PHYSICAL REVIEW E THIRD SERIES, VOLUME 86, NUMBER 5 NOVEMBER 2012

BRIEF REPORTS

Statistical physics

Random walk in chemical space of Cantor dust as a paradigm of superdiffusion *(5 pages)* 052101
Alexander S. Balankin, Baltasar Mena, C. L. Martínez-González, and Daniel Morales Matamoros

Railway switch transport model *(5 pages)* 052102
Martin Horvat, Tomaž Prosen, Giuliano Benenti, and Giulio Casati

Thermodynamic geometry, phase transitions, and the Widom line *(4 pages)* 052103
G. Ruppeiner, A. Sahay, T. Sarkar, and G. Sengupta

Forcing anomalous scaling on demographic fluctuations *(4 pages)* 052104
Piero Olla

Structured and complex fluids

Origin of the growing length scale in M-p-spin glass models *(4 pages)* 052501
Joonhyun Yeo and M. A. Moore

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 86, NUMBER 5** **NOVEMBER 2012**

Estimating nonstationary input signals from a single neuronal spike train *(12 pages)* 051903
Hideaki Kim and Shigeru Shinomoto

Long charged macromolecule in an entropic trap with rough surfaces *(5 pages)* 051904
Yevgeni Sh. Mamasakhlisov, Shura Hayryan, and Chin-Kun Hu

Monte Carlo simulations of single and coupled synthetic molecular motors *(11 pages)* 051905
C.-M. Chen and M. Zuckermann

Impact of motor molecules on the dynamics of treadmilling filaments *(11 pages)* 051906
Christoph Erlenkämper, Denis Johann, and Karsten Kruse

Definition of the persistence length in the coarse-grained models of DNA elasticity *(7 pages)* 051907
A. Fathizadeh, B. Eslami-Mossallam, and M. R. Ejtehadi

Population dynamics and wave propagation in a Lotka-Volterra system with spatial diffusion *(8 pages)* 051908
Mao-Xiang Wang and Pik-Yin Lai

Collective motion of dimers *(16 pages)* 051909
Catherine J. Penington, Karolína Korvasová, Barry D. Hughes, and Kerry A. Landman

From chemosensing in microorganisms to practical biosensors *(6 pages)* 051910
Surya K. Ghosh, Tapanendu Kundu, and Anirban Sain

Impact of ultrafast electronic damage in single-particle x-ray imaging experiments *(7 pages)* 051911
U. Lorenz, N. M. Kabachnik, E. Weckert, and I. A. Vartanyants

Modeling the mechanical properties of DNA nanostructures *(11 pages)* 051912
Jean Michel Arbona, Jean-Pierre Aimé, and Juan Elezgaray

Energetics of adhesion cluster formation in the context of biological membranes *(8 pages)* 051913
Eva Sunnick, Andreas Janshoff, and Burkhard Geil

Doubly stochastic coherence in complex neuronal networks *(10 pages)* 051914
Yang Gao and Jianjun Wang

Dynamic modes of quasispherical vesicles: Exact analytical solutions *(11 pages)* 051915
M. Guedda, M. Abaidi, M. Benlahsen, and C. Misbah

Metrics for characterizing collective transport by multiple dimeric kinesins *(12 pages)* 051916
Woochul Nam and Bogdan I. Epurenau

Molecular dynamics simulation of reversibly self-assembling shells in solution using trapezoidal particles *(7 pages)* 051917
D. C. Rapaport

Cooperation in neural systems: Bridging complexity and periodicity *(6 pages)* 051918
Marzieh Zare and Paolo Grigolini

Tracking time-varying causality and directionality of information flow using an error reduction ratio test with applications to electroencephalography data *(11 pages)* 051919
Yifan Zhao, Steve A. Billings, Hualiang Wei, and Ptolemaios G. Sarrigiannis

Power-law distribution of phase-locking intervals does not imply critical interaction *(13 pages)* 051920
M. Botcharova, S. F. Farmer, and L. Berthouze

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 86, NUMBER 5** **NOVEMBER 2012**

