THIRD SERIES, VOLUME 72, NUMBER 5

CONTENTS

NOVEMBER 2005

PART 1: SOFT MATTER AND BIOLOGICAL PHYSICS

RAPID COMMUNICATIONS

Colloidal dispersions, suspensions, and aggregates

- Light scattering enhancement in an aqueous solution of spermine-induced fractal J -aggregate composite
(4 pages) 050401(R)
Norberto Micali, Valentina Villari, Luigi Monsù Scolaro, Andrea Romeo, and Maria Angela Castriciano

ARTICLES

Statistical physics of soft matter

- Transport on randomly evolving trees (10 pages) 051101
L. Pál
- Numerical method for accessing the universal scaling function for a multiparticle discrete time asymmetric
exclusion process (7 pages) 051102
Nicholas Chia and Ralf Bundschuh
- Langevin equations for fluctuating surfaces (15 pages) 051103
Alvin L.-S. Chua, Christoph A. Haselwandter, Chiara Baggio, and Dimitri D. Vvedensky
- Aggregation of inertial particles in random flows (10 pages) 051104
B. Mehlig, M. Wilkinson, K. Duncan, T. Weber, and M. Ljunggren
- Cancellation phenomenon of barrier escape driven by a non-Gaussian noise (4 pages) 051105
Jing-Dong Bao, Hai-Yan Wang, Ying Jia, and Yi-Zhong Zhuo
- Volatility, persistence, and survival in financial markets (11 pages) 051106
M. Constantin and S. Das Sarma

Equilibrium and linear transport properties of fluids

- Bulk viscosity of stirred xenon near the critical point (20 pages) 051201
K. A. Gillis, I. I. Shinder, and M. R. Moldover
- Structure analysis methods for crystalline solids and supercooled liquids (7 pages) 051202
Da-Qi Yu, Min Chen, and Xiu-Jun Han

Copyright 2005 by The American Physical Society

(Continued)

1539-3755(200511)72:5;1-W

Phenomenological viscous factor in the nonequilibrium distribution function for liquids (<i>7 pages</i>)	051203
S. Morioka	
Many-body correlations versus mode-coupling effects in the dynamics of dense gases (<i>7 pages</i>)	051204
Puneet Sharma and K. Tankeshwar	
Granular materials	
Velocity distributions in dilute granular systems (<i>10 pages</i>)	051301
J. S. van Zon and F. C. MacKintosh	
Dilatancy, buckling, and undulations on a vertically vibrating granular layer (<i>7 pages</i>)	051302
Osamu Sano	
Numerical tests of constitutive laws for dense granular flows (<i>16 pages</i>)	051303
Gregg Lois, Anaël Lemaître, and Jean M. Carlson	
Granular packings sheared in an annular channel: Flow localization and grain size dependence (<i>10 pages</i>) . . .	051304
J.-C. Tsai and J. P. Gollub	
Memory of the unjamming transition during cyclic tiltings of a granular pile (<i>11 pages</i>)	051305
S. Deboeuf, O. Dauchot, L. Staron, A. Mangeney, and J.-P. Vilotte	
Effects of compression on the vibrational modes of marginally jammed solids (<i>11 pages</i>)	051306
Matthieu Wyart, Leonardo E. Silbert, Sidney R. Nagel, and Thomas A. Witten	
Colloidal dispersions, suspensions, and aggregates	
Time-resolved-correlation measurements of temporally heterogeneous dynamics (<i>17 pages</i>)	051401
Agnès Duri, Hugo Bissig, Véronique Trappe, and Luca Cipelletti	
Phase behavior of dipolar hard and soft spheres (<i>10 pages</i>)	051402
Antti-Pekka Hynninen and Marjolein Dijkstra	
Structured and complex fluids	
Density functional theory for the freezing of soft-core fluids (<i>7 pages</i>)	051501
A. J. Archer	
Diffusion of benzene confined in the oriented nanochannels of chrysotile asbestos fibers (<i>7 pages</i>)	051502
E. Mamontov, Yu. A. Kumzerov, and S. B. Vakhrushev	
Thermodynamics, structure, and dynamics of water confined between hydrophobic plates (<i>12 pages</i>)	051503
Pradeep Kumar, Sergey V. Buldyrev, Francis W. Starr, Nicolas Giovambattista, and H. Eugene Stanley	
Effective interaction of charged platelets in aqueous solution: Investigations of colloid laponite suspensions by static light scattering and small-angle x-ray scattering (<i>10 pages</i>)	051504
Li Li, L. Harnau, S. Rosenfeldt, and M. Ballauff	
Interconversion of mechanical and dielectrical relaxation measurements for dicyclohexylmethyl-2-methyl succinate (<i>8 pages</i>)	051505
R. Díaz-Calleja, A. Garcia-Bernabé, M. J. Sanchis, and L. F. del Castillo	
Helium condensation in aerogel: Avalanches and disorder-induced phase transition (<i>13 pages</i>)	051506
F. Detcheverry, E. Kierlik, M. L. Rosinberg, and G. Tarjus	

