THIRD SERIES, VOLUME 72, NUMBER 2

CONTENTS

AUGUST 2005

PART 1: SOFT MATTER AND BIOLOGICAL PHYSICS

RAPID COMMUNICATIONS

Statistical physics of soft matter

- Exact solution of the Fokker-Planck equation for a broad class of diffusion coefficients (*3 pages*) 020101(R)
Kwok Sau Fa

Structured and complex fluids

- Structural transition in bidispersed electrorheological fluids (*4 pages*) 020501(R)
Xianxiang Huang, Wing Yim Tam, and Ping Sheng

Films, interfaces, and crystal growth

- Renormalization group approach to multiscale simulation of polycrystalline materials using the phase field
crystal model (*4 pages*) 020601(R)
Nigel Goldenfeld, Badrinarayan P. Athreya, and Jonathan A. Dantzig

Liquid crystals

- Polarization switching in a columnar liquid crystalline urea as studied by optical second-harmonic generation
interferometry (*4 pages*) 020701(R)
Yoshinori Okada, Shohei Matsumoto, Yoichi Takanishi, Ken Ishikawa, Shoichiro Nakahara,
Keiki Kishikawa, and Hideo Takezoe
- Plucking a liquid chord: Mechanical response of a liquid crystal filament (*4 pages*) 020702(R)
Ralf Stannarius, Alexandru Nemeş, and Alexey Eremin

Biological physics

- Exact asymptotic results for the Bernoulli matching model of sequence alignment (*4 pages*) 020901(R)
Satya N. Majumdar and Sergei Nechaev

ARTICLES

Statistical physics of soft matter

- System size stochastic resonance: General nonequilibrium potential framework (*10 pages*) 021101
B. von Haeften, G. Izús, and H. S. Wio

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 72, NUMBER 2

AUGUST 2005

Scaling in activated escape of underdamped systems (<i>8 pages</i>)	021102
M. I. Dykman, I. B. Schwartz, and M. Shapiro	
Analytical results for the statistical distribution related to a memoryless deterministic walk: Dimensionality effect and mean-field models (<i>8 pages</i>)	021103
César Augusto Sangaletti Terçariol and Alexandre Souto Martinez	
Random walks and anomalous diffusion in two-component random media (<i>9 pages</i>)	021104
A. E. Arinstein and M. Gitterman	
Maxwell and very-hard-particle models for probabilistic ballistic annihilation: Hydrodynamic description (<i>16 pages</i>)	021105
François Coppex, Michel Droz, and Emmanuel Trizac	
Instabilities in a free granular fluid described by the Enskog equation (<i>9 pages</i>)	021106
Vicente Garzó	
First-passage method for the study of the efficiency of a two-channel reaction on a lattice (<i>8 pages</i>)	021107
E. Abad	
Equilibrium and linear transport properties of fluids	
Anomalous diffusivity in supercooled liquid silicon under pressure (<i>4 pages</i>)	021201
Tetsuya Morishita	
Asymptotic decay of the pair correlation function in molecular fluids: Application to hard rods (<i>11 pages</i>)	021202
S. V. Savenko and Marjolein Dijkstra	
Enhanced septahedral ordering in cold Lennard-Jones fluids (<i>11 pages</i>)	021203
Paul C. Whitford and George D. J. Phillies	
Granular materials	
Elastic wave propagation in confined granular systems (<i>18 pages</i>)	021301
Ellák Somfai, Jean-Noël Roux, Jacco H. Snoeijer, Martin van Hecke, and Wim van Saarloos	
Power-law velocity distributions in granular gases (<i>10 pages</i>)	021302
E. Ben-Naim, B. Machta, and J. Machta	
Mean-field description of jamming in noncohesive frictionless particulate systems (<i>9 pages</i>)	021303
D. A. Head	
Indeterminacy and the onset of motion in a simple granular packing (<i>11 pages</i>)	021304
Sean McNamara, Ramón García-Rojo, and Hans Herrmann	
Brazil nut effect and excluded volume attraction in vibrofluidized granular mixtures (<i>9 pages</i>)	021305
M. Bose, U. U. Kumar, P. R. Nott, and V. Kumaran	
Transport properties of dense dissipative hard-sphere fluids for arbitrary energy loss models (<i>23 pages</i>)	021306
James F. Lutsko	
Size segregation, convection, and arching effect (<i>7 pages</i>)	021307
Alejandro Saez, Francisco Vivanco, and Francisco Melo	
Breeding and solitary wave behavior of dunes (<i>5 pages</i>)	021308
O. Durán, V. Schwämmle, and H. Herrmann	