Strong anisotropy in two-dimensional surfaces with generic scale invariance: Gaussian and related models *(12 pages)* 051611
Edoardo Vivo, Matteo Nicoli, and Rodolfo Cuerno

Nature of inclined growth in thin-layer electrodeposition under uniform magnetic fields *(7 pages)* 051612
Alejandro Soba, Graciela González, Lucas Calivar, and Guillermo Marshall

Liquid crystals

Transitions between paraelectric and ferroelectric phases of bent-core smectic liquid crystals in the bulk and in thin freely suspended films *(10 pages)* 051701
Alexey Eremin, Martin Floegel, Ulrike Kornek, Stephan Stern, Ralf Stannarius, Hajnalka Nádasi, Wolfgang Weissflog, Chenhui Zhu, Yongqiang Shen, Cheol Soo Park, Joseph Maclennan, and Noel Clark

Isothermal high-pressure studies of 4-cyano-3-fluorophenyl 4-butylbenzoate dynamics near room temperature *(6 pages)* 051702
Tomasz Rozwadowski, Maria Massalska-Arodź, Żaneta Wojnarowska, Marian Paluch, Ewa Juszyńska, and Jan Krawczyk

Texture and shape of two-dimensional domains of nematic liquid crystals *(12 pages)* 051703
R. M. W. van Bijnen, R. H. J. Otten, and P. van der Schoot

Doping the nematic liquid crystal 5CB with milled $BaTiO_3$ nanoparticles *(5 pages)* 051704
Alexander Lorenz, Natalie Zimmermann, Satyendra Kumar, Dean R. Evans, Gary Cook, and Heinz-S. Kitzerow

Non-Debye relaxation in the dielectric response of nematic liquid crystals: Surface and memory effects in the adsorption-desorption process of ionic impurities *(8 pages)* 051705
J. L. de Paula, P. A. Santoro, R. S. Zola, E. K. Lenzi, L. R. Evangelista, F. Ciuchi, A. Mazzulla, and N. Scaramuzza

Mechanism of electric-field-induced segregation of additives in a liquid-crystal host *(5 pages)* 051706
Lu Lu, Vassili Sergan, and Philip J. Bos

Second-harmonic generation in a laterally azo-bridged trimer ferroelectric liquid crystal: Phase matching in the presence of a helicoidal structure *(5 pages)* 051707
J. Etxebarria, J. Ortega, C. L. Folcia, Y. Zhang, and C. Walker

Properties of the static NMR response of a confined thin nematic film of 5CB-d_2 under crossed electric and magnetic fields: Theory and experiments *(20 pages)* 051708
A. Véron, A. Sugimura, G. R. Luckhurst, and A. F. Martins

Polymers

Entropy-driven segregation of nanoparticles in polymer melts *(4 pages)* 051801
Yves Termonia

Biological physics

Network approach to identify the folding transition states of peptides and proteins *(6 pages)* 051901
Xuewei Jiang, Anhua Zhong, Changjun Chen, Yanzhao Huang, and Yi Xiao

Role of red blood cell elastic properties in capillary occlusions *(11 pages)* 051902
Bojan Božič and Gregor Gomišček

(Continued)

PHYSICAL REVIEW E THIRD SERIES, VOLUME 86, NUMBER 5 NOVEMBER 2012

Motion, relaxation dynamics, and diffusion processes in two-dimensional colloidal crystals confined between walls *(14 pages)* 051404
Dorothea Wilms, Peter Virnau, Ian K. Snook, and Kurt Binder

Feedback-induced oscillations in one-dimensional colloidal transport *(10 pages)* 051405
K. Lichtner, A. Pototsky, and S. H. L. Klapp

Structured and complex fluids

Determination of viscoelastic properties by analysis of probe-particle motion in molecular simulations *(6 pages)* 051501
Mir Karim, Swapnil C. Kohale, Tsutomu Indei, Jay D. Schieber, and Rajesh Khare

Influence of nonelectrostatic ion-ion interactions on double-layer capacitance *(8 pages)* 051502
Hui Zhao

Mechanism of fast surface self-diffusion of an organic glass *(6 pages)* 051503
S. Capaccioli, K. L. Ngai, M. Paluch, and D. Prevosto

