THIRD SERIES, VOLUME 81, NUMBER 6 *CONTENTS* **JUNE 2010**

PART 1: STATISTICAL, SOFT MATTER, AND BIOLOGICAL PHYSICS

RAPID COMMUNICATIONS

Statistical physics

Lévy walks and scaling in quenched disordered media *(4 pages)* . . . . . 060101(R)
Raffaella Burioni, Luca Caniparoli, and Alessandro Vezzani

Equilibriumlike behavior in chemical reaction networks far from equilibrium *(4 pages)* . . . . . 060102(R)
David K. Lubensky

Scaling and universality in the two-dimensional Ising model with a magnetic field *(4 pages)* . . . . . 060103(R)
Vladimir V. Mangazeev, Michael Yu. Dudalev, Vladimir V. Bazhanov, and Murray T. Batchelor

Relative entropy as a universal metric for multiscale errors *(4 pages)* . . . . . 060104(R)
Aviel Chaimovich and M. Scott Shell

Granular materials

Spatial distribution functions of random packed granular spheres obtained by direct particle imaging *(4 pages)* . . . . . 060301(R)
Andreea Panaitescu and Arshad Kudrolli

Colloidal dispersions, suspensions, and aggregates

Tailoring the phonon band structure in binary colloidal mixtures *(4 pages)* . . . . . 060401(R)
Julia Fornleitner, Gerhard Kahl, and Christos N. Likos

Liquid crystals

Disclination-mediated thermo-optical response in nematic glass sheets *(4 pages)* . . . . . 060701(R)
Carl D. Modes, Kaushik Bhattacharya, and Mark Warner

Polymers

Large-scale dynamics of a single polymer chain under severe confinement *(4 pages)* . . . . . 060801(R)
Karine Lagrené, Jean-Marc Zanotti, Mohamed Daoud, Bela Farago, and Patrick Judeinstein

Copyright 2010 by The American Physical Society

1539-3755(201006)81:6:1;1-T

PHYSICAL REVIEW E THIRD SERIES, VOLUME 81, NUMBER 6 JUNE 2010

Biological physics

Coexistence in a one-dimensional cyclic dominance process *(4 pages)* . . . . . 060901(R)
Anton A. Winkler, Tobias Reichenbach, and Erwin Frey

ARTICLES

Statistical physics

Effective Edwards-Wilkinson equation for single-file diffusion *(9 pages)* 061101
P. M. Centres and S. Bustingorry

Fundamental theory of statistical particle dynamics *(18 pages)* 061102
Gene F. Mazenko

Mean first-passage time for random walks on generalized deterministic recursive trees *(5 pages)* 061103
Francesc Comellas and Alicia Miralles

Computer simulation of Feynman's ratchet and pawl system *(13 pages)* 061104
Jianzhou Zheng, Xiao Zheng, ChiYung Yam, and GuanHua Chen

Phase behavior of colloidal superballs: Shape interpolation from spheres to cubes *(13 pages)* 061105
Robert D. Batten, Frank H. Stillinger, and Salvatore Torquato

Finite-size effects in film geometry with nonperiodic boundary conditions: Gaussian model and renormalization-group theory at fixed dimension *(29 pages)* 061106
Boris Kastening and Volker Dohm

Entropy-based characterizations of the observable dependence of the fluctuation-dissipation temperature *(14 pages)* 061107
Kirsten Martens, Eric Bertin, and Michel Droz

Asymmetric exclusion process in a system of interacting Brownian particles *(9 pages)* 061108
José Eduardo de Oliveira Rodrigues and Ronald Dickman

Diffusion-limited reactions on a two-dimensional lattice with binary disorder *(9 pages)* 061109
Andrea Wolff, Ingo Lohmar, Joachim Krug, Yechiel Frank, and Ofer Biham

Critical frontier of the Potts and percolation models on triangular-type and kagome-type lattices. I. Closed-form expressions *(9 pages)* 061110
F. Y. Wu

Critical frontier of the Potts and percolation models on triangular-type and kagome-type lattices. II. Numerical analysis *(14 pages)* 061111
Chengxiang Ding, Zhe Fu, Wenan Guo, and F. Y. Wu

Realization of a Brownian engine to study transport phenomena: A semiclassical approach *(10 pages)* 061112
Pradipta Ghosh, Anindita Shit, Sudip Chattopadhyay, and Jyotipratim Ray Chaudhuri

Curvature-dependent diffusion flow on a surface with thickness *(8 pages)* 061113
Naohisa Ogawa

Dielectric properties of classical and quantized ionic fluids *(11 pages)* 061114
Johan S. Høye

de Almeida–Thouless line in vector spin glasses *(13 pages)* 061115
Auditya Sharma and A. P. Young