(Continued)

Rheophysics of dense granular materials: Discrete simulation of plane shear flows (<i>17 pages</i>)	021309
Frédéric da Cruz, Sacha Emam, Michaël Prochnow, Jean-Noël Roux, and François Chevoir	
Colloidal dispersions, suspensions, and aggregates	
Geometry of dynamically available empty space is the key to near-arrest dynamics (<i>5 pages</i>)	021401
Aonghus Lawlor, Paolo De Gregorio, Phil Bradley, Mauro Sellitto, and Kenneth A. Dawson	
Anomalous behavior of the depletion potential in quasi-two-dimensional binary mixtures (<i>7 pages</i>)	021402
Bianxiao Cui, Binhua Lin, Derek Frydel, and Stuart A. Rice	
Relationship between particle deposit characteristics and the mechanism of particle arrival (<i>9 pages</i>)	021403
Daniel Rodríguez-Pérez, Jose L. Castillo, and J. Carlos Antoranz	
Soft colloids driven and sheared by traveling wave fields (<i>9 pages</i>)	021404
M. Rex, H. Löwen, and C. N. Likos	
Long-range polarization attraction between two different like-charged macroions (<i>11 pages</i>)	021405
Rui Zhang and B. I. Shklovskii	
Structure, normal mode spectra, and mixing of a binary system of charged particles confined in a parabolic trap (<i>13 pages</i>)	021406
W. P. Ferreira, F. F. Munarin, K. Nelissen, R. N. Costa Filho, F. M. Peeters, and G. A. Farias	
Banding of suspended particles in a rotating fluid-filled horizontal cylinder (<i>9 pages</i>)	021407
G. Seiden, M. Ungarish, and S. G. Lipson	
Cluster formation of nanoparticles in an optical trap studied by fluorescence correlation spectroscopy (<i>7 pages</i>)	021408
Chie Hosokawa, Hiroyuki Yoshikawa, and Hiroshi Masuhara	
Structured and complex fluids	
Static and dynamic anomalies in a repulsive spherical ramp liquid: Theory and simulation (<i>11 pages</i>)	021501
Pradeep Kumar, Sergey V. Buldyrev, Francesco Sciortino, Emanuela Zaccarelli, and H. Eugene Stanley	
Mean-field glass transition in a model liquid (<i>12 pages</i>)	021502
V. S. Dotsenko and G. Blatter	
Potential-energy landscape of a supercooled liquid and its resemblance to a collection of traps (<i>13 pages</i>)	021503
A. Heuer, B. Doliwa, and A. Saksengwijit	
Self-assembled patterns and strain-induced instabilities for modulated systems (<i>15 pages</i>)	021504
Eliaana Ascitto, Christopher Roland, and Celeste Sagui	
Pattern formation arising from condensation of a homogeneous gas into a binary, phase-separating liquid (<i>8 pages</i>)	021505
C. M. Pooley, Anna C. Balazs, and J. M. Yeomans	
Viscoelastic properties of composite materials with random structure (<i>9 pages</i>)	021506
V. V. Novikov and Chr. Friedrich	
Dynamics of shear-transformation zones in amorphous plasticity: Nonlinear theory at low temperatures (<i>12 pages</i>)	021507
Leonid Pechenik	

