THIRD SERIES, VOLUME 83, NUMBER 3 *CONTENTS* **MARCH 2011**

PART 1: STATISTICAL, SOFT MATTER, AND BIOLOGICAL PHYSICS

RAPID COMMUNICATIONS

Statistical physics

Predictability of anomalous transport on lattice networks with quenched disorder *(4 pages)* . . . . . 030101(R)
Peter K. Kang, Marco Dentz, and Ruben Juanes

Landauer's principle in the quantum regime *(4 pages)* . . . . . 030102(R)
Stefanie Hilt, Saroosh Shabbir, Janet Anders, and Eric Lutz

Maximal-entropy random walks in complex networks with limited information *(4 pages)* . . . . . 030103(R)
Roberta Sinatra, Jesús Gómez-Gardeñes, Renaud Lambiotte, Vincenzo Nicosia, and Vito Latora

Zero-temperature freezing in the three-dimensional kinetic Ising model *(4 pages)* . . . . . 030104(R)
J. Olejarz, P. L. Krapivsky, and S. Redner

Variational formula for experimental determination of high-order correlations of current fluctuations in driven systems *(4 pages)* . . . . . 030105(R)
Takahiro Nemoto and Shin-ichi Sasa

Evidence of a glass transition in a ten-state non-mean-field Potts glass *(4 pages)* . . . . . 030106(R)
Ruben S. Andrist, Derek Larson, and Helmut G. Katzgraber

Density profiles in open superdiffusive systems *(4 pages)* . . . . . 030107(R)
Stefano Lepri and Antonio Politi

Granular materials

Power-law flow statistics in anisometric (wedge) hoppers *(4 pages)* . . . . . 030301(R)
Summer Saraf and Scott V. Franklin

Critical scaling of shearing rheology at the jamming transition of soft-core frictionless disks *(4 pages)* . . . . . 030302(R)
Peter Olsson and S. Teitel

Finite-size scaling at the jamming transition: Corrections to scaling and the correlation-length critical exponent *(4 pages)* . . . . . 030303(R)
Daniel Vågberg, Daniel Valdez-Balderas, M. A. Moore, Peter Olsson, and S. Teitel

PHYSICAL REVIEW E THIRD SERIES, VOLUME 83, NUMBER 3 MARCH 2011

Colloidal dispersions, suspensions, and aggregates

Near-surface structure of a bicontinuous microemulsion with a transition region *(4 pages)* . . . . . 030401(R)
M. Kerscher, P. Busch, S. Mattauch, H. Frielinghaus, D. Richter, M. Belushkin, and G. Gompper

Colloidal diffusion inside a spherical cell *(4 pages)* . . . . . 030402(R)
A. E. Cervantes-Martínez, A. Ramírez-Saito, R. Armenta-Calderón, M. A. Ojeda-López, and J. L. Arauz-Lara

Structured and complex fluids

Thermal diffusion in a binary liquid due to rectified molecular fluctuations *(4 pages)* . . . . . 030501(R)
Simon Villain-Guillot and Alois Würger

Direct experimental evidence of growing dynamic length scales in confined colloidal liquids *(4 pages)* . . . . . 030502(R)
Prasad S. Sarangapani, Andrew B. Schofield, and Yingxi Zhu

Biological physics

Kinetic theory of flocking: Derivation of hydrodynamic equations *(4 pages)* . . . . . 030901(R)
Thomas Ihle

ARTICLES

Statistical physics

Asymptotic front behavior in an $A + B \rightarrow 2A$ reaction under subdiffusion *(7 pages)* 031101
D. Froemberg, H. H. Schmidt-Martens, I. M. Sokolov, and F. Sagués

Dynamical approach to the Casimir effect *(12 pages)* 031102
P. Rodriguez-Lopez, R. Brito, and R. Soto

Renewal stochastic processes with correlated events: Phase transitions along time evolution *(6 pages)* 031103
Jorge Velázquez and Alberto Robledo

Trace analysis for fracture networks with anisotropic orientations and heterogeneous distributions *(18 pages)* 031104
V. V. Mourzenko, J.-F. Thovert, and P. M. Adler