Films, interfaces, and crystal growth

Gravity capillary waves in fluid layers under normal electric fields (9 pages)	051601
Demetrios T. Papageorgiou, Peter G. Petropoulos, and Jean-Marc Vanden-Broeck	
Statistical mechanics of the disjoining pressure of a planar film (12 pages)	051602
J. R. Henderson	
Effect of diffusion on nucleation of two-dimensional nanoislands (8 pages)	051603
M. V. Sorokin and A. E. Volkov	

Liquid crystals

Origin of shear-induced phase transitions in melts of liquid-crystal polymers (5 pages)	051701
Laurence Noirez	
Biaxial nematic phases and V-shaped molecules: A Monte Carlo simulation study (15 pages)	051702
Martin A. Bates and Geoffrey R. Luckhurst	
Interlayer jump diffusion in the smectic- C_A^* phase by angular-dependent ^2H NMR study (8 pages)	051703
J. Xu, C. A. Veracini, and Ronald Y. Dong	
Nematic-nematic phase separation in binary mixtures of thick and thin hard rods: Results from Onsager-like theories (19 pages)	051704
Szabolcs Varga, Kirstin Purdy, Amparo Galindo, Seth Fraden, and George Jackson	
Geometrical analysis of the electro-optical effect in nematic droplets (7 pages)	051705
L. Jiménez, Carlos I. Mendoza, and J. A. Reyes	
Orientational instabilities in nematic liquid crystals with weak anchoring under combined action of steady flow and external fields (10 pages)	051706
I. Sh. Nasibullayev, O. S. Tarasov, A. P. Krekhov, and L. Kramer	
Density functional theory and simulation of the columnar phase of a system of parallel hard ellipsoids with attractive interactions (12 pages)	051707
Elvira Martín del Río, Amparo Galindo, and Enrique de Miguel	
Strong azimuthal anchoring energy at a nematic-polyimide interface (9 pages)	051708
S. Faetti and P. Marianelli	
Dynamics of the guest-host orientational interaction in dye-doped liquid-crystalline materials (15 pages)	051709
Thai V. Truong, Lei Xu, and Y. R. Shen	
Dielectric spectroscopy of aerosil-dispersed liquid crystal embedded in Anopore membranes (10 pages)	051710
G. Sinha, J. Leys, C. Glorieux, and J. Thoen	
Test of clock model in ellipsometric study of thin and thick free-standing films of an antiferroelectric liquid crystal (9 pages)	051711
M. Conradi, M. Čepič, M. Čopič, and I. Mušević	
Numerical study of optically induced director oscillations in nematic liquid crystals: Transition to chaos via homoclinic gluings and the role of backflow (4 pages)	051712
G. Demeter, D. O. Krimer, and L. Kramer	
Transformation from walls to disclination lines: Statics and dynamics of the pincement transition (11 pages)	051713
Alberto de Lózar, Wolfgang Schöpf, Ingo Rehberg, Daniel Svenšek, and Lorenz Kramer	

Poisson bracket approach to the dynamics of nematic liquid crystals: The role of spin angular momentum (9 pages)	051714
H. Stark and T. C. Lubensky	
Electro-optics and structural peculiarities of liquid crystal–nanoparticle–polymer composites (11 pages)	051715
Oleg V. Yaroshchuk, Leonid O. Dolgov, and Alexei D. Kiselev	
Calorimetric study of the nematic to smectic-A and smectic-A to smectic-C phase transitions in liquid-crystal–aerosil dispersions (10 pages)	051716
A. Roshi, G. S. Iannacchione, P. S. Clegg, R. J. Birgeneau, and M. E. Neubert	
Orientational correlations and the effect of spatial gradients in the equilibrium steady state of hard rods in two dimensions: A study using deposition-evaporation kinetics (12 pages)	051717
Mahendra D. Khandkar and Mustansir Barma	
Chiral-mechanical transitions in topologically imprinted elastomers (8 pages)	051718
D. J. Burrige, Y. Mao, and M. Warner	

Polymers

Evidence for vertical phase separation in densely grafted, high-molecular-weight poly(<i>N</i> -isopropylacrylamide) brushes in water (7 pages)	051801
H. Yim, M. S. Kent, S. Satija, S. Mendez, S. S. Balamurugan, S. Balamurugan, and G. P. Lopez	
Phase behavior of physically cross-linked asymmetric random heteropolymers (9 pages)	051802
Simcha Srebnik	
Unzipping an adsorbed polymer in a dirty or random environment (14 pages)	051803
Rajeev Kapri and Somendra M. Bhattacharjee	
Reentrant ordering transition of asymmetric copolymer solution film confined between polymer-grafted surfaces (7 pages)	051804
Chun-lai Ren and Yu-qiang Ma	
Conformational statistics of ribbonlike semiflexible polymer chains (7 pages)	051805
A. E. Arinstein	
Uniaxial ordering and rotator phase of ribbonlike polymers (12 pages)	051806
A. E. Arinstein	
Flow-induced correlation effects within a linear chain in a polymer melt (12 pages)	051807
R. Stepanyan, J. J. M. Slot, J. Molenaar, and M. Tchesnokov	

