THIRD SERIES, VOLUME 84, NUMBER 5 ***CONTENTS*** **NOVEMBER 2011**

PART 1: STATISTICAL, SOFT MATTER, AND BIOLOGICAL PHYSICS

RAPID COMMUNICATIONS

Statistical physics

Calculation of microcanonical entropy differences from configurational averages *(4 pages)* . . . . . 050101(R)
Sergio Davis

Discontinuous percolation transitions in real physical systems *(5 pages)* . . . . . 050102(R)
Y. S. Cho and B. Kahng

Granular materials

Observation of density segregation inside migrating dunes *(4 pages)* . . . . . 050301(R)
Christopher Groh, Ingo Rehberg, and Christof A. Kruelle

Densest columnar structures of hard spheres from sequential deposition *(4 pages)* . . . . . 050302(R)
Ho-Kei Chan

Structured and complex fluids

Mode-coupling theory predictions for the dynamical transitions of partly pinned fluid systems *(5 pages)* . . . . . 050501(R)
Vincent Krakoviack

Films, interfaces, and crystal growth

Far-from-equilibrium growth of thin films in a temperature gradient *(4 pages)* . . . . . 050601(R)
Julián Candia and Ezequiel V. Albano

Persistence in reactive-wetting interfaces *(4 pages)* . . . . . 050602(R)
Yael Efraim and Haim Taitelbaum

Biological physics

Transformation of an oblate-shaped vesicle induced by an adhering spherical particle *(4 pages)* . . . . . 050901(R)
Siqin Cao, Guanghong Wei, and Jeff Z. Y. Chen

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 84, NUMBER 5** **NOVEMBER 2011**

ARTICLES

Statistical physics

Quasiequilibrium directed hopping in a time-dependent two-well periodic potential *(12 pages)* 051101
V. M. Rozenbaum and I. V. Shapochkina

One-dimensional diffusion: Discrepancy between exact results and Monte Carlo calculations *(7 pages)* 051102
J. J. Torrez Herrera, G. A. Ranzuglia, S. J. Manzi, and V. D. Pereyra

Microscopic theory of the jamming transition of harmonic spheres *(27 pages)* 051103
Ludovic Berthier, Hugo Jacquin, and Francesco Zamponi

Ideal chains with fixed self-intersection rate *(5 pages)* 051104
Simone Franchini

Self-similarity of phase-space networks of frustrated spin models and lattice gas models *(8 pages)* 051105
Yi Peng, Feng Wang, Michael Wong, and Yilong Han

Equation of state from the Potts-percolation model of a solid *(9 pages)* 051106
Miron Kaufman and H. T. Diep

Fisher-information condition for enhanced signal detection via stochastic resonance *(5 pages)* 051107
Fabing Duan, François Chapeau-Blondeau, and Derek Abbott

Inertial Lévy flight *(10 pages)* 051108
Yan Lü and Jing-Dong Bao

Universal amplitude ratios for scaling corrections on Ising strips *(6 pages)* 051109
N. Sh. Izmailian

Geometrical expression of excess entropy production *(6 pages)* 051110
Takahiro Sagawa and Hisao Hayakawa

Efficient data compression from statistical physics of codes over finite fields *(7 pages)* 051111
A. Braunstein, F. Kayhan, and R. Zecchina

Derivation of exact master equation with stochastic description: Dissipative harmonic oscillator *(10 pages)* 051112
Haifeng Li, Jiushu Shao, and Shikuan Wang

Noise-controlled dynamics through the averaging principle for stochastic slow-fast systems *(8 pages)* 051113
Gilles Wainrib

Survival via cooperation in the prisoner's dilemma game *(6 pages)* 051114
Zhaojin Xu, Haizhao Zhi, and Lianzhong Zhang

Transport properties of a boundary-driven one-dimensional gas of spinless fermions *(8 pages)* 051115
Marko Žnidarič, Bojan Žunkovič, and Tomaž Prosen

Finite-size scaling in two-dimensional Ising spin-glass models *(8 pages)* 051116
Francesco Parisen Toldin, Andrea Pelissetto, and Ettore Vicari

Macroscopic constraints for the minimum entropy production principle *(9 pages)* 051117
Matteo Polettini

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 84, NUMBER 5** **NOVEMBER 2011**

Antipersistent dynamics in kinetic models of wealth exchange *(8 pages)* 051118
Sanchari Goswami, Arnab Chatterjee, and Parongama Sen

Avalanche distributions in the two-dimensional nonequilibrium zero-temperature random field Ising model *(14 pages)* 051119
Djordje Spasojević, Sanja Janićević, and Milan Knežević

Effective stochastic behavior in dynamical systems with incomplete information *(12 pages)* 051120
Michael A. Buice and Carson C. Chow

