## PART 2: STATISTICAL AND NONLINEAR PHYSICS, FLUID DYNAMICS, AND RELATED TOPICS

### RAPID COMMUNICATIONS

#### General methods of statistical physics

- Family of solvable generalized random-matrix ensembles with unitary symmetry (*4 pages*) ..... 055101(R)  
K. A. Muttalib and J. R. Klauder
- Branching mechanism of intergranular crack propagation in three dimensions (*4 pages*) ..... 055102(R)  
M. Itakura, H. Kaburaki, and C. Arakawa
- Congestion and decongestion in a communication network (*4 pages*) ..... 055103(R)  
Brajendra K. Singh and Neelima Gupte

#### Chaos and pattern formation

- Missing physics in stick-slip dynamics of a model for peeling of an adhesive tape (*4 pages*) ..... 055201(R)  
Rumi De and G. Ananthakrishna
- Hexagons become the secondary pattern if symmetry is broken (*4 pages*) ..... 055202(R)  
Bert Reimann, Reinhard Richter, Holger Knieling, Rene Friedrichs, and Ingo Rehberg
- Universal critical behavior of the synchronization transition in delayed chaotic systems (*4 pages*) ..... 055203(R)  
Ivan G. Szendro and Juan M. López

#### Fluid dynamics

- Effects of surface tension on immiscible Rayleigh-Taylor turbulence (*4 pages*) ..... 055301(R)  
M. Chertkov, I. Kolokolov, and V. Lebedev
- Nonlinear Rayleigh-Taylor growth in converging geometry (*4 pages*) ..... 055302(R)  
Daniel S. Clark and Max Tabak
- Quasiplanar steep water waves (*4 pages*) ..... 055303(R)  
V. P. Ruban

#### Classical physics, including nonlinear media and photonic materials

- Two-dimensional sonic crystals with Helmholtz resonators (*4 pages*) ..... 055601(R)  
Xinhua Hu, C. T. Chan, and Jian Zi

## ARTICLES

### General methods of statistical physics

|                                                                                                                   |        |
|-------------------------------------------------------------------------------------------------------------------|--------|
| Temperature dependence of the Casimir effect ( <i>8 pages</i> ) . . . . .                                         | 056101 |
| I. Brevik, J. B. Aarseth, J. S. Høye, and K. A. Milton                                                            |        |
| Anomalous roughness with system-size-dependent local roughness exponent ( <i>8 pages</i> ) . . . . .              | 056102 |
| Alexander S. Balankin and Daniel Morales Matamoros                                                                |        |
| Subgraph centrality in complex networks ( <i>9 pages</i> ) . . . . .                                              | 056103 |
| Ernesto Estrada and Juan A. Rodríguez-Velázquez                                                                   |        |
| Diffusion-annihilation processes in complex networks ( <i>9 pages</i> ) . . . . .                                 | 056104 |
| Michele Catanzaro, Marián Boguñá, and Romualdo Pastor-Satorras                                                    |        |
| Mean-field conductivity in a certain class of networks ( <i>6 pages</i> ) . . . . .                               | 056105 |
| M. V. Chubynsky and M. F. Thorpe                                                                                  |        |
| Recurrence time analysis, long-term correlations, and extreme events ( <i>9 pages</i> ) . . . . .                 | 056106 |
| Eduardo G. Altmann and Holger Kantz                                                                               |        |
| Theory of lubrication due to collective pinning ( <i>11 pages</i> ) . . . . .                                     | 056107 |
| J. B. Sokoloff                                                                                                    |        |
| Robustness of the avalanche dynamics in data-packet transport on scale-free networks ( <i>4 pages</i> ) . . . . . | 056108 |
| E. J. Lee, K.-I. Goh, B. Kahng, and D. Kim                                                                        |        |
| Dynamics of the Fisher information metric ( <i>5 pages</i> ) . . . . .                                            | 056109 |
| Xavier Calmet and Jacques Calmet                                                                                  |        |
| Corrections to the Kelvin equation for long-range boundary fields ( <i>6 pages</i> ) . . . . .                    | 056110 |
| Andrzej Drzewiński and Katarzyna Szota                                                                            |        |
| Thermodynamics of the self-gravitating ring model ( <i>10 pages</i> ) . . . . .                                   | 056111 |
| Takayuki Tatekawa, Freddy Bouchet, Thierry Dauxois, and Stefano Ruffo                                             |        |
| Structural transitions in two-dimensional hard-sphere systems ( <i>8 pages</i> ) . . . . .                        | 056112 |
| S. C. Wu, D. T. Wasan, and A. D. Nikolov                                                                          |        |
| Influence of the link weight structure on the shortest path ( <i>13 pages</i> ) . . . . .                         | 056113 |
| Piet Van Mieghem and Stijn van Langen                                                                             |        |
| Importance of extremists for the structure of social networks ( <i>5 pages</i> ) . . . . .                        | 056114 |
| Philippe Blanchard, Santo Fortunato, and Tyll Krüger                                                              |        |
| Spin-glass phase transition on scale-free networks ( <i>13 pages</i> ) . . . . .                                  | 056115 |
| D.-H. Kim, G. J. Rodgers, B. Kahng, and D. Kim                                                                    |        |
| Compositional properties of random Boolean networks ( <i>5 pages</i> ) . . . . .                                  | 056116 |
| Elena Dubrova and Maxim Teslenko                                                                                  |        |

