THIRD SERIES, VOLUME 70, NUMBER 1

JULY 2004

|                                                                                                                                                            |        |
|------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Dynamics of gene regulatory networks with cell division cycle (13 pages) . . . . .                                                                         | 011909 |
| Luonan Chen, Ruiqi Wang, Tetsuya J. Kobayashi, and Kazuyuki Aihara                                                                                         |        |
| Overstretching and force-driven strand separation of double-helix DNA (18 pages) . . . . .                                                                 | 011910 |
| Simona Cocco, Jie Yan, Jean-Francois Léger, Didier Chatenay, and John F. Marko                                                                             |        |
| Spatially uniform and nonuniform analyses of electroencephalographic dynamics, with application to the topography of the alpha rhythm (19 pages) . . . . . | 011911 |
| S. C. O'Connor and P. A. Robinson                                                                                                                          |        |
| Density functional study on the structures and thermodynamic properties of small ions around polyanionic DNA (10 pages) . . . . .                          | 011912 |
| Ke Wang, Yang-Xin Yu, and Guang-Hua Gao                                                                                                                    |        |
| Electronic structures of A- and B-type DNA crystals (8 pages) . . . . .                                                                                    | 011913 |
| Masateru Taniguchi and Tomoji Kawai                                                                                                                        |        |
| Synchronization measures of bursting data: Application to the electrocorticogram of an auditory event-related experiment (10 pages) . . . . .              | 011914 |
| Mark A. Kramer, Erik Edwards, Maryam Soltani, Mitchel S. Berger, Robert T. Knight, and Andrew J. Szeri                                                     |        |
| Nucleosome interactions in chromatin: Fiber stiffening and hairpin formation (9 pages) . . . . .                                                           | 011915 |
| Boris Mergell, Ralf Everaers, and Helmut Schiessel                                                                                                         |        |
| Stochastic model for the species abundance problem in an ecological community (5 pages) . . . . .                                                          | 011916 |
| Simone Pigolotti, Alessandro Flammini, and Amos Maritan                                                                                                    |        |
| Stretching of homopolymers and contact order (8 pages) . . . . .                                                                                           | 011917 |
| Marek Cieplak, Trinh Xuan Hoang, and Mark O. Robbins                                                                                                       |        |

## BRIEF REPORTS

### Colloidal dispersions, suspensions, and aggregates

|                                                                                |        |
|--------------------------------------------------------------------------------|--------|
| Reentrance effect in the lane formation of driven colloids (4 pages) . . . . . | 012401 |
| J. Chakrabarti, J. Dzubiella, and H. Löwen                                     |        |

### Structured and complex fluids

|                                                                            |        |
|----------------------------------------------------------------------------|--------|
| Glass transition in models with controlled frustration (4 pages) . . . . . | 012501 |
| Annalisa Fierro                                                            |        |

### Liquid crystals

|                                                                                           |        |
|-------------------------------------------------------------------------------------------|--------|
| Self-consistent model of blue phase III to isotropic phase transition (3 pages) . . . . . | 012701 |
| Michał Cieřła and Lech Longa                                                              |        |

### Polymers

|                                                            |        |
|------------------------------------------------------------|--------|
| Stretching an adsorbed polymer globule (4 pages) . . . . . | 012801 |
| Franck Celestini, Thomas Frisch, and Xabier Oyharcabal     |        |

### Biological physics

|                                                                          |        |
|--------------------------------------------------------------------------|--------|
| Spreading of families in cyclic predator-prey models (4 pages) . . . . . | 012901 |
| Mária Ravasz, György Szabó, and Attila Szolnoki                          |        |

## CONTENTS - *Continued*

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 70, NUMBER 1

JULY 2004

Simulations of a small protein in a specifically designed generalized ensemble (*4 pages*) ..... 012902  
Ulrich H. E. Hansmann

Changes in the Hurst exponent of heartbeat intervals during physical activity (*4 pages*) ..... 012903  
M. Martinis, A. Knežević, G. Krstačić, and E. Vargović

## COMMENTS

### **Equilibrium and linear transport properties of fluids**

Comment on “Collective dynamics in liquid lithium, sodium, and aluminum” (*3 pages*) ..... 013201  
Tullio Scopigno and Giancarlo Ruocco

Reply to “Comment on ‘Collective dynamics in liquid lithium, sodium, and aluminum’ ” (*3 pages*) ..... 013202  
Shaminder Singh and K. Tankeshwar