Electric currents in networks of interconnected memristors *(8 pages)* 031105
Ehsan Nedaaee Oskoee and Muhammad Sahimi

Sufficient conditions for thermal rectification in general graded materials *(4 pages)* 031106
Emmanuel Pereira

Entropy production in the nonequilibrium steady states of interacting many-body systems *(8 pages)* 031107
Sven Dorosz and Michel Pleimling

Moment ratios and dynamic critical behavior of a reactive system with several absorbing configurations *(7 pages)* 031108
M. F. de Andrade and W. Figueiredo

Mapping of diffusion in a channel with soft walls *(8 pages)* 031109
Pavol Kalinay and Jerome K. Percus

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 83, NUMBER 3** **MARCH 2011**

Nucleation in scale-free networks *(8 pages)* 031110
Hanshuang Chen, Chuansheng Shen, Zhonghuai Hou, and Houwen Xin

Quantum equilibration under constraints and transport balance *(7 pages)* 031111
Gernot Schaller

Sensitivity to noise and ergodicity of an assembly line of cellular automata that classifies density *(5 pages)* 031112
J. Ricardo G. Mendonça

Electrostatic approximation of source-to-target mean first-passage times on networks *(6 pages)* 031113
Anthony P. Roberts and Christophe P. Haynes

Stationary-point approach to the phase transition of the classical XY chain with power-law interactions *(9 pages)* 031114
Michael Kastner

Bimodal response in periodically driven diffusive systems *(6 pages)* 031115
Urna Basu, Debasish Chaudhuri, and P. K. Mohanty

Dynamics of majority rule with differential latencies *(4 pages)* 031116
Alexander Scheidler

Accuracy of perturbative master equations *(5 pages)* 031117
C. H. Fleming and N. I. Cummings

Origin of lognormal-like distributions with a common width in a growth and division process *(5 pages)* 031118
Kazufumi Hosoda, Tomoaki Matsuura, Hiroaki Suzuki, and Tetsuya Yomo

Application of importance sampling to the computation of large deviations in nonequilibrium processes *(5 pages)* 031119
Anupam Kundu, Sanjib Sabhapandit, and Abhishek Dhar

Infrared behavior in systems with a broken continuous symmetry: Classical O(N) model versus interacting bosons *(17 pages)* 031120
N. Dupuis

Directed current in the Holstein system *(6 pages)* 031121
D. Hennig, A. D. Burbanks, and A. H. Osbaldestin

Level density and level-spacing distributions of random, self-adjoint, non-Hermitian matrices *(5 pages)* 031122
Yogesh N. Joglekar and William A. Karr

Weibull-type limiting distribution for replicative systems *(6 pages)* 031123
Junghyo Jo, Jean-Yves Fortin, and M. Y. Choi

Complexity and nonseparability of classical Liouvillian dynamics *(5 pages)* 031124
Tomaž Prosen

Development of a semiclassical method to compute mobility and diffusion coefficient of a Brownian particle in a nonequilibrium environment *(12 pages)* 031125
Anindita Shit, Pradipta Ghosh, Sudip Chattopadhyay, and Jyotipratim Ray Chaudhuri

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 83, NUMBER 3** **MARCH 2011**

Extension of scaled particle theory to inhomogeneous hard particle fluids. IV. Cavity growth at any distance relative to a planar hard wall *(20 pages)* 031126
Daniel W. Siderius and David S. Corti

Singular perturbation analysis of a reduced model for collective motion: A renormalization group approach *(6 pages)* 031127
Chiu Fan Lee (李超帆)

Heat conduction in one-dimensional aperiodic quantum Ising chains *(6 pages)* 031128
Wenjuan Li and Peiqing Tong

Multishocks in driven diffusive processes: Insights from fixed-point analysis of the boundary layers *(11 pages)* 031129
Sutapa Mukherji

Chaos in fermionic many-body systems and the metal-insulator transition *(7 pages)* 031130
T. Papenbrock, Z. Pluhař, J. Tithof, and H. A. Weidenmüller

