

Bulk and shear viscosities in lattice Boltzmann equations (<i>11 pages</i>)	031203
Paul J. Dellar	
Simple model for a two-component gas flow in the presence of macroscopic scatterers (<i>6 pages</i>)	031204
A. I. Chervanyov	
Active control of oscillatory thermocapillary convection (<i>7 pages</i>)	031205
Junichiro Shiomi, Gustav Amberg, and Henrik Alfredsson	
Granular materials	
Correlation between bulk stresses and interparticle contact forces in fine powders (<i>9 pages</i>)	031301
M. A. S. Quintanilla, A. Castellanos, and J. M. Valverde	
Scaling relations for granular flow in quasi-two-dimensional rotating cylinders (<i>13 pages</i>)	031302
Ashish V. Orpe and D. V. Khakhar	
Velocity distributions and correlations in homogeneously heated granular media (<i>10 pages</i>)	031303
Sung Joon Moon, M. D. Shattuck, and J. B. Swift	
Bifurcations of a driven granular system under gravity (<i>14 pages</i>)	031304
Masaharu Isobe	
Continuum saltation model for sand dunes (<i>10 pages</i>)	031305
Gerd Sauermann, Klaus Kroy, and Hans J. Herrmann	
Precollisional velocity correlations in a hard-disk fluid with dissipative collisions (<i>10 pages</i>)	031306
R. Soto, J. Piasecki, and M. Mareschal	
Stick-slip fluctuations in granular drag (<i>9 pages</i>)	031307
I. Albert, P. Tegzes, R. Albert, J. G. Sample, A. -L. Barabási, T. Vicsek, B. Kahng, and P. Schiffer	
Colloidal dispersions, suspensions, and aggregates	
Scaling laws in magneto-optical properties of aggregated ferrofluids (<i>6 pages</i>)	031401
R. Botet, K. N. Trohidou, J. A. Blackman, and D. Kechrakos	
Phase transition kinetics in colloid-polymer mixtures at triple coexistence: Kinetic maps from free-energy landscapes (<i>9 pages</i>)	031402
F. Renth, W. C. K. Poon, and R. M. L. Evans	
Classification of ordering kinetics in three-phase systems (<i>13 pages</i>)	031403
R. M. L. Evans, W. C. K. Poon, and F. Renth	
Structured and complex fluids	
Field-induced structure transformation in electrorheological solids (<i>5 pages</i>)	031501
C. K. Lo and K. W. Yu	
Jamming creep of a frictional interface (<i>4 pages</i>)	031502
L. Bureau, T. Baumberger, and C. Caroli	
Apparent nonergodic behavior of supercooled liquids above the glass transition temperature (<i>7 pages</i>)	031503
A. Patkowski, H. Gläser, T. Kanaya, and E. W. Fischer	
Temporal fractal model for the anomalous dielectric relaxation of inhomogeneous media with chaotic structure (<i>11 pages</i>)	031504
V. V. Novikov and V. P. Privalko	
Viscoelasticity near the gel point: A molecular dynamics study (<i>5 pages</i>)	031505
Daniel Vernon, Michael Plischke, and Béla Joós	
Amorphous thin film growth: Effects of density inhomogeneities (<i>11 pages</i>)	031506
Martin Raible, Stefan J. Linz, and Peter Hänggi	
Modes of counterion density fluctuations and counterion-mediated attractions between like-charged fluid membranes (<i>9 pages</i>)	031507
Bae-Yeun Ha