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 81, NUMBER 6** **JUNE 2010**

Universal power-law and partial condensation in aggregation-chipping processes *(6 pages)* 061116
Hiroshi Yamamoto and Toshiya Ohtsuki

Crossover of critical Casimir forces between different surface universality classes *(17 pages)* 061117
T. F. Mohry, A. Maciołek, and S. Dietrich

Effects of clustering on diversity-induced resonance in hidden metric spaces *(7 pages)* 061118
Liang Wu, Shiqun Zhu, Xiaoqin Luo, and Dan Wu

Effect of anisotropy on the scaling of connectivity and conductivity in continuum percolation theory *(5 pages)* 061119
S. Sadeghnejad, M. Masihi, P. R. King, A. Shojaei, and M. Pishvaei

Quasideterministic transport of Brownian particles in an oscillating periodic potential *(4 pages)* 061120
Pawel Romanczuk, Felix Müller, and Lutz Schimansky-Geier

Phase coexistence in consolidating porous media *(9 pages)* 061121
Emilio N. M. Cirillo, Nicoletta Ianiro, and Giulio Sciarra

Lasing process in a closed bipartite quantum system: A thermodynamical analysis *(6 pages)* 061122
G. Waldherr and G. Mahler

Thermomechanic-electrical coupling in phospholipid monolayers near the critical point *(5 pages)* 061123
D. Steppich, J. Griesbauer, T. Frommelt, W. Appelt, A. Wixforth, and M. F. Schneider

Coverage-maximization in networks under resource constraints *(6 pages)* 061124
Subrata Nandi, Lutz Brusch, Andreas Deutsch, and Niloy Ganguly

Thermal fluctuation effects on finite-size scaling of synchronization *(7 pages)* 061125
Seung-Woo Son and Hyunsuk Hong

Fractal topology of hand-crumpled paper *(6 pages)* 061126
Alexander S. Balankin, Didier Samayoa Ochoa, Israel Andrés Miguel, Julián Patiño Ortiz, and Miguel Ángel Martínez Cruz

Crossover between the extended and localized regimes in stochastic partially self-avoiding walks in one-dimensional disordered systems *(7 pages)* 061127
Juliana Militão Berbert and Alexandre Souto Martinez

Phase transitions of the generalized contact process with two absorbing states *(8 pages)* 061128
Man Young Lee and Thomas Vojta

Signal transmission by vibrational resonance in one-way coupled bistable systems *(8 pages)* 061129
Chenggui Yao and Meng Zhan

Entanglement and the thermodynamic arrow of time *(9 pages)* 061130
David Jennings and Terry Rudolph

Different thermal conductance of the inter- and intrachain interactions in a double-stranded molecular structure *(5 pages)* 061131
Wei-Rong Zhong

Crystallization of hard disks induced by a temperature gradient *(7 pages)* 061132
S. Wołoszczuk and A. Lipowski

Effect of different jump distributions on the dynamics of jump processes *(10 pages)* 061133
Edoardo Daly and Amilcare Porporato

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 81, NUMBER 6 JUNE 2010

Quantum quenches in an *XXZ* spin chain from a spatially inhomogeneous initial state *(17 pages)* 061134
Jarrett Lancaster and Aditi Mitra

Equilibrium and linear transport properties of fluids

Breakdown of excess entropy scaling for systems with thermodynamic anomalies *(12 pages)* 061201
Yu. D. Fomin, V. N. Ryzhov, and N. V. Gribova

Relaxation rates of the linearized Uehling-Uhlenbeck equation for bosons *(9 pages)* 061202
Erich Gust and L. E. Reichl

Aging to equilibrium dynamics of SiO_2 *(9 pages)* 061203
K. Vollmayr-Lee, J. A. Roman, and J. Horbach

Use of the Ornstein-Zernike Percus-Yevick equation to extract interaction potentials from pair correlation functions *(9 pages)* 061204
Qifei Wang, David J. Keffer, Donald M. Nicholson, and J. Brock Thomas

Granular materials

Microstructure evolution in density relaxation by tapping *(10 pages)* 061301
Anthony D. Rosato, Oleksandr Dybenko, David J. Horntrop, Vishagan Ratnaswamy, and Lou Kondic

Model for density waves in gravity-driven granular flow in narrow pipes *(5 pages)* 061302
Simen Å. Ellingsen, Knut S. Gjerden, Morten Grøva, and Alex Hansen

Molecular dynamics simulations of complex-shaped particles using Voronoi-based spheropolyhedra *(9 pages)* 061303
S. A. Galindo-Torres and D. M. Pedroso