How coupled elementary units determine the dynamics of macroscopic glass-forming systems *(11 pages)* 051504
Christian Rehwald and Andreas Heuer

Films, interfaces, and crystal growth

Site-dipole field and vortices in confined water *(10 pages)* 051601
Allison N. Dickey and Mark J. Stevens

Droplet hydrodynamics during lysozyme protein crystallization *(8 pages)* 051602
T. Pradhan, M. Asfer, and P. K. Panigrahi

Quantitative phase-field modeling of nonisothermal solidification in dilute multicomponent alloys with arbitrary diffusivities *(15 pages)* 051603
Munekazu Ohno

Squeezing instabilities and delamination in elastic bilayers: A linear stability analysis *(12 pages)* 051604
Hemalatha Annepu and Jayati Sarkar

Effects of nonlinear interfacial kinetics and interfacial thermal resistance in planar solidification *(14 pages)* 051605
Benoit Palmieri, C. A. Ward, and Marcus Dejmek

Distributional fixed-point equations for island nucleation in one dimension: A retrospective approach for capture-zone scaling *(8 pages)* 051606
P. A. Mulheran, K. P. O'Neill, M. Grinfeld, and W. Lamb

Distribution of scaled height in one-dimensional competitive growth profiles *(6 pages)* 051607
T. A. de Assis, C. P. de Castro, F. de Brito Mota, C. M. C. de Castilho, and R. F. S. Andrade

Appearance of a homochiral state of crystals induced by random fluctuation in grinding *(6 pages)* 051608
Hiroyasu Katsuno and Makio Uwaha

Nonlinear phase-field model for electrode-electrolyte interface evolution *(5 pages)* 051609
Linyun Liang, Yue Qi, Fei Xue, Saswata Bhattacharya, Stephen J. Harris, and Long-Qing Chen

Nanoparticle effects on the water-oil interfacial tension *(11 pages)* 051610
Heng Fan and Alberto Striolo

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 86, NUMBER 5** **NOVEMBER 2012**

Efficiency and its bounds for a quantum Einstein engine at maximum power *(7 pages)* 051135
H. Yan and Hao Guo

Conjugate variables in continuous maximum-entropy inference *(6 pages)* 051136
Sergio Davis and Gonzalo Gutiérrez

Monte Carlo simulations of the clean and disordered contact process in three dimensions *(11 pages)* 051137
Thomas Vojta

Effect of quantum fluctuation in error-correcting codes *(10 pages)* 051138
Yosuke Otsubo, Jun-ichi Inoue, Kenji Nagata, and Masato Okada

Supersingular mass distributions in gelling systems *(8 pages)* 051139
A. A. Lushnikov

Conductivity of Coniglio-Klein clusters *(7 pages)* 051140
Nicolas Posé, N. A. M. Araújo, and H. J. Herrmann

Equilibrium and linear transport properties of fluids

Effects of surface morphology and anisotropy on the tangential-momentum accommodation coefficient between Pt(100) and Ar *(9 pages)* 051201
Thanh Tung Pham, Quy Dong To, Guy Lauriat, Céline Léonard, and Vo Van Hoang

Granular materials

Vector-based model of elastic bonds for simulation of granular solids *(10 pages)* 051301
Vitaly A. Kuzkin and Igor E. Asonov

Origin of rebounds with a restitution coefficient larger than unity in nanocluster collisions *(7 pages)* 051302
Hiroto Kuninaka and Hisao Hayakawa

Sculpting sandcastles grain by grain: Self-assembled sand towers *(6 pages)* 051303
F. Pacheco-Vázquez, F. Moreau, N. Vandewalle, and S. Dorbolo

Shear-induced alignment and dynamics of elongated granular particles *(8 pages)* 051304
Tamás Börzsönyi, Balázs Szabó, Sandra Wegner, Kirsten Harth, János Török, Ellák Somfai, Tomasz Bien, and Ralf Stannarius

