PHYSICAL REVIEW E

THIRD SERIES, VOLUME 81, NUMBER 6

JUNE 2010

Motor-driven effective temperature and viscoelastic response of active matter (<i>8 pages</i>)	061922
Konstantin I. Morozov and Len M. Pismen	
Inclusion of noise in iterated firing time maps based on the phase response curve (<i>5 pages</i>)	061923
Fred H. Sieling, Carmen C. Canavier, and Astrid A. Prinz	
Propagation of firing rate by synchronization and coherence of firing pattern in a feed-forward multilayer neural network (<i>9 pages</i>)	061924
Ming Yi and Lijian Yang	
Ion-channel-like behavior in lipid bilayer membranes at the melting transition (<i>5 pages</i>)	061925
Jill Gallaher, Katarzyna Wodzińska, Thomas Heimbürg, and Martin Bier	

BRIEF REPORTS

Statistical physics

Some properties of the thermal conductivity of chains of oscillators (<i>4 pages</i>)	062101
Emmanuel Pereira and Romero B. Solha	

Granular materials

Sinking of light intruders in a shaken granular bed (<i>4 pages</i>)	062301
Iván Sánchez, Gustavo Gutiérrez, Iker Zuriguel, and Diego Maza	

Structured and complex fluids

Rheology and ordering transitions of non-Brownian suspensions in a confined shear flow: Effects of external torques (<i>4 pages</i>)	062501
Kyongmin Yeo and Martin R. Maxey	

Liquid crystals

Statistical models of mixtures with a biaxial nematic phase (<i>4 pages</i>)	062701
E. do Carmo, D. B. Liarte, and S. R. Salinas	

Biological physics

Maze-solving by chemotaxis (<i>3 pages</i>)	062901
A. M. Reynolds	

COMMENTS

Comment on “Six-state clock model on the square lattice: Fisher zero approach with Wang-Landau sampling” (<i>2 pages</i>)	063101
Seung Ki Baek, Petter Minnhagen, and Beom Jun Kim	

Spatial-temporal dynamics of chaotic behavior in cultured hippocampal networks (8 pages)	061903
Wenjuan Chen, Xiangning Li, Jiangbo Pu, and Qingming Luo	
Analytical progress in the theory of vesicles under linear flow (10 pages)	061904
Alexander Farutin, Thierry Biben, and Chaouqi Misbah	
Effect of crowding on the conformation of interwound DNA strands from neutron scattering measurements and Monte Carlo simulations (8 pages)	061905
Xiaoying Zhu, Siow Yee Ng, Amar Nath Gupta, Yuan Ping Feng, Bow Ho, Alain Lapp, Stefan U. Egelhaaf, V. Trevor Forsyth, Michael Haertlein, Martine Moulin, Ralf Schweins, and Johan R. C. van der Maarel	
Particle-based model to simulate the micromechanics of biological cells (15 pages)	061906
P. Van Liedekerke, E. Tijskens, H. Ramon, P. Ghysels, G. Samaey, and D. Roose	
Anharmonic oscillation effect on the Davydov-Scott monomer in a thermal bath (11 pages)	061907
A. Sulaiman, F. P. Zen, H. Alatas, and L. T. Handoko	
Free energy and critical force for adhesion clusters (6 pages)	061908
Han-Jou Lin, Hsuan-Yi Chen, Yu-Jane Sheng, and Heng-Kwong Tsao	
Variable renewal rate and growth properties of cell populations in colon crypts (12 pages)	061909
A. Di Garbo, M. D. Johnston, S. J. Chapman, and P. K. Maini	
Mechanical energy transfer and dissipation in fibrous beta-sheet-rich proteins (6 pages)	061910
Zhiping Xu and Markus J. Buehler	
Shape fluctuations of nearly spherical lipid vesicles and emulsion droplets (10 pages)	061911
Isak Bivas	
Quantifying biodiversity and asymptotics for a sequence of random strings (8 pages)	061912
Hitoshi Koyano and Hirohisa Kishino	
Different fitnesses for in vivo and in vitro evolutions due to the finite generation-time effect (5 pages)	061913
David B. Saakian, Araks S. Martirosyan, and Chin-Kun Hu	
Compression of random coils due to macromolecular crowding: Scaling effects (4 pages)	061914
C. Le Coeur, J. Teixeira, P. Busch, and S. Longeville	
Semiconservative quasispecies equations for polysomic genomes: The general case (14 pages)	061915
Eran Itan and Emmanuel Tannenbaum	
Fluctuations and pattern formation in self-propelled particles (14 pages)	061916
Shradha Mishra, Aparna Baskaran, and M. Cristina Marchetti	
Mutual information in time-varying biochemical systems (15 pages)	061917
Filipe Tostevin and Pieter Rein ten Wolde	
Symmetries of interacting helices of charge (9 pages)	061918
Jonathan Landy and Joseph Rudnick	
Exactly solvable model for helix-coil-sheet transitions in protein systems (4 pages)	061919
John S. Schreck and Jian-Min Yuan	
Dynamic modes of red blood cells in oscillatory shear flow (9 pages)	061920
Hiroshi Noguchi	
Stochastic cellular automata model of neural networks (9 pages)	061921
A. V. Goltsev, F. V. de Abreu, S. N. Dorogovtsev, and J. F. F. Mendes	

