

Longitudinal hopping in intervehicle communication: Theory and simulations on modeled and empirical trajectory data (<i>9 pages</i>)	036102
Christian Thiemann, Martin Treiber, and Arne Kesting	
Long-range correlations of density fluctuations in the Kerner-Klenov-Wolf cellular automata three-phase traffic flow model (<i>5 pages</i>)	036103
J. J. Wu, H. J. Sun, and Z. Y. Gao	
Mobility and social network effects on extremist opinions (<i>8 pages</i>)	036104
André C. R. Martins	
Stochastic resonance on weakly paced scale-free networks (<i>8 pages</i>)	036105
Matjaž Perc	
Mean field and cavity analysis for coupled oscillator networks (<i>6 pages</i>)	036106
Jonathan P. L. Hatchett and Tatsuya Uezu	
Spectral centrality measures in complex networks (<i>10 pages</i>)	036107
Nicola Perra and Santo Fortunato	
Model for interevent times with long tails and multifractality in human communications: An application to financial trading (<i>11 pages</i>)	036108
Josep Perelló, Jaume Masoliver, Andrzej Kasprzak, and Ryszard Kutner	
Chemical pattern formation induced by a shear flow in a two-layer model (<i>7 pages</i>)	036109
Desiderio A. Vasquez, Jeff Meyer, and Hans Suedhoff	
Controlling microscopic friction through mechanical oscillations (<i>5 pages</i>)	036110
R. Guerra, A. Vanossi, and M. Urbakh	
Static and dry friction due to multiscale surface roughness (<i>9 pages</i>)	036111
J. B. Sokoloff	
Clustering signatures classify directed networks (<i>5 pages</i>)	036112
S. E. Ahnert and T. M. A. Fink	
Conserved-mass aggregation model with mass-dependent fragmentation on complex networks (<i>6 pages</i>)	036113
Sungchul Kwon, Dong-Jin Lee, and Yup Kim	
Memory effects in the statistics of interoccurrence times between large returns in financial records (<i>8 pages</i>)	036114
Mikhail I. Bogachev and Armin Bunde	
Agent-based spin model for financial markets on complex networks: Emergence of two-phase phenomena (<i>6 pages</i>)	036115
Yup Kim, Hong-Joo Kim, and Soon-Hyung Yook	
Understanding and preventing cascading breakdown in complex clustered networks (<i>5 pages</i>)	036116
Liang Huang, Ying-Cheng Lai, and Guanrong Chen	
Chaos and pattern formation	
Beamlets from stochastic acceleration (<i>5 pages</i>)	036201
Silvia Perri and Vincenzo Carbone	
Dynamics of perturbations in disordered chaotic systems (<i>10 pages</i>)	036202
Ivan G. Szendro, Juan M. López, and Miguel A. Rodríguez
