test of the Stokes-Einstein law *(9 pages)* 011205
F. Ould-Kaddour and D. Levesque
Mode-coupling theory for the glassy dynamics of a diatomic probe molecule immersed in a simple liquid *(16 pages)* 011206
S.-H. Chong, W. Götze, and A. P. Singh
Self-dynamic structure factor of dense liquids: Theory and simulation *(9 pages)* 011207
Manel Canales and Joan Àngel Padró
Global models for moving contact lines *(13 pages)* 011208
Javier A. Diez, L. Kondic, and Andrea Bertozzi
Distribution functions of a simple fluid under shear. II. High shear rates *(5 pages)* 011209
Yu. V. Kalyuzhnyi, S. T. Cui, and H. D. Cochran
Collective dynamics of liquid aluminum probed by inelastic x-ray scattering *(7 pages)* 011210
T. Scopigno, U. Balucani, G. Ruocco, and F. Sette
