PHYSICAL REVIEW E THIRD SERIES, VOLUME 81, NUMBER 3 MARCH 2010

COMMENTS

Chaos and pattern formation

Comment on "Adaptive steady-state stabilization for nonlinear dynamical systems" *(3 pages)* 038201
Wei Lin

Reply to "Comment on 'Adaptive steady-state stabilization for nonlinear dynamical systems' " *(4 pages)* 038202
David J. Braun

ERRATA

Errata

Retraction: Geometric Ginzburg-Landau theory for faceted crystals in one dimension: From coarsening to chaos through a driving force [Phys. Rev. E **79**, 011115 (2009)] *(1 page)* . . . . . 039901(E)
Frank Haußer and Axel Voigt

PHYSICAL REVIEW E THIRD SERIES, VOLUME 81, NUMBER 3 MARCH 2010

Slow optical soliton pairs via electron spin coherence in a quantum well waveguide *(8 pages)* 036607
Ji-Bing Liu, Na Liu, Chuan-Jia Shan, Tang-Kun Liu, and Yan-Xia Huang

Soliton propagation through a disordered system: Statistics of the transmission delay *(14 pages)* 036608
Sergey A. Gredeskul, Stanislav A. Derevyanko, Alexander S. Kovalev, and Jaroslaw E. Prilepsky

Computational physics

Estimating generalized Lyapunov exponents for products of random matrices *(12 pages)* 036701
J. Vanneste

General solution of lattices for Cartesian lattice Bhatanagar-Gross-Krook models *(7 pages)* 036702
Xiaowen Shan (单肖文)

Alternative boundary conditions for Monte Carlo simulations based on self-consistent correlations: Application to the two- and three-dimensional Ising models *(6 pages)* 036703
I. Etxebarria, C. Capillas, and L. Elcoro

Comparison between different Gaussian series representations of the imaginary time propagator *(8 pages)* 036704
Riccardo Conte and Eli Pollak

Bulgac-Kusnezov-Nosé-Hoover thermostats *(14 pages)* 036705
Alessandro Sergi and Gregory S. Ezra

Lattice Boltzmann method for oscillatory Stokes flow with applications to micro- and nanodevices *(14 pages)* 036706
Yong Shi and John E. Sader

Phase-field modeling by the method of lattice Boltzmann equations *(16 pages)* 036707
Abbas Fakhari and Mohammad H. Rahimian

BRIEF REPORTS

Interdisciplinary physics

Optimizing transport efficiency on scale-free networks through assortative or dissortative topology *(4 pages)* 037101
Yu-hua Xue, Jian Wang, Liang Li, Daren He, and Bambi Hu

Chaos and pattern formation

Redundant variables and Granger causality *(4 pages)* 037201
L. Angelini, M. de Tommaso, D. Marinazzo, L. Nitti, M. Pellicoro, and S. Stramaglia

Monochromatic waves induced by large-scale parametric forcing *(4 pages)* 037202
A. Nepomnyashchy and S. I. Abarzhi

Classical physics

Spatial shift of lattice soliton scattering in the Fermi-Pasta-Ulam model *(4 pages)* 037601
Tao Jin, Hong Zhao, and Bambi Hu

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 81, NUMBER 3 MARCH 2010

Relativistic quantum corrections to laser wakefield acceleration *(7 pages)* 036406
Jun Zhu and Peiyong Ji

Nonlinear wave propagation in strongly coupled dusty plasmas *(10 pages)* 036407
B. M. Veeresha, S. K. Tiwari, A. Sen, P. K. Kaw, and A. Das

Collimation of dense plasma jets created by low-energy laser pulses and studied with soft x-ray laser interferometry *(7 pages)* 036408
Michael A. Purvis, Jonathan Grava, Jorge Filevich, Duncan P. Ryan, Stephen J. Moon, James Dunn, Vyacheslav N. Shlyaptsev, and Jorge J. Rocca

Application of linear response theory to magnetotransport properties of dense plasmas *(8 pages)* 036409
J. R. Adams, H. Reinholz, and R. Redmer

X-ray polarization spectroscopy to study anisotropic velocity distribution of hot electrons produced by an ultra-high-intensity laser *(4 pages)* 036410
Y. Inubushi, Y. Okano, H. Nishimura, H. Cai, H. Nagatomo, T. Kai, T. Kawamura, D. Batani, A. Morace, R. Redaelli, C. Fourment, J. J. Santos, G. Malka, A. Boscheron, O. Bonville, J. Grenier, Ph. Canal, B. Lacoste, C. Lepage, L. Marmande, E. Mazataud, A. Casner, M. Koenig, S. Fujioka, T. Nakamura, T. Johzaki, and K. Mima

Fully relativistic form factor for Thomson scattering *(13 pages)* 036411
J. P. Palastro, J. S. Ross, B. Pollock, L. Divol, D. H. Froula, and S. H. Glenzer

Emission and its back-reaction accompanying electron motion in relativistically strong and QED-strong pulsed laser fields *(13 pages)* 036412
Igor V. Sokolov, John A. Nees, Victor P. Yanovsky, Natalia M. Naumova, and Gérard A. Mourou

Abel solution to a bremmstrahlung inverse problem *(3 pages)* 036413
Cliff A. Thomas

Rank-ordered multifractal analysis for intermittent fluctuations with global crossover behavior *(11 pages)* 036414
Sunny W. Y. Tam, Tom Chang, Paul M. Kintner, and Eric M. Klatt

Classical physics

Normal-incidence left-handed metamaterials based on symmetrically connected split-ring resonators *(6 pages)* 036601
Jiafu Wang, Shaobo Qu, Zhuo Xu, Hua Ma, Song Xia, Yiming Yang, Xiang Wu, Qian Wang, and Chunhui Chen

Polarization of an electromagnetic wave in a randomly birefringent medium: A stochastic theory of the Stokes parameters *(9 pages)* 036602
Robert Botet and Hiroshi Kuratsuji

Retrieving the impulse response of the Earth due to random electromagnetic forcing *(5 pages)* 036603
Sharmin Shamsalsadati and Chester J. Weiss

Properties of the Shapiro steps in the ac driven Frenkel-Kontorova model with deformable substrate potential *(9 pages)* 036604
Jasmina Tekić and Bambi Hu

Analytic expressions for the constitutive parameters of magnetoelectric metamaterials *(17 pages)* 036605
D. R. Smith

Theory of a curved planar waveguide with Robin boundary conditions *(14 pages)* 036606
O. Olendski and L. Mikhailovska