Biological physics

Rotary motor powered by stochastic uncorrelated dipoles (6 pages)	051901
Cheng-Hung Chang and Tian Yow Tsong	
Dynamical model based on finite stacking enthalpies for homogeneous and inhomogeneous DNA thermal denaturation (5 pages)	051902
Marc Joyeux and Sahin Buyukdagli	
Entropy reduction effect imposed by hydrogen bond formation on protein folding cooperativity: Evidence from a hydrophobic minimalist model (7 pages)	051903
Marco Aurélio A. Barbosa, Leandro G. Garcia, and Antônio F. Pereira de Araújo	
Adsorption-induced conformational changes in protein diffusion-aggregation surface assemblies (9 pages)	051904
Delphine Pellenc, Olivier Gallet, and Hugues Berry	

Glucose metabolism and oscillatory behavior of pancreatic islets (<i>12 pages</i>)	051905
H. Kang, J. Jo, H. J. Kim, M. Y. Choi, S. W. Rhee, and D. S. Koh	
Signal buffering in random networks of spiking neurons: Microscopic versus macroscopic phenomena (<i>5 pages</i>)	051906
Julien Mayor and Wulfram Gerstner	
Self-regulating gene: An exact solution (<i>5 pages</i>)	051907
J. E. M. Hornos, D. Schultz, G. C. P. Innocentini, J. Wang, A. M. Walczak, J. N. Onuchic, and P. G. Wolynes	
Laser photothermoacoustic heterodyned lock-in depth profilometry in turbid tissue phantoms (<i>11 pages</i>)	051908
Ying Fan, Andreas Mandelis, Gloria Spirou, I. Alex Vitkin, and William M. Whelan	
Nonlinear dynamics of homeothermic temperature control in skunk cabbage, <i>Symplocarpus foetidus</i> (<i>6 pages</i>)	051909
Takanori Ito and Kikukatsu Ito	
Predictions and simulations of cortical dynamics during natural sleep using a continuum approach (<i>14 pages</i>)	051910
M. T. Wilson, M. L. Steyn-Ross, D. A. Steyn-Ross, and J. W. Sleight	
Stochastic resonance in the mechano-electrical transduction of hair cells (<i>4 pages</i>)	051911
John F. Lindner, Matthew Bennett, and Kurt Wiesenfeld	
Ventricular dilation as an instability of intracranial dynamics (<i>13 pages</i>)	051912
R. Bouzerar, K. Ambarki, O. Balédent, G. Kongolo, J. C. Picot, and M. E. Meyer	
Lubricating bacteria model for the growth of bacterial colonies exposed to ultraviolet radiation (<i>8 pages</i>)	051913
Shengli Zhang, Lei Zhang, Run Liang, Erhu Zhang, Yachao Liu, and Shumin Zhao	
Dynamic instability of microtubules: Effect of catastrophe-suppressing drugs (<i>14 pages</i>)	051914
Pankaj Kumar Mishra, Ambarish Kunwar, Sutapa Mukherji, and Debashish Chowdhury	
One-dimensional model of yeast prion aggregation (<i>8 pages</i>)	051915
K. C. Kunes, D. L. Cox, and R. R. P. Singh	
Topographic voltage and coherence mapping of brain potentials by means of the symbolic resonance analysis (<i>6 pages</i>)	051916
Peter beim Graben, Stefan Frisch, Andrew Fink, Douglas Saddy, and Jürgen Kurths	
Delayed excitatory and inhibitory feedback shape neural information transmission (<i>11 pages</i>)	051917
Maurice J. Chacron, André Longtin, and Leonard Maler	
Speeding up a single-molecule DNA device with a simple catalyst (<i>6 pages</i>)	051918
Yufang Wang, Y. Zhang, and N. P. Ong	
Improvement on a simplified model for protein folding simulation (<i>6 pages</i>)	051919
Ming Zhang, Changjun Chen, Yi He, and Yi Xiao	
Fast heat propagation in living tissue caused by branching artery network (<i>5 pages</i>)	051920
V. V. Gafiychuk, I. A. Lubashevsky, and B. Y. Datsko	
Generation of dynamic structures in nonequilibrium reactive bilayers (<i>11 pages</i>)	051921
Ramon Reigada, Javier Buceta, and Katja Lindenberg	
Block structured dynamics and neuronal coding (<i>8 pages</i>)	051922
J. M. González-Miranda	

