THIRD SERIES, VOLUME 82, NUMBER 5

CONTENTS

NOVEMBER 2010

PART 1: STATISTICAL, SOFT MATTER, AND BIOLOGICAL PHYSICS

RAPID COMMUNICATIONS

Statistical physics

- Symmetrization of single-sided or nonsymmetrical distributions: The way to enhance a generation rate of random bits from a physical source of randomness (*4 pages*) 050101(R)
V. N. Chizhevsky

Granular materials

- Towards a relevant set of state variables to describe static granular packings (*4 pages*) 050301(R)
Luis A. Pugnaloni, Iván Sánchez, Paula A. Gago, José Damas, Iker Zuriguel, and Diego Maza
- Magnetic resonance measurements of high-velocity particle motion in a three-dimensional gas-solid spouted bed (*4 pages*) 050302(R)
C. R. Müller, D. J. Holland, A. J. Sederman, J. S. Dennis, and L. F. Gladden

Colloidal dispersions, suspensions, and aggregates

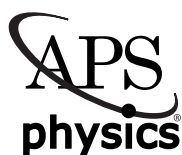

- Correlated electrolyte solutions and ion-induced attractions between nanoparticles (*4 pages*) 050401(R)
Jos W. Zwanikken and Monica Olvera de la Cruz

Liquid crystals

- Splay-bend elasticity of a nematic liquid crystal with T-shaped molecules (*4 pages*) 050701(R)
P. Sathyanarayana, M. C. Varia, A. K. Prajapati, B. Kundu, V. S. S. Sastry, and S. Dhara

Polymers

- Slow process in confined polymer melts: Layer exchange dynamics at a polymer solid interface (*4 pages*) 050801(R)
L. Yelash, P. Virnau, K. Binder, and W. Paul
- Stretching semiflexible filaments with quenched disorder (*4 pages*) 050802(R)
Panayotis Benetatos and Eugene M. Terentjev
- Role of hydrodynamic interactions in the migration of polyelectrolytes driven by a pressure gradient and an electric field (*4 pages*) 050803(R)
Rahul Kekre, Jason E. Butler, and Anthony J. C. Ladd

Copyright 2010 by The American Physical Society

(Continued)

1539-3755(201011)82:5:1;1-6

Geometry and topology of knotted ring polymers in an array of obstacles (<i>4 pages</i>)	050804(R)
Enzo Orlandini, Attilio L. Stella, and Carlo Vanderzande	

Biological physics

Active force generation in cross-linked filament bundles without motor proteins (<i>4 pages</i>)	050901(R)
Sam Walcott and Sean X. Sun	

ARTICLES

Statistical physics

Optimization criteria, bounds, and efficiencies of heat engines (<i>5 pages</i>)	051101
N. Sánchez-Salas, L. López-Palacios, S. Velasco, and A. Calvo Hernández	
Effect of correlated noise on quasi-one-dimensional diffusion (<i>5 pages</i>)	051102
D. V. Tkachenko, V. R. Misko, and F. M. Peeters	
Approximation of super-ions for single-file diffusion of multiple ions through narrow pores (<i>9 pages</i>)	051103
Valery N. Kharkyanen, Semen O. Yesylevskyy, and Natalia M. Berezetskaya	
Exact path-integral evaluation of the heat distribution function of a trapped Brownian oscillator (<i>5 pages</i>)	051104
Debarati Chatterjee and Binny J. Cherayil	
Scaling behavior of explosive percolation on the square lattice (<i>8 pages</i>)	051105
Robert M. Ziff	
Effect of colored noise on logical stochastic resonance in bistable dynamics (<i>7 pages</i>)	051106
Lei Zhang, Aiguo Song, and Jun He	
Wave-number dependent current correlation for a harmonic oscillator (<i>11 pages</i>)	051107
August Wierling and Isao Sawada	
Unusual Yang-Lee edge singularity in the one-dimensional axial-next-to-nearest-neighbor Ising model (<i>8 pages</i>)	051108
D. Dalmazi and F. L. Sá	
Constrained maximal power in small engines (<i>7 pages</i>)	051109
B. Gaveau, M. Moreau, and L. S. Schulman	
Tensor renormalization group: Local magnetizations, correlation functions, and phase diagrams of systems with quenched randomness (<i>7 pages</i>)	051110
Can Güven, Michael Hinczewski, and A. Nihat Berker	
Drift effect and “negative” mass transport in an inhomogeneous medium: Limiting case of a two-component lattice gas (<i>7 pages</i>)	051111
Sergei P. Lukyanets and Oleksandr V. Kliushnychenko	
Inference with minimal Gibbs free energy in information field theory (<i>13 pages</i>)	051112
Torsten A. Enßlin and Cornelius Weig	
Derivation of quantum master equation with counting fields by monitoring a probe (<i>5 pages</i>)	051113
Takaaki Monnai	
Mesoscopic speckle (<i>5 pages</i>)	051114
Sheng Zhang, Yitzchak Lockerman, and Azriel Z. Genack	

