

CONTENTS - *Continued*

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 80, NUMBER 1

JULY 2009

Polymers

- Interactions between planar stiff polyelectrolyte brushes (*4 pages*) 010801(R)
 Aaron Wynveen and Christos N. Likos

Biological physics

- Analysis of accordion DNA stretching revealed by the gold cluster ruler (*4 pages*) 010901(R)
 Alexey K. Mazur
- Self-organized criticality of a catalytic reaction network under flow (*4 pages*) 010902(R)
 Akinori Awazu and Kunihiro Kaneko
- Supercoil formation in DNA denaturation (*4 pages*) 010903(R)
 A. Kabakçioğlu, E. Orlandini, and D. Mukamel

ARTICLES

Statistical physics

- Anomalous diffusive behavior of a harmonic oscillator driven by a Mittag-Leffler noise (*6 pages*) 011101
 A. D. Viñales, K. G. Wang, and M. A. Despósito
- Mean survival times of absorbing triply periodic minimal surfaces (*6 pages*) 011102
 Jana Gevertz and S. Torquato
- Thermodynamic construction of a one-step replica-symmetry-breaking solution in finite-connectivity spin glasses (*9 pages*) 011103
 T. Nakajima and K. Hukushima
- Casimir force between dielectric media with free charges (*6 pages*) 011104
 Johan S. Høye and Iver Brevik
- Correlations in avalanche critical points (*4 pages*) 011105
 Benedetta Cerruti and Eduard Vives
- Discontinuous phase transitions of conserved threshold transfer process with deterministic hopping (*7 pages*) 011106
 Sang-Gui Lee and Sang Bub Lee
- Continuum and lattice heat currents for oscillator chains (*8 pages*) 011107
 Onuttom Narayan and A. P. Young
- Coupled order-parameter system on a scale-free network (*12 pages*) 011108
 V. Palchykov, C. von Ferber, R. Folk, and Yu. Holovatch
- Subdiffusion in time-averaged, confined random walks (*5 pages*) 011109
 Thomas Neusius, Igor M. Sokolov, and Jeremy C. Smith
- Steady-state work fluctuations of a dragged particle under external and thermal noise (*21 pages*) 011110
 A. Baule and E. G. D. Cohen
- Subordinated Brownian motion model for sediment transport (*9 pages*) 011111
 Vamsi Ganti, Arvind Singh, Paola Passalacqua, and Efi Foufoula-Georgiou
- “Squishy capacitor” model for electrical double layers and the stability of charged interfaces (*16 pages*) 011112
 Michael B. Partenskii and Peter C. Jordan
