## PART 1: STATISTICAL, SOFT MATTER, AND BIOLOGICAL PHYSICS

### RAPID COMMUNICATIONS

#### Statistical physics

- Contact process in heterogeneous and weakly disordered systems (*4 pages*) ..... 040101(R)  
C. J. Neugebauer, S. V. Fallert, and S. N. Taraskin
- Using available volume to predict fluid diffusivity in random media (*4 pages*) ..... 040102(R)  
Jeetain Mittal, Jeffrey R. Errington, and Thomas M. Truskett
- Transition records of stationary Markov chains (*4 pages*) ..... 040103(R)  
Jan Naudts and Erik Van der Straeten

#### Colloidal dispersions, suspensions, and aggregates

- Self-assembly of DNA-coded nanoclusters (*4 pages*) ..... 040401(R)  
Nicholas A. Licata and Alexei V. Tkachenko

#### Structured and complex fluids

- Universality in the phase behavior of soft matter: A law of corresponding states (*4 pages*) ..... 040501(R)  
G. Malescio

#### Liquid crystals

- Stick-slip dynamics around a topological defect in free-standing smectic films (*4 pages*) ..... 040701(R)  
Alexey Eremin, Christian Bohley, and Ralf Stannarius
- Self-alignment of liquid crystals in three-dimensional photonic crystals (*4 pages*) ..... 040702(R)  
Stefano Gottardo, Matteo Burrelli, Francesco Geobaldo, Luca Pallavidino, Fabrizio Giorgis, and  
Diederik S. Wiersma

#### Polymers

- Shear alignment of sphere-morphology block copolymer thin films with viscous fluid flow (*4 pages*) ..... 040801(R)  
Mingshaw W. Wu, Richard A. Register, and Paul M. Chaikin

|-------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Classification of phase transitions in reaction-diffusion models ( <i>16 pages</i> ) .....                                                                  | 041101 |
| Vlad Elgart and Alex Kamenev                                                                                                                                |        |
| Dynamical bimodality in equilibrium monostable systems ( <i>6 pages</i> ) .....                                                                             | 041102 |
| M. Mierzejewski, J. Dajka, J. Łuczka, P. Talkner, and P. Hänggi                                                                                             |        |
| Exact solution of a generalized Kramers-Fokker-Planck equation retaining retardation effects ( <i>13 pages</i> ) .....                                      | 041103 |
| R. Friedrich, F. Jenko, A. Baule, and S. Eule                                                                                                               |        |
| Direct observation of a precursor in a complex system ( <i>5 pages</i> ) .....                                                                              | 041104 |
| R. L. Santos and J. M. A. Figueiredo                                                                                                                        |        |
| Simplifying random satisfiability problems by removing frustrating interactions ( <i>9 pages</i> ) .....                                                    | 041105 |
| A. Ramezanpour and S. Moghimi-Araghi                                                                                                                        |        |
| Scaling and universality in the aging kinetics of the two-dimensional clock model ( <i>11 pages</i> ) .....                                                 | 041106 |
| Federico Corberi, Eugenio Lippiello, and Marco Zannetti                                                                                                     |        |
| Detrended fluctuation analysis in x-ray photon correlation spectroscopy for determining coarsening dynamics in alloys ( <i>10 pages</i> ) .....             | 041107 |
| Lorenz-M. Stadler, Bogdan Sepiol, Bastian Pfau, Jan W. Kantelhardt, Richard Weinkamer, and Gero Vogl                                                        |        |
| Water ingress in Y-type zeolite: Anomalous moisture-dependent transport diffusivity ( <i>9 pages</i> ) .....                                                | 041108 |
| Eduardo N. de Azevedo, D. Vitoreti da Silva, R. E. de Souza, and M. Engelsberg                                                                              |        |
| Threshold feedback control for a collective flashing ratchet: Threshold dependence ( <i>7 pages</i> ) .....                                                 | 041109 |
| M. Feito and F. J. Cao                                                                                                                                      |        |
| Universal distribution of threshold forces at the depinning transition ( <i>12 pages</i> ) .....                                                            | 041110 |
| Andrei A. Fedorenko, Pierre Le Doussal, and Kay Jörg Wiese                                                                                                  |        |
| Minority games with score-dependent and agent-dependent payoffs ( <i>8 pages</i> ) .....                                                                    | 041111 |
| F. Ren, B. Zheng, T. Qiu, and S. Trimper                                                                                                                    |        |
| State-dependent fire models and related renewal processes ( <i>9 pages</i> ) .....                                                                          | 041112 |
| Edoardo Daly and Amilcare Porporato                                                                                                                         |        |
| Test of local scale invariance from the direct measurement of the response function in the Ising model quenched to and below $T_C$ ( <i>8 pages</i> ) ..... | 041113 |
| Eugenio Lippiello, Federico Corberi, and Marco Zannetti                                                                                                     |        |
| Testing for correlation structures in short-term variabilities with long-term trends of multivariate time series ( <i>8 pages</i> ) .....                   | 041114 |
| Tomomichi Nakamura, Yoshito Hirata, and Michael Small                                                                                                       |        |
| Spectral formulation and WKB approximation for rare-event statistics in reaction systems ( <i>10 pages</i> ) .....                                          | 041115 |
| Michael Assaf and Baruch Meerson                                                                                                                            |        |
| Fisher waves and front roughening in a two-species invasion model with preemptive competition ( <i>7 pages</i> ) .....                                      | 041116 |
| L. O'Malley, B. Kozma, G. Korniss, Z. Rácz, and T. Caraco                                                                                                   |        |
| Fokker-Planck-Kramers equation for a Brownian gas in a magnetic field ( <i>10 pages</i> ) .....                                                             | 041117 |
| J. I. Jiménez-Aquino and M. Romero-Bastida                                                                                                                  |        |

