PHYSICAL REVIEW E THIRD SERIES, VOLUME 81, NUMBER 5 MAY 2010

Fluctuations of the Casimir-like force between two membrane inclusions *(4 pages)* . . . . . 050903(R)
Anne-Florence Bitbol, Paul G. Dommersnes, and Jean-Baptiste Fournier

ARTICLES

Statistical physics

Spontaneous versus explicit replica symmetry breaking in the theory of disordered systems *(15 pages)* 051101
D. Mouhanna and G. Tarjus

Fractional chemotaxis diffusion equations *(12 pages)* 051102
T. A. M. Langlands and B. I. Henry

Phase transitions in self-gravitating systems and bacterial populations with a screened attractive potential *(32 pages)* 051103
P. H. Chavanis and L. Delfini

Phase diagram of the charged lattice-gas model with two types of particles *(12 pages)* 051104
G. Lehaut, F. Gulminelli, and O. Lopez

Critical phase of bond percolation on growing networks *(5 pages)* 051105
Takehisa Hasegawa and Koji Nemoto

Random diffusion model with structure corrections *(12 pages)* 051106
David D. McCowan and Gene F. Mazenko

Triangular Ising antiferromagnets with quenched nonmagnetic impurities *(5 pages)* 051107
Huai-Lei Tang, Yi Zhu, Guo-Hong Yang, and Ying Jiang

Upper critical dimension of the negative-weight percolation problem *(8 pages)* 051108
O. Melchert, L. Apolo, and A. K. Hartmann

Statistical mechanics far from equilibrium: Prediction and test for a sheared system *(4 pages)* 051109
R. M. L. Evans, R. A. Simha, A. Baule, and P. D. Olmsted

Nonlinear stochastic equations with multiplicative Lévy noise *(7 pages)* 051110
Tomasz Srokowski

Incorporating friction and collective shear moves into a lattice gas *(5 pages)* 051111
Alex Dickson, Alice Nasto, and Aaron R. Dinner

Rényi entropy measure of noise-aided information transmission in a binary channel *(10 pages)* 051112
François Chapeau-Blondeau, David Rousseau, and Agnès Delahaies

Functional integral approach for multiplicative stochastic processes *(9 pages)* 051113
Zochil González Arenas and Daniel G. Barci

Surface pattern formation and scaling described by conserved lattice gases *(12 pages)* 051114
Géza Ódor, Bartosz Liedke, and Karl-Heinz Heinig

Projection-operator approach to master equations for coarse-grained occupation numbers in nonideal quantum gases *(9 pages)* 051115
Christian Bartsch, Robin Steinigeweg, and Jochen Gemmer

Short-time critical dynamics of damage spreading in the two-dimensional Ising model *(7 pages)* 051116
M. Leticia Rubio Puzzo and Ezequiel V. Albano

Effects of dielectric disorder on van der Waals interactions in slab geometries *(13 pages)* 051117
David S. Dean, Ron R. Horgan, Ali Naji, and Rudolf Podgornik

(Continued)