CONTENTS - *Continued*

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 72, NUMBER 5

NOVEMBER 2005

Elasticity theory and shape transitions of viral shells (<i>19 pages</i>)	051923
T. T. Nguyen, Robijn F. Bruinsma, and William M. Gelbart	
Analytical theory of the stochastic dynamics of the power stroke in nonprocessive motor proteins (<i>10 pages</i>)	051924
H. J. Woo and Christopher L. Moss	
Gompertz mortality law and scaling behavior of the Penna model (<i>5 pages</i>)	051925
J. B. Coe and Y. Mao	
Synthesizing bird song (<i>8 pages</i>)	051926
D. Zysman, J. M. Méndez, B. Pando, J. Aliaga, F. Goller, and G. B. Mindlin	
Multistability of reentrant rhythms in an ionic model of a two-dimensional annulus of cardiac tissue (<i>11 pages</i>)	051927
Philippe Comtois and Alain Vinet	
Unfolding dynamics of the protein ubiquitin: Insight from simulation (<i>10 pages</i>)	051928
Shubhra Ghosh Dastidar and Chaitali Mukhopadhyay	
Exploring the energy landscape of model proteins: A metric criterion for the determination of dynamical connectivity (<i>8 pages</i>)	051929
Lorenzo Bongini, Roberto Livi, Antonio Politi, and Alessandro Torcini	
Surface charge relaxation and the pearling instability of charged surfactant tubes (<i>7 pages</i>)	051930
T. T. Nguyen, A. Gopal, K. Y. C. Lee, and T. A. Witten	
Approximate solution to the bidomain equations for electrocardiogram problems (<i>7 pages</i>)	051931
Salil G. Patel and Bradley J. Roth	

BRIEF REPORTS

Biological physics

Force-induced conformational transition in a system of interacting stiff polymers: Application to unfolding (<i>4 pages</i>)	052901
Sanjay Kumar and Debaprasad Giri	
Diffusing wave spectroscopy with a small number of scattering events: An implication to microflow diagnostics (<i>4 pages</i>)	052902
Sergey Ulyanov	
Dynamic transitions in small world networks: Approach to equilibrium limit (<i>4 pages</i>)	052903
Prashant M. Gade and Sudeshna Sinha

THIRD SERIES, VOLUME 72, NUMBER 5

CONTENTS

NOVEMBER 2005

PART 2: STATISTICAL AND NONLINEAR PHYSICS, FLUID DYNAMICS, AND RELATED TOPICS

RAPID COMMUNICATIONS

General methods of statistical physics

- Stable and unstable attractors in Boolean networks (*4 pages*) 055101(R)
Konstantin Klemm and Stefan Bornholdt
- Scale-free network hidden in a collapsing polymer (*4 pages*) 055102(R)
A. Kabakçioğlu and A. L. Stella
- Nonuniversality in microbranching instabilities in rapid fracture (*4 pages*) 055103(R)
Eran Bouchbinder and Itamar Procaccia

Chaos and pattern formation

- Testing for nonlinearity in time series without the Fourier transform (*4 pages*) 055201(R)
Tomomichi Nakamura, Xiaodong Luo, and Michael Small
- Stable stationary and breathing holes at the onset of a weakly inverted instability (*4 pages*) 055202(R)
Orazio Descalzi and Helmut R. Brand

Plasma physics

- Warm wave breaking of nonlinear plasma waves with arbitrary phase velocities (*4 pages*) 055401(R)
C. B. Schroeder, E. Esarey, and B. A. Shadwick

Classical physics, including nonlinear media and photonic materials

- Formation and propagation of matched and coupled ultraslow optical soliton pairs in a four-level double- Λ system (*4 pages*) 055601(R)
L. Deng, M. G. Payne, Guoxiang Huang, and E. W. Hagley
- Statistics of the mesoscopic field (*4 pages*) 055602(R)
A. A. Chabanov and A. Z. Genack

Computational physics

- Maximally fast coarsening algorithms (*4 pages*) 055701(R)
Mowei Cheng and Andrew D. Rutenberg

