PHYSICAL REVIEW E

THIRD SERIES, VOLUME 63, NUMBER 1

JANUARY 2001

Limits for interchannel frequency separation in a soliton wavelength-division multiplexing system (5 pages)	016609
C. Etrich, N.-C. Panoiu, D. Mihalache, and F. Lederer	
Solitons in nonlocal nonlinear media: Exact solutions (6 pages)	016610
Wiesław Królikowski and Ole Bang	
Near equilibrium dynamics of nonhomogeneous Kirchhoff filaments in viscous media (13 pages)	016611
A. F. Fonseca and M. A. M. de Aguiar	
Multimode soliton dynamics in perturbed ladder lattices (11 pages)	016612
Oleksiy O. Vakhnenko and Michael J. Velgakis	
Classical theory of resonant transition radiation in multilayer structures (13 pages)	016613
B. Pardo and J.-M. André	
Crossing of identical solitary waves in a chain of elastic beads (6 pages)	016614
Marian Manciu, Surajit Sen, and Alan J. Hurd	
Parametric localized modes in quadratic nonlinear photonic structures (9 pages)	016615
Andrey A. Sukhorukov, Yuri S. Kivshar, Ole Bang, and Costas M. Soukoulis	

Computational physics

Parallel excluded volume tempering for polymer melts (10 pages)	016701
Alex Bunker and Burkhard Dünweg	
Efficient dynamic importance sampling of rare events in one dimension (10 pages)	016702
Daniel M. Zuckerman and Thomas B. Woolf	
Fourth-order algorithms for solving the multivariable Langevin equation and the Kramers equation (7 pages)	016703
Harald A. Forbert and Siu A. Chin	

BRIEF REPORTS

General methods of statistical physics

Self-organization in systems of self-propelled particles (4 pages)	017101
Herbert Levine, Wouter-Jan Rappel, and Inon Cohen	
Generalized strategies in the minority game (3 pages)	017102
M. Hart, P. Jefferies, N. F. Johnson, and P. M. Hui	

Chaos and pattern formation

Optimized chaos control with simple limiters (2 pages)	017201
C. Wagner and R. Stoop	
Analysis of spatiotemporally periodic behavior in lattices of coupled piecewise monotonic maps (4 pages)	017202
Nandini Chatterjee and Neelima Gupte	
Driven, underdamped Frenkel-Kontorova model on a quasiperiodic substrate (4 pages)	017203
A. Vanossi, J. Röder, A. R. Bishop, and V. Bortolani	

Plasma physics

Plasma kinetics around a dust grain in an ion flow (4 pages)	017401
S. A. Maiorov, S. V. Vladimirov, and N. F. Cramer	
Radiometric force in dusty plasmas (3 pages)	017402
A. M. Ignatov and Sh. G. Amiranashvili	

(Continued)

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 63, NUMBER 1

JANUARY 2001

Statistical theory of dusty plasmas: Microscopic equations and Bogolyubov-Born-Green-Kirkwood-Yvon hierarchy (17 pages)	016403
P. P. J. M. Schram, A. G. Sitenko, S. A. Trigger, and A. G. Zagorodny	
Model for the generation of toroidal and poloidal magnetic fields in a laser-produced plasma (11 pages)	016404
B. Bhattacharyya, Urmi Sanyal, and S. V. Lawande	
Time of flight measurements on ion-velocity distribution and anisotropy of ion temperatures in laser plasmas (10 pages)	016405
Andrea Thum-Jaeger, Binoy K. Sinha, and Klaus P. Rohr	
Time-dependent electron-ion collision frequency at arbitrary laser intensity-temperature ratio (8 pages)	016406
P. Mulser, F. Cornolti, E. Bésuelle, and R. Schneider	
N^+ charge transfer and N_2^+ dissociation in N_2 at swarm energies (5 pages)	016407
E. Basurto, J. de Urquijo, C. Cisneros, and I. Alvarez	
Feedback of a small-scale magnetic dynamo (8 pages)	016408
S. V. Nazarenko, G. E. Falkovich, and S. Galtier	
Anisotropic dust lattice modes (3 pages)	016409
A. V. Ivlev and G. Morfill	
Bohm criterion for a plasma composed of electrons and positive dust grains (6 pages)	016410
M. S. Benilov and P. K. Shukla	
Laser-produced plasma bubble (6 pages)	016411
J. F. Kielkopf	

