## RAPID COMMUNICATIONS

### Statistical physics

|                                                                                                                   |           |
|-------------------------------------------------------------------------------------------------------------------|-----------|
| Time parameters and Lorentz transformations of relativistic stochastic processes ( <i>4 pages</i> ) .....         | 010101(R) |
| Jörn Dunkel, Peter Hänggi, and Stefan Weber                                                                       |           |
| Generalized Clausius relation and power dissipation in nonequilibrium stochastic systems ( <i>4 pages</i> ) ..... | 010102(R) |
| B. Gaveau, M. Moreau, and L. S. Schulman                                                                          |           |

### Equilibrium and linear transport properties of fluids

|                                                                                                                                                   |           |
|---------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| Ion structure in warm dense matter: Benchmarking solutions of hypernetted-chain equations by first-principle simulations ( <i>4 pages</i> ) ..... | 010201(R) |
| K. Wünsch, J. Vorberger, and D. O. Gericke                                                                                                        |           |

### Granular materials

|                                                                                        |           |
|----------------------------------------------------------------------------------------|-----------|
| Fluidization of granular media wetted by liquid $^4\text{He}$ ( <i>4 pages</i> ) ..... | 010301(R) |
| K. Huang, M. Sohaili, M. Schröter, and S. Herminghaus                                  |           |

### Colloidal dispersions, suspensions, and aggregates

|                                                                                     |           |
|-------------------------------------------------------------------------------------|-----------|
| Aggregation phenomena in telechelic star polymer solutions ( <i>4 pages</i> ) ..... | 010401(R) |
| Federica Lo Verso, Athanassios Z. Panagiotopoulos, and Christos N. Likos            |           |

### Structured and complex fluids

|                                                                                                         |           |
|---------------------------------------------------------------------------------------------------------|-----------|
| Colloids as model systems for liquid undercooled metals ( <i>4 pages</i> ) .....                        | 010501(R) |
| Patrick Wette, Ina Klassen, Dirk Holland-Moritz, Thomas Palberg, Stephan V. Roth, and Dieter M. Herlach |           |

### Films, interfaces, and crystal growth

|                                                                                                       |           |
|-------------------------------------------------------------------------------------------------------|-----------|
| Ripening-dominated crystallization in polydisperse hard-sphere-like colloids ( <i>4 pages</i> ) ..... | 010601(R) |
| Sara Iacopini, Thomas Palberg, and Hans Joachim Schöpe                                                |           |

## PART 2: NONLINEAR AND PLASMA PHYSICS, FLUID DYNAMICS, AND RELATED TOPICS

### RAPID COMMUNICATIONS

#### Interdisciplinary physics

- Congestion phenomena on complex networks (*4 pages*) ..... 015101(R)  
Daniele De Martino, Luca Dall'Asta, Ginestra Bianconi, and Matteo Marsili

#### Chaos and pattern formation

- Time-averaged properties of unstable periodic orbits and chaotic orbits in ordinary differential equation systems (*4 pages*) ..... 015201(R)  
Yoshitaka Saiki and Michio Yamada
- Synchronization of modulated traveling baroclinic waves in a periodically forced, rotating fluid annulus (*4 pages*) ..... 015202(R)  
F. J. R. Eccles, P. L. Read, A. A. Castrejón-Pita, and T. W. N. Haine

#### Fluid dynamics

- Evolution of the acceleration field and a reformulation of the sweeping decorrelation hypothesis in two-dimensional turbulence (*4 pages*) ..... 015301(R)  
F. Schwander, E. Hascoët, and J. C. Vassilicos

#### Plasma physics

- Laser-driven inertial ion focusing (*4 pages*) ..... 015401(R)  
H. B. Zhuo, Wei Yu, M. Y. Yu, H. Xu, X. Wang, B. F. Shen, Z. M. Sheng, and J. Zhang

#### Classical physics

- Integrable nonautonomous nonlinear Schrödinger equations are equivalent to the standard autonomous equation (*4 pages*) ..... 015601(R)  
Anjan Kundu

### ARTICLES

#### Interdisciplinary physics

- Implications of an inverse branching aftershock sequence model (*8 pages*) ..... 016101  
D. L. Turcotte, S. G. Abaimov, I. Dobson, and J. B. Rundle

| Lattice Boltzmann modeling of multicomponent diffusion in narrow channels ( <i>11 pages</i> ) .....                                                                                                             | 016702 |
| Seung Hyun Kim, Heinz Pitsch, and Iain D. Boyd                                                                                                                                                                  |        |
| Counting solutions for the $N$ -queens and Latin-square problems by Monte Carlo simulations ( <i>4 pages</i> ) .....                                                                                            | 016703 |
| Cheng Zhang and Jianpeng Ma                                                                                                                                                                                     |        |
| Simulation of buoyancy-driven flows in a vertical cylinder using a simple lattice Boltzmann model ( <i>8 pages</i> ) .....                                                                                      | 016704 |
| Sheng Chen, Jonas Tölke, and Manfred Krafczyk                                                                                                                                                                   |        |
| Perturbation theory without diagrams: The polaron case ( <i>16 pages</i> ) .....                                                                                                                                | 016705 |
| R. Rosenfelder                                                                                                                                                                                                  |        |
| Validation of multicomponent lattice Boltzmann equation simulations using theoretical calculations of immiscible drop shape ( <i>8 pages</i> ) .....                                                            | 016706 |
| I. Halliday, T. J. Spencer, and C. M. Care                                                                                                                                                                      |        |
| Anomalies of liquid water at low temperature due to two types of hydrogen bonds ( <i>4 pages</i> ) .....                                                                                                        | 016707 |
| Yusong Tu and Haiping Fang                                                                                                                                                                                      |        |

## BRIEF REPORTS

## Fluid dynamics

- Hot spots revealed by simultaneous experimental measurement of the two-dimensional concentration and temperature fields of an exothermic chemical front during finger-pattern formation (*4 pages*) ..... 017301  
 P. Grosfils, F. Dubois, C. Yourassowsky, and A. De Wit

## Classical physics

- Numerical studies of a low-loss and broad-pass-band single-sided-structure left-handed metamaterial (*4 pages*) ..... 017601  
 Jianhong Lv, Baorong Yan, Minghai Liu, and Xiwei Hu

## Computational physics

- Interface matching method for solving surface plasmon modes with damping in plasmonic crystals (*4 pages*) ..... 017701  
 Ruey-Lin Chern

## ERRATA

- Erratum: Quantum stress in chaotic billiards [Phys. Rev. E **77**, 066209 (2008)] (*1 page*) ..... 019901(E)  
 Karl-Fredrik Berggren, Dmitrii N. Maksimov, Almas F. Sadreev, Ruven Höhmann, Ulrich Kuhl, and Hans-Jürgen Stöckmann
- Publisher's Note: Higher-order large-time asymptotics for a reaction of the form  $nA + mB \rightarrow C$  [Phys. Rev. E **79**, 016105 (2009)] (*1 page*) ..... 019902(E)  
 P. M. J. Trevelyan
- Erratum: Barchan dunes in two dimensions: Experimental tests for minimal models [Phys. Rev. E **78**, 021304 (2008)] (*1 page*) ..... 019903(E)  
 Christopher Groh, Andreas Wierschem, Nuri Aksel, Ingo Rehberg, and Christof A. Kruelle