Internal relaxation time in immersed particulate materials *(9 pages)* 061304
P. Rognon, I. Einav, and C. Gay

Morphological transitions in partially gas-fluidized granular mixtures *(11 pages)* 061305
Anders Nermoen, Christophe Raufaste, Simon Daniel deVilliers, Espen Jettestuen, Paul Meakin, and Dag Kristian Dysthe

Colloidal dispersions, suspensions, and aggregates

Hydrodynamic irreversibility in particle suspensions with nonuniform strain *(5 pages)* 061401
Jeffrey S. Guasto, Andrew S. Ross, and J. P. Gollub

Evaluation of radiation force acting on macromolecules by combination of Brownian dynamics simulation with fluorescence correlation spectroscopy *(8 pages)* 061402
Syoji Ito, Naoki Toitani, Hiroaki Yamauchi, and Hiroshi Miyasaka

Estimate for the fractal dimension of the Apollonian gasket in *d* dimensions *(4 pages)* 061403
R. S. Farr and E. Griffiths

Stochastic qualifier of gel and glass transitions in laponite suspensions *(7 pages)* 061404
F. Shayeganfar, S. Jabbari-Farouji, M. Sadegh Movahed, G. R. Jafari, and M. Reza Rahimi Tabar

Structured and complex fluids

Phase separation of thin-film polymer mixtures under in-plane electric fields *(9 pages)* 061501
Chen-Hung Wang, Peilong Chen, and C.-Y. David Lu

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 81, NUMBER 6 JUNE 2010

Dynamics of extended space charge in concentration polarization *(17 pages)* 061502
Isaak Rubinstein and Boris Zaltzman

Boundary slip dependency on surface stiffness *(5 pages)* 061503
Nikolaos Asproulis and Dimitris Drikakis

Effect of hydrophobic solutes on the liquid-liquid critical point *(8 pages)* 061504
Dario Corradini, Sergey V. Buldyrev, Paola Gallo, and H. Eugene Stanley

Frequency-dependent specific heat from thermal effusion in spherical geometry *(14 pages)* 061505
Bo Jakobsen, Niels Boye Olsen, and Tage Christensen

From equilibrium to steady-state dynamics after switch-on of shear *(15 pages)* 061506
Matthias Krüger, Fabian Weysser, and Thomas Voigtmann

Films, interfaces, and crystal growth

Phase-field-crystal model for fcc ordering *(16 pages)* 061601
Kuo-An Wu, Ari Adland, and Alain Karma

Liquid crystals

Relaxation kinetics of stretched disclination lines in a nematic liquid crystal *(6 pages)* 061701
Natan Osterman, Jurij Kotar, Eugene M. Terentjev, and Pietro Cicuta

Molecular model of biaxial ordering in nematic liquid crystals composed of flat molecules with four mesogenic groups *(10 pages)* 061702
M. V. Gorkunov, M. A. Osipov, A. Kocot, and J. K. Vij

Effective viscosity for nematic-liquid-crystal viscosity measurement using a shear horizontal wave *(8 pages)* 061703
Ryotaro Ozaki, Masashi Aoki, Katsumi Yoshino, Kohji Toda, and Hiroshi Moritake

Continuum theory of tilted chiral smectic phases *(10 pages)* 061704
J. P. Marcerou

Polymers

Elastic lattice polymers *(9 pages)* 061801
M. Baiesi, G. T. Barkema, and E. Carlon

Buckling of stiff polymer rings in weak spherical confinement *(8 pages)* 061802
Katja Ostermeir, Karen Alim, and Erwin Frey

Entropic elasticity of dilated and contorted idealized circular chains *(7 pages)* 061803
Martin Bertrand, Martin Forget, and Béla Joós

Internal dissipation of a polymer *(6 pages)* 061804
J. M. Deutsch

Biological physics

Scale-invariant model of marine population dynamics *(15 pages)* 061901
José A. Capitán and Gustav W. Delius

Dynamic-energy-budget-driven fruiting-body formation in myxobacteria *(12 pages)* 061902
M. Hendrata and B. Birnir

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 81, NUMBER 6** **JUNE 2010**

Spatial-temporal dynamics of chaotic behavior in cultured hippocampal networks *(8 pages)* 061903
Wenjuan Chen, Xiangning Li, Jiangbo Pu, and Qingming Luo

Analytical progress in the theory of vesicles under linear flow *(10 pages)* 061904
Alexander Farutin, Thierry Biben, and Chaouqi Misbah