Physics of beams

Stochastic collective dynamics of charged-particle beams in the stability regime (11 pages)	016501
Nicola Cufaro Petroni, Salvatore De Martino, Silvio De Siena, and Fabrizio Illuminati	
Stochastic resonance in free-electron lasers (5 pages)	016502
Oscar G. Calderón	

Classical physics, including nonlinear media

Nontopological solitary waves in continuous and discrete one-component molecular chains (11 pages)	016601
Paweł Machnikowski, Piotr Magnuszewski, and Andrzej Radosz	
Compression of femtosecond laser pulses in thin one-dimensional photonic crystals (9 pages)	016602
A. V. Andreev, A. V. Balakin, I. A. Ozheredov, A. P. Shkurinov, P. Masselin, G. Mouret, and D. Boucher	
Self-bending of the coupled spatial soliton pairs in a photorefractive medium with drift and diffusion nonlinearity (10 pages)	016603
Victor Aleshkevich, Yaroslav Kartashov, and Victor Vysloukh	
Influence of walkoff on pattern formation in nondegenerate optical parametric oscillators (13 pages)	016604
H. Ward, M. N. Ouarzazi, M. Taki, and P. Glorieux	
Stable vortex solitons in the two-dimensional Ginzburg-Landau equation (6 pages)	016605
L.-C. Crasovan, B. A. Malomed, and D. Mihalache	
Analytical solution of the polarized photon transport equation in an infinite uniform medium using cumulant expansion (10 pages)	016606
W. Cai, M. Lax, and R. R. Alfano	
Photorefractive light scattering families in (111)-cut $Bi_{12}TiO_{20}$ crystals with an external electric ac field (6 pages)	016607
V. P. Kamenov, E. Shamonina, K. H. Ringhofer, E. Nippolainen, V. V. Prokofiev, and A. A. Kamshilin	
Time-gated Manakov spatial solitons are computationally universal (7 pages)	016608
Ken Steiglitz

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 63, NUMBER 1

JANUARY 2001

Arbitrary trajectory quantization method (6 pages)	016213
Debabrata Biswas	
Scattering properties of a cut-circle billiard waveguide with two conical leads (11 pages)	016214
Kathrin Fuchss, Suhan Ree, and L. E. Reichl	
Synchronization of chaotic oscillations in doped fiber ring lasers (15 pages)	016215
Clifford Tureman Lewis, Henry D. I. Abarbanel, Matthew B. Kennel, Michael Buhl, and Lucas Illing	
Infinite hierarchies of nonlinearly dependent periodic orbits (5 pages)	016216
Jason A. C. Gallas	
Digital signal transmission with cascaded heterogeneous chaotic systems (7 pages)	016217
K. Murali	
Critical behavior of crisis-induced transition to spatiotemporal chaos in parameter space (6 pages)	016218
Kaifen He	