|                                                                                                                                                       |        |
|-------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Escape over a fluctuating potential barrier with three-state Markovian noise ( <i>6 pages</i> ) . . . . .                                             | 041118 |
| Jing-hui Li and Yin-xia Han                                                                                                                           |        |
| Localized short-range correlations in the spectrum of the equal-time correlation matrix ( <i>9 pages</i> ) . . . . .                                  | 041119 |
| Markus Müller, Yurytzy López Jiménez, Christian Rummel, Gerold Baier, Andreas Galka,<br>Ulrich Stephani, and Hiltrud Muhle                            |        |
| Thermostatistical description of gas mixtures from space partitions ( <i>12 pages</i> ) . . . . .                                                     | 041120 |
| R. D. Rohrmann and J. Zorec                                                                                                                           |        |

## PART: 2 NONLINEAR AND PLASMA PHYSICS, FLUID DYNAMICS, AND RELATED TOPICS

### RAPID COMMUNICATIONS

#### Interdisciplinary physics

- Self-organized criticality and scale-free properties in emergent functional neural networks (*4 pages*) ..... 045101(R)  
Chang-Woo Shin and Seunghwan Kim
- Transition in the pattern of cracks resulting from memory effects in paste (*4 pages*) ..... 045102(R)  
Akio Nakahara and Yousuke Matsuo

#### Chaos and pattern formation

- Fluctuations and transients in quantum-resonant evolution (*4 pages*) ..... 045201(R)  
Itzhack Dana and Dmitry L. Dorofeev
- Noise-induced intermittent cellular patterns on circular domains (*4 pages*) ..... 045202(R)  
Peter Blomgren, Scott Gasner, and Antonio Palacios

#### Fluid dynamics

- Scaling of circulation in buoyancy generated vortices (*4 pages*) ..... 045301(R)  
P. Stansell and R. V. R. Pandya

#### Plasma physics

- Coherence-based transverse measurement of synchrotron x-ray radiation from relativistic laser-plasma interaction and laser-accelerated electrons (*4 pages*) ..... 045401(R)  
R. C. Shah, F. Albert, K. Ta Phuoc, O. Shevchenko, D. Boschetto, A. Pukhov, S. Kiselev, F. Burgy, J.-P. Rousseau, and A. Rousse

#### Classical physics, including nonlinear media and photonic materials

- Voltage-controlled phase matching in quadrupole second-harmonic generation (*4 pages*) ..... 045601(R)  
S. V. Lazarenko, A. Kirilyuk, and Th. Rasing
- Relativistic attosecond electron pulses from a free-space laser-acceleration scheme (*4 pages*) ..... 045602(R)  
Charles Varin and Michel Piché
- Spatial wave intensity correlations in quasi-one-dimensional wires (*4 pages*) ..... 045603(R)  
Gabriel Cwilich, Luis S. Froufe-Pérez, and Juan José Sáenz

#### Classical physics, including nonlinear media and photonic materials

|                                                                                                                                                                                             |        |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Stable three-dimensional optical solitons supported by competing quadratic and self-focusing cubic nonlinearities ( <i>4 pages</i> ) . . . . .                                              | 047601 |
| D. Mihalache, D. Mazilu, B. A. Malomed, F. Lederer, L.-C. Crasovan, Y. V. Kartashov, and L. Torner                                                                                          |        |
| Finite-time collapse of $N$ classical fields described by coupled nonlinear Schrödinger equations ( <i>3 pages</i> ) . . . .                                                                | 047602 |
| D. C. Roberts and A. C. Newell                                                                                                                                                              |        |
| Competition between phase-matching and stationarity in Kerr-driven optical pulse filamentation ( <i>4 pages</i> ) . . . . .                                                                 | 047603 |
| Daniele Faccio, Alessandro Averchi, Arnaud Couairon, Audrius Dubietis, Rimtautas Piskarskas, Aidas Matijosius, Francesca Bragheri, Miguel A. Porras, Algis Piskarskas, and Paolo Di Trapani |        |

### ERRATA

|                                                                                                                                                                                             |           |
