

## PART 1: SOFT MATTER AND BIOLOGICAL PHYSICS

### RAPID COMMUNICATIONS

#### Statistical physics of soft matter

- Lambert diffusion in porous media in the Knudsen regime: Equivalence of self-diffusion and transport diffusion (*4 pages*) ..... 030101(R)  
Stefanie Russ, Stephan Zschiegner, Armin Bunde, and Jörg Kärger

- Intrinsic coherence resonance in an electrochemical cell (*4 pages*) ..... 030102(R)  
M. Rivera, Gerardo J. Escalera Santos, J. Uruchurtu-Chavarrín, and P. Parmananda

#### Equilibrium and linear transport properties of fluids

- Internal fluid dynamics in levitated drops by fast magnetic resonance velocimetry (*4 pages*) ..... 030201(R)  
A. Amar, S. Stapf, and B. Blümich

- Diffusion maximum as a function of size in dense liquids (*4 pages*) ..... 030202(R)  
Pradip Kr. Ghorai, A. V. Anil Kumar, Srikanth Sastry, and S. Yashonath

#### Granular materials

- Force dynamics in weakly vibrated granular packings (*4 pages*) ..... 030301(R)  
Paul Umbanhowar and Martin van Hecke

#### Colloidal dispersions, suspensions, and aggregates

- Bulk and interfacial properties in colloid-polymer mixtures (*4 pages*) ..... 030401(R)  
R. L. C. Vink, A. Jusufi, J. Dzubiella, and C. N. Likos

#### Polymers

- Bimodality in the transverse fluctuations of a grafted semiflexible polymer and the diffusion-convection analogue: An effective-medium approach (*4 pages*) ..... 030801(R)  
P. Benetatos, T. Munk, and E. Frey

#### Biological physics

- Coupled dynamics of DNA breathing and of proteins that selectively bind to single-stranded DNA (*4 pages*) ..... 030901(R)  
Tobias Ambjörnsson and Ralf Metzler

## ARTICLES

**Statistical physics of soft matter**

- Transport reversal in a thermal ratchet (*5 pages*) ..... 031101  
 Baoquan Ai, Liqui Wang, and Lianggang Liu
- Theory of the  $\omega^{-4/3}$  law of the power spectrum in dissipative flows (*5 pages*) ..... 031102  
 Hisao Hayakawa
- Diffusion, fragmentation, and coagulation processes: Analytical and numerical results (*13 pages*) ..... 031103  
 Poul Olesen, Jesper Ferkinghoff-Borg, Mogens H. Jensen, and Joachim Mathiesen
- Phase space flows for non-Hamiltonian systems with constraints (*5 pages*) ..... 031104  
 Alessandro Sergi
- Two distinct mechanisms of coherence in randomly perturbed dynamical systems (*10 pages*) ..... 031105  
 R. E. Lee DeVille, Eric Vanden-Eijnden, and Cyrill B. Muratov
- Logarithmic diffusion and porous media equations: A unified description (*5 pages*) ..... 031106  
 I. T. Pedron, R. S. Mendes, T. J. Buratta, L. C. Malacarne, and E. K. Lenzi
- Self-consistent generalized Langevin equation for colloidal mixtures (*11 pages*) ..... 031107  
 Marco Antonio Chávez-Rojo and Magdalena Medina-Noyola
- Multipoint correlation functions for continuous-time random walk models of anomalous diffusion  
 (*18 pages*) ..... 031108  
 František Šanda and Shaul Mukamel
- Logarithmic coarsening and glassy behavior in a polymer model with mass-dependent diffusion  
 (*6 pages*) ..... 031109  
 F. D. A. Aarão Reis and R. B. Stinchcombe
- Exact effective transport dynamics in a one-dimensional random environment (*12 pages*) ..... 031110  
 Marco Dentz and Brian Berkowitz
- Diffusive transport of light in a Kelvin foam (*12 pages*) ..... 031111  
 MirFaez Miri, Ebrahim Madadi, and Holger Stark
- Fokker-Planck analysis of stochastic coherence in models of an excitable neuron with noise in both fast and  
 slow dynamics (*14 pages*) ..... 031112  
 Robert C. Hilborn and Rebecca J. Erwin
- System-size resonance in a binary attractor neural network (*7 pages*) ..... 031113  
 M. A. de la Casa, E. Korutcheva, J. M. R. Parrondo, and F. J. de la Rubia

