PHYSICAL REVIEW E **THIRD SERIES, VOLUME 78, NUMBER 5** **NOVEMBER 2008**

Joint probability distributions and multipoint correlations of the continuous-time random walk *(14 pages)* 051104
Markus Niemann and Holger Kantz

Percolation on correlated networks *(13 pages)* 051105
A. V. Goltsev, S. N. Dorogovtsev, and J. F. F. Mendes

Diffusion and relaxation controlled by tempered α-stable processes *(6 pages)* 051106
Aleksander Stanislavsky, Karina Weron, and Aleksander Weron

Transport coefficients of non-Newtonian fluid and causal dissipative hydrodynamics *(11 pages)* 051107
T. Koide and T. Kodama

Dynamic phase transition in the two-dimensional kinetic Ising model in an oscillating field: Universality with respect to the stochastic dynamics *(7 pages)* 051108
G. M. Buendía and P. A. Rikvold

Switching-path distribution in multidimensional systems *(10 pages)* 051109
H. B. Chan, M. I. Dykman, and C. Stambaugh

Anisotropic rotational diffusion and dielectric relaxation of rigid dipolar particles in a strong external dc field *(9 pages)* 051110
Yuri P. Kalmykov and Serguey V. Titov

Narrow escape and leakage of Brownian particles *(8 pages)* 051111
A. Singer, Z. Schuss, and D. Holcman

Role of pinning potentials in heat transport through disordered harmonic chains *(5 pages)* 051112
Dibyendu Roy and Abhishek Dhar

Return interval distribution of extreme events and long-term memory *(9 pages)* 051113
M. S. Santhanam and Holger Kantz

Injected power fluctuations in one-dimensional dissipative systems: Role of ballistic transport *(10 pages)* 051114
Jean Farago and Estelle Pitard

Anomalous diffusion in heterogeneous glass-forming liquids: Temperature-dependent behavior *(11 pages)* 051115
J. S. Langer

Langevin formulation for single-file diffusion *(8 pages)* 051116
Alessandro Taloni and Michael A. Lomholt

Scaling properties of a rice-pile model: Inertia and friction effects *(8 pages)* 051117
M. Khfifi and M. Loulidi

Scaling exponents and transition behavior of the generalized conserved lattice gas model at zero temperature *(5 pages)* 051118
Jae-Suk Yang, In-mook Kim, and Wooseop Kwak

Equilibrium long-ranged charge correlations at the surface of a conductor coupled to electromagnetic radiation *(9 pages)* 051119
Ladislav Šamaj and Bernard Jancovici

Interaction stochasticity supports cooperation in spatial Prisoner's dilemma *(7 pages)* 051120
Xiaojie Chen, Feng Fu, and Long Wang

Effect of a time-dependent field on subdiffusing particles *(6 pages)* 051121
A. I. Shushin

(Continued)