PHYSICAL REVIEW E	THIRD SERIES, VOLUME 81, NUMBER 6	JUNE 2010
Dynamics of extended space charge in concentration polarization (<i>17 pages</i>)		061502
Isaak Rubinstein and Boris Zaltzman		
Boundary slip dependency on surface stiffness (<i>5 pages</i>)		061503
Nikolaos Asproulis and Dimitris Drikakis		
Effect of hydrophobic solutes on the liquid-liquid critical point (<i>8 pages</i>)		061504
Dario Corradini, Sergey V. Buldyrev, Paola Gallo, and H. Eugene Stanley		
Frequency-dependent specific heat from thermal effusion in spherical geometry (<i>14 pages</i>)		061505
Bo Jakobsen, Niels Boye Olsen, and Tage Christensen		
From equilibrium to steady-state dynamics after switch-on of shear (<i>15 pages</i>)		061506
Matthias Krüger, Fabian Weysser, and Thomas Voigtmann		
Films, interfaces, and crystal growth		
Phase-field-crystal model for fcc ordering (<i>16 pages</i>)		061601
Kuo-An Wu, Ari Adland, and Alain Karma		
Liquid crystals		
Relaxation kinetics of stretched disclination lines in a nematic liquid crystal (<i>6 pages</i>)		061701
Natan Osterman, Jurij Kotar, Eugene M. Terentjev, and Pietro Cicuta		
Molecular model of biaxial ordering in nematic liquid crystals composed of flat molecules with four mesogenic groups (<i>10 pages</i>)		061702
M. V. Gorkunov, M. A. Osipov, A. Kocot, and J. K. Vij		
Effective viscosity for nematic-liquid-crystal viscosity measurement using a shear horizontal wave (<i>8 pages</i>)		061703
Ryotaro Ozaki, Masashi Aoki, Katsumi Yoshino, Kohji Toda, and Hiroshi Moritake		
Continuum theory of tilted chiral smectic phases (<i>10 pages</i>)		061704
J. P. Marcerou		
Polymers		
Elastic lattice polymers (<i>9 pages</i>)		061801
M. Baiesi, G. T. Barkema, and E. Carlon		
Buckling of stiff polymer rings in weak spherical confinement (<i>8 pages</i>)		061802
Katja Ostermeir, Karen Alim, and Erwin Frey		
Entropic elasticity of dilated and contorted idealized circular chains (<i>7 pages</i>)		061803
Martin Bertrand, Martin Forget, and Béla Joós		
Internal dissipation of a polymer (<i>6 pages</i>)		061804
J. M. Deutsch		
Biological physics		
Scale-invariant model of marine population dynamics (<i>15 pages</i>)		061901
José A. Capitán and Gustav W. Delius		
Dynamic-energy-budget-driven fruiting-body formation in myxobacteria (<i>12 pages</i>)		061902
M. Hendrata and B. Birnir		