THIRD SERIES, VOLUME 71, NUMBER 5

MAY 2005

|                                                                                                                                                                                |        |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Determination of the diffusion constant using phase-sensitive measurements ( <i>11 pages</i> ) . . . . .                                                                       | 056604 |
| I. M. Vellekoop, P. Lodahl, and A. Lagendijk                                                                                                                                   |        |
| Vector-soliton collision dynamics in nonlinear optical fibers ( <i>16 pages</i> ) . . . . .                                                                                    | 056605 |
| Roy H. Goodman and Richard Haberman                                                                                                                                            |        |
| Modeling of defect modes in photonic crystals using the fictitious source superposition method ( <i>11 pages</i> ) . . .                                                       | 056606 |
| S. Wilcox, L. C. Botten, R. C. McPhedran, C. G. Poulton, and C. Martijn de Sterke                                                                                              |        |
| Ghost imaging with incoherent and partially coherent light radiation ( <i>7 pages</i> ) . . . . .                                                                              | 056607 |
| Yangjian Cai and Shi-Yao Zhu                                                                                                                                                   |        |
| Analytic properties of photonic crystal superprism parameters ( <i>9 pages</i> ) . . . . .                                                                                     | 056608 |
| M. J. Steel, R. Zoli, C. Grillet, R. C. McPhedran, C. Martijn de Sterke, A. Norton, P. Bassi, and B. J. Eggleton                                                               |        |
| Analysis of longitudinal-field reflection in dielectric gratings ( <i>5 pages</i> ) . . . . .                                                                                  | 056609 |
| Shayan Mookherjea and Uriel Levy                                                                                                                                               |        |
| Generalized optical theorem for reflection, transmission, and extinction of power for electromagnetic fields ( <i>8 pages</i> ) . . . . .                                      | 056610 |
| D. R. Lytle,II, P. Scott Carney, John C. Schotland, and Emil Wolf                                                                                                              |        |
| Equilibrium orientation of an ellipsoidal particle inside a dielectric medium with a finite electric conductivity in the external electric field ( <i>10 pages</i> ) . . . . . | 056611 |
| Yu. Dolinsky and T. Elperin                                                                                                                                                    |        |
| Discrete quadratic cavity solitons ( <i>12 pages</i> ) . . . . .                                                                                                               | 056612 |
| O. Egorov, U. Peschel, and F. Lederer                                                                                                                                          |        |
| Polarization instability, steering, and switching of discrete vector solitons ( <i>8 pages</i> ) . . . . .                                                                     | 056613 |
| Rodrigo A. Vicencio, Mario I. Molina, and Yuri S. Kivshar                                                                                                                      |        |
| Squared-field amplitude modulus and radiation intensity nonequivalence within nonlinear slabs ( <i>5 pages</i> ) . . . .                                                       | 056614 |
