PHYSICAL REVIEW E

THIRD SERIES, VOLUME 84, NUMBER 5

NOVEMBER 2011

Evolutionary and population dynamics: A coupled approach (<i>11 pages</i>)	051921
Jonas Cremer, Anna Melbinger, and Erwin Frey	
Effects of cholesterol on pore formation in lipid bilayers induced by human islet amyloid polypeptide fragments: A coarse-grained molecular dynamics study (<i>8 pages</i>)	051922
Weixin Xu, Guanghong Wei, Haibin Su, Lars Nordenskiöld, and Yuguang Mu	
Synchronization in a noise-driven developing neural network (<i>8 pages</i>)	051923
I.-H. Lin, R.-K. Wu, and C.-M. Chen	

BRIEF REPORTS

Structured and complex fluids

Fragility versus activation volume: Insight into molecular dynamics of glass-forming hydrogen-bonded liquids (<i>5 pages</i>)	052501
Marian Paluch, Sebastian Pawlus, Andrzej Grzybowski, Katarzyna Grzybowska, Patrik Włodarczyk, and Jerzy Ziolo	

Biological physics

Role of axonal sodium-channel band in neuronal excitability (<i>4 pages</i>)	052901
Longfei Wang, Hengtong Wang, Lianchun Yu, and Yong Chen

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 84, NUMBER 5

NOVEMBER 2011

Charge transport in DNA: Dependence of diffusion coefficient on temperature and electron-phonon coupling constant (<i>6 pages</i>)	051905
G. Kalosakas	
Computer simulation of cytoskeleton-induced blebbing in lipid membranes (<i>5 pages</i>)	051906
Eric J. Spangler, Cameron W. Harvey, Joel D. Revalee, P. B. Sunil Kumar, and Mohamed Laradji	
Entropic attraction of adhesion bonds toward cell boundaries (<i>6 pages</i>)	051907
Noam Weil and Oded Farago	
Beyond the edge of chaos: Amplification and temporal integration by recurrent networks in the chaotic regime (<i>8 pages</i>)	051908
T. Toyozumi and L. F. Abbott	
Reconstruction of physiological instructions from Zebra finch song (<i>8 pages</i>)	051909
Yonatan Sanz Perl, Ezequiel M. Arneodo, Ana Amador, Franz Goller, and Gabriel B. Mindlin	
Looped star polymers show conformational transition from spherical to flat toroidal shapes (<i>5 pages</i>)	051910
Pascal Reiss, Miriam Fritsche, and Dieter W. Heermann	
Target search on a dynamic DNA molecule (<i>6 pages</i>)	051911
Thomas Schötz, Richard A. Neher, and Ulrich Gerland	
Quantum nonequilibrium approach for fast electron transport in open systems: Photosynthetic reaction centers (<i>6 pages</i>)	051912
M. Pudlak, K. N. Pichugin, R. G. Nazmitdinov, and R. Pincak	
Analyzing inflammatory response as excitable media (<i>8 pages</i>)	051913
Pernille Yde, Mogens Høgh Jensen, and Ala Trusina	
Mechanical surface tension governs membrane thermal fluctuations (<i>6 pages</i>)	051914
Oded Farago	
Angularly selective mesoscopic tomography (<i>9 pages</i>)	051915
Vadim Y. Soloviev, Andrea Bassi, Luca Fieramonti, Gianluca Valentini, Cosimo D'Andrea, and Simon R. Arridge	
Corepressive interaction and clustering of degrade-and-fire oscillators (<i>10 pages</i>)	051916
Bastien Fernandez and Lev S. Tsimring	
Nonequilibrium phase transitions in biomolecular signal transduction (<i>19 pages</i>)	051917
Eric Smith, Supriya Krishnamurthy, Walter Fontana, and David Krakauer	
Calculation of complex DNA damage induced by ions (<i>7 pages</i>)	051918
Eugene Surdutovich, David C. Gallagher, and Andrey V. Solov'yov	
Stochastic oscillations in models of epidemics on a network of cities (<i>12 pages</i>)	051919
G. Rozhnova, A. Nunes, and A. J. McKane	
Model of the initiation of signal transduction by ligands in a cell culture: Simulation of molecules near a plane membrane comprising receptors (<i>13 pages</i>)	051920
Ianik Plante and Francis A. Cucinotta	

(Continued)

