PHYSICAL REVIEW E

THIRD SERIES, VOLUME 63, NUMBER 5

MAY 2001

Escape time in anomalous diffusive media (<i>5 pages</i>)	051109
E. K. Lenzi, C. Anteneodo, and L. Borland	
Noise-assisted transmission of binary information: Theory and experiment (<i>9 pages</i>)	051110
Sylvain Barbay, Giovanni Giacomelli, and Francesco Marin	
Strong enhancement of noise-induced escape by nonadiabatic periodic driving due to transient chaos (<i>6 pages</i>)	051111
S. M. Soskin, R. Mannella, M. Arrayás, and A. N. Silchenko	
Preferential growth: Exact solution of the time-dependent distributions (<i>7 pages</i>)	051112
L. Kullmann and J. Kertész	
Equilibrium and linear transport properties of fluids	
Generalized fundamental solutions for unsteady viscous flows (<i>7 pages</i>)	051201
Jian-Jun Shu and Allen T. Chwang	
Collective dynamics in liquid lead: Generalized propagating excitations (<i>13 pages</i>)	051202
Taras Bryk and Ihor Mryglod	
Transformation from Rogers-Young approximation to the density functional approach for nonuniform fluids: Numerical recipe (<i>6 pages</i>)	051203
Shiqi Zhou	
Granular materials	
Edwards' measures: A thermodynamic construction for dense granular media and glasses (<i>14 pages</i>)	051301
Alain Barrat, Jorge Kurchan, Vittorio Loreto, and Mauro Sellitto	
Glassy systems under time-dependent driving forces: Application to slow granular rheology (<i>15 pages</i>)	051302
L. Berthier, L. F. Cugliandolo, and J. L. Iguain	
Large-scale synchrony in weakly interacting automata (<i>6 pages</i>)	051303
Eric J. Friedman and A. S. Landsberg	
Numerical model for granular compaction under vertical tapping (<i>9 pages</i>)	051304
P. Philippe and D. Bideau	
Colloidal dispersions, suspensions, and aggregates	
Colloids confined to a flexible container (<i>9 pages</i>)	051401
Lutz Maibaum, Matthias Schmidt, and Hartmut Löwen	
Dynamic structure of thermoreversible colloidal gels of adhesive spheres (<i>10 pages</i>)	051402
Michael J. Solomon and Priya Varadan	
Dynamics of viscous penetration in percolation porous media (<i>5 pages</i>)	051403
J. S. Andrade, Jr., A. D. Araújo, S. V. Buldyrev, S. Havlin, and H. E. Stanley	
Structured and complex fluids	
Freezing and orientational order in weakly anisotropic fluids (<i>4 pages</i>)	051501
Hyung-June Woo and Xueyu Song	
Melting of a quasi-two-dimensional metallic system (<i>11 pages</i>)	051502
Dmitriy S. Chekmarev, David W. Oxtoby, and Stuart A. Rice	
Phase separation in a homogeneous shear flow: Morphology, growth laws, and dynamic scaling (<i>10 pages</i>)	051503
Ludovic Berthier	
Constitutive equations for an elastic material with anisotropic rigid particles (<i>8 pages</i>)	051504
Leonard M. C. Sagis, Mariëlle Ramaekers, and Erik van der Linden	
Phase separation under two-dimensional Poiseuille flow (<i>5 pages</i>)	051505
Hirohito Kiwata