Charge renormalization and inversion of a highly charged lipid bilayer: Effects of dielectric discontinuities and charge correlations (<i>10 pages</i>)	021508
Sattar Taheri-Araghi and Bae-Yeun Ha	
Brownian dynamics simulation of orientational behavior, flow-induced structure, and rheological properties of a suspension of oblate spheroid particles under simple shear (<i>11 pages</i>)	021509
Takehiro Yamamoto, Takanori Suga, and Noriyasu Mori	
Films, interfaces, and crystal growth	
Shape effect of hot droplets on fragmentation (<i>9 pages</i>)	021601
Nobuyoshi Komatsu and Takashi Abe	
Effect of hydrodynamic flow on low-field spin-lattice relaxation in liquids in the nanoscopic vicinity of solid surfaces: Theory and Monte Carlo simulations of model pore spaces (<i>14 pages</i>)	021602
Carlos Mattea, Hernan Tiraboschi, and Rainer Kimmich	
Optimum vacancy concentration in a crystal (<i>5 pages</i>)	021603
Sunil P. Singh, Charanbir Kaur, and Shankar P. Das	
Liquid crystals	
Friction drag of a spherical particle in a liquid crystal above the isotropic-nematic transition (<i>10 pages</i>)	021701
Jun-ichi Fukuda, Holger Stark, and Hiroshi Yokoyama	
Effect of flexible bimesogen dopant on the stability of the anticlinic liquid-crystal phase (<i>5 pages</i>)	021702
Min Hua Zhu, Rolfe G. Petschek, Charles Rosenblatt, Lachezar Komitov, Nils Olsson, Bertil Helgee, Julie M. Kim, and Mary E. Neubert	
Dielectric spectroscopy of a binary mixture of liquid crystals showing wide temperature range twisted grain boundary phase with re-entrant cholesteric phase (<i>10 pages</i>)	021703
Meenal Gupta, R. Dhar, V. K. Agrawal, R. Dabrowski, and M. Tykarska	
Flow-induced molecular orientation of amphiphile monolayers: Incorporation of hexatic elasticity into Ericksen-Leslie theory (<i>7 pages</i>)	021704
Mitsumasa Iwamoto and Ou-Yang Zhong-can	
Effect of pressure on the dynamics of the photostimulated orientational ordering transition in a liquid crystal (<i>6 pages</i>)	021705
S. Krishna Prasad, Vivek Kumar Gupta, D. S. Shankar Rao, and Chethan V. Lobo	
Phase sequences and long-range interactions in ferroelectric liquid crystals (<i>9 pages</i>)	021706
M. B. Hamaneh and P. L. Taylor	
Thermodynamical scaling of the low frequency relaxation time in liquid crystalline phases (<i>4 pages</i>)	021707
Stanisław Urban and Albert Würflinger	
Smectic tilt susceptibility: Anharmonic behavior in surface-induced smectic layers above the nematic–smectic-A transition temperature (<i>5 pages</i>)	021708
Zhibin Huang, Giovanni Carbone, Chen Xia, Ghanshyam P. Sinha, and Charles Rosenblatt	
Monte Carlo simulation of a strongly coupled XY model in three dimensions (<i>9 pages</i>)	021709
Rasool Ghanbari and Farhad Shahbazi	
Optically isotropic liquid-crystal phase of bent-core molecules with polar nanostructure (<i>6 pages</i>)	021710
G. Liao, S. Stojadinovic, G. Pelzl, W. Weissflog, S. Sprunt, and A. Jáklí	

Liquid crystal pretilt control by inhomogeneous surfaces (<i>4 pages</i>)	021711
Jones T. K. Wan, Ophelia K. C. Tsui, Hoi-Sing Kwok, and Ping Sheng	
Intrinsic torsional reorientations in a twisted nematic liquid crystal cell (<i>7 pages</i>)	021712
A. V. Zakharov and A. A. Vakulenko	
Polymers	
Solution of a field theory model of frontal photopolymerization (<i>12 pages</i>)	021801
James A. Warren, João T. Cabral, and Jack F. Douglas	
Evidence of convective constraint release during hole growth in freely standing polystyrene films at low temperatures (<i>12 pages</i>)	021802
C. B. Roth, B. Deh, B. G. Nickel, and J. R. Dutcher	
Hole growth in freely standing polystyrene films probed using a differential pressure experiment (<i>9 pages</i>)	021803
C. B. Roth and J. R. Dutcher	
Effect of low-molecular-weight salt on the nematic ordering in solutions of rodlike polyelectrolytes (<i>7 pages</i>)	021804
Igor I. Potemkin, Nikolay N. Oskolkov, Alexei R. Khokhlov, and Peter Reineker	
Dynamics of inextensible semiflexible filaments (<i>15 pages</i>)	021805
Tanniemola B. Liverpool	
Elasticity of polymer vesicles by osmotic pressure: An intermediate theory between fluid membranes and solid shells (<i>7 pages</i>)	021806
Z. C. Tu, L. Q. Ge, J. B. Li, and Z. C. Ou-Yang	
Surface forces in a confined polymer melt: Self-consistent field analysis of full and restricted equilibrium cases (<i>10 pages</i>)	021807
F. A. M. Leermakers and H. J. Butt	
Biological physics	
Role of chemical synapses in coupled neurons with noise (<i>7 pages</i>)	021901
Pablo Balenzuela and Jordi García-Ojalvo	
Signal-to-noise ratio gain of a noisy neuron that transmits subthreshold periodic spike trains (<i>7 pages</i>)	021902
Yan Mei Kang, Jian Xue Xu, and Yong Xie	
Frequency domain photon migration in the δ - P_1 approximation: Analysis of ballistic, transport, and diffuse regimes (<i>13 pages</i>)	021903
J. S. You, C. K. Hayakawa, and V. Venugopalan	
Medium effects on the selection of sequences folding into stable proteins in a simple model (<i>4 pages</i>)	021904
You-Quan Li, Yong-Yun Ji, Jun-Wen Mao, and Xiao-Wei Tang	
Nonlinear statistical modeling and model discovery for cardiorespiratory data (<i>10 pages</i>)	021905
D. G. Luchinsky, M. M. Millonas, V. N. Smelyanskiy, A. Pershakova, A. Stefanovska, and P. V. E. McClintock	
Effect of tubulin diffusion on polymerization of microtubules (<i>8 pages</i>)	021906
P. A. Deymier, Y. Yang, and J. Hoying	
Fast method for estimating the energy distribution of globular states of proteins (<i>5 pages</i>)	021907
Hai-Bo Cao, Cai-Zhuang Wang, and Kai-Ming Ho	