Nonlinear hydrodynamics and turbulence

Electrohydrodynamic instabilities and orientation of dielectric ellipsoids in low-conducting fluids (6 pages)	016301
A. Cēbers, E. Lemaire, and L. Lobry	
Multifractality of drop breakup in the air-blast nozzle atomization process (6 pages)	016302
Wei-Xing Zhou and Zun-Hong Yu	
Bounds on the convective heat transport in a rotating layer (8 pages)	016303
N. K. Vitanov and F. H. Busse	
Renormalization group analysis for thermal turbulent transport (11 pages)	016304
Bin-Shei Lin, Chien C. Chang, and Chi-Tzung Wang	
Pumping of water with ac electric fields applied to asymmetric pairs of microelectrodes (8 pages)	016305
A. B. D. Brown, C. G. Smith, and A. R. Rennie	
Wall-bounded turbulent shear flow: Analytic result for a universal amplitude (7 pages)	016306
Amit Kr. Chattopadhyay and Jayanta K. Bhattacharjee	
Localized perturbations in binary fluid convection with and without throughflow (20 pages)	016307
P. Büchel and M. Lücke	
Anomalous scaling of anisotropy of second-order moments in a model of a randomly advected solenoidal vector field (8 pages)	016308
Kyo Yoshida and Yukio Kaneda	
Anomalous scaling of a passive scalar in the presence of strong anisotropy (25 pages)	016309
L. Ts. Adzhemyan, N. V. Antonov, M. Hnatich, and S. V. Novikov	
Observation of bubble dynamics within luminescent cavitation clouds: Sonoluminescence at the nano-scale (7 pages)	016310
K. R. Weninger, C. G. Camara, and S. J. Putterman	
Gravity-driven instability in a spherical Hele-Shaw cell (5 pages)	016311
José A. Miranda, Fernando Parisio, Fernando Moraes, and Michael Widom	
Chaotic properties of dilute two- and three-dimensional random Lorentz gases. II. Open systems (14 pages) ..	016312
H. van Beijeren, Arnulf Latz, and J. R. Dorfman	

Plasma physics

Nonhydrodynamic aspects of electron transport near a boundary: The Milne problem (11 pages)	016401
Aleksey V. Vasenkov and Bernie D. Shizgal	
Metallization of hydrogen using heavy-ion-beam implosion of multilayered cylindrical targets (9 pages)	016402
N. A. Tahir, D. H. H. Hoffmann, A. Kozyreva, A. Tauschwitz, A. Shutov, J. A. Maruhn, P. Spiller, U. Neuner, J. Jacoby, M. Roth, R. Bock, H. Juranek, and R. Redmer

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 63, NUMBER 1

JANUARY 2001

Quantum phase transitions in the Ising model in a spatially modulated field (4 pages)	016112
Parongama Sen	
Universality and φ^4 theory of finite-size effects above the upper critical dimension (5 pages)	016113
X. S. Chen and V. Dohm	
Phase diffusion as a model for coherent suppression of tunneling in the presence of noise (6 pages)	016114
J. Grondalski, P. M. Alsing, and I. H. Deutsch	
Geometry of river networks. I. Scaling, fluctuations, and deviations (13 pages)	016115
Peter Sheridan Dodds and Daniel H. Rothman	
Geometry of river networks. II. Distributions of component size and number (15 pages)	016116
Peter Sheridan Dodds and Daniel H. Rothman	
Geometry of river networks. III. Characterization of component connectivity (10 pages)	016117
Peter Sheridan Dodds and Daniel H. Rothman	
Nonlinear lattice model of viscoelastic mode III fracture (9 pages)	016118
David A. Kessler and Herbert Levine	
Renormalization-group theoretical reduction of the Swift-Hohenberg model (7 pages)	016119
Y. Shiwa	
Dynamic phase transition, universality, and finite-size scaling in the two-dimensional kinetic Ising model in an oscillating field (15 pages)	016120
G. Korniss, C. J. White, P. A. Rikvold, and M. A. Novotny	
Uniaxial Hugoniotat: A method for atomistic simulations of shocked materials (8 pages)	016121
J.-B. Maillet, M. Mareschal, L. Soulard, R. Ravelo, P. S. Lomdahl, T. C. Germann, and B. L. Holian	
Chaos and pattern formation	
Morphological image analysis of quantum motion in billiards (7 pages)	016201
J. S. Kole, K. Michielsen, and H. De Raedt	
Rotationally induced transitions in small clusters (6 pages)	016202
Ersin Yurtsever	
Simple variational approach to the quantum Frenkel-Kontorova model (5 pages)	016203
Choon-Lin Ho and Chung-I Chou	
Dynamics and control of a multimode laser: Reduction of space-dependent rate equations to a low-dimensional system (12 pages)	016204
K. Pyragas, F. Lange, T. Letz, J. Parisi, and A. Kittel	
Electronic transport through ballistic chaotic cavities: Reflection symmetry, direct processes, and symmetry breaking (15 pages)	016205
Moisés Martínez and Pier A. Mello	
Covering dynamical systems: Twofold covers (10 pages)	016206
Christophe Letellier and Robert Gilmore	
Constructing nonautonomous differential equations from experimental time series (7 pages)	016207
Boris P. Bezruchko and Dmitry A. Smirnov	
Exploring phase space localization of chaotic eigenstates via parametric variation (16 pages)	016208
Nicholas R. Cerruti, Arul Lakshminarayan, Julie H. Lefebvre, and Steven Tomsovic	
Phase space localization of chaotic eigenstates: Violating ergodicity (12 pages)	016209
Arul Lakshminarayan, Nicholas R. Cerruti, and Steven Tomsovic	
Logistic map with a delayed feedback: Stability of a discrete time-delay control of chaos (7 pages)	016210
T. Buchner and J. J. Żebrowski	
Compartmentalized reaction-diffusion systems (9 pages)	016211
Francisco Chávez and Raymond Kapral	
Synchronization, re-entry, and failure of spiral waves in a two-layer discrete excitable system (9 pages)	016212
V. B. Kazantsev, V. I. Nekorkin, D. V. Artyuhin, and M. G. Velarde

