SEPTEMBER 2008

|                                                                                                                                                                                               |        |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Flat histogram Monte Carlo sampling for mechanical variables and conjugate thermodynamic fields with example applications to strongly correlated electronic systems ( <i>11 pages</i> ) ..... | 036703 |
| Georg Ganzenmüller and Grzegorz Pawłowski                                                                                                                                                     |        |
| Hydrodynamic correlations in the translocation of a biopolymer through a nanopore: Theory and multiscale simulations ( <i>7 pages</i> ) .....                                                 | 036704 |
| Maria Fyta, Simone Melchionna, Sauro Succi, and Efthimios Kaxiras                                                                                                                             |        |
| Particle tracking for time-fractional diffusion ( <i>7 pages</i> ) .....                                                                                                                      | 036705 |
| Yong Zhang, Mark M. Meerschaert, and Boris Baeumer                                                                                                                                            |        |
| Divide and concur: A general approach to constraint satisfaction ( <i>5 pages</i> ) .....                                                                                                     | 036706 |
| Simon Gravel and Veit Elser                                                                                                                                                                   |        |
| Serial correlation of detrended time series ( <i>11 pages</i> ) .....                                                                                                                         | 036707 |
| Călin Vamoș and Maria Crăciun                                                                                                                                                                 |        |

## BRIEF REPORTS

### Interdisciplinary physics

|                                                                                                 |        |
|-------------------------------------------------------------------------------------------------|--------|
| Functions of neuronal network motifs ( <i>4 pages</i> ) .....                                   | 037101 |
| Chunguang Li                                                                                    |        |
| Short-time memories in a network with randomly distributed connections ( <i>4 pages</i> ) ..... | 037102 |
| R. C. Bonetti, C. A. S. Batista, A. M. Batista, S. E. de S. Pinto, S. R. Lopes, and R. L. Viana |        |

### Chaos and pattern formation

|                                                                       |        |
|-----------------------------------------------------------------------|--------|
| Quantum localization in open chaotic systems ( <i>4 pages</i> ) ..... | 037201 |
| Jung-Wan Ryu, G. Hur, and Sang Wook Kim                               |        |

### Fluid dynamics

|                                                                                        |        |
|----------------------------------------------------------------------------------------|--------|
| Laminar-turbulent boundary in plane Couette flow ( <i>4 pages</i> ) .....              | 037301 |
| Tobias M. Schneider, John F. Gibson, Maher Lagha, Filippo De Lillo, and Bruno Eckhardt |        |
| Hydrodynamic instabilities of viscous coalescing droplets ( <i>4 pages</i> ) .....     | 037302 |
| H. Aryafar and H. P. Kavehpour                                                         |        |

## ERRATA

|                                                                                                                                                                                                    |           |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| Erratum: Observation of supercontinuum generation in the direct simulation of an intense laser pulse propagating in a neutral gas [Phys. Rev. E <b>70</b> , 056404 (2004)] ( <i>1 page</i> ) ..... | 039901(E) |
| James Koga                                                                                                                                                                                         |           |
| Erratum: Nonlinear theory of nonstationary low Mach number channel flows of freely cooling nearly elastic granular gases [Phys. Rev. E <b>77</b> , 021307 (2008)] ( <i>1 page</i> ) .....          | 039902(E) |
| Baruch Meerson, Itzhak Fouxon, and Arkady Vilenkin                                                                                                                                                 |           |
| Erratum: Two-dimensional colloidal aggregation mediated by the range of repulsive interactions [Phys. Rev. E <b>75</b> , 041408 (2007)] ( <i>2 pages</i> ) .....                                   | 039903(E) |
| J. C. Fernández-Toledano, A. Moncho-Jordá, F. Martínez-López, A. E. González, and R. Hidalgo-Álvarez                                                                                               |           |