Universal shocks in random matrix theory (<i>6 pages</i>)	051115
Jean-Paul Blaizot and Maciej A. Nowak	
Semiclassical theory of energy diffusive escape in a Duffing oscillator (<i>10 pages</i>)	051116
Alvise Verso and Joachim Ankerhold	
Level density of spin chains of Haldane-Shastry type (<i>6 pages</i>)	051117
Alberto Enciso, Federico Finkel, and Artemio González-López	
Entropy production theorem for a charged particle in an electromagnetic field (<i>7 pages</i>)	051118
J. I. Jiménez-Aquino	
Friction phenomena and phase transition in the underdamped two-dimensional Frenkel-Kontorova model (<i>9 pages</i>)	051119
Yang Yang, Wen-Shan Duan, Jian-Min Chen, Lei Yang, Jasmina Tekić, Zhi-Gang Shao, and Cang-Long Wang	
Anomalous diffusion with under- and overshooting subordination: A competition between the very large jumps in physical and operational times (<i>7 pages</i>)	051120
Aleksander Stanislavsky and Karina Weron	
Revisiting Kawasaki dynamics in one dimension (<i>8 pages</i>)	051121
M. D. Grynberg	
Effective stochastic resonance under noise of heterogeneous amplitude (<i>7 pages</i>)	051122
Ryosuke Kawai, Shogo Torigoe, Kazuhiro Yoshida, Akinori Awazu, and Hiraku Nishimori	
Parameter exploration of optically trapped liquid aerosols (<i>9 pages</i>)	051123
D. R. Burnham, P. J. Reece, and D. McGloin	
Analytical determination of the bifurcation thresholds in stochastic differential equations with delayed feedback (<i>7 pages</i>)	051124
Mathieu Gaudreault, François Drolet, and Jorge Viñals	
Quantum diffusion in a fermionic bath (<i>10 pages</i>)	051125
Sudarson Sekhar Sinha, Debasish Mondal, Bidhan Chandra Bag, and Deb Shankar Ray	
Application of Edwards' statistical mechanics to high-dimensional jammed sphere packings (<i>11 pages</i>)	051126
Yuliang Jin, Patrick Charbonneau, Sam Meyer, Chaoming Song, and Francesco Zamponi	
Order parameter expansion and finite-size scaling study of coherent dynamics induced by quenched noise in the active rotator model (<i>8 pages</i>)	051127
Niko Komin and Raúl Toral	
Steering the potential barriers: Entropic to energetic (<i>6 pages</i>)	051128
P. S. Burada and G. Schmid	
Random walks on Sierpinski gaskets of different dimensions (<i>7 pages</i>)	051129
Sebastian Weber, Joseph Klafter, and Alexander Blumen	
Sum rule for response function in nonequilibrium Langevin systems (<i>7 pages</i>)	051130
Tatsuro Yuge	
Solution of an associating lattice-gas model with density anomaly on a Husimi lattice (<i>11 pages</i>)	051131
Tiago J. Oliveira, Jürgen F. Stilck, and Marco Aurélio A. Barbosa	
Statistics of reversible bond dynamics observed in force-clamp spectroscopy (<i>13 pages</i>)	051132
Gregor Diezemann, Thomas Schlesier, Burkhard Geil, and Andreas Janshoff	