| Alberto Lencina and Pablo Vaveliuk                                                                                                                                             |        |
| Variational approach to spatial optical solitons in bulk cubic-quintic media stabilized by self-induced multiphoton ionization ( <i>6 pages</i> ) . . . . .                    | 056615 |
| C. P. Jisha, V. C. Kuriakose, and K. Porsezian                                                                                                                                 |        |
| Coupled-mode theory for spatial gap solitons in optically induced lattices ( <i>9 pages</i> ) . . . . .                                                                        | 056616 |
| Boris A. Malomed, Thawatchai Mayteevarunyoo, Elena A. Ostrovskaya, and Yuri S. Kivshar                                                                                         |        |
| Dynamic ultrasound radiation force in fluids ( <i>9 pages</i> ) . . . . .                                                                                                      | 056617 |
| Glauber T. Silva, Shigao Chen, James F. Greenleaf, and Mostafa Fatemi                                                                                                          |        |
| Measurement of dynamic and static radiation force on a sphere ( <i>4 pages</i> ) . . . . .                                                                                     | 056618 |
| Shigao Chen, Glauber T. Silva, Randall R. Kinnick, James F. Greenleaf, and Mostafa Fatemi                                                                                      |        |
| Exact solutions of the generalized nonlinear Schrödinger equation with distributed coefficients ( <i>11 pages</i> ) . . . .                                                    | 056619 |
| V. I. Kruglov, A. C. Peacock, and J. D. Harvey                                                                                                                                 |        |
| Bistability in the sine-Gordon equation: The ideal switch ( <i>8 pages</i> ) . . . . .                                                                                         | 056620 |
| R. Khomeriki and J. Leon                                                                                                                                                       |        |
| Rotating photonic crystals: A medium for compact optical gyroscopes ( <i>7 pages</i> ) . . . . .                                                                               | 056621 |
| Ben Zion Steinberg                                                                                                                                                             |        |

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 71, NUMBER 5

MAY 2005

Reduced Maxwell-Duffing description of extremely short pulses in nonresonant media (*12 pages*) . . . . . 056622  
Elena V. Kazantseva, Andrei I. Maimistov, and Jean-Guy Caputo

Capture into resonance in dynamics of a classical hydrogen atom in an oscillating electric field (*6 pages*) . . . . 056623  
Anatoly Neishtadt and Alexei Vasiliev

## Computational physics

Scaling of non-Markovian Monte Carlo wave-function methods (*9 pages*) . . . . . 056701  
J. Piilo, S. Maniscalco, A. Messina, and F. Petruccione

Diffusion properties of gradient-based lattice Boltzmann models of immiscible fluids (*8 pages*) . . . . . 056702  
M. Latva-Kokko and Daniel H. Rothman

Forward symplectic integrators and the long-time phase error in periodic motions (*12 pages*) . . . . . 056703  
Sante R. Scuro and Siu A. Chin

High-resolution numerical approximation of traffic flow problems with variable lanes and free-flow velocities (*13 pages*) . . . . . 056704  
Peng Zhang, Ru-Xun Liu, and S. C. Wong

Density of states of classical spin systems with continuous degrees of freedom (*7 pages*) . . . . . 056705  
Andreas Richter, Michel Pleimling, and Alfred Hüller

Lattice Boltzmann model for axisymmetric multiphase flows (*14 pages*) . . . . . 056706  
Kannan N. Premnath and John Abraham