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 78, NUMBER 3

SEPTEMBER 2008

|                                                                                                                                              |        |
|----------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Probability of metastable configurations in spherical three-dimensional Yukawa crystals ( <i>13 pages</i> ) . . . . .                        | 036408 |
| H. Kählert, P. Ludwig, H. Baumgartner, M. Bonitz, D. Block, S. Käding, A. Melzer, and A. Piel                                                |        |
| Dynamo transition in low-dimensional models ( <i>6 pages</i> ) . . . . .                                                                     | 036409 |
| Mahendra K. Verma, Thomas Lessinnes, Daniele Carati, Ioannis Sarris, Krishna Kumar, and Meenakshi Singh                                      |        |
| High-electron-temperature diagnostics of transient ionizing plasma using near-uv transitions ( <i>7 pages</i> ) . . . . .                    | 036410 |
| Ramy Doron, Ron Arad, Vladimir Bernshtam, Yitzhak Maron, and Yuri Ralchenko                                                                  |        |
| Numerical simulations of potential distribution for elongated insulating dust being charged by drifting plasmas ( <i>7 pages</i> ) . . . . . | 036411 |
| W. J. Miloch, S. V. Vladimirov, H. L. Pécseli, and J. Trulsen                                                                                |        |

## Classical physics

|                                                                                                                                              |        |
|----------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Dynamics of wave packets in two-dimensional random systems with anisotropic disorder ( <i>7 pages</i> ) . . . . .                            | 036601 |
| Gregory Samelsohn and Eugene Gruzdev                                                                                                         |        |
| How acoustic waves are guided in buried subsurface channels in unconsolidated granular media ( <i>11 pages</i> ) . . . . .                   | 036602 |
| Vitalyi Gusev and Vincent Tournat                                                                                                            |        |
| Causality and electromagnetic properties of active media ( <i>10 pages</i> ) . . . . .                                                       | 036603 |
| Bertil Nistad and Johannes Skaar                                                                                                             |        |
| Modulation analysis of large-scale discrete vortices ( <i>9 pages</i> ) . . . . .                                                            | 036604 |
| Luis A. Cisneros, Antonmaria A. Minzoni, Panayotis Panayotaros, and Noel F. Smyth                                                            |        |
| Surface solitons in three dimensions ( <i>10 pages</i> ) . . . . .                                                                           | 036605 |
| Q. E. Hoq, R. Carretero-González, P. G. Kevrekidis, B. A. Malomed, D. J. Frantzeskakis, Yu. V. Bludov, and V. V. Konotop                     |        |
| Cancellation of spurious arrivals in Green's function extraction and the generalized optical theorem ( <i>8 pages</i> ) . . . . .            | 036606 |
| Roel Snieder, Kasper van Wijk, Matt Haney, and Rodney Calvert                                                                                |        |
| Quasiperiodic waves and asymptotic behavior for Bogoyavlenskii's breaking soliton equation in (2+1) dimensions ( <i>13 pages</i> ) . . . . . | 036607 |
| Engui Fan and Y. C. Hon                                                                                                                      |        |
| Numerical method for designing approximate cloaks with arbitrary shapes ( <i>4 pages</i> ) . . . . .                                         | 036608 |
| Hua Ma, Shaobo Qu, Zhuo Xu, and Jiafu Wang                                                                                                   |        |
| Plate-mode waves in phononic crystal thin slabs: Mode conversion ( <i>5 pages</i> ) . . . . .                                                | 036609 |
| Jiu-Jiu Chen, Bernard Bonello, and Zhi-Lin Hou                                                                                               |        |

## Computational physics

|                                                                                                                              |        |
|------------------------------------------------------------------------------------------------------------------------------|--------|
| Axisymmetric lattice Boltzmann method ( <i>7 pages</i> ) . . . . .                                                           | 036701 |
| Jian Guo Zhou                                                                                                                |        |
| Thermodynamic consistency of liquid-gas lattice Boltzmann methods: Interfacial property issues ( <i>16 pages</i> ) . . . . . | 036702 |
| E. S. Kikkinides, A. G. Yiotis, M. E. Kainourgiakis, and A. K. Stubos                                                        |        |