ARTICLES

General methods of statistical physics

Scaling and data collapse for the mean exit time of asset prices (<i>10 pages</i>)	056101
Miquel Montero, Josep Perelló, Jaume Masoliver, Fabrizio Lillo, Salvatore Miccichè, and Rosario N. Mantegna	
Mean-field limit of systems with multiplicative noise (<i>9 pages</i>)	056102
Miguel A. Muñoz, Francesca Colaiori, and Claudio Castellano	
Correction to scaling in the response function of the two-dimensional kinetic Ising model (<i>13 pages</i>)	056103
Federico Corberi, Eugenio Lippiello, and Marco Zannetti	
Molecular-field theory method for evaluating critical points of the Ising model (<i>5 pages</i>)	056104
K. K. Zhuravlev	
Lorentz-Lorenz coefficient, critical point constants, and coexistence curve of 1,1-difluoroethylene (<i>6 pages</i>)	056105
Nicola Fameli and David A. Balzarini	
Random Lindblad equations from complex environments (<i>11 pages</i>)	056106
Adrián A. Budini	
Local modularity measure for network clusterizations (<i>4 pages</i>)	056107
Stefanie Muff, Francesco Rao, and Amedeo Cafilisch	
Continuous approach for the random-field Ising chain (<i>7 pages</i>)	056108
R. Zillmer and A. Pikovsky	
Energetics of a simple microscopic heat engine (<i>7 pages</i>)	056109
Mesfin Asfaw and Mulugeta Bekele	
Quantum heat engine with multilevel quantum systems (<i>10 pages</i>)	056110
H. T. Quan, P. Zhang, and C. P. Sun	
Critical behavior of the two-dimensional randomly driven lattice gas (<i>4 pages</i>)	056111
Sergio Caracciolo, Andrea Gambassi, Massimiliano Gubinelli, and Andrea Pelissetto	
One-dimensional three-state quantum walk (<i>7 pages</i>)	056112
Norio Inui, Norio Konno, and Etsuo Segawa	
Variational principles and the shift in the front speed due to a cutoff (<i>7 pages</i>)	056113
Vicenç Méndez, Daniel Campos, and Evgeny P. Zemskov	
Universality of fluctuation-dissipation ratios: The ferromagnetic model (<i>13 pages</i>)	056114
A. Garriga, P. Sollich, I. Pagonabarraga, and F. Ritort	
Implications of the detailed fluctuation theorem for the sources of irreversibility in interfacial charge transfer processes (<i>8 pages</i>)	056115
Juan Bisquert	
Transition from smooth sliding to stick-slip motion in a single frictional contact (<i>15 pages</i>)	056116
O. M. Braun, M. Peyrard, V. Bortolani, A. Franchini, and A. Vanossi	
Monte Carlo study of the XY vector Blume-Emery-Griffiths model for ^3He — ^4He mixtures in three dimensions (<i>8 pages</i>)	056117
R. T. S. Freire, S. J. Mitchell, J. A. Plascak, and D. P. Landau	

Cooperation, social networks, and the emergence of leadership in a prisoner's dilemma with adaptive local interactions (<i>15 pages</i>)	056118
Martín G. Zimmermann and Víctor M. Eguíluz	
Traversal times for random walks on small-world networks (<i>7 pages</i>)	056119
Paul E. Parris and V. M. Kenkre	
Three mechanisms for power laws on the Cayley tree (<i>18 pages</i>)	056120
Ted Brookings, J. M. Carlson, and John Doyle	
Integral equation study of an ideal Ising mixture (<i>10 pages</i>)	056121
W. Fenz, I. P. Omelyan, and R. Folk	
Vere-Jones' self-similar branching model (<i>13 pages</i>)	056122
A. Saichev and D. Sornette	
Stationary and dynamical properties of a zero-range process on scale-free networks (<i>8 pages</i>)	056123
Jae Dong Noh	
Predicting failure using conditioning on damage history: Demonstration on percolation and hierarchical fiber bundles (<i>9 pages</i>)	056124
J. V. Andersen and D. Sornette	
Zero-range model of traffic flow (<i>9 pages</i>)	056125
J. Kaupužs, R. Mahnke, and R. J. Harris	
Spectral properties of disordered fully connected graphs (<i>14 pages</i>)	056126
S. N. Taraskin	
Cycles and clustering in bipartite networks (<i>9 pages</i>)	056127
Pedro G. Lind, Marta C. González, and Hans J. Herrmann	
Epidemic spreading and cooperation dynamics on homogeneous small-world networks (<i>5 pages</i>)	056128
F. C. Santos, J. F. Rodrigues, and J. M. Pacheco	
Directed and undirected multiurn models in a one-dimensional ring (<i>5 pages</i>)	056129
Jan Nagler	
Resilience of complex networks to random breakdown (<i>6 pages</i>)	056130
Gerald Paul, Sameet Sreenivasan, and H. Eugene Stanley	
Possible connection between the optimal path and flow in percolation clusters (<i>6 pages</i>)	056131
Eduardo López, Sergey V. Buldyrev, Lidia A. Braunstein, Shlomo Havlin, and H. Eugene Stanley	
Dilute Potts model in two dimensions (<i>15 pages</i>)	056132
Xiaofeng Qian, Youjin Deng, and Henk W. J. Blöte	
From time series to superstatistics (<i>8 pages</i>)	056133
Christian Beck, Ezechiel G. D. Cohen, and Harry L. Swinney	
The mean-field φ^4 model: Entropy, analyticity, and configuration space topology (<i>9 pages</i>)	056134
Ingo Hahn and Michael Kastner	
Finding instabilities in the community structure of complex networks (<i>6 pages</i>)	056135
David Gfeller, Jean-Cédric Chappelier, and Paolo De Los Rios	
Nonlinear amplifier and frequency shifter using a tunable periodic drive (<i>6 pages</i>)	056136
Sergey Savel'ev, A. L. Rakhmanov, and Franco Nori	