Multifractality of instantaneous normal modes at mobility edges (<i>10 pages</i>)	051133
B. J. Huang and Ten-Ming Wu	
Finite-size scaling in Ising-like systems with quenched random fields: Evidence of hyperscaling violation (<i>17 pages</i>)	051134
R. L. C. Vink, T. Fischer, and K. Binder	
Equilibrium and linear transport properties of fluids	
Multicomponent gas transport coefficients: Alternate formulations (<i>19 pages</i>)	051201
R. F. Snider	
Molecular dynamics simulation study of self-diffusion for penetrable-sphere model fluids (<i>10 pages</i>)	051202
Soong-Hyuck Suh, Chun-Ho Kim, Soon-Chul Kim, and Andrés Santos	
Granular materials	
Critical behavior of two freely evolving granular gases separated by an adiabatic piston (<i>8 pages</i>)	051301
J. Javier Brey and Nagi Khalil	
Sedimentation instabilities: Impact of the fluid compressibility and viscosity (<i>8 pages</i>)	051302
Michael J. Niebling, Eirik G. Flekkøy, Knut Jørgen Måløy, and Renaud Toussaint	
Catastrophic regime in the discharge of a granular pile (<i>4 pages</i>)	051303
C. F. M. Magalhães, J. G. Moreira, and A. P. F. Atman	
Athermal jamming of soft frictionless Platonic solids (<i>13 pages</i>)	051304
Kyle C. Smith, Meheboob Alam, and Timothy S. Fisher	
Diffusivity and weak clustering in a quasi-two-dimensional granular gas (<i>8 pages</i>)	051305
J. A. Perera-Burgos, G. Pérez-Ángel, and Y. Nahmad-Molinari	
Fluctuations, jamming, and yielding for a driven probe particle in disordered disk assemblies (<i>11 pages</i>)	051306
C. J. Olson Reichhardt and C. Reichhardt	
Colloidal dispersions, suspensions, and aggregates	
Origins of the anomalous stress behavior in charged colloidal suspensions under shear (<i>7 pages</i>)	051401
Amit Kumar and Jonathan J. L. Higdon	
Molecular dynamics simulation of fractal aggregate diffusion (<i>10 pages</i>)	051402
Gaurav Pranami, Monica H. Lamm, and R. Dennis Vigil	
Analysis of patterns formed by two-component diffusion limited aggregation (<i>6 pages</i>)	051403
E. B. Postnikov, A. B. Ryabov, and A. Loskutov	
Free energies, vacancy concentrations, and density distribution anisotropies in hard-sphere crystals: A combined density functional and simulation study (<i>14 pages</i>)	051404
M. Oettel, S. Görig, A. Härtel, H. Löwen, M. Radu, and T. Schilling	
Viscoelastic properties of ferrofluids (<i>10 pages</i>)	051405
D. N. Chirikov, S. P. Fedotov, L. Yu. Iskakova, and A. Yu. Zubarev	
Irreversibility and chaos: Role of long-range hydrodynamic interactions in sheared suspensions (<i>4 pages</i>)	051406
Bloen Metzger and Jason E. Butler	