Stable growth mechanisms of ice disk crystals in heavy water (<i>9 pages</i>)	051605
Satoshi Adachi, Izumi Yoshizaki, Takehiko Ishikawa, Etsuro Yokoyama, Yoshinori Furukawa, and Taro Shimaoka	
Liquid crystals	
Surface gliding of the easy axis of a polymer-stabilized nematic liquid crystal and its dependence on the constituent monomers (<i>6 pages</i>)	051701
Ji-Hoon Lee and Tae-Hoon Yoon	
Nematic disclinations as twisted ribbons (<i>7 pages</i>)	051702
Simon Čopar, Tine Porenta, and Slobodan Žumer	
Surface-aligning field in smectic liquid-crystal films (<i>4 pages</i>)	051703
LiDong Pan and C. C. Huang	
Molecular theory of smectic ordering in liquid crystals with nanoscale segregation of different molecular fragments (<i>13 pages</i>)	051704
M. V. Gorkunov, M. A. Osipov, N. Kapernaum, D. Nonnenmacher, and F. Giesselmann	
Polymers	
Tube-width fluctuations of entangled stiff polymers (<i>7 pages</i>)	051801
Jens Glaser and Klaus Kroy	
Charge carrier dynamics and relaxation in (polyethylene oxide–lithium-salt)-based polymer electrolyte containing 1-butyl-1-methylpyrrolidinium bis(trifluoromethylsulfonyl)imide as ionic liquid (<i>9 pages</i>)	051802
A. Karmakar and A. Ghosh	
Measurement of the skin layer in the drying process of a polymer solution (<i>9 pages</i>)	051803
Yuji Shimokawa, Tadashi Kajiya, Keiji Sakai, and Masao Doi	
Numerical simulation methods for the Rouse model in flow (<i>13 pages</i>)	051804
Michael P. Howard and Scott T. Milner	
Simulating flexible polymers in a potential of randomly distributed hard disks (<i>8 pages</i>)	051805
Sebastian Schöbl, Johannes Zierenberg, and Wolfhard Janke	
Biological physics	
Switching between phenotypes and population extinction (<i>11 pages</i>)	051901
Ingo Lohmar and Baruch Meerson	
Membrane potential and spike train statistics depend distinctly on input statistics (<i>10 pages</i>)	051902
Robert Rosenbaum and Krešimir Josić	
Comprehensive analysis of compositional interface fluctuations in planar lipid bilayer membranes (<i>12 pages</i>)	051903
Tao Han and Mikko Haataja	
Logistic map analysis of biomolecular network evolution (<i>7 pages</i>)	051904
R. R. Stein and H. Isambert

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 84, NUMBER 5

NOVEMBER 2011

Enhanced transmission with tunable Fano-like profile in magnetic nanofluids (7 pages)	051403
Junaid M. Laskar, Baldev Raj, and John Philip	
Reentrant transition in the shear viscosity of dilute rigid-rod dispersions (9 pages)	051404
Hideki Kobayashi and Ryoichi Yamamoto	
Rotational Fourier tracking of diffusing polygons (5 pages)	051405
Kenny Mayoral, Terry P. Kennair, Xiaoming Zhu, James Milazzo, Kathy Ngo, Michael M. Fryd, and Thomas G. Mason	
Structured and complex fluids	
Friction contribution to water-bond breakage kinetics (10 pages)	051501
Yann von Hansen, Felix Sedlmeier, Michael Hinczewski, and Roland R. Netz	
Yielding and structural relaxation in soft materials: Evaluation of strain-rate frequency superposition data by the stress decomposition method (8 pages)	051502
Andreas Hess and Nuri Aksel	
Polymorphism, thermodynamic anomalies, and network formation in an atomistic model with two internal states (7 pages)	051503
Chandana Mondal and Surajit Sengupta	
Diffuse-charge dynamics of ionic liquids in electrochemical systems (10 pages)	051504
Hui Zhao	
Density and concentration field description of nonperiodic structures (15 pages)	051505
Andreas M. Menzel	
Transport coefficients in silicate melts from structural data via a structure-thermodynamics-dynamics relationship (5 pages)	051506
Gaurav Goel, Daniel J. Lacks, and James A. Van Orman	
Molecular dynamics and crystallization phenomenon of supercooled and glassy DNA and RNA nucleosides: β -adenosine, β -thymidine, and β -uridine (15 pages)	051507
K. Adrjanowicz, Z. Wojnarowska, K. Grzybowska, L. Hawelek, K. Kaminski, M. Paluch, A. Kasprzycka, and K. Walczak	
Simulation study of the polarizable Stockmayer fluid in an external field (8 pages)	051508
Ran Jia and Reinhard Hentschke	
Films, interfaces, and crystal growth	
Simulation study of anisotropic random sequential adsorption of extended objects on a triangular lattice (9 pages)	051601
Lj. Budinski-Petković, I. Lončarević, Z. M. Jakšić, S. B. Vrhovac, and N. M. Švrakić	
Fingering in a channel and tripolar Loewner evolutions (10 pages)	051602
Miguel A. Durán and Giovani L. Vasconcelos	
Effect of noise on ordering of hexagonal grains in a phase-field-crystal model (5 pages)	051603
H. Ohnogi and Y. Shiwa	
Modeling kinetics of diffusion-controlled surface wrinkles (9 pages)	051604
Yong Ni, Linghui He, and Qihan Liu