Exact analytical solution of the collapse of self-gravitating Brownian particles and bacterial populations at zero temperature *(20 pages)* 031131
Pierre-Henri Chavanis and Clément Sire

Condensation phenomena of the generalized conserved-mass aggregation model on complex networks *(11 pages)* 031132
Sungchul Kwon and Yup Kim

Transport on exploding percolation clusters *(4 pages)* 031133
José S. Andrade Jr., Hans J. Herrmann, André A. Moreira, and Cláudio L. N. Oliveira

Hopping over a heat barrier *(7 pages)* 031134
Anja Garber, Nicholas R. Moloney, and Holger Kantz

Coupled quantum Otto cycle *(6 pages)* 031135
George Thomas and Ramandeep S. Johal

Fractional Langevin equations of distributed order *(10 pages)* 031136
C. H. Eab and S. C. Lim

Nonlocal effective-average-action approach to crystalline phantom membranes *(12 pages)* 031137
N. Hasselmann and F. L. Braghin

Equilibrium and linear transport properties of fluids

Generalized thermodynamic and transport properties. I. Simple liquids *(15 pages)* 031201
D. Bertolini and A. Tani

Generalized thermodynamic and transport properties. II. Molecular liquids *(10 pages)* 031202
D. Bertolini and A. Tani

Charge regulation in nanopore ionic field-effect transistors *(6 pages)* 031203
Zhijun Jiang and Derek Stein

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 83, NUMBER 3 MARCH 2011

Granular materials

Density profiles of loose and collapsed cohesive granular structures generated by ballistic deposition *(13 pages)* 031301
Dirk Kadau and Hans J. Herrmann

Edwards entropy and compactivity in a model of granular matter *(5 pages)* 031302
Richard K. Bowles and S. S. Ashwin

Abrasion of flat rotating shapes *(8 pages)* 031303
A. E. Roth, C. M. Marques, and D. J. Durian

Solution of the Roth-Marques-Durian rotational abrasion model *(5 pages)* 031304
Bryan Gin-ge Chen

Precessive sand ripples in intense steady shear flows *(11 pages)* 031305
Juan M. Restrepo, Derek E. Moulton, and Hermann Uys

Shallow granular flows *(10 pages)* 031306
Daisuke Takagi, Jim N. McElwaine, and Herbert E. Huppert

Glassiness, rigidity, and jamming of frictionless soft core disks *(9 pages)* 031307
Daniel Vågberg, Peter Olsson, and S. Teitel

Scaling of granular temperature in a vibrated granular bed *(8 pages)* 031308
V. Zivkovic, M. J. Biggs, and D. H. Glass

Stochastic transitions and jamming in granular pipe flow *(4 pages)* 031309
Samuel Brand, Robin C. Ball, and Mario Nicodemi

Brownian motor in a granular medium *(5 pages)* 031310
R. Balzan, F. Dalton, V. Loreto, A. Petri, and G. Pontuale

Colloidal dispersions, suspensions, and aggregates

Investigating the microstructure of a yield-stress fluid by light scattering *(8 pages)* 031401
David Lee, Iris A. Gutowski, Arthur E. Bailey, Laurent Rubatat, John R. de Bruyn, and Barbara J. Frisken

Self-assembly of nanoparticles into heterogeneous structures with gradient material properties *(7 pages)* 031402
Jonghyun Park and Wei Lu

Retarded transfers of an emulsified two-component oil phase *(6 pages)* 031403
Ji Wang, Jean-Baptiste d'Espinose, François Lequeux, and Laurence Talini

Structured and complex fluids

Shear alignment of a disordered lamellar mesophase *(12 pages)* 031501
V. Kumaran and D. S. S. Raman

Optical coherence tomography velocimetry in controlled shear flow *(5 pages)* 031502
M. Harvey and T. A. Waigh

Universal jamming phase diagram in the hard-sphere limit *(8 pages)* 031503
Thomas K. Haxton, Michael Schmiedeberg, and Andrea J. Liu

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 83, NUMBER 3** **MARCH 2011**