Exact solution of a stochastic protein dynamics model with delayed degradation *(7 pages)* 051121
L. F. Lafuerza and R. Toral

Carnot's theorem for nonthermal stationary reservoirs *(7 pages)* 051122
Simone De Liberato and Masahito Ueda

Non-Markovian diffusion over a potential barrier in the presence of periodic time modulation *(5 pages)* 051123
V. M. Kolomietz and S. V. Radionov

Classical open systems with nonlinear nonlocal dissipation and state-dependent diffusion: Dynamical responses and the Jarzynski equality *(11 pages)* 051124
Hideo Hasegawa

Tsallis distributions and $1/f$ noise from nonlinear stochastic differential equations *(7 pages)* 051125
J. Ruseckas and B. Kaulakys

Exact dynamical state of the exclusive queueing process with deterministic hopping *(8 pages)* 051127
Chikashi Arita and Andreas Schadschneider

Generalization of the Beck-Cohen superstatistics *(6 pages)* 051128
Denis Nikolaevich Sob'yanin

Interface-roughening phase diagram of the three-dimensional Ising model for all interaction anisotropies from hard-spin mean-field theory *(4 pages)* 051129
Tolga Çağlar and A. Nihat Berker

Thermodynamic theory of phase transitions in driven lattice gases *(4 pages)* 051130
Punyabrata Pradhan and Udo Seifert

Discrimination between two mechanisms of surface scattering in a single-mode waveguide *(4 pages)* 051131
M. Rendón, F. M. Izrailev, and N. M. Makarov

Critical behavior of the Ising model on random fractals *(10 pages)* 051132
Pascal Monceau

Block voter model: Phase diagram and critical behavior *(5 pages)* 051133
C. I. N. Sampaio-Filho and F. G. B. Moreira

Thermodynamics of a stochastic twin elevator *(9 pages)* 051134
Niraj Kumar, Christian Van den Broeck, Massimiliano Esposito, and Katja Lindenberg

Voronoi cell patterns: Theoretical model and applications *(10 pages)* 051135
Diego Luis González and T. L. Einstein

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 84, NUMBER 5** **NOVEMBER 2011**

Long-range steady-state density profiles induced by localized drive *(4 pages)* 051136
Tridib Sadhu, Satya N. Majumdar, and David Mukamel

Active Brownian motion in threshold distribution of a Coulomb blockade model *(5 pages)* 051137
Takayuki Narumi, Masaru Suzuki, Yoshiki Hidaka, Tetsuya Asai, and Shoichi Kai

Anomalous diffusion: Testing ergodicity breaking in experimental data *(5 pages)* 051138
Marcin Magdziarz and Aleksander Weron

Parrondo-like behavior in continuous-time random walks with memory *(7 pages)* 051139
Miquel Montero

Equilibrium and linear transport properties of fluids

Heat can cool near-critical fluids *(8 pages)* 051201
Daniel Beysens, Thomas Fröhlich, and Yves Garrabos

Collective acoustic modes in liquids: A comparison between the generalized-hydrodynamics and memory-function approaches *(6 pages)* 051202
F. Aliotta, J. Gapiński, M. Pochylski, R. C. Ponterio, F. Saija, and C. Vasi

Statics and dynamics of inhomogeneous liquids via the internal-energy functional *(8 pages)* 051203
Matthias Schmidt

Anomalous change in the dynamics of a supercritical fluid *(5 pages)* 051204
Sungho Han

Granular materials

Equation for the force experienced by a wall overflowed by a granular avalanche: Experimental verification *(7 pages)* 051301
Thierry Faug, Paolo Caccamo, and Benoit Chanut

Lift and drag forces on an inclined plow moving over a granular surface *(7 pages)* 051302
Baptiste Percier, Sebastien Manneville, Jim N. McElwaine, Stephen W. Morris, and Nicolas Taberlet

Correlations and critical behavior of the q model *(6 pages)* 051303
Alexander St. John and Harsh Mathur

Quasistatic to inertial transition in granular materials and the role of fluctuations *(8 pages)* 051304
Johan Gaume, Guillaume Chambon, and Mohamed Naaim

Diffusive transport of light in two-dimensional granular materials *(8 pages)* 051305
Zeinab Sadjadi and MirFaez Miri

Phase transitions in vibrated granular systems in microgravity *(5 pages)* 051306
E. Opsomer, F. Ludewig, and N. Vandewalle

Colloidal dispersions, suspensions, and aggregates

Charged colloids in an aqueous mixture with a salt *(19 pages)* 051401
Ryuichi Okamoto and Akira Onuki