Effect of crowding on the conformation of interwound DNA strands from neutron scattering measurements and Monte Carlo simulations *(8 pages)* 061905
Xiaoying Zhu, Siow Yee Ng, Amar Nath Gupta, Yuan Ping Feng, Bow Ho, Alain Lapp, Stefan U. Egelhaaf, V. Trevor Forsyth, Michael Haertlein, Martine Moulin, Ralf Schweins, and Johan R. C. van der Maarel

Particle-based model to simulate the micromechanics of biological cells *(15 pages)* 061906
P. Van Liedekerke, E. Tijskens, H. Ramon, P. Ghysels, G. Samaey, and D. Roose

Anharmonic oscillation effect on the Davydov-Scott monomer in a thermal bath *(11 pages)* 061907
A. Sulaiman, F. P. Zen, H. Alatas, and L. T. Handoko

Free energy and critical force for adhesion clusters *(6 pages)* 061908
Han-Jou Lin, Hsuan-Yi Chen, Yu-Jane Sheng, and Heng-Kwong Tsao

Variable renewal rate and growth properties of cell populations in colon crypts *(12 pages)* 061909
A. Di Garbo, M. D. Johnston, S. J. Chapman, and P. K. Maini

Mechanical energy transfer and dissipation in fibrous beta-sheet-rich proteins *(6 pages)* 061910
Zhiping Xu and Markus J. Buehler

Shape fluctuations of nearly spherical lipid vesicles and emulsion droplets *(10 pages)* 061911
Isak Bivas

Quantifying biodiversity and asymptotics for a sequence of random strings *(8 pages)* 061912
Hitoshi Koyano and Hirohisa Kishino

Different fitnesses for in vivo and in vitro evolutions due to the finite generation-time effect *(5 pages)* 061913
David B. Saakian, Araks S. Martirosyan, and Chin-Kun Hu

Compression of random coils due to macromolecular crowding: Scaling effects *(4 pages)* 061914
C. Le Coeur, J. Teixeira, P. Busch, and S. Longeville

Semiconservative quasispecies equations for polysomic genomes: The general case *(14 pages)* 061915
Eran Itan and Emmanuel Tannenbaum

Fluctuations and pattern formation in self-propelled particles *(14 pages)* 061916
Shradha Mishra, Aparna Baskaran, and M. Cristina Marchetti

Mutual information in time-varying biochemical systems *(15 pages)* 061917
Filipe Tostevin and Pieter Rein ten Wolde

Symmetries of interacting helices of charge *(9 pages)* 061918
Jonathan Landy and Joseph Rudnick

Exactly solvable model for helix-coil-sheet transitions in protein systems *(4 pages)* 061919
John S. Schreck and Jian-Min Yuan

Dynamic modes of red blood cells in oscillatory shear flow *(9 pages)* 061920
Hiroshi Noguchi

Stochastic cellular automata model of neural networks *(9 pages)* 061921
A. V. Goltsev, F. V. de Abreu, S. N. Dorogovtsev, and J. F. F. Mendes

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 81, NUMBER 6 JUNE 2010

Motor-driven effective temperature and viscoelastic response of active matter *(8 pages)* 061922
Konstantin I. Morozov and Len M. Pismen

Inclusion of noise in iterated firing time maps based on the phase response curve *(5 pages)* 061923
Fred H. Sieling, Carmen C. Canavier, and Astrid A. Prinz

Propagation of firing rate by synchronization and coherence of firing pattern in a feed-forward multilayer neural network *(9 pages)* 061924
Ming Yi and Lijian Yang

Ion-channel-like behavior in lipid bilayer membranes at the melting transition *(5 pages)* 061925
Jill Gallaher, Katarzyna Wodzińska, Thomas Heimburg, and Martin Bier

BRIEF REPORTS

Statistical physics

Some properties of the thermal conductivity of chains of oscillators *(4 pages)* 062101
Emmanuel Pereira and Romero B. Solha

Granular materials

Sinking of light intruders in a shaken granular bed *(4 pages)* 062301
Iván Sánchez, Gustavo Gutiérrez, Iker Zuriguel, and Diego Maza

Structured and complex fluids

Rheology and ordering transitions of non-Brownian suspensions in a confined shear flow: Effects of external torques *(4 pages)* 062501
Kyongmin Yeo and Martin R. Maxey

Liquid crystals

Statistical models of mixtures with a biaxial nematic phase *(4 pages)* 062701
E. do Carmo, D. B. Liarte, and S. R. Salinas

Biological physics

Maze-solving by chemotaxis *(3 pages)* 062901
A. M. Reynolds

COMMENTS

Comment on “Six-state clock model on the square lattice: Fisher zero approach with Wang-Landau sampling” *(2 pages)* 063101
Seung Ki Baek, Petter Minnhagen, and Beom Jun Kim