Connection between dynamics and thermodynamics of liquids on the melting line *(8 pages)* 031504
D. Fragiadakis and C. M. Roland

Memory effects in the relaxation of the Gaussian trap model *(8 pages)* 031505
Gregor Diezemann and Andreas Heuer

Inherent structures of phase-separating binary mixtures: Nucleation, spinodal decomposition, and pattern formation *(9 pages)* 031506
Sarmistha Sarkar and Biman Bagchi

Films, interfaces, and crystal growth

Phase-field-crystal methodology for modeling of structural transformations *(12 pages)* 031601
Michael Greenwood, Jörg Rottler, and Nikolas Provatas

Crossover dynamics at large metastability in gas-liquid nucleation *(7 pages)* 031602
Mantu Santra and Biman Bagchi

Rupture of thin liquid films: Generalization of weakly nonlinear theory *(13 pages)* 031603
B. Y. Rubinstein and A. M. Leshansky

Self-organized nanopatterns in thin layers of superheated liquid metals *(5 pages)* 031604
E. L. Gurevich

Surface waves on non-Newtonian viscoelastic liquids *(12 pages)* 031605
Y. Ohmasa and M. Yao

Liquid crystals

Elastic constants and orientational viscosities of a bent-core nematic liquid crystal *(8 pages)* 031701
M. Majumdar, P. Salamon, A. Jákli, J. T. Gleeson, and S. Sprunt

Effect of *trans-cis* photoisomerization on phase equilibria and phase transition of liquid-crystalline azobenzene chromophore and its blends with reactive mesogenic diacrylate *(8 pages)* 031702
Namil Kim, Quan Li, and Thein Kyu

Polarization-gratings approach to deformed-helix ferroelectric liquid crystals with subwavelength pitch *(11 pages)* 031703
Alexei D. Kiselev, Eugene P. Pozhidaev, Vladimir G. Chigrinov, and Hoi-Sing Kwok

Textures in thin films of nematic liquid crystals induced by strongly focusing a circularly polarized laser *(6 pages)* 031704
K. Miyakawa, A. Yoshinaga, and D. Ariyoshi

Polymers

Density fluctuations of polymers in disordered media *(5 pages)* 031801
J. M. Deutsch and M. Olvera de la Cruz

Controlled manipulation of elastomers with radiation: Insights from multiquantum nuclear-magnetic-resonance data and mechanical measurements *(5 pages)* 031802
A. Maiti, T. Weisgraber, L. N. Dinh, R. H. Gee, T. Wilson, S. Chinn, and R. S. Maxwell

Size and shape of excluded volume polymers confined between parallel plates *(14 pages)* 031803
Debasish Chaudhuri and Bela Mulder

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 83, NUMBER 3 MARCH 2011

Biological physics

Dynamics of coupled repressilators: The role of mRNA kinetics and transcription cooperativity *(4 pages)* 031901
I. Potapov, E. Volkov, and A. Kuznetsov

Three-band decomposition analysis of wall shear stress in pulsatile flows *(10 pages)* 031902
A. Gizzi, M. Bernaschi, D. Bini, C. Cherubini, S. Filippi, S. Melchionna, and S. Succi

Secondary structure of double-stranded DNA under stretching: Elucidation of the stretched form *(6 pages)* 031903
M. Maaloum, A-F. Beker, and P. Muller

Coexistence and critical behavior in a lattice model of competing species *(10 pages)* 031904
Jacek Wendykier, Adam Lipowski, and António Luis Ferreira

DNA breathing dynamics: Analytic results for distribution functions of relevant Brownian functionals *(12 pages)* 031905
Malay Bandyopadhyay, Shamik Gupta, and Dvira Segal

Effects of dendritic load on the firing frequency of oscillating neurons *(15 pages)* 031906
Michael A. Schwemmer and Timothy J. Lewis

Coherent diffraction of a single virus particle: The impact of a water layer on the available orientational information *(5 pages)* 031907
F. Wang, E. Weckert, B. Ziaja, D. S. D. Larsson, and D. van der Spoel