Theoretical calculation of the phase behavior of colloidal membranes *(10 pages)* 051402
Yasheng Yang and Michael F. Hagan

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 84, NUMBER 5** **NOVEMBER 2011**

Enhanced transmission with tunable Fano-like profile in magnetic nanofluids *(7 pages)* 051403
Junaid M. Laskar, Baldev Raj, and John Philip

Reentrant transition in the shear viscosity of dilute rigid-rod dispersions *(9 pages)* 051404
Hideki Kobayashi and Ryoichi Yamamoto

Rotational Fourier tracking of diffusing polygons *(5 pages)* 051405
Kenny Mayoral, Terry P. Kennair, Xiaoming Zhu, James Milazzo, Kathy Ngo, Michael M. Fryd, and Thomas G. Mason

Structured and complex fluids

Friction contribution to water-bond breakage kinetics *(10 pages)* 051501
Yann von Hansen, Felix Sedlmeier, Michael Hinczewski, and Roland R. Netz

Yielding and structural relaxation in soft materials: Evaluation of strain-rate frequency superposition data by the stress decomposition method *(8 pages)* 051502
Andreas Hess and Nuri Aksel

Polymorphism, thermodynamic anomalies, and network formation in an atomistic model with two internal states *(7 pages)* 051503
Chandana Mondal and Surajit Sengupta

Diffuse-charge dynamics of ionic liquids in electrochemical systems *(10 pages)* 051504
Hui Zhao

Density and concentration field description of nonperiodic structures *(15 pages)* 051505
Andreas M. Menzel

Transport coefficients in silicate melts from structural data via a structure-thermodynamics-dynamics relationship *(5 pages)* 051506
Gaurav Goel, Daniel J. Lacks, and James A. Van Orman

Molecular dynamics and crystallization phenomenon of supercooled and glassy DNA and RNA nucleosides: β-adenosine, β-thymidine, and β-uridine *(15 pages)* 051507
K. Adrjanowicz, Z. Wojnarowska, K. Grzybowska, L. Hawelek, K. Kaminski, M. Paluch, A. Kasprzycka, and K. Walczak

Simulation study of the polarizable Stockmayer fluid in an external field *(8 pages)* 051508
Ran Jia and Reinhard Hentschke

Films, interfaces, and crystal growth

Simulation study of anisotropic random sequential adsorption of extended objects on a triangular lattice *(9 pages)* 051601
Lj. Budinski-Petković, I. Lončarević, Z. M. Jakšić, S. B. Vrhovac, and N. M. Švrakić

Fingering in a channel and tripolar Loewner evolutions *(10 pages)* 051602
Miguel A. Durán and Giovani L. Vasconcelos

Effect of noise on ordering of hexagonal grains in a phase-field-crystal model *(5 pages)* 051603
H. Ohnogi and Y. Shiwa

Modeling kinetics of diffusion-controlled surface wrinkles *(9 pages)* 051604
Yong Ni, Linghui He, and Qihan Liu

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 84, NUMBER 5 NOVEMBER 2011

Stable growth mechanisms of ice disk crystals in heavy water *(9 pages)* 051605
Satoshi Adachi, Izumi Yoshizaki, Takehiko Ishikawa, Etsuro Yokoyama, Yoshinori Furukawa, and Taro Shimaoka

Liquid crystals

Surface gliding of the easy axis of a polymer-stabilized nematic liquid crystal and its dependence on the constituent monomers *(6 pages)* 051701
Ji-Hoon Lee and Tae-Hoon Yoon

Nematic disclinations as twisted ribbons *(7 pages)* 051702
Simon Čopar, Tine Porenta, and Slobodan Žumer

Surface-aligning field in smectic liquid-crystal films *(4 pages)* 051703
LiDong Pan and C. C. Huang

Molecular theory of smectic ordering in liquid crystals with nanoscale segregation of different molecular fragments *(13 pages)* 051704
M. V. Gorkunov, M. A. Osipov, N. Kapernaum, D. Nonnenmacher, and F. Giesselmann

Polymers

Tube-width fluctuations of entangled stiff polymers *(7 pages)* 051801
Jens Glaser and Klaus Kroy

Charge carrier dynamics and relaxation in (polyethylene oxide–lithium-salt)-based polymer electrolyte containing 1-butyl-1-methylpyrrolidinium bis(trifluoromethylsulfonyl)imide as ionic liquid *(9 pages)* 051802
A. Karmakar and A. Ghosh

Measurement of the skin layer in the drying process of a polymer solution *(9 pages)* 051803
Yuji Shimokawa, Tadashi Kajiya, Keiji Sakai, and Masao Doi

Numerical simulation methods for the Rouse model in flow *(13 pages)* 051804
Michael P. Howard and Scott T. Milner