Wave patterns in frequency-entrained oscillator lattices (<i>14 pages</i>)	056137
Jan Eric Sträng and Per Östborn	
Phase transition in the link weight structure of networks (<i>7 pages</i>)	056138
Piet Van Mieghem and Serena M. Magdalena	
Synchronizations in small-world networks of spiking neurons: Diffusive versus sigmoid couplings (<i>8 pages</i>)	056139
Hideo Hasegawa	
Chaos and pattern formation	
Control of multilevel voltage states in a hysteretic superconducting-quantum-interference-device ring-resonator system (<i>8 pages</i>)	056201
P. Stiffell, M. J. Everitt, T. D. Clark, and J. F. Ralph	
Graphical interpretation of observability in terms of feedback circuits (<i>6 pages</i>)	056202
Christophe Letellier and Luis A. Aguirre	
Chaos, coherence, and the double-slit experiment (<i>8 pages</i>)	056203
Philippe Jacquod	
Amplitude death in coupled chaotic oscillators (<i>10 pages</i>)	056204
Awadhesh Prasad	
Effect of inhomogeneities on spiral wave dynamics in the Belousov-Zhabotinsky reaction (<i>6 pages</i>)	056205
Linda B. Smolka, Bradley Marts, and Anna L. Lin	
Distribution of the spacing between two adjacent avoided crossings (<i>5 pages</i>)	056206
Manabu Machida and Keiji Saito	
Reliability of the 0-1 test for chaos (<i>5 pages</i>)	056207
Jing Hu, Wen-wen Tung, Jianbo Gao, and Yinhe Cao	
Two-mode chaos and its synchronization properties (<i>5 pages</i>)	056208
D. E. Postnov, A. V. Shishkin, O. V. Sosnovtseva, and E. Mosekilde	
Persistence of strong correlations in the energy spectrum of a separable Hamiltonian system: The rectangular box (<i>10 pages</i>)	056209
J. M. A. S. P. Wickramasinghe, B. Goodman, and R. A. Serota	
Quantum signatures of nonlinear resonances in mesoscopic systems: Efficient extension of localized wave functions (<i>7 pages</i>)	056210
Y. F. Chen, T. H. Lu, K. W. Su, and K. F. Huang	
Weyl formula: Experimental test of ray splitting and corner corrections (<i>31 pages</i>)	056211
C. Vaa, P. M. Koch, and R. Blümel	
Weakly nonlinear analysis of impulsively-forced Faraday waves (<i>10 pages</i>)	056212
Anne Catllá, Jeff Porter, and Mary Silber	
Bifurcation and chaos in coupled ratchets exhibiting synchronized dynamics (<i>8 pages</i>)	056213
U. E. Vincent, A. Kenfack, A. N. Njah, and O. Akinlade	
Fast high-quality numerical shadowing of chaotic maps using synchronization (<i>14 pages</i>)	056214
Mitrajit Dutta	
Spectral correlations of individual quantum graphs (<i>14 pages</i>)	056215
Sven Gnutzmann and Alexander Altland	

Small-shuffle surrogate data: Testing for dynamics in fluctuating data with trends (6 pages)	056216
Tomomichi Nakamura and Michael Small	
Patterns and localized structures in population dynamics (5 pages)	056217
M. G. Clerc, D. Escaff, and V. M. Kenkre	
Pair of excitable FitzHugh-Nagumo elements: Synchronization, multistability, and chaos (6 pages)	056218
T. Yanagita, T. Ichinomiya, and Y. Oyama	
Fluid dynamics	
Gas slippage effect on microscale porous flow using the lattice Boltzmann method (8 pages)	056301
G. H. Tang, W. Q. Tao, and Y. L. He	
Surface excess properties from energy transport measurements during water evaporation (11 pages)	056302
Fei Duan and C. A. Ward	
Thermocapillary transport of energy during water evaporation (11 pages)	056303
Fei Duan, V. K. Badam, F. Durst, and C. A. Ward	
Surface-thermal capacity of D ₂ O from measurements made during steady-state evaporation (13 pages)	056304
Fei Duan and C. A. Ward	
Scaling laws and dispersion equations for Lévy particles in one-dimensional fractal porous media (7 pages)	056305
Moongyu Park, Natalie Kleinfelter, and John H. Cushman	
Application of the finite-size Lyapunov exponent to particle tracking velocimetry in fluid mechanics experiments (12 pages)	056306
Natalie Kleinfelter, Monica Moroni, and John H. Cushman	
Structural studies of decaying fluid turbulence: Effect of initial conditions (9 pages)	056307
Chirag Kalelkar	
Acceleration- and deceleration-phase nonlinear Rayleigh-Taylor growth at spherical interfaces (11 pages)	056308
Daniel S. Clark and Max Tabak	
Fine structure generation in a double-diffusive system (6 pages)	056309
S. B. Kozitskiy	
MRI measurements of an acoustically cavitating fluid in a standing wave (12 pages)	056310
Igor V. Mastikhin and Benedict Newling	
Spiral vortices traveling between two rotating defects in the Taylor-Couette system (9 pages)	056311
Ch. Hoffmann, M. Lücke, and A. Pinter	
Spatiotemporal resonances in a microfluidic system (5 pages)	056312
A. Dodge, A. Hountondji, M. C. Jullien, and P. Tabeling	
Rayleigh-Taylor instability in elastic solids (10 pages)	056313
A. R. Piriz, J. J. López Cela, O. D. Cortázar, N. A. Tahir, and D. H. H. Hoffmann	
Enstrophy dissipation in two-dimensional turbulence (7 pages)	056314
Marco Baiesi and Christian Maes	
Scaling laws for rotating Rayleigh-Bénard convection (10 pages)	056315
J. D. Scheel and M. C. Cross	