High-level organization of isochores into gigantic superstructures in the human genome *(7 pages)* 031908
P. Carpena, J. L. Oliver, M. Hackenberg, A. V. Coronado, G. Barturen, and P. Bernaola-Galván

Oscillation propagation in neural networks with different topologies *(8 pages)* 031909
Yang Gao and Jianjun Wang

Polymorphism of highly cross-linked F-actin networks: Probing multiple length scales *(9 pages)* 031910
Lam T. Nguyen and Linda S. Hirst

Weakly sheared active suspensions: Hydrodynamics, stability, and rheology *(9 pages)* 031911
Zhenlu Cui

Energy and information in Hodgkin-Huxley neurons *(11 pages)* 031912
A. Moujahid, A. d'Anjou, F. J. Torrealdea, and F. Torrealdea

Complex and transitive synchronization in a frustrated system of calling frogs *(5 pages)* 031913
Ikkyu Aihara, Ryu Takeda, Takeshi Mizumoto, Takuma Otsuka, Toru Takahashi, Hiroshi G. Okuno, and Kazuyuki Aihara

Chemotactic predator-prey dynamics *(6 pages)* 031914
Ankush Sengupta, Tobias Kruppa, and Hartmut Löwen

Role of dissolved salts in thermophoresis of DNA: Lattice-Boltzmann-based simulations *(7 pages)* 031915
Audrey Hammack, Yeng-Long Chen, and Jennifer Kreft Pearce

Memristive model of electro-osmosis in skin *(5 pages)* 031916
G. K. Johnsen, C. A. Lütken, Ø. G. Martinsen, and S. Grimnes

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 83, NUMBER 3** **MARCH 2011**

Control of rare events in reaction and population systems by deterministically imposed transitions *(8 pages)* 031917
M. Khasin and M. I. Dykman

Collective behavior of brain tumor cells: The role of hypoxia *(6 pages)* 031920
Evgeniy Khain, Mark Katakowski, Scott Hopkins, Alexandra Szalad, Xuguang Zheng, Feng Jiang, and Michael Chopp

Three-dimensional vesicles under shear flow: Numerical study of dynamics and phase diagram *(10 pages)* 031921
Thierry Biben, Alexander Farutin, and Chaouqi Misbah

Vibrational dynamics of hydrogen in proteins *(9 pages)* 031922
Derya Vural and Henry R. Glyde

Driven transport on parallel lanes with particle exclusion and obstruction *(10 pages)* 031923
Anna Melbinger, Tobias Reichenbach, Thomas Franosch, and Erwin Frey

Temperature dependence of lysozyme hydration and the role of elastic energy *(8 pages)* 031924
Hai-Jing Wang, Alfred Kleinhammes, Pei Tang, Yan Xu, and Yue Wu

Self-consistent mean-field model for palmitoyloleoylphosphatidylcholine–palmitoyl sphingomyelin–cholesterol lipid bilayers *(14 pages)* 031925
Paul W. Tumaneng, Sagar A. Pandit, Guijun Zhao, and H. L. Scott

Intrinsic randomness of transport coefficient in subdiffusion with static disorder *(8 pages)* 031926
Tomoshige Miyaguchi and Takuma Akimoto

Riemannian geometric approach to human arm dynamics, movement optimization, and invariance *(11 pages)* 031927
Armin Biess, Tamar Flash, and Dario G. Liebermann

BRIEF REPORTS

Statistical physics

Criterion for explosive percolation transitions on complex networks *(3 pages)* 032101
Hans Hooyberghs and Bert Van Schaeybroeck

Boltzmann's H theorem for systems with frictional dissipation *(4 pages)* 032102
João P. S. Bizarro

Granular materials

High-speed imaging of traveling waves in a granular material during silo discharge *(4 pages)* 032301
Tamás Börzsönyi and Zsolt Kovács

Biological physics

Walking model with no energy cost *(4 pages)* 032901
Mario Gomes and Andy Ruina

COMMENTS

Comment on "Phase transition in a one-dimensional Ising ferromagnet at zero temperature using Glauber dynamics with a synchronous updating mode" *(2 pages)* 033101
Il Gu Yi and Beom Jun Kim
