

PART 1: STATISTICAL, SOFT MATTER, AND BIOLOGICAL PHYSICS

RAPID COMMUNICATIONS

Statistical physics

- Geometric microcanonical thermodynamics for systems with first integrals (*4 pages*) 050101(R)
Roberto Franzosi
- Quantum quenches in disordered systems: Approach to thermal equilibrium without a typical relaxation time (*5 pages*) 050102(R)
Ehsan Khatami, Marcos Rigol, Armando Relaño, and Antonio M. García-García
- Upper critical dimension of the Kardar-Parisi-Zhang equation (*4 pages*) 050103(R)
Moshe Schwartz and Ehud Perlsman
- Normal and anomalous diffusion in random potential landscapes (*4 pages*) 050104(R)
F. Camboni and I. M. Sokolov
- Validity of projected Gross-Pitaevskii simulation: Comparison with quantum Monte Carlo (*4 pages*) 050105(R)
Toshihiro Sato, Yasuyuki Kato, Takafumi Suzuki, and Naoki Kawashima

Structured and complex fluids

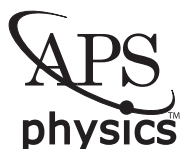

- Nonlinear elastic model for faceting of vesicles with soft grain boundaries (*4 pages*) 050501(R)
Rastko Sknepnek and Monica Olvera de la Cruz

Films, interfaces, and crystal growth

- Dimensional crossover in fluids under nanometer-scale confinement (*5 pages*) 050601(R)
Amit Das and J. Chakrabarti
- Nucleation and growth of droplets in vapor-liquid transitions (*4 pages*) 050602(R)
Sutapa Roy and Subir K. Das

Liquid crystals

- Conformal smectics and their many metrics (*4 pages*) 050701(R)
Gareth P. Alexander, Randall D. Kamien, and Ricardo A. Mosna

ARTICLES

Statistical physics

Persistence of a Brownian particle in a time-dependent potential (<i>7 pages</i>)	051101
D. Chakraborty	
Escape rate for a quantum particle moving in a time-periodic rapidly oscillating potential: A time-independent approach (<i>9 pages</i>)	051102
Anindita Shit, Sudip Chattopadhyay, and Jyotipratim Ray Chaudhuri	
Correlated continuous-time random walks in external force fields (<i>5 pages</i>)	051103
Marcin Magdziarz, Ralf Metzler, Wladyslaw Szczotka, and Piotr Zebrowski	
Avalanche frontiers in the dissipative Abelian sandpile model and off-critical Schramm-Loewner evolution (<i>8 pages</i>)	051104
M. N. Najafi, Saman Moghimi-Araghi, and S. Rouhani	
Kinetic equations governing Smoluchowski dynamics in equilibrium (<i>15 pages</i>)	051105
Gene F. Mazenko, David D. McCowan, and Paul Spyridis	
Flaw strength distributions and statistical parameters for ceramic fibers: The normal distribution (<i>6 pages</i>)	051106
M. R'Mili, N. Godin, and J. Lamon	
Work fluctuations for Bose particles in grand canonical initial states (<i>8 pages</i>)	051107
Juyeon Yi, Yong Woon Kim, and Peter Talkner	
Phase transition in the Jarzynski estimator of free energy differences (<i>13 pages</i>)	051108
Alberto Suárez, Robert Silbey, and Irwin Oppenheim	
Conditional pair distributions in many-body systems: Exact results for Poisson ensembles (<i>13 pages</i>)	051109
René D. Rohrmann and Ernesto Zurbriggen	
Directed transport of confined Brownian particles with torque (<i>4 pages</i>)	051110
Paul K. Radtke and Lutz Schimansky-Geier	
Interfacial territory covered by surface-mediated diffusion (<i>5 pages</i>)	051111
T. Calandre, O. Bénichou, D. S. Grebenkov, and R. Voituriez	
Quantum annealing with antiferromagnetic fluctuations (<i>8 pages</i>)	051112
Yuya Seki and Hidetoshi Nishimori	
Entropy production in full phase space for continuous stochastic dynamics (<i>19 pages</i>)	051113
Richard E. Spinney and Ian J. Ford	
Short time cycles of purely quantum refrigerators (<i>12 pages</i>)	051114
Tova Feldmann and Ronnie Kosloff	
Work relation and the second law of thermodynamics in nonequilibrium steady states (<i>5 pages</i>)	051115
Naoko Nakagawa	
Onset of synchronization in complex networks of noisy oscillators (<i>11 pages</i>)	051116
Bernard Sonnenschein and Lutz Schimansky-Geier