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 84, NUMBER 5

NOVEMBER 2011

Long-range steady-state density profiles induced by localized drive (<i>4 pages</i>)	051136
Tridib Sadhu, Satya N. Majumdar, and David Mukamel	
Active Brownian motion in threshold distribution of a Coulomb blockade model (<i>5 pages</i>)	051137
Takayuki Narumi, Masaru Suzuki, Yoshiki Hidaka, Tetsuya Asai, and Shoichi Kai	
Anomalous diffusion: Testing ergodicity breaking in experimental data (<i>5 pages</i>)	051138
Marcin Magdziarz and Aleksander Weron	
Parrondo-like behavior in continuous-time random walks with memory (<i>7 pages</i>)	051139
Miquel Montero	
Equilibrium and linear transport properties of fluids	
Heat can cool near-critical fluids (<i>8 pages</i>)	051201
Daniel Beysens, Thomas Fröhlich, and Yves Garrabos	
Collective acoustic modes in liquids: A comparison between the generalized-hydrodynamics and memory-function approaches (<i>6 pages</i>)	051202
F. Aliotta, J. Gapiński, M. Pochylski, R. C. Ponterio, F. Saija, and C. Vasi	
Statics and dynamics of inhomogeneous liquids via the internal-energy functional (<i>8 pages</i>)	051203
Matthias Schmidt	
Anomalous change in the dynamics of a supercritical fluid (<i>5 pages</i>)	051204
Sungho Han	
Granular materials	
Equation for the force experienced by a wall overflowed by a granular avalanche: Experimental verification (<i>7 pages</i>)	051301
Thierry Faug, Paolo Caccamo, and Benoit Chanut	
Lift and drag forces on an inclined plow moving over a granular surface (<i>7 pages</i>)	051302
Baptiste Percier, Sebastien Manneville, Jim N. McElwaine, Stephen W. Morris, and Nicolas Taberlet	
Correlations and critical behavior of the q model (<i>6 pages</i>)	051303
Alexander St. John and Harsh Mathur	
Quasistatic to inertial transition in granular materials and the role of fluctuations (<i>8 pages</i>)	051304
Johan Gaume, Guillaume Chambon, and Mohamed Naaim	
Diffusive transport of light in two-dimensional granular materials (<i>8 pages</i>)	051305
Zeinab Sadjadi and MirFaez Miri	
Phase transitions in vibrated granular systems in microgravity (<i>5 pages</i>)	051306
E. Opsomer, F. Ludewig, and N. Vandewalle	
Colloidal dispersions, suspensions, and aggregates	
Charged colloids in an aqueous mixture with a salt (<i>19 pages</i>)	051401
Ryuichi Okamoto and Akira Onuki	
Theoretical calculation of the phase behavior of colloidal membranes (<i>10 pages</i>)	051402
Yasheng Yang and Michael F. Hagan

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 84, NUMBER 5

NOVEMBER 2011

Antipersistent dynamics in kinetic models of wealth exchange (<i>8 pages</i>)	051118
Sanchari Goswami, Arnab Chatterjee, and Parongama Sen	
Avalanche distributions in the two-dimensional nonequilibrium zero-temperature random field Ising model (<i>14 pages</i>)	051119
Djordje Spasojević, Sanja Janićević, and Milan Knežević	
Effective stochastic behavior in dynamical systems with incomplete information (<i>12 pages</i>)	051120
Michael A. Buice and Carson C. Chow	
Exact solution of a stochastic protein dynamics model with delayed degradation (<i>7 pages</i>)	051121
L. F. Lafuerza and R. Toral	
Carnot's theorem for nonthermal stationary reservoirs (<i>7 pages</i>)	051122
Simone De Liberato and Masahito Ueda	
Non-Markovian diffusion over a potential barrier in the presence of periodic time modulation (<i>5 pages</i>)	051123
V. M. Kolomietz and S. V. Radionov	
Classical open systems with nonlinear nonlocal dissipation and state-dependent diffusion: Dynamical responses and the Jarzynski equality (<i>11 pages</i>)	051124
Hideo Hasegawa	
Tsallis distributions and $1/f$ noise from nonlinear stochastic differential equations (<i>7 pages</i>)	051125
J. Ruseckas and B. Kaulakys	
Exact dynamical state of the exclusive queueing process with deterministic hopping (<i>8 pages</i>)	051127
Chikashi Arita and Andreas Schadschneider	
Generalization of the Beck-Cohen superstatistics (<i>6 pages</i>)	051128
Denis Nikolaevich Sob'yanin	
Interface-roughening phase diagram of the three-dimensional Ising model for all interaction anisotropies from hard-spin mean-field theory (<i>4 pages</i>)	051129
Tolga Çağlar and A. Nihat Berker	
Thermodynamic theory of phase transitions in driven lattice gases (<i>4 pages</i>)	051130
Punyabrata Pradhan and Udo Seifert	
Discrimination between two mechanisms of surface scattering in a single-mode waveguide (<i>4 pages</i>)	051131
M. Rendón, F. M. Izrailev, and N. M. Makarov	
Critical behavior of the Ising model on random fractals (<i>10 pages</i>)	051132
Pascal Monceau	
Block voter model: Phase diagram and critical behavior (<i>5 pages</i>)	051133
C. I. N. Sampaio-Filho and F. G. B. Moreira	
Thermodynamics of a stochastic twin elevator (<i>9 pages</i>)	051134
Niraj Kumar, Christian Van den Broeck, Massimiliano Esposito, and Katja Lindenberg	
Voronoi cell patterns: Theoretical model and applications (<i>10 pages</i>)	051135
Diego Luis González and T. L. Einstein
