PHYSICAL REVIEW E THIRD SERIES, VOLUME 64, NUMBER 5 NOVEMBER 2001

Polymers

Bethe approximation for a model of polymer solvation *(4 pages)* . . . . . 050801(R)
P. Bruscolini, C. Buzano, A. Pelizzola, and M. Pretti
Surface-tethered chains entangled in a polymer melt: Effects on adhesion dynamics *(4 pages)* . . . . . 050802(R)
Scott W. Sides, Gary S. Grest, and Mark J. Stevens
Short- and intermediate-time behavior of the linear stress relaxation in semiflexible polymers *(4 pages)* . . . . . 050803(R)
P. Dimitrakopoulos, J. F. Brady, and Z.-G. Wang

Biological physics

Critical behavior of propagation on small-world networks *(4 pages)* . . . . . 050901(R)
Damián H. Zanette
Random dynamics of the Hodgkin-Huxley neuron model *(4 pages)* . . . . . 050902(R)
K. Pakdaman and Seiji Tanabe
Instability of myelin tubes under dehydration: Deswelling of layered cylindrical structures *(4 pages)* . . . . . 050903(R)
C.-M. Chen, C.F. Schmidt, P.D. Olmsted, and F.C. MacKintosh

REGULAR ARTICLES

Statistical physics of soft matter

Slow crossover to Kardar-Parisi-Zhang scaling *(5 pages)* 051101
R. A. Blythe and M. R. Evans
Exact multilocal renormalization group and applications to disordered problems *(27 pages)* 051102
Pascal Chauve and Pierre Le Doussal
Origin of the hydrodynamic Lyapunov modes *(14 pages)* 051103
Sean McNamara and Michel Mareschal
Estimating and improving the signal-to-noise ratio of time series by symbolic dynamics *(15 pages)* 051104
Peter beim Graben
Experimental evidence of stochastic resonance without tuning due to non-Gaussian noises *(3 pages)* 051105
F. J. Castro, M. N. Kuperman, M. Fuentes, and H. S. Wio
Fractional Langevin equation *(4 pages)* 051106
Eric Lutz
Noise-induced phase synchronization enhanced by dichotomic noise *(7 pages)* 051107
Robert Rozenfeld, Jan A. Freund, Alexander Neiman, and Lutz Schimansky-Geier
Anomalous two-state model for anomalous diffusion *(12 pages)* 051108
A. I. Shushin
Effect of external noise correlation in optical coherence resonance *(4 pages)* 051109
J. M. Buldú, J. García-Ojalvo, Claudio R. Mirasso, M. C. Torrent, and J. M. Sancho
Robust stochastic resonance: Signal detection and adaptation in impulsive noise *(11 pages)* 051110
Bart Kosko and Sanya Mitaim
Accurate estimation of the survival probability for trapping in two dimensions *(6 pages)* 051111
Lazaros K. Gallos and Panos Argyrakis
Self-generated disorder and structural glass formation in homopolymer globules *(16 pages)* 051112
V. G. Rostiashvili, G. Migliorini, and T. A. Vilgis
Rotational Brownian motion of axisymmetric particles in a Maxwell fluid *(9 pages)* 051113
V. S. Volkov and A. I. Leonov
Correlation ratchets: Four current reversals and disjunct ‘‘windows’’ *(4 pages)* 051114
Romi Mankin, Risto Tammelo, and Dmitri Martila
Amphiphilic hard body mixtures *(10 pages)* 051115
Matthias Schmidt and Christian von Ferber