Pattern reconstruction and sequence processing in feed-forward layered neural networks near saturation (9 pages)	021908
F. L. Metz and W. K. Theumann	
Randomly curved runs interrupted by tumbling: A model for bacterial motion (7 pages)	021909
C. A. Condat, J. Jäckle, and S. A. Menchón	
Mode locking the cell cycle (6 pages)	021910
Frederick R. Cross and Eric D. Siggia	
Integrate-and-fire neurons with threshold noise: A tractable model of how interspike interval correlations affect neuronal signal transmission (21 pages)	021911
Benjamin Lindner, Maurice J. Chacron, and André Longtin	
ac conductivity in a DNA charge transport model (4 pages)	021912
P. Maniadis, G. Kalosakas, K. Ø. Rasmussen, and A. R. Bishop	
Direct stochastic simulation of Ca^{2+} motion in <i>Xenopus</i> eggs (12 pages)	021913
Y.-B. Yi, H. Wang, A. M. Sastry, and C. M. Lastoskie	
Probing mechanical properties of living cells by atomic force microscopy with blunted pyramidal cantilever tips (10 pages)	021914
Félix Rico, Pere Roca-Cusachs, Núria Gavara, Ramon Farré, Mar Rotger, and Daniel Navajas	
Recurrence plot analysis of nonstationary data: The understanding of curved patterns (6 pages)	021915
A. Facchini, H. Kantz, and E. Tiezzi	
Layered synchronous propagation of noise-induced chaotic spikes in linear arrays (5 pages)	021916
G. X. Qi, H. B. Huang, H. J. Wang, X. Xie, P. Yang, and Y. J. Zhang	
Mechanical properties of viral capsids (12 pages)	021917
Roya Zandi and David Reguera	

BRIEF REPORTS

Structured and complex fluids

Hydrodynamic slip boundary condition at chemically patterned surfaces: A continuum deduction from molecular dynamics (4 pages)	022501
Tiezheng Qian, Xiao-Ping Wang, and Ping Sheng	

Films, interfaces, and crystal growth

Kinetic model for step flow growth of [100] steps (4 pages)	022601
Lev Balykov and Axel Voigt	

Biological physics

Geometric and physical considerations for realistic protein models (4 pages)	022901
Isaac A. Hubner and Eugene I. Shakhnovich	
Scroll waves meandering in a model of an excitable medium (4 pages)	022902
A. Rusakov, A. B. Medvinsky, and A. V. Panfilov	
Chemotactic collapse and mesenchymal morphogenesis (4 pages)	022903
Carlos Escudero	

COMMENTS

Comment on “Frequency dependence and equilibration of the specific heat of glass-forming liquids” (3 pages)	023201
Elijah Flenner and Grzegorz Szamel	
Reply to “Comment on ‘Frequency dependence and equilibration of the specific heat of glass-forming liquids’ ” (2 pages)	023202
Clare C. Yu and Hervé M. Carruzzo	
Comment on the use of the method of images for calculating electromagnetic responses of interacting spheres (4 pages)	023401
Vadim A. Markel	
Reply to “Comment on the use of the method of images for calculating electromagnetic responses of interacting spheres” (2 pages)	023402
J. P. Huang, K. W. Yu, G. Q. Gu, M. Karttunen, and L. Dong