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 85, NUMBER 5

MAY 2012

 Virtual qubits, virtual temperatures, and the foundations of thermodynamics (<i>14 pages</i>)	051117
Nicolas Brunner, Noah Linden, Sandu Popescu, and Paul Skrzypczyk	
Explosive percolation on the Bethe lattice (<i>4 pages</i>)	051118
Huiseung Chae, Soon-Hyung Yook, and Yup Kim	
Dynamical scaling behavior of the one-dimensional conserved directed-percolation universality class (<i>6 pages</i>)	051119
Sungchul Kwon and Yup Kim	
Strongly anisotropic nonequilibrium phase transition in Ising models with friction (<i>8 pages</i>)	051120
Sebastian Angst, Alfred Hucht, and Dietrich E. Wolf	
Behavior of a single element in a finite stochastic array (<i>8 pages</i>)	051121
José Gómez-Ordóñez, José M. Casado, and Manuel Morillo	
Phase transitions in trajectories of a superconducting single-electron transistor coupled to a resonator (<i>12 pages</i>)	051122
Sam Genway, Juan P. Garrahan, Igor Lesanovsky, and Andrew D. Armour	
Nonequilibrium phase transitions and stationary-state solutions of a three-dimensional random-field Ising model under a time-dependent periodic external field (<i>9 pages</i>)	051123
Yusuf Yüksel, Erol Vatansever, Ümit Akıncı, and Hamza Polat	
Superaging correlation function and ergodicity breaking for Brownian motion in logarithmic potentials (<i>14 pages</i>)	051124
A. Dechant, E. Lutz, D. A. Kessler, and E. Barkai	
Temporal disorder in up-down symmetric systems (<i>10 pages</i>)	051125
Ricardo Martínez-García, Federico Vazquez, Cristóbal López, and Miguel A. Muñoz	
Scaling exponents for a monkey on a tree: Fractal dimensions of randomly branched polymers (<i>15 pages</i>)	051126
Hans-Karl Janssen and Olaf Stenull	
Statistical description of the collective motion of nanoparticles (<i>6 pages</i>)	051127
O. V. Yushchenko and A. Yu. Badalyan	
Upper transition point for percolation on the enhanced binary tree: A sharpened lower bound (<i>5 pages</i>)	051128
Seung Ki Baek	
Wigner separability entropy and complexity of quantum dynamics (<i>6 pages</i>)	051129
Giuliano Benenti, Gabriel G. Carlo, and Tomaž Prosen	
Resonant response in nonequilibrium steady states (<i>8 pages</i>)	051130
R. Salgado-García	
Fractional Brownian motors and stochastic resonance (<i>6 pages</i>)	051131
Igor Goychuk and Vasyl Kharchenko	
Transition by breaking of analyticity in the ground state of Josephson junction arrays as a static signature of the vortex jamming transition (<i>5 pages</i>)	051132
Tomoaki Nogawa, Hajime Yoshino, and Bongsoo Kim	
Information metric from a linear sigma model (<i>4 pages</i>)	051133
U. Miyamoto and S. Yahikozawa

THIRD SERIES, VOLUME 85, NUMBER 5

MAY 2012

Detection of diffusion anisotropy due to particle asymmetry from single-particle tracking of Brownian motion by the large-deviation principle (<i>9 pages</i>)	051134
Itsuo Hanasaki and Yoshitada Isono	
Two-dimensional XXZ-Ising model with quartic interactions (<i>7 pages</i>)	051135
J. S. Valverde	
Predictability of the coherent-noise model and its applications (<i>8 pages</i>)	051136
N. V. Sarlis and S.-R. G. Christopoulos	
Surface-directed spinodal decomposition: A molecular dynamics study (<i>9 pages</i>)	051137
Prabhat K. Jaiswal, Sanjay Puri, and Subir K. Das	
Scaling theory for the quasideterministic limit of continuous bifurcations (<i>10 pages</i>)	051138
David A. Kessler and Nadav M. Shnerb	
Estimation of the entropy based on its polynomial representation (<i>9 pages</i>)	051139
Martin Vinck, Francesco P. Battaglia, Vladimir B. Balakirsky, A. J. Han Vinck, and Cyriel M. A. Pennartz	
Microstructural degeneracy associated with a two-point correlation function and its information content (<i>16 pages</i>)	051140
C. J. Gommès, Y. Jiao, and S. Torquato	
Crossing on hyperbolic lattices (<i>6 pages</i>)	051141
Hang Gu and Robert M. Ziff	
Full-counting statistics of heat transport in harmonic junctions: Transient, steady states, and fluctuation theorems (<i>19 pages</i>)	051142
Bijay Kumar Agarwalla, Baowen Li, and Jian-Sheng Wang	
Equilibrium and linear transport properties of fluids	
Widom line and noise-power spectral analysis of a supercritical fluid (<i>10 pages</i>)	051201
Sungho Han and Clare C. Yu	
Nanoscale simple-fluid behavior under steady shear (<i>10 pages</i>)	051202
Xin Yong and Lucy T. Zhang	
Structure and phase behavior of two-Yukawa fluids with competing interactions in planar slit pores (<i>9 pages</i>)	051203
Eun-Young Kim, Soon-Chul Kim, and Soong-Hyuck Suh	
Nonexponential relaxation in a simple liquid metal (<i>5 pages</i>)	051204
F. Demmel and C. Morkel	
Combining molecular dynamics simulation and transition state theory to evaluate solid-liquid interfacial friction in carbon nanotube membranes (<i>8 pages</i>)	051205
Jeetu S. Babu and Sarith P. Sathian	
Granular materials	
Universal reference state in a driven homogeneous granular gas (<i>6 pages</i>)	051301
María Isabel García de Soria, Pablo Maynar, and Emmanuel Trizac	
Probing the shear-band formation in granular media with sound waves (<i>6 pages</i>)	051302
Y. Khidas and X. Jia