Stratification, segregation, and mixing of granular materials in quasi-two-dimensional bounded heaps *(12 pages)* 051305
Yi Fan, Youcef Boukerkour, Thibault Blanc, Paul B. Umbanhowar, Julio M. Ottino, and Richard M. Lueptow

Colloidal dispersions, suspensions, and aggregates

Magnetophoresis of particles and aggregates in concentrated magnetic fluids *(11 pages)* 051401
A. F. Pshenichnikov and A. S. Ivanov

Structural phases of colloids interacting via a flat-well potential *(6 pages)* 051402
L. Q. Costa Campos, C. C. de Souza Silva, and S. W. S. Apolinario

Effect of hydrodynamic interactions on rapid Brownian coagulation of colloidal dispersions *(9 pages)* 051403
Yuki Matsuoka, Tomonori Fukasawa, Ko Higashitani, and Ryoichi Yamamoto

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 86, NUMBER 5** **NOVEMBER 2012**

Finite-temperature phase diagram of ultrathin magnetic films without external fields *(8 pages)* 051119
Santiago A. Pighin, Orlando V. Billoni, and Sergio A. Cannas

Diffusion in sparse networks: Linear to semilinear crossover *(11 pages)* 051120
Yaron de Leeuw and Doron Cohen

Duality analysis on random planar lattices *(9 pages)* 051121
Masayuki Ohzeki and Keisuke Fujii

Polymer unfolding and motion synchronization induced by spatially correlated noise *(8 pages)* 051122
M. Majka and P. F. Góra

Universal and nonuniversal features of the generalized voter class for ordering dynamics in two dimensions *(7 pages)* 051123
Claudio Castellano and Romualdo Pastor-Satorras

Nonperturbative renormalization group for the stationary Kardar-Parisi-Zhang equation: Scaling functions and amplitude ratios in 1+1, 2+1, and 3+1 dimensions *(19 pages)* 051124
Thomas Kloss, Léonie Canet, and Nicolás Wschebor

Dynamical singularities of glassy systems in a quantum quench *(6 pages)* 051125
Tomoyuki Obuchi and Kazutaka Takahashi

Bond-site duality and nature of the explosive-percolation phase transition on a two-dimensional lattice *(5 pages)* 051126
Woosik Choi, Soon-Hyung Yook, and Yup Kim

Fluctuation theorems and inequalities generalizing the second law of thermodynamics out of equilibrium *(13 pages)* 051127
Gatien Verley and David Lacoste

Statistical topology of cellular networks in two and three dimensions *(13 pages)* 051128
J. K. Mason, E. A. Lazar, R. D. MacPherson, and D. J. Srolovitz

Stretched exponentials and tensionless glass in the plaquette Ising model *(6 pages)* 051129
Adam Lipowski

Coarse-grained models of stripe forming systems: Phase diagrams, anomalies, and scaling hypothesis *(9 pages)* 051130
Alejandro Mendoza-Coto and Daniel A. Stariolo

Phase transitions in strongly coupled three-dimensional Z(N) lattice gauge theories at finite temperature *(14 pages)* 051131
O. Borisenko, V. Chelnokov, G. Cortese, R. Fiore, M. Gravina, A. Papa, and I. Surzhikov

Impact of committed individuals on vaccination behavior *(7 pages)* 051132
Xiao-Tao Liu, Zhi-Xi Wu, and Lianzhong Zhang

Jamming transition of kinetically constrained models in rectangular systems *(17 pages)* 051133
Eial Teomy and Yair Shokef

Non-mean-field effects in systems with long-range forces in competition *(4 pages)* 051134
R. Bachelard and F. Staniscia

(Continued)

PHYSICAL REVIEW E **THIRD SERIES, VOLUME 86, NUMBER 5** **NOVEMBER 2012**

Formation mechanism and size features of multiple giant clusters in generic percolation processes *(11 pages)* 051103
Yang Zhang, Wei Wei, Binghui Guo, Renquan Zhang, and Zhiming Zheng

Inverse freezing in a cluster Ising spin-glass model with antiferromagnetic interactions *(6 pages)* 051104
C. F. Silva, F. M. Zimmer, S. G. Magalhaes, and C. Lacroix