**Equilibrium and linear transport properties of fluids**

- Molecular dynamics study of the density and temperature dependence of bridge functions in normal and  
 supercritical Lennard-Jones fluids (*9 pages*) ..... 031201  
 Tapas R. Kunor and Srabani Taraphder
- Thermal conductivity and bulk viscosity in quartic oscillator chains (*8 pages*) ..... 031202  
 G. R. Lee-Dadswell, B. G. Nickel, and C. G. Gray

**Granular materials**

- Polymerization transitions in two-dimensional systems of dipolar spheres (*4 pages*) ..... 031301  
 Justin Stambaugh, Kevin Van Workum, Jack F. Douglas, and Wolfgang Losert

## PART 2: STATISTICAL AND NONLINEAR PHYSICS, FLUID DYNAMICS, AND RELATED TOPICS

### RAPID COMMUNICATIONS

#### General methods of statistical physics

- Two-loop functional renormalization for elastic manifolds pinned by disorder in  $N$  dimensions (*4 pages*) ..... 035101(R)  
Pierre Le Doussal and Kay Jörg Wiese
- Stochastic optimal velocity model and its long-lived metastability (*4 pages*) ..... 035102(R)  
Masahiro Kanai, Katsuhiro Nishinari, and Tetsuji Tokihiro

#### Chaos and pattern formation

- Spatiotemporal chaos in excised larynx vibrations (*4 pages*) ..... 035201(R)  
Yu Zhang and Jack J. Jiang

#### Fluid dynamics

- Reverse transition to hydrodynamic stability through the Schwarzschild line in a supercritical fluid layer  
(*4 pages*) ..... 035301(R)  
Gilbert Accary, Isabelle Raspo, Patrick Bontoux, and Bernard Zappoli
- Large-scale intermittency in two-dimensional driven turbulence (*4 pages*) ..... 035302(R)  
Yonggun Jun and X. L. Wu

#### Classical physics, including nonlinear media and photonic materials

- Optimal superluminal systems (*4 pages*) ..... 035601(R)  
Bruno Macke, Bernard Ségard, and Franck Wielonsky
- Translationally invariant discrete kinks from one-dimensional maps (*4 pages*) ..... 035602(R)  
I. V. Barashenkov, O. F. Oxtoby, and Dmitry E. Pelinovsky
- Dynamical stabilization of solitons in cubic-quintic nonlinear Schrödinger model (*4 pages*) ..... 035603(R)  
Fatkhulla Kh. Abdullaev and Josselin Garnier

### ARTICLES

#### General methods of statistical physics

- Power laws of complex systems from extreme physical information (*10 pages*) ..... 036101  
B. Roy Frieden and Robert A. Gatenby

### BRIEF REPORTS

#### General methods of statistical physics

|                                                                                              |        |
|----------------------------------------------------------------------------------------------|--------|
| Synchronization on Erdős-Rényi networks ( <i>3 pages</i> ) . . . . .                         | 037101 |
| Baihua Gong, Lei Yang, and Kongqing Yang                                                     |        |
| Size-temperature phase diagram for small Lennard-Jones clusters ( <i>4 pages</i> ) . . . . . | 037102 |
| Pavel A. Frantsuzov and Vladimir A. Mandelshtam                                              |        |
| Kinetic description of avalanching systems ( <i>4 pages</i> ) . . . . .                      | 037103 |
| M. Gedalin, M. Balikhin, D. Coca, G. Consolini, and R. A. Treumann                           |        |
| Evolution of power law distributions in science and society ( <i>4 pages</i> ) . . . . .     | 037104 |
| Young-Pyo Jeon and Benjamin J. McCoy                                                         |        |

