## PART 1: SORT MATTER AND BIOLOGICAL PHYSICS

### EDITORIALS AND ANNOUNCEMENTS

Announcement: New Prices and Payment Policy for Color Figures in the Print Journal (*1 page*) ..... 060001

### RAPID COMMUNICATIONS

#### Statistical physics

Characterizing potentials by a generalized Boltzmann factor (*4 pages*) ..... 060101(R)  
V. Blickle, T. Speck, U. Seifert, and C. Bechinger

Markov analysis and Kramers-Moyal expansion of nonstationary stochastic processes with application  
to the fluctuations in the oil price (*4 pages*) ..... 060102(R)  
Fatemeh Ghasemi, Muhammad Sahimi, J. Peinke, R. Friedrich,  
G. Reza Jafari, and M. Reza Rahimi Tabar

Microscopic formula for transport coefficients of causal hydrodynamics (*4 pages*) ..... 060103(R)  
T. Koide

Strong correlations between fluctuations and response in aging transport (*4 pages*) ..... 060104(R)  
E. Barkai

#### Granular materials

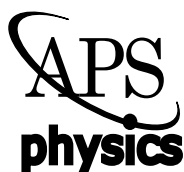

Power-law friction in closely packed granular materials (*4 pages*) ..... 060301(R)  
Takahiro Hatano

Tail of the contact force distribution in static granular materials (*4 pages*) ..... 060302(R)  
Adrianne R. T. van Eerd, Wouter G. Ellenbroek, Martin van Hecke,  
Jacco H. Snoeijer, and Thijs J. H. Vlugt

#### Structured and complex fluids

Induced dipoles and dielectrophoresis of nanocolloids in electrolytes (*4 pages*) ..... 060501(R)  
Sagnik Basuray and Hsueh-Chia Chang

Microstructure of neat alcohols (*4 pages*) ..... 060502(R)  
Aurélien Perera, Franjo Sokolić, and Larisa Zoranić

Copyright 2007 by The American Physical Society

(Continued)

1539-3755(200706)75:6;1;1-8

**Films, interfaces, and crystal growth**

- Universality of the power-law approach to the jamming limit in random sequential adsorption dynamics  
(4 pages) ..... 060601(R)  
Pradip B. Shelke, M. D. Khandkar, A. G. Banpurkar, S. B. Ogale, and A. V. Limaye

**Liquid crystals**

- Molecular model for de Vries type smectic-A–smectic-C phase transition in liquid crystals (4 pages) ..... 060701(R)  
M. V. Gorkunov, F. Giesselmann, J. P. F. Lagerwall, T. J. Sluckin, and M. A. Osipov

**Polymers**

- Unexpectedly normal phase behavior of single homopolymer chains (4 pages) ..... 060801(R)  
W. Paul, T. Strauch, F. Rampf, and K. Binder

**Biological physics**

- Quantification of spatial intensity correlations and photodetector intensity fluctuations of coherent light  
reflected from turbid particle suspensions (4 pages) ..... 060901(R)  
Vinayakrishnan Rajan, Babu Varghese, Ton G van Leeuwen, and Wiendelt Steenbergen

**ARTICLES**

**Statistical physics**

- Nonequilibrium work fluctuations for oscillators in non-Markovian baths (7 pages) ..... 061101  
Trieu Mai and Abhishek Dhar
- Percolation in hierarchical scale-free nets (8 pages) ..... 061102  
Hernán D. Rozenfeld and Daniel ben-Avraham
- Self-overlap as a method of analysis in Ising models (8 pages) ..... 061103  
A. Ferrera, B. Luque, L. Lacasa, and E. Valero
- Griffiths singularities and algebraic order in the exact solution of an Ising model on a fractal modular network  
(6 pages) ..... 061104  
Michael Hinczewski
- Optimal stimulus and noise distributions for information transmission via suprathreshold stochastic resonance  
(13 pages) ..... 061105  
Mark D. McDonnell, Nigel G. Stocks, and Derek Abbott
- Single molecule pulling with large time steps (7 pages) ..... 061106  
Harald Oberhofer, Christoph Dellago, and Stefan Boresch
- Fluctuation-induced phase transition in a spatially extended model for catalytic CO oxidation (10 pages) .... 061107  
M. Pineda, L. Schimansky-Geier, and R Imbühl
- Critical endpoint behavior in an asymmetric Ising model: Application of Wang-Landau sampling to calculate  
the density of states (9 pages) ..... 061108  
Shan-Ho Tsai, Fugao Wang, and D. P. Landau
- Emergence of order in selection-mutation dynamics (7 pages) ..... 061109  
Christoph Marx, Harald A. Posch, and Walter Thirring

THIRD SERIES, VOLUME 75, NUMBER 6

JUNE 2007

|                                                                                                                                                                       |        |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Interparticle potential barriers in soft matter systems (7 pages) . . . . .                                                                                           | 061402 |
| H. Fagner                                                                                                                                                             |        |
| Phase separation of charge-stabilized colloids: A Gibbs ensemble Monte Carlo simulation study (10 pages) . . . . .                                                    | 061403 |
| Ben Lu and Alan R. Denton                                                                                                                                             |        |
| Crystallization of colloidal hard spheres under gravity (8 pages) . . . . .                                                                                           | 061404 |
| Matthieu Marechal and Marjolein Dijkstra                                                                                                                              |        |
| Magnetic properties of polydisperse ferrofluids: A critical comparison between experiment, theory, and computer simulation (12 pages) . . . . .                       | 061405 |
| Alexey O. Ivanov, Sofia S. Kantorovich, Evgeniy N. Reznikov, Christian Holm, Alexander F. Pshenichnikov, Alexander V. Lebedev, Alexandros Chremos, and Philip J. Camp |        |
| Transition from two-dimensional to three-dimensional behavior in the self-assembly of magnetorheological fluids confined in thin slits (13 pages) . . . . .           | 061406 |
| Ramin Haghighoie and Patrick S. Doyle                                                                                                                                 |        |
| <b>Structured and complex fluids</b>                                                                                                                                  |        |
| Liquid-to-glass transition in bulk glass-forming $\text{Cu}_{60}\text{Ti}_{20}\text{Zr}_{20}$ alloy by molecular dynamics simulations (15 pages) . . . . .            | 061501 |
| X. J. Han and H. Teichler                                                                                                                                             |        |
| Wall slip, shear banding, and instability in the flow of a triblock copolymer micellar solution (11 pages) . . . . .                                                  | 061502 |
| Sébastien Manneville, Annie Colin, Gilles Waton, and François Schosseler                                                                                              |        |
| Phase behavior of the Stockmayer fluid via molecular dynamics simulation (11 pages) . . . . .                                                                         | 061503 |
| Jörg Bartke and Reinhard Hentschke                                                                                                                                    |        |
| Possibility of Fisher renormalization of the critical exponents in an Ising fluid (11 pages) . . . . .                                                                | 061504 |