Sorting colloidal particles into multiple channels with optical forces: Prismatic optical fractionation (9 pages)	051407
Ke Xiao and David G. Grier	
Structured and complex fluids	
Precipitation in aqueous mixtures with addition of a strongly hydrophilic or hydrophobic solute (20 pages) ...	051501
Ryuichi Okamoto and Akira Onuki	
Boiling of an emulsion in a yield stress fluid (9 pages)	051502
Geoffroy Guéna, Ji Wang, Jean-Baptiste d'Espinose, François Lequeux, and Laurence Talini	
Films, interfaces, and crystal growth	
Modeling the early stages of reactive wetting (14 pages)	051601
Daniel Wheeler, James A. Warren, and William J. Boettinger	
Coarse-grained molecular dynamics simulations of shear-induced instabilities of lipid bilayer membranes in water (6 pages)	051602
Itsuo Hanasaki, Jens H. Walther, Satoyuki Kawano, and Petros Koumoutsakos	
Relationship between induced fluid structure and boundary slip in nanoscale polymer films (10 pages)	051603
Nikolai V. Priezjev	
Cumulative distribution functions associated with bubble-nucleation processes in cavitation (5 pages)	051604
Hiroshi Watanabe, Masaru Suzuki, and Nobuyasu Ito	
Diffusive motion of C ₆₀ on a graphene sheet (7 pages)	051605
M. Neek-Amal, N. Abedpour, S. N. Rasuli, A. Naji, and M. R. Ejtehadi	
Phase-field study of spacing evolution during transient growth (8 pages)	051606
Sebastian Gurevich, Morteza Amoorezaei, and Nikolas Provatas	
Liquid crystals	
Modeling elastic instabilities in nematic elastomers (4 pages)	051701
Badel L. Mbanga, Fangfu Ye, Jonathan V. Selinger, and Robin L. B. Selinger	
Calorimetric study of the nematic to smectic-A phase transition in octylcyanobiphenyl-hexane binary mixtures (8 pages)	051702
Krishna P. Sigdel and Germano S. Iannacchione	
Dispersive kinetics in discotic liquid crystals (8 pages)	051703
O. Kruglova, F. M. Mulder, G. J. Kearley, S. J. Picken, J. A. Stride, I. Paraschiv, and H. Zuillhof	
Polymers	
Anomalous increase in dielectric susceptibility during isothermal aging of ultrathin polymer films (8 pages)	051801
Daisuke Tahara and Koji Fukao	
Demixing of compact polymers chains in three dimensions (6 pages)	051802
Jesper Lykke Jacobsen	
Evidence for structural transition in hairy-rod poly[9,9-bis(2-ethylhexyl)fluorene] under high pressure conditions (6 pages)	051803
M. Knaapila, R. Stepanyan, D. Haase, S. Carlson, M. Torkkeli, Y. Cerenius, U. Scherf, and S. Guha	

Biological physics

Analytical approach to thermodynamics of bolalipid membranes (<i>9 pages</i>)	051901
Sergei I. Mukhin and Boris B. Kheyfets	
Three-dimensional chemotaxis model for a crawling neutrophil (<i>8 pages</i>)	051902
Jihwan Song and Dongchoul Kim	
Metastable states and quasicycles in a stochastic Wilson-Cowan model of neuronal population dynamics (<i>13 pages</i>)	051903
Paul C. Bressloff	
Universal patterns of equilibrium cluster growth in aqueous sugars observed by dynamic light scattering (<i>7 pages</i>)	051904
D. L. Sidebottom and Tri D. Tran	
Biopolymer network geometries: Characterization, regeneration, and elastic properties (<i>5 pages</i>)	051905
Stefan B. Lindström, David A. Vader, Artem Kulachenko, and David A. Weitz	
Intrinsic and force-generated cooperativity in a theory of DNA-bending proteins (<i>15 pages</i>)	051906
Houyin Zhang and John F. Marko	
Queueing induced by bidirectional motor motion near the end of a microtubule (<i>8 pages</i>)	051907
Peter Ashwin, Congping Lin, and Gero Steinberg	
Anomalous drift of spiral waves in heterogeneous excitable media (<i>5 pages</i>)	051908
S. Sridhar, Sitabhra Sinha, and Alexander V. Panfilov	
Spatial rock-paper-scissors models with inhomogeneous reaction rates (<i>11 pages</i>)	051909
Qian He, Mauro Mobilia, and Uwe C. Täuber	
Intercellular calcium waves in the fire-diffuse-fire framework: Green's function for gap-junctional coupling (<i>12 pages</i>)	051910
Jamie Harris and Yulia Timofeeva	
Rhythmogenic neuronal networks, emergent leaders, and k -cores (<i>6 pages</i>)	051911
David J. Schwab, Robijn F. Bruinsma, Jack L. Feldman, and Alex J. Levine	
Optical techniques provide information on various effective diffusion coefficients in the presence of traps (<i>11 pages</i>)	051912
Lorena Sigaut, María Laura Ponce, Alejandro Colman-Lerner, and Silvina Ponce Dawson	
Alternative to the diffusion equation in population genetics (<i>8 pages</i>)	051913
Bahram Houchmandzadeh and Marcel Vallade	
Competitive hybridization models (<i>17 pages</i>)	051914
Vera Cherepinsky, Ghazala Hashmi, and Bud Mishra	
Shock wave initiated by an ion passing through liquid water (<i>5 pages</i>)	051915
Eugene Surdutovich and Andrey V. Solov'yov	
Inference of plasmid-copy-number mean and noise from single-cell gene expression data (<i>8 pages</i>)	051916
Stéphane Ghozzi, Jérôme Wong Ng, Didier Chatenay, and Jérôme Robert	
Scaling properties and fractality in the distribution of coding segments in eukaryotic genomes revealed through a block entropy approach (<i>9 pages</i>)	051917
Labrini Athanasopoulou, Stavros Athanasopoulos, Kostas Karamanos, and Yannis Almirantis	