Newtonian fluid meets an elastic solid: Coupling lattice Boltzmann and lattice-spring models (*16 pages*) . . . . 056707  
Gavin A. Buxton, Rolf Verberg, David Jasnow, and Anna C. Balazs

Effects of data windows on the methods of surrogate data (*5 pages*) . . . . . 056708  
Tomoya Suzuki, Tohru Ikeguchi, and Masuo Suzuki

Simultaneous computation of free energies and kinetics of rare events (*5 pages*) . . . . . 056709  
Daniele Moroni, Titus S. van Erp, and Peter G. Bolhuis

## BRIEF REPORTS

### General methods of statistical physics

Network clustering coefficient without degree-correlation biases (*4 pages*) . . . . . 057101  
Sara Nadiv Soffer and Alexei Vázquez

Coevolutionary dynamics on scale-free networks (*4 pages*) . . . . . 057102  
Sungmin Lee and Yup Kim

Multiple dynamical resonances in a discrete neuronal model (*4 pages*) . . . . . 057103  
Yu Jiang

Random walks on complex networks with inhomogeneous impact (*4 pages*) . . . . . 057104  
Zoltán Eisler and János Kertész

Front propagation in hyperbolic fractional reaction-diffusion equations (*4 pages*) . . . . . 057105  
Vicenç Méndez and Vicente Ortega-Cejas

(Continued)

## CONTENTS - Continued

### THIRD SERIES, VOLUME , NUMBER

#### Chaos and pattern formation

- Synchronization in driven versus autonomous coupled chaotic maps (*4 pages*) ..... 057201  
M. Pineda and M. G. Cosenza
- Dangerous bifurcation at border collision: When does it occur? (*4 pages*) ..... 057202  
Anindita Ganguli and Soumitro Banerjee

#### Fluid dynamics

- Reexamination of Hagen-Poiseuille flow: Shape dependence of the hydraulic resistance in microchannels (*4 pages*) ..... 057301  
Niels Asger Mortensen, Fridolin Okkels, and Henrik Bruus

#### Plasma physics

- Topology of plasma equilibria and the current closure condition (*4 pages*) ..... 057401  
S. Kocić, S. M. Mahajan, and R. D. Hazeltine

#### Classical physics, including nonlinear media and photonic materials

- Stability of double-peaked solitons in Bragg gratings with the quadratic nonlinearity (*4 pages*) ..... 057601  
Yaniv Leitner and Boris A. Malomed
- Localization of light and second-order nonlinearity enhancement in weakly disordered one-dimensional photonic crystals (*4 pages*) ..... 057602  
Daniele Faccio and Francesca Bragheri
- Phase-matched waveguide four-wave mixing scaled to higher peak powers with large-core-area hollow photonic-crystal fibers (*4 pages*) ..... 057603  
S. O. Konorov, E. E. Serebryannikov, A. B. Fedotov, R. B. Miles, and A. M. Zheltikov

#### Computational physics

- Maximum entropy and the problem of moments: A stable algorithm (*4 pages*) ..... 057701  
K. Bandyopadhyay, A. K. Bhattacharya, Parthapratim Biswas, and D. A. Drabold

### COMMENTS

- Comment on “Soliton ratchets induced by excitation of internal modes” (*2 pages*) ..... 058601  
Niurka R. Quintero, Bernardo Sánchez-Rey, and Jesús Casado-Pascual
- Reply to “Comment on ‘Soliton ratchets induced by excitation of internal modes’ ” (*1 page*) ..... 058602  
C. R. Willis and M. Farzaneh

### ERRATA

- Erratum: Nonuniversal finite-size scaling in anisotropic systems [Phys. Rev. E **70**, 056136 (2004)] (*1 page*) ..... 059901(E)  
X. S. Chen and V. Dohm
- Erratum: Free expansion of elastic filaments [Phys. Rev. E **64**, 061802 (2001)] (*1 page*) ..... 059902(E)  
A. J. Spakowitz and Z.-G. Wang