THIRD SERIES, VOLUME 63, NUMBER 1

JANUARY 2001

Critical dynamics of gelation (17 pages)	011510
Kurt Broderix, Henning Löwe, Peter Müller, and Annette Zippelius	

Films, interfaces, and crystal growth

Contact-angle hysteresis in solid-on-solid wetting (4 pages)	011601
Phil Attard	
Influence of noise-reduction schemes on statistics of the diffusion-limited aggregation model at meso- and macroscales (9 pages)	011602
Vladislav A. Bogoyavlenskiy	

Liquid crystals

Nematic director slippage: Role of the angular momentum of light (7 pages)	011701
D. Andrienko, V. Reshetnyak, Yu. Reznikov, and T. J. Sluckin	
Second-harmonic generation studies in the B_2 and B_4 phases of a banana-shaped liquid crystal (7 pages)	011702
J. Ortega, N. Pereda, C. L. Folcia, J. Etxebarria, and M. B. Ros	
Acoustic wave propagation in structurally helical media (10 pages)	011703
C. Oldano and S. Ponti	
Rotational viscosity, dynamic phenomena, and dielectric properties in a long-chain liquid crystal: NMR study and theoretical treatment (8 pages)	011704
A. V. Zakharov and Ronald Y. Dong	
Optically induced periodic structures in smectic-C liquid crystals (4 pages)	011705
A. Jáklí, T. Kósa, A. Vajda, E. Benkler, I. Jánosy, and P. Pálffy-Muhoray	
Molecular dynamics study of mesophase formation using a transverse quadrupolar Gay-Berne model (10 pages)	011706
M. P. Neal and A. J. Parker	
Experimental NMR spin-lattice relaxometry study in the liquid crystalline nematic phase of propylcyano-phenylcyclohexane (4 pages)	011707
R. H. Acosta and D. J. Pusiol	
Numerical bifurcation study of electrohydrodynamic convection in nematic liquid crystals (12 pages)	011708
S. J. Tavener, T. Mullin, G. I. Blake, and K. A. Cliffe	

Polymers

Polymer dynamics in time-dependent Matheron–de Marsily flows: An exactly solvable model (6 pages)	011801
S. Jespersen, G. Oshanin, and A. Blumen	

Biological physics

Local interaction simulation approach for the response of the vascular system to metabolic changes of cell behavior (9 pages)	011901
M. Scalerandi, G. P. Pescarmona, P. P. Delsanto, and B. Capogrosso Sansone	
Dynamics of a bouncing ball in human performance (8 pages)	011902
Dagmar Sternad, Marcos Duarte, Hiromu Katsumata, and Stefan Schaal	
Correlation property of length sequences based on global structure of the complete genome (8 pages)	011903
Zu-Guo Yu, V. V. Anh, and Bin Wang	
Stability of neuronal pulses composed of concatenated unstable kinks (4 pages)	011904
Mónica M. Romeo and Christopher K. R. T. Jones	
Multivariate Ornstein-Uhlenbeck processes with mean-field dependent coefficients: Application to postural sway (16 pages)	011905
T. D. Frank, A. Daffertshofer, and P. J. Beek