Simulating flexible polymers in a potential of randomly distributed hard disks *(8 pages)* 051805
Sebastian Schöbl, Johannes Zierenberg, and Wolfhard Janke

Biological physics

Switching between phenotypes and population extinction *(11 pages)* 051901
Ingo Lohmar and Baruch Meerson

Membrane potential and spike train statistics depend distinctly on input statistics *(10 pages)* 051902
Robert Rosenbaum and Krešimir Josić

Comprehensive analysis of compositional interface fluctuations in planar lipid bilayer membranes *(12 pages)* 051903
Tao Han and Mikko Haataja

Logistic map analysis of biomolecular network evolution *(7 pages)* 051904
R. R. Stein and H. Isambert

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 84, NUMBER 5** **NOVEMBER 2011**

Charge transport in DNA: Dependence of diffusion coefficient on temperature and electron-phonon coupling constant *(6 pages)* 051905
G. Kalosakas

Computer simulation of cytoskeleton-induced blebbing in lipid membranes *(5 pages)* 051906
Eric J. Spangler, Cameron W. Harvey, Joel D. Revalee, P. B. Sunil Kumar, and Mohamed Laradji

Entropic attraction of adhesion bonds toward cell boundaries *(6 pages)* 051907
Noam Weil and Oded Farago

Beyond the edge of chaos: Amplification and temporal integration by recurrent networks in the chaotic regime *(8 pages)* 051908
T. Toyoizumi and L. F. Abbott

Reconstruction of physiological instructions from Zebra finch song *(8 pages)* 051909
Yonatan Sanz Perl, Ezequiel M. Arneodo, Ana Amador, Franz Goller, and Gabriel B. Mindlin

Looped star polymers show conformational transition from spherical to flat toroidal shapes *(5 pages)* 051910
Pascal Reiss, Miriam Fritsche, and Dieter W. Heermann

Target search on a dynamic DNA molecule *(6 pages)* 051911
Thomas Schötz, Richard A. Neher, and Ulrich Gerland

Quantum nonequilibrium approach for fast electron transport in open systems: Photosynthetic reaction centers *(6 pages)* 051912
M. Pudlak, K. N. Pichugin, R. G. Nazmitdinov, and R. Pincak

Analyzing inflammatory response as excitable media *(8 pages)* 051913
Pernille Yde, Mogens Høgh Jensen, and Ala Trusina

Mechanical surface tension governs membrane thermal fluctuations *(6 pages)* 051914
Oded Farago

Angularly selective mesoscopic tomography *(9 pages)* 051915
Vadim Y. Soloviev, Andrea Bassi, Luca Fieramonti, Gianluca Valentini, Cosimo D'Andrea, and Simon R. Arridge

Corepressive interaction and clustering of degrade-and-fire oscillators *(10 pages)* 051916
Bastien Fernandez and Lev S. Tsimring

Nonequilibrium phase transitions in biomolecular signal transduction *(19 pages)* 051917
Eric Smith, Supriya Krishnamurthy, Walter Fontana, and David Krakauer

Calculation of complex DNA damage induced by ions *(7 pages)* 051918
Eugene Surdutovich, David C. Gallagher, and Andrey V. Solov'yov

Stochastic oscillations in models of epidemics on a network of cities *(12 pages)* 051919
G. Rozhnova, A. Nunes, and A. J. McKane

Model of the initiation of signal transduction by ligands in a cell culture: Simulation of molecules near a plane membrane comprising receptors *(13 pages)* 051920
Ianik Plante and Francis A. Cucinotta

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 84, NUMBER 5** **NOVEMBER 2011**

Evolutionary and population dynamics: A coupled approach *(11 pages)* 051921
Jonas Cremer, Anna Melbinger, and Erwin Frey

Effects of cholesterol on pore formation in lipid bilayers induced by human islet amyloid polypeptide fragments: A coarse-grained molecular dynamics study *(8 pages)* 051922
Weixin Xu, Guanghong Wei, Haibin Su, Lars Nordenskiöld, and Yuguang Mu

Synchronization in a noise-driven developing neural network *(8 pages)* 051923
I.-H. Lin, R.-K. Wu, and C.-M. Chen

BRIEF REPORTS

Structured and complex fluids

Fragility versus activation volume: Insight into molecular dynamics of glass-forming hydrogen-bonded liquids *(5 pages)* 052501
Marian Paluch, Sebastian Pawlus, Andrzej Grzybowski, Katarzyna Grzybowska, Patryk Włodarczyk, and Jerzy Zioło

Biological physics

Role of axonal sodium-channel band in neuronal excitability *(4 pages)* 052901
Longfei Wang, Hengtong Wang, Lianchun Yu, and Yong Chen