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 78, NUMBER 3

SEPTEMBER 2008

|                                                                                                                                       |        |
|---------------------------------------------------------------------------------------------------------------------------------------|--------|
| Local conditional Lyapunov exponent characterization of consistency of dynamical response of the driven Lorenz system (5 pages) ..... | 036203 |
| Atsushi Uchida, Kazuyuki Yoshimura, Peter Davis, Shigeru Yoshimori, and Rajarshi Roy                                                  |        |
| Exotic orbits of two interacting wave sources (12 pages) .....                                                                        | 036204 |
| S. Protière, S. Bohn, and Y. Couder                                                                                                   |        |
| Slow acceleration and deceleration through a Hopf bifurcation: Power ramps, target nucleation, and elliptic bursting (7 pages) .....  | 036205 |
| Steven M. Baer and Erin M. Gaekel                                                                                                     |        |
| Local prediction of turning points of oscillating time series (6 pages) .....                                                         | 036206 |
| D. Kugiumtzis                                                                                                                         |        |
| How random is dice tossing? (9 pages) .....                                                                                           | 036207 |
| Jan Nagler and Peter Richter                                                                                                          |        |
| Absorption strength in absorbing chaotic cavities (7 pages) .....                                                                     | 036208 |
| G. Báez, M. Martínez-Mares, and R. A. Méndez-Sánchez                                                                                  |        |
| Applications of geometrical criteria for transition to Hamiltonian chaos (4 pages) .....                                              | 036209 |
| Yossi Ben Zion and Lawrence Horwitz                                                                                                   |        |
| Controlled synchronization under information constraints (6 pages) .....                                                              | 036210 |
| Alexander L. Fradkov, Boris Andrievsky, and Robin J. Evans                                                                            |        |
| Synchronization of bursting neurons with delayed chemical synapses (6 pages) .....                                                    | 036211 |
| Nikola Burić, Kristina Todorović, and Nebojša Vasović                                                                                 |        |
| Zero Lyapunov exponent in the vicinity of the saddle-node bifurcation point in the presence of noise (11 pages) .....                 | 036212 |
| Alexander E. Hramov, Alexey A. Koronovskii, and Maria K. Kurovskaya                                                                   |        |
| Random cyclic matrices (4 pages) .....                                                                                                | 036213 |
| Sudhir R. Jain and Shashi C. L. Srivastava                                                                                            |        |
| Local theory of the slanted homoclinic snaking bifurcation diagram (4 pages) .....                                                    | 036214 |
| U. Bortolozzo, M. G. Clerc, and S. Residori                                                                                           |        |
| Controlling chaos of a Bose-Einstein condensate loaded into a moving optical Fourier-synthesized lattice (6 pages) .....              | 036215 |
| R. Chacón, D. Bote, and R. Carretero-González                                                                                         |        |
| Dynamics of tidal synchronization and orbit circularization of celestial bodies (4 pages) .....                                       | 036216 |
| Bruno Escrivano, Jozsef Vanyo, Idan Tuval, Julyan H. E. Cartwright, Diego L. González, Oreste Piro, and Tamás Tél                     |        |
| Phase resetting, phase locking, and bistability in the periodically driven saline oscillator: Experiment and model (13 pages) .....   | 036217 |
| Hortensia González, Humberto Arce, and Michael R. Guevara                                                                             |        |
| Time reversal of the excitation wave form in a dissipative pattern-forming system (9 pages) .....                                     | 036218 |
| Jana Heuer, Thomas John, and Ralf Stannarius                                                                                          |        |
| Quantum ratchet accelerator without a bichromatic lattice potential (8 pages) .....                                                   | 036219 |
| Jiao Wang and Jiangbin Gong                                                                                                           |        |
| Semiclassical corrections to the large- $N$ limit of Dicke's model (6 pages) .....                                                    | 036220 |
| Mauricio Reis, M. C. Nemes, and J. G. Peixoto de Faria                                                                                |        |