### **Biological Physics**

Comment on “Theory of high-force DNA stretching and overstretching” (*2 pages*) ..... 013901  
Pui-Man Lam

Reply to “Comment on ‘Theory of high-force DNA stretching and overstretching’ ” (*2 pages*) ..... 013902  
Cornelis Storm and Philip Nelson

## PART 2: STATISTICAL AND NONLINEAR PHYSICS, FLUID DYNAMICS, AND RELATED TOPICS

### RAPID COMMUNICATIONS

#### General methods of statistical physics

- Multifractality in a broad class of disordered systems (*4 pages*) ..... 015101(R)  
Olaf Stenull
- Lattice scale-free networks with weighted linking (*4 pages*) ..... 015102(R)  
Kongqing Yang, Liang Huang, and Lei Yang
- Building reliable lattice Monte Carlo models for real drift and diffusion problems (*4 pages*) ..... 015103(R)  
Michel G. Gauthier and Gary W. Slater
- Phase transition in random walks with long-range correlations (*4 pages*) ..... 015104(R)  
Shahar Hod and Uri Keshet

#### Chaos and pattern formation

- Semiclassical construction of random wave functions for confined systems (*4 pages*) ..... 015201(R)  
Juan Diego Urbina and Klaus Richter
- Chemical turbulence equivalent to Nikolavskii turbulence (*4 pages*) ..... 015202(R)  
Dan Tanaka
- Dynamical properties of the delta-kicked harmonic oscillator (*4 pages*) ..... 015203(R)  
G. A. Kells, J. Twamley, and D. M. Heffernan

#### Fluid dynamics

- Slow modes in passive scalar turbulent advection (*4 pages*) ..... 015301(R)  
Thomas Gilbert
- Different cascade speeds for longitudinal and transverse velocity increments of small-scale turbulence  
(*4 pages*) ..... 015302(R)  
M. Siefert and J. Peinke

#### Physics of beams

- Phase-matching segmented wigglers in free-electron lasers (*4 pages*) ..... 015501(R)  
H. P. Freund

## BRIEF REPORTS

**General methods of statistical physics**

- Deformation of a renormalization-group equation applied to infinite-order phase transitions (*4 pages*) . . . . . 017101  
Hisamitsu Mukaida
- Rényi entropies and observables (*4 pages*) . . . . . 017102  
Bernhard Lesche
- Generic features of the fluctuation dissipation relation in coarsening systems (*4 pages*) . . . . . 017103  
Federico Corberi, Claudio Castellano, Eugenio Lippiello, and Marco Zannetti

**Chaos and pattern formation**

- $1/f$  noise in the two-body random ensemble (*4 pages*) . . . . . 017201  
A. Relaño, R. A. Molina, and J. Retamosa

**Fluid dynamics**

- Gas permeability of porous silicon nanostructures (*4 pages*) . . . . . 017301  
V. Lysenko, J. Vitiello, B. Remaki, and D. Barbier
- Anisotropy of acceleration in turbulent flows (*4 pages*) . . . . . 017302  
A. M. Reynolds, K. Yeo, and C. Lee
- Velocity boundary condition at solid walls in rarefied gas calculations (*4 pages*) . . . . . 017303  
Duncan A. Lockerby, Jason M. Reese, David R. Emerson, and Robert W. Barber

**Plasma physics**

- Dependence of the transition from Townsend to glow discharge on secondary emission (*3 pages*) . . . . . 017401  
Yu. P. Raizer, Ute Ebert, and D. D. Šijačić

**Classical physics, including nonlinear media and photonic materials**

- Effects of random and systematic perturbations in a one-dimensional photonic crystal wavelength converter (*4 pages*) . . . . . 017601  
F. Bragheri, D. Faccio, M. Romagnoli, T. Krauss, and J. Roberts

**Computational physics**

- Numerical methods for stochastic differential equations (*4 pages*) . . . . . 017701  
Joshua Wilkie

## COMMENTS

**General methods of statistical physics**

- Comment on “Fluctuation-dissipation relations in the nonequilibrium critical dynamics of Ising models” (*4 pages*) . . . . . 018101  
Michel Pleimling
- Reply to “Comment on ‘Fluctuation-dissipation relations in the nonequilibrium critical dynamics of Ising models’ ” (*4 pages*) . . . . . 018102  
Peter Mayer, Ludovic Berthier, Juan P. Garrahan, and Peter Sollich
