PHYSICAL REVIEW E **THIRD SERIES, VOLUME 63, NUMBER 2** **FEBRUARY 2001**

Structured and complex fluids

Simple fluids with complex phase behavior *(4 pages)* . . . . . 020501(R)
Gianpietro Malescio and Giuseppe Pellicane

Films, interfaces, and crystal growth

Crystalline smectic-*B* films as fluctuating systems: Static and dynamic x-ray scattering *(4 pages)* . . . . . 020601(R)
Andrea Fera, Igor P. Dolbnya, Ricarda Opitz, Boris I. Ostrovskii, and Wim H. de Jeu

Biological physics

Multifractality, Levinthal paradox, and energy hypersurface *(4 pages)* . . . . . 020901(R)
M. A. Moret, P. G. Pascutti, K. C. Mundim, P. M. Bisch, and E. Nogueira, Jr.

REGULAR ARTICLES

Statistical physics of soft matter

Multiple current reversal in Brownian ratchets *(5 pages)* 021101
M. Kostur and J. Łuczka
Interpolation formula between very low and intermediate-to-high damping Kramers escape rates for single-domain ferromagnetic particles *(12 pages)* 021102
P. M. Déjardin, D. S. F. Crothers, W. T. Coffey, and D. J. McCarthy
Adaptation of autocatalytic fluctuations to diffusive noise *(6 pages)* 021103
N. M. Shnerb, E. Bettelheim, Y. Louzoun, O. Agam, and S. Solomon
Trapping and survival probability in two dimensions *(5 pages)* 021104
Lazaros K. Gallos, Panos Argyrakis, and Klaus W. Kehr
Brownian motion in a magnetic field *(9 pages)* 021105
Radosław Czopnik and Piotr Garbaczewski
Effect of long-range interactions on the scaling of the noisy Kuramoto-Sivashinsky equation *(8 pages)* 021106
Gang Tang and Benkun Ma
Irreversible and reversible modes of operation of deterministic ratchets *(6 pages)* 021107
I. M. Sokolov
Slow logarithmic relaxation in models with hierarchically constrained dynamics *(4 pages)* 021108
J. J. Brey and A. Prados
Boltzmann approximation of transport properties in thermal lattice gases *(12 pages)* 021109
Ronald Blaak and David Dubbeldam
Influence of auto-organization and fluctuations on the kinetics of a monomer-monomer catalytic scheme *(9 pages)* 021110
P. Argyrakis, S. F. Burlatsky, E. Clément, and G. Oshanin
Modeling experimental data in a Monte Carlo simulation *(5 pages)* 021111
Gregory C. Rutledge
Operator Lévy motion and multiscaling anomalous diffusion *(6 pages)* 021112
Mark M. Meerschaert, David A. Benson, and Boris Baeumer
Critical branching-annihilating random walk of two species *(7 pages)* 021113
Géza Ódor
Relaxation of classical particles in two-dimensional anharmonic single-well potentials *(5 pages)* 021114
Donald P. Visco, Jr. and Surajit Sen
Coil-to-stretch transition, kink formation, and efficient barrier crossing of a flexible chain *(10 pages)* 021115
SeungKyun Lee and Wokyung Sung
Dynamic realization of transport phenomenon in finite system *(14 pages)* 021116
Shiwei Yan, Fumihiko Sakata, Yi-zhong Zhuo, and Xi-zhen Wu