Effects of reservoir squeezing on quantum systems and work extraction *(6 pages)* 051105
X. L. Huang(黄晓理), Tao Wang(王涛), and X. X. Yi(衣学喜)

Time-reversal symmetry in nonstationary Markov processes with application to some fluctuation theorems *(18 pages)* 051106
Carolyne M. Van Vliet

Heating and thermal squeezing in parametrically driven oscillators with added noise *(12 pages)* 051107
Adriano A. Batista

Building cooperative networks *(10 pages)* 051108
Ignacio Gomez Portillo

Efficiencies and coefficients of performance of heat engines, refrigerators, and heat pumps with friction: A universal limiting behavior *(7 pages)* 051109
João P. S. Bizarro and Paulo Rodrigues

Nonequilibrium magnetic properties in a two-dimensional kinetic mixed Ising system within the effective-field theory and Glauber-type stochastic dynamics approach *(12 pages)* 051110
Mehmet Ertaş, Bayram Deviren, and Mustafa Keskin

Geometrical defects in two-dimensional melting of many-particle Yukawa systems *(8 pages)* 051111
Arūnas Radzvilavičius

Efficiency at maximum power output of an irreversible Carnot-like cycle with internally dissipative friction *(5 pages)* 051112
Jianhui Wang and Jizhou He

Phase diagram for a zero-temperature Glauber dynamics under partially synchronous updates *(7 pages)* 051113
Bartosz Skorupa, Katarzyna Sznajd-Weron, and Rafal Topolnicki

Current fluctuations in the weakly asymmetric exclusion process with open boundaries *(7 pages)* 051114
Mieke Gorissen and Carlo Vanderzande

Transport in time-dependent random potentials *(14 pages)* 051115
Yevgeny Krivolapov and Shmuel Fishman

Frustrated Ising model on the Cairo pentagonal lattice *(11 pages)* 051116
M. Rojas, Onofre Rojas, and S. M. de Souza

Geodesics in information geometry: Classical and quantum phase transitions *(6 pages)* 051117
Prashant Kumar, Subhash Mahapatra, Prabwal Phukon, and Tapobrata Sarkar

Statistical model for self-assembly of trimesic acid molecules into homologous series of flower phases *(12 pages)* 051118
A. Ibenskas and E. E. Tornau

THIRD SERIES, VOLUME 86, NUMBER 5 *CONTENTS* NOVEMBER 2012

PART 1: STATISTICAL, SOFT MATTER, AND BIOLOGICAL PHYSICS

RAPID COMMUNICATIONS

Statistical physics

Competing ferromagnetic and nematic alignment in self-propelled polar particles *(5 pages)* . . . . . 050101(R)
Sandrine Ngo, Francesco Ginelli, and Hugues Chaté

Only through perturbation can relaxation times be estimated *(5 pages)* . . . . . 050102(R)
Susanne Ditlevsen and Petr Lansky

Multicanonical distribution: Statistical equilibrium of multiscale systems *(5 pages)* . . . . . 050103(R)
Domingos S. P. Salazar and Giovani L. Vasconcelos

Granular materials

Scaling behavior in the convection-driven Brazil nut effect *(4 pages)* . . . . . 050301(R)
Prakhyat Hejmady, Ranjini Bandyopadhyay, Sanjib Sabhapandit, and Abhishek Dhar

Liquid crystals

Origin of tilted-phase generation in systems of ellipsoidal molecules with dipolar interactions *(4 pages)* . . . . . 050701(R)
Tushar Kanti Bose and Jayashree Saha

Biological physics

Sequence repeats and protein structure *(5 pages)* . . . . . 050901(R)
Trinh X. Hoang, Antonio Trovato, Flavio Seno, Jayanth R. Banavar, and Amos Maritan

ARTICLES

Statistical physics

Analytical derivation of critical exponents of the dynamic phase transition in the mean-field approximation *(7 pages)* 051101
R. A. Gallardo, O. Idigoras, P. Landeros, and A. Berger

Thermodynamic properties of a Kerr nonlinear blackbody *(9 pages)* 051102
Ze Cheng