#### Chaos and pattern formation

|                                                                                                                                             |        |
|---------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Generalized synchronization in coupled Ginzburg-Landau equations and mechanisms of its arising ( <i>4 pages</i> ) . . . . .                 | 037201 |
| Alexander E. Hramov, Alexey A. Koronovskii, and Pavel V. Popov                                                                              |        |
| Statistics of unstable periodic orbits of a chaotic dynamical system with a large number of degrees of freedom ( <i>4 pages</i> ) . . . . . | 037202 |
| Mitsuhiro Kawasaki and Shin-ichi Sasa                                                                                                       |        |
| Coexistence of anticipated and layered chaotic synchronization in time-delay systems ( <i>4 pages</i> ) . . . . .                           | 037203 |
| H. J. Wang, H. B. Huang, and G. X. Qi                                                                                                       |        |
| Period-adding route in sparkling bubbles ( <i>4 pages</i> ) . . . . .                                                                       | 037204 |
| Gérard Liger-Belair, Alberto Tufaile, Bertrand Robillard, Philippe Jeandet, and José Carlos Sartorelli                                      |        |
| Desynchronized wave patterns in synchronized chaotic regions of coupled map lattices ( <i>4 pages</i> ) . . . . .                           | 037205 |
| P. Palaniyandi, P. Muruganandam, and M. Lakshmanan                                                                                          |        |
| Some aspects of the synchronization in coupled maps ( <i>4 pages</i> ) . . . . .                                                            | 037206 |
| Sandro E. de Souza Pinto, José T. Lunardi, Abdala M. Saleh, and Antonio M. Batista                                                          |        |

#### Fluid dynamics

|                                                                                   |        |
|-----------------------------------------------------------------------------------|--------|
| Breaking time reversal symmetry by viscous dephasing ( <i>4 pages</i> ) . . . . . | 037301 |
| Bruno Eckhardt and Erwan Hascoët                                                  |        |
| Bubble dispenser in microfluidic devices ( <i>4 pages</i> ) . . . . .             | 037302 |
| Thomas Cubaud, Mahidhar Tatineni, Xiaolin Zhong, and Chih-Ming Ho                 |        |

**Plasma physics**

- 10-Hz grazing-incidence pumped Ni-like Mo x-ray laser (*4 pages*) ..... 037401  
J. Tümmler, K. A. Janulewicz, G. Priebe, and P. V. Nickles

**Classical physics, including nonlinear media and photonic materials**

- Near- and far-field evolution of laser pulse filaments in Kerr media (*4 pages*) ..... 037601  
D. Faccio, A. Matijosius, A. Dubietis, R. Piskarskas, A. Varanavičius, E. Gaizauskas, A. Piskarskas,  
A. Couairon, and P. Di Trapani
- Wireless transfer between antenna arrays at the Talbot distance (*4 pages*) ..... 037602  
Rudolf Sprik

**COMMENTS**

- Comment on “Transition to turbulence in a shear flow” (*3 pages*) ..... 038301  
Fernando G. Basombrío and Gabriel Campo
- Reply to “Comment on ‘Transition to turbulence in a shear flow’ ” (*2 pages*) ..... 038302  
Bruno Eckhardt

**ERRATA**

- Erratum: Nonequilibrium patterns and shape fluctuations in reactive membranes [Phys. Rev. E **71**, 051906 (2005)] (*1 page*) ..... 039901(E)  
Ramon Reigada, Javier Buceta, and Katja Lindenberg
- Erratum: Scaling theory of polyelectrolyte adsorption on a repulsive charged surface [Phys. Rev. E **72**, 011808 (2005)] (*1 page*) ..... 039902(E)  
Chi-Ho Cheng and Pik-Yin Lai
- Publisher’s Note: Electrorotation of colloidal particles in liquid crystals [Phys. Rev. E **72**, 031704 (2005)] (*1 page*) ..... 039903(E)  
G. Liao, I. I. Smalyukh, J. R. Kelly, O. D. Lavrentovich, and A. Jákli