CONTENTS - Continued

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 72, NUMBER 5

NOVEMBER 2005

Field theory of the inverse cascade in two-dimensional turbulence (<i>15 pages</i>)	056316
Jackson R. Mayo	
Nuclear-magnetic-resonance diffusion simulations in two phases in porous media (<i>11 pages</i>)	056317
A. Valfouskaya and P. M. Adler	
Scale dependence of the coarse-grained velocity derivative tensor structure in turbulence (<i>9 pages</i>)	056318
Aurore Naso and Alain Pumir	
Fluid permeabilities of triply periodic minimal surfaces (<i>8 pages</i>)	056319
Y. Jung and S. Torquato	
Low magnetic Prandtl number dynamos with helical forcing (<i>9 pages</i>)	056320
Pablo D. Mininni and David C. Montgomery	
Reversing and nonreversing modulated Taylor-Couette flow at finite aspect ratio (<i>11 pages</i>)	056321
Anthony J. Youd and Carlo F. Barenghi	
Plasma physics	
Thin-foil expansion into a vacuum (<i>5 pages</i>)	056401
P. Mora	
Influence of electron recapture by the cathode upon the discharge characteristics in dc planar magnetrons (<i>11 pages</i>)	056402
Ivan Kolev, Annemie Bogaerts, and Renaat Gijbels	
Analytic expressions for optimal inertial-confinement-fusion hohlraum wall density and wall loss (<i>5 pages</i>)	056403
Mordecai D. Rosen and James H. Hammer	
Physics of beams	
Closed orbit change induced by nonzero dispersion rf cavities (<i>10 pages</i>)	056501
Weiming Guo, Katherine Harkay, and Michael Borland	
Pulsed-laser nonlinear Thomson scattering for general scattering geometries (<i>10 pages</i>)	056502
G. A. Krafft, A. Doyuran, and J. B. Rosenzweig	
Classical physics, including nonlinear media and photonic materials	
Propagation and localization of electromagnetic waves in quasiperiodic serial loop structures (<i>15 pages</i>)	056601
H. Aynaou, E. H. El Boudouti, Y. El Hassouani, A. Akjouj, B. Djafari-Rouhani, J. Vasseur, A. Benomar, and V. R. Velasco	
Dynamical mode locking in commensurate structures with an asymmetric deformable substrate potential (<i>4 pages</i>)	056602
Bambi Hu and Jasmina Tekić	
Nonlinear-optical spectral transformation of few-cycle laser pulses in photonic-crystal fibers (<i>6 pages</i>)	056603
E. E. Serebryannikov, A. M. Zheltikov, N. Ishii, C. Y. Teisset, S. Köhler, T. Fuji, T. Metzger, F. Krausz, and A. Baltuška	
Effect of absorption on the spatial coherence in scalar fields generated by statistically homogeneous and isotropic sources (<i>10 pages</i>)	056604
Kasimir Blomstedt, Tero Setälä, and Ari T. Friberg	

(Continued)

