ARTICLES

Statistical physics

Memory-induced anomalous dynamics: Emergence of diffusion, subdiffusion, and superdiffusion from a single random walk model *(5 pages)* 021101
Niraj Kumar, Upendra Harbola, and Katja Lindenberg

Exit times in non-Markovian drifting continuous-time random-walk processes *(9 pages)* 021102
Miquel Montero and Javier Villarroel

Predicting rare events in chemical reactions: Application to skin cell proliferation *(5 pages)* 021103
Chiu Fan Lee (李超帆)

Low-temperature quantum fluctuations in overdamped ratchets *(4 pages)* 021104
Stefan A. Maier and Joachim Ankerhold

Coherence resonance due to transient thresholds in excitable systems *(5 pages)* 021105
Ramana Dodla and Charles J. Wilson

Universality of the glassy transitions in the two-dimensional $\pm J$ Ising model *(9 pages)* 021106
Francesco Parisen Toldin, Andrea Pelissetto, and Ettore Vicari

Autocorrelations in the totally asymmetric simple exclusion process and Nagel-Schreckenberg model *(7 pages)* 021107
Jan de Gier, Timothy M. Garoni, and Zongzheng Zhou

Bimolecular chemical reactions on weighted complex networks *(8 pages)* 021108
Sungchul Kwon, Woosik Choi, and Yup Kim

Universal generation of $1/f$ noises *(8 pages)* 021109
Iddo Eliazar and Joseph Klafter

Nonextensivity and natural time: The case of seismicity *(9 pages)* 021110
N. V. Sarlis, E. S. Skordas, and P. A. Varotsos

Thermally activated barrier crossing and stochastic resonance of a flexible polymer chain in a piecewise linear bistable potential *(6 pages)* 021111
Mesfin Asfaw

Exact nonequilibrium work generating function for a small classical system *(7 pages)* 021112
W. A. M. Morgado and D. O. Soares-Pinto

Diffusion in a crowded environment *(4 pages)* 021113
Duccio Fanelli and Alan J. McKane

Statistical mechanics of Floquet systems with regular and chaotic states *(16 pages)* 021114
Roland Ketzmerick and Waltraut Wustmann

Aspiring to the fittest and promotion of cooperation in the prisoner's dilemma game *(7 pages)* 021115
Zhen Wang and Matjaž Perc

Tunable heat pump by modulating the coupling to the leads *(9 pages)* 021116
Eduardo C. Cuansing and Jian-Sheng Wang

Dimensional reduction of the master equation for stochastic chemical networks: The reduced-multiplane method *(12 pages)* 021117
Baruch Barzel, Ofer Biham, Raz Kupferman, Azi Lipshtat, and Amir Zait