(Continued)

Excitation energy transfer: Study with non-Markovian dynamics (<i>5 pages</i>)	051918
Xian-Ting Liang	
Structural reorganization of parallel actin bundles by crosslinking proteins: Incommensurate states of twist (<i>15 pages</i>)	051919
Homin Shin and Gregory M. Grason	
Slow sites in an exclusion process with limited resources (<i>13 pages</i>)	051920
Chris A. Brackley, M. Carmen Romano, and Marco Thiel	
Critical behavior of the susceptible-infected-recovered model on a square lattice (<i>8 pages</i>)	051921
Tânia Tomé and Robert M. Ziff	
Biodiversity on island chains: Neutral model simulations (<i>9 pages</i>)	051922
Patrick B. Warren	
Comparison of Brownian-dynamics-based estimates of polymer tension with direct force measurements (<i>13 pages</i>)	051923
Mark E. Arsenault, Prashant K. Purohit, Yale E. Goldman, Henry Shuman, and Haim H. Bau	
Looping probabilities of elastic chains: A path integral approach (<i>15 pages</i>)	051924
Ludovica Cotta-Ramusino and John H. Maddocks	
Leading-edge–gel coupling in lamellipodium motion (<i>8 pages</i>)	051925
Juliane Zimmermann, Mihaela Enculescu, and Martin Falcke	
Overlapping two self-avoiding polymers in a closed cylindrical pore: Implications for chromosome segregation in a bacterial cell (<i>5 pages</i>)	051926
Youngkyun Jung and Bae-Yeun Ha	
Insights into the potential functionality of single-chain force-induced conformational transitions in polymer networks: Implications for polysaccharide signaling in the plant cell wall (<i>7 pages</i>)	051927
E. Schuster, L Lundin, and M. A. K. Williams	
Periodic modulation of tubular vesicles induced by phase separation (<i>9 pages</i>)	051928
Miho Yanagisawa, Masayuki Imai, and Takashi Taniguchi	
Analysis of stationary droplets in a generic Turing reaction-diffusion system (<i>9 pages</i>)	051929
Thomas E. Woolley, Ruth E. Baker, Philip K. Maini, José Luis Aragón, and Rafael A. Barrio	
Composition-based effective chain length for prediction of protein folding rates (<i>12 pages</i>)	051930
Le Chang, Jun Wang, and Wei Wang	
Dynamics of a polymer in a Brownian ratchet (<i>15 pages</i>)	051931
James M. Polson, Brian Bylhouwer, Martin J. Zuckermann, Arthur J. Horton, and William M. Scott	

BRIEF REPORTS

Statistical physics

Ground state of interacting quantum magnetic dipoles: Transition from a ferromagnetic Fermi liquid to an antiferromagnetic solid (<i>4 pages</i>)	052101
Sudhanshu S. Jha and S. D. Mahanti	
Probability distribution of a trapped Brownian particle in plane shear flows (<i>4 pages</i>)	052102
Jochen Bammert and Walter Zimmermann