Slow light in periodic superstructure Bragg gratings (<i>8 pages</i>)	056605
D. Janner, G. Galzerano, G. Della Valle, P. Laporta, S. Longhi, and M. Belmonte	
Exact solution to line source scattering by an ideal left-handed wedge (<i>5 pages</i>)	056606
Cesar Monzon, Donald W. Forester, and Peter Loschialpo	
Compactlike discrete breathers in systems with nonlinear and nonlocal dispersive terms (<i>9 pages</i>)	056607
A. V. Gorbach and S. Flach	
Solitons for the rotating reduced Maxwell-Bloch equations with anisotropy (<i>7 pages</i>)	056608
H. Steudel, A. A. Zabolotskii, and R. Meinel	
Spontaneous emission in one-dimensional photonic crystals (<i>11 pages</i>)	056609
Adán S. Sánchez and P. Halevi	
Radiation torque on a birefringent sphere caused by an electromagnetic wave (<i>13 pages</i>)	056610
Mengkun Liu, Nian Ji, Zhifang Lin, and S. T. Chui	
Engineering Fano resonances in discrete arrays (<i>7 pages</i>)	056611
Andrey E. Miroshnichenko and Yuri S. Kivshar	
(2+1)-dimensional X-shaped localized waves (<i>9 pages</i>)	056612
Ioannis M. Besieris and Amr M. Shaarawi	
Planar electromagnetic metamaterial with a fish scale structure (<i>4 pages</i>)	056613
V. A. Fedotov, P. L. Mladyonov, S. L. Prosvirnin, and N. I. Zheludev	
Group delay tuning in active fiber Bragg gratings: From superluminal to subluminal pulse reflection (<i>5 pages</i>)	056614
Stefano Longhi	
Computational physics	
Exact numerical simulation of power-law noises (<i>10 pages</i>)	056701
Edoardo Milotti	
Efficient integral-equation-based method for accurate analysis of scattering from periodically arranged nanostructures (<i>17 pages</i>)	056702
G. Kobidze, B. Shanker, and D. P. Nyquist	
Lattice Boltzmann scheme for crystal growth in external flows (<i>10 pages</i>)	056703
Dmitry Medvedev and Klaus Kassner	
Linear embedding via Green's operators: A modeling technique for finite electromagnetic band-gap structures (<i>11 pages</i>)	056704
A. M. van de Water, B. P. de Hon, M. C. van Beurden, A. G. Tijhuis, and P. de Maagt	
Lattice Boltzmann interface capturing method for incompressible flows (<i>10 pages</i>)	056705
H. W. Zheng, C. Shu, and Y. T. Chew	
Reducing stochasticity in the North Atlantic Oscillation index with coupled Langevin equations (<i>12 pages</i>) . . .	056706
Pedro G. Lind, Alejandro Mora, Jason A. C. Gallas, and Maria Haase	
Boundary conditions for equilibrating incommensurate periodic patterns (<i>7 pages</i>)	056707
Hiroto Ogawa and Nariya Uchida	
Generating uniformly distributed random networks (<i>7 pages</i>)	056708
Yael Artzy-Randrup and Lewi Stone	

CONTENTS - *Continued*

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 72, NUMBER 5

NOVEMBER 2005

Moments of spectral functions: Monte Carlo evaluation and verification (<i>12 pages</i>)	056709
Cristian Predescu	
Fast flat-histogram method for generalized spin models (<i>18 pages</i>)	056710
S. Reynal and H. T. Diep	
Inferring the time-dependent complex Ginzburg-Landau equation from modulus data (<i>13 pages</i>)	056711
Rotha P. Yu, David M. Paganin, and Michael J. Morgan	
Statistical field estimators for multiscale simulations (<i>16 pages</i>)	056712
Jacob Eapen, Ju Li, and Sidney Yip	

BRIEF REPORTS

General methods of statistical physics

Relativity, nonextensivity, and extended power law distributions (<i>4 pages</i>)	057101
R. Silva and J. A. S. Lima	
Enhanced synchronizability by structural perturbations (<i>4 pages</i>)	057102
Ming Zhao, Tao Zhou, Bing-Hong Wang, and Wen-Xu Wang	
Entropy production in the majority-vote model (<i>4 pages</i>)	057103
Leonardo Crochik and Tânia Tomé	

Chaos and pattern formation

Partial amplitude death in coupled chaotic oscillators (<i>4 pages</i>)	057201
Weiqing Liu, Jinghua Xiao, and Junzhong Yang	
Adaptive approximation method for joint parameter estimation and identical synchronization of chaotic systems (<i>4 pages</i>)	057202
Inés P. Mariño and Joaquín Míguez	

Fluid dynamics

Galilean invariance and homogeneous anisotropic randomly stirred flows (<i>4 pages</i>)	057301
Arjun Berera and David Hochberg	

Classical physics, including nonlinear media and photonic materials

Time reversal invariance and the arrow of time in classical electrodynamics (<i>3 pages</i>)	057601
Fritz Rohrlich	

ERRATA

Erratum: Statistics of loop formation along double helix DNAs [Phys. Rev. E 71 , 061905 (2005)] (<i>1 page</i>)	059901(E)
Jie Yan, Ryo Kawamura, and John F. Marko	
Publisher's Note: Reexamination of the Helfrich-Hurault effect in smectic-A liquid crystals [Phys. Rev. E 72 , 041708 (2005)] (<i>1 page</i>)	059902
G. Bevilacqua and G. Napoli
