Entangled dynamics of a stiff polymer (4 pages)	060904(R)
Felix Höfling, Tobias Munk, Erwin Frey, and Thomas Franosch	

ARTICLES

Statistical physics

Nonequilibrium properties of a two-dimensionally isotropic interface in a two-phase mixture as described by the square gradient model (15 pages)	061101
K. S. Glavatskiy and D. Bedeaux	
Mechanical equivalent of quantum heat engines (6 pages)	061102
Jacques Arnaud, Laurent Chusseau, and Fabrice Philippe	
Intrinsic fractality of classic shot noise (5 pages)	061103
Iddo Eliazar	
Method for replica symmetry breaking at and near $T=0$ with application to the Sherrington-Kirkpatrick model (8 pages)	061104
Manuel J. Schmidt and Reinhold Oppermann	
Inferential framework for nonstationary dynamics. I. Theory (8 pages)	061105
Dmitri G. Luchinsky, Vadim N. Smelyanskiy, Andrea Duggento, and Peter V. E. McClintock	
Inferential framework for nonstationary dynamics. II. Application to a model of physiological signaling (10 pages)	061106
Andrea Duggento, Dmitri G. Luchinsky, Vadim N. Smelyanskiy, Igor Khovanov, and Peter V. E. McClintock	
Extinction of an infectious disease: A large fluctuation in a nonequilibrium system (4 pages)	061107
Alex Kamenev and Baruch Meerson	
Geometric properties of the three-dimensional Ising and XY models (9 pages)	061108
Frank Winter, Wolfhard Janke, and Adriaan M. J. Schakel	
Localization-delocalization transition in a two-dimensional quantum percolation model (9 pages)	061109
M Fhokrul Islam and Hisao Nakanishi	
Reentrant and forward phase diagrams of the anisotropic three-dimensional Ising spin glass (7 pages)	061110
Can Güven, A. Nihat Berker, Michael Hinczewski, and Hidetoshi Nishimori	
Brownian dipole rotator in alternating electric field (9 pages)	061111
V. M. Rozenbaum, O. Ye. Vovchenko, and T. Ye. Korochkova	
Steady-state Lévy flights in a confined domain (4 pages)	061112
S. I. Denisov, Werner Horsthemke, and Peter Hänggi	
Random-walk access times on partially disordered complex networks: An effective medium theory (9 pages)	061113
Paul E. Parris, Julián Candia, and V. M. Kenkre	
Fermi resonance and its effect on the mean transition time and rate (10 pages)	061114
M. L. Deng and W. Q. Zhu	
Order of phase transitions in barrier crossing (7 pages)	061115
J. Bürki, C. A. Stafford, and D. L. Stein