Quantum quenches in an XXZ spin chain from a spatially inhomogeneous initial state (<i>17 pages</i>)	061134
Jarrett Lancaster and Aditi Mitra	
Equilibrium and linear transport properties of fluids	
Breakdown of excess entropy scaling for systems with thermodynamic anomalies (<i>12 pages</i>)	061201
Yu. D. Fomin, V. N. Ryzhov, and N. V. Gribova	
Relaxation rates of the linearized Uehling-Uhlenbeck equation for bosons (<i>9 pages</i>)	061202
Erich Gust and L. E. Reichl	
Aging to equilibrium dynamics of SiO ₂ (<i>9 pages</i>)	061203
K. Vollmayr-Lee, J. A. Roman, and J. Horbach	
Use of the Ornstein-Zernike Percus-Yevick equation to extract interaction potentials from pair correlation functions (<i>9 pages</i>)	061204
Qifei Wang, David J. Keffer, Donald M. Nicholson, and J. Brock Thomas	
Granular materials	
Microstructure evolution in density relaxation by tapping (<i>10 pages</i>)	061301
Anthony D. Rosato, Oleksandr Dybenko, David J. Horntrop, Vishagan Ratnaswamy, and Lou Kondic	
Model for density waves in gravity-driven granular flow in narrow pipes (<i>5 pages</i>)	061302
Simen Å. Ellingsen, Knut S. Gjerden, Morten Grøva, and Alex Hansen	
Molecular dynamics simulations of complex-shaped particles using Voronoi-based spheropolyhedra (<i>9 pages</i>)	061303
S. A. Galindo-Torres and D. M. Pedroso	
Internal relaxation time in immersed particulate materials (<i>9 pages</i>)	061304
P. Rognon, I. Einav, and C. Gay	
Morphological transitions in partially gas-fluidized granular mixtures (<i>11 pages</i>)	061305
Anders Nermoen, Christophe Raufaste, Simon Daniel deVilliers, Espen Jettestuen, Paul Meakin, and Dag Kristian Dysthe	
Colloidal dispersions, suspensions, and aggregates	
Hydrodynamic irreversibility in particle suspensions with nonuniform strain (<i>5 pages</i>)	061401
Jeffrey S. Guasto, Andrew S. Ross, and J. P. Gollub	
Evaluation of radiation force acting on macromolecules by combination of Brownian dynamics simulation with fluorescence correlation spectroscopy (<i>8 pages</i>)	061402
Syoji Ito, Naoki Toitani, Hiroaki Yamauchi, and Hiroshi Miyasaka	
Estimate for the fractal dimension of the Apollonian gasket in d dimensions (<i>4 pages</i>)	061403
R. S. Farr and E. Griffiths	
Stochastic qualifier of gel and glass transitions in laponite suspensions (<i>7 pages</i>)	061404
F. Shayeghanfar, S. Jabbari-Farouji, M. Sadegh Movahed, G. R. Jafari, and M. Reza Rahimi Tabar	
Structured and complex fluids	
Phase separation of thin-film polymer mixtures under in-plane electric fields (<i>9 pages</i>)	061501
Chen-Hung Wang, Peilong Chen, and C.-Y. David Lu	

PHYSICAL REVIEW E	THIRD SERIES, VOLUME 81, NUMBER 6	JUNE 2010
Universal power-law and partial condensation in aggregation-chipping processes (<i>6 pages</i>)		061116
Hiroshi Yamamoto and Toshiya Ohtsuki		
Crossover of critical Casimir forces between different surface universality classes (<i>17 pages</i>)		061117
T. F. Mohry, A. Maciołek, and S. Dietrich		
Effects of clustering on diversity-induced resonance in hidden metric spaces (<i>7 pages</i>)		061118
Liang Wu, Shiqun Zhu, Xiaoqin Luo, and Dan Wu		
Effect of anisotropy on the scaling of connectivity and conductivity in continuum percolation theory (<i>5 pages</i>)		061119
S. Sadeghnejad, M. Masihi, P. R. King, A. Shojaei, and M. Pishvaei		
Quasideterministic transport of Brownian particles in an oscillating periodic potential (<i>4 pages</i>)		061120
Pawel Romanczuk, Felix Müller, and Lutz Schimansky-Geier		
Phase coexistence in consolidating porous media (<i>9 pages</i>)		061121
Emilio N. M. Cirillo, Nicoletta Ianiro, and Giulio Sciarra		
Lasing process in a closed bipartite quantum system: A thermodynamical analysis (<i>6 pages</i>)		061122
G. Waldherr and G. Mahler		
Thermomechanic-electrical coupling in phospholipid monolayers near the critical point (<i>5 pages</i>)		061123
D. Steppich, J. Griesbauer, T. Frommelt, W. Appelt, A. Wixforth, and M. F. Schneider		
Coverage-maximization in networks under resource constraints (<i>6 pages</i>)		061124
Subrata Nandi, Lutz Brusch, Andreas Deutsch, and Niloy Ganguly		
Thermal fluctuation effects on finite-size scaling of synchronization (<i>7 pages</i>)		061125
Seung-Woo Son and Hyunsuk Hong		
Fractal topology of hand-crumpled paper (<i>6 pages</i>)		061126
Alexander S. Balankin, Didier Samayoa Ochoa, Israel Andrés Miguel, Julián Patiño Ortiz, and Miguel Ángel Martínez Cruz		
Crossover between the extended and localized regimes in stochastic partially self-avoiding walks in one-dimensional disordered systems (<i>7 pages</i>)		061127
Juliana Militão Berbert and Alexandre Souto Martinez		
Phase transitions of the generalized contact process with two absorbing states (<i>8 pages</i>)		061128
Man Young Lee and Thomas Vojta		
Signal transmission by vibrational resonance in one-way coupled bistable systems (<i>8 pages</i>)		061129
Chenggui Yao and Meng Zhan		
Entanglement and the thermodynamic arrow of time (<i>9 pages</i>)		061130
David Jennings and Terry Rudolph		
Different thermal conductance of the inter- and intrachain interactions in a double-stranded molecular structure (<i>5 pages</i>)		061131
Wei-Rong Zhong		
Crystallization of hard disks induced by a temperature gradient (<i>7 pages</i>)		061132
S. Wołoszczuk and A. Lipowski		
Effect of different jump distributions on the dynamics of jump processes (<i>10 pages</i>)		061133
Edoardo Daly and Amilcare Porporato
