**THIRD SERIES, VOLUME 88, NUMBER 3**  
**PARTS A AND B**

---

**CONTENTS**

**SEPTEMBER 2013**

---

*The Table of Contents is a total listing of Parts A and B.*  
*Part A consists of pages 030101(R)-032602, and Part B pages 032701-039904(E).*

## **PART A**

### **RAPID COMMUNICATIONS**

#### **Statistical Physics**

- Integrability of zero-dimensional replica field theories at  $\beta = 1$  (5 pages) ..... 030101(R)  
Pedro Vidal and Eugene Kanzieper
- Consensus time and conformity in the adaptive voter model (5 pages) ..... 030102(R)  
Tim Rogers and Thilo Gross
- Arrow-arrow correlations for the six-vertex model (5 pages) ..... 030103(R)  
P. Falco

#### **Granular Materials**

- Drag on intruders in granular beds: A boundary layer approach (4 pages) ..... 030201(R)  
Jonathan Goldsmith, Hong Guo, Shelby N. Hunt, Mingjiang Tao, and Stephan Koehler

#### **Films, Interfaces, and Crystal Growth**

- Non-mean-field behavior of critical wetting transition for short-range forces (4 pages) ..... 030401(R)  
Paweł Bryk and Kurt Binder

#### **Biological Physics**

- Localizing epileptic seizure onsets with Granger causality (5 pages) ..... 030701(R)  
Bhim M. Adhikari, Charles M. Epstein, and Mukesh Dhamala

#### **Fluid Dynamics**

- Growth rate degeneracies in kinematic dynamos (5 pages) ..... 031001(R)  
B. Favier and M. R. E. Proctor

#### **Plasma Physics**

- Thermal energy density of dust in dusty plasmas: Experiment and theory (5 pages) ..... 031101(R)  
R. Fisher, K. Avinash, E. Thomas, R. Merlino, and V. Gupta

Copyright 2013 by American Physical Society

(Continued)

1539-3755(201309)88:3:B;1-Y

**Classical Physics**

- Multiple flat photonic bands with finite Chern numbers (*4 pages*) . . . . . 031201(R)  
S. T. Chui, Shiyang Liu, and Zhifang Lin

**ARTICLES**

**Statistical Physics**

- Generalized extended Navier-Stokes theory: Multiscale spin relaxation in molecular fluids (*5 pages*) . . . . . 032101  
J. S. Hansen
- Stochastic thermodynamics of active Brownian particles (*7 pages*) . . . . . 032102  
Chandrima Ganguly and Debasish Chaudhuri
- Quest for absolute zero in the presence of external noise (*6 pages*) . . . . . 032103  
E. Torrontegui and R. Kosloff
- Nonlinear subdiffusive fractional equations and the aggregation phenomenon (*9 pages*) . . . . . 032104  
Sergei Fedotov
- Nonequilibrium work and entropy production by quantum projective measurements (*6 pages*) . . . . . 032105  
Juyeon Yi and Yong Woon Kim
- Statistics of avalanches with relaxation and Barkhausen noise: A solvable model (*35 pages*) . . . . . 032106  
Alexander Dobrinevski, Pierre Le Doussal, and Kay Jörg Wiese
- Everlasting effect of initial conditions on single-file diffusion (*11 pages*) . . . . . 032107  
N. Leibovich and E. Barkai
- Density-independent model of self-propelled particles (*10 pages*) . . . . . 032108  
Daniel Schubring and Paul R. Ohmann
- Spectral analysis and slow spreading dynamics on complex networks (*7 pages*) . . . . . 032109  
Géza Ódor
- Quantum fidelity for degenerate ground states in quantum phase transitions (*10 pages*) . . . . . 032110  
Yao Heng Su, Bing-Quan Hu, Sheng-Hao Li, and Sam Young Cho
- Quantum spin-1 anisotropic ferromagnetic Heisenberg model in a crystal field: A variational approach (*10 pages*) . . . . . 032111  
D. C. Carvalho, J. A. Plascak, and L. M. Castro
- Collisional relaxation of two-dimensional self-gravitating systems (*9 pages*) . . . . . 032112  
Bruno Marcos
- Beyond the Young-Laplace model for cluster growth during dewetting of thin films: Effective coarsening exponents and the role of long range dewetting interactions (*29 pages*) . . . . . 032113  
Adi Constantinescu, Leonardo Golubović, and Artem Levandovsky
- Distributions of time averages for weakly chaotic systems: The role of infinite invariant density (*10 pages*) . . . . . 032114  
Nickolay Korabel and Eli Barkai
- Emerging spectra of singular correlation matrices under small power-map deformations (*9 pages*) . . . . . 032115  
Vinayak, Rudi Schäfer, and Thomas H. Seligman

| PHYSICAL REVIEW E                                                                                         | THIRD SERIES, VOLUME 88, NUMBER 3 | SEPTEMBER 2013 |
|-----------------------------------------------------------------------------------------------------------|-----------------------------------|----------------|
| Disrupted coarsening in complex Cahn-Hilliard dynamics (5 pages) . . . . .                                |                                   | 032116         |
| David Simeone, Gilles Demange, and Laurence Luneville                                                     |                                   |                |
| Nonequilibrium identities and response theory for dissipative particles (9 pages) . . . . .               |                                   | 032117         |
| Hisao Hayakawa and Michio Otsuki                                                                          |                                   |                |
| Vortex distribution in a confining potential (5 pages) . . . . .                                          |                                   | 032118         |
| Matheus Giroto, Alexandre P. dos Santos, and Yan Levin                                                    |                                   |                |
| Ergodic crossover in partially self-avoiding stochastic walks (8 pages) . . . . .                         |                                   | 032119         |
| Juliana M. Berbert, Rodrigo Silva González, and Alexandre Souto Martinez                                  |                                   |                |
| Rerouting excitation transfers in the Fenna-Matthews-Olson complex (6 pages) . . . . .                    |                                   | 032120         |
| Guang-Yin Chen, Neill Lambert, Che-Ming Li, Yueh-Nan Chen, and Franco Nori                                |                                   |                |
| Influence of long-range interactions on charge ordering phenomena on a square lattice (8 pages) . . . . . |                                   | 032121         |
| Louk Rademaker, Yohanes Pramudya, Jan Zaanen, and Vladimir Dobrosavljević                                 |                                   |                |
| Control of logic gates by dichotomous noise in energetic and entropic systems (14 pages) . . . . .        |                                   | 032122         |
| Moupriya Das and Deb Shankar Ray                                                                          |                                   |                |
| Thermodynamic curvature for attractive and repulsive intermolecular forces (8 pages) . . . . .            |                                   | 032123         |
| Helge-Otmar May, Peter Mausbach, and George Ruppeiner                                                     |                                   |                |
| Crossover behavior in driven cascades (10 pages) . . . . .                                                |                                   | 032124         |
| James Burridge                                                                                            |                                   |                |
| Nonequilibrium heterogeneous catalysis in the long mean-free-path regime (12 pages) . . . . .             |                                   | 032125         |
| D. P. Sheehan                                                                                             |                                   |                |
| Extended finite-size scaling of synchronized coupled oscillators (7 pages) . . . . .                      |                                   | 032126         |
| Chulho Choi, Meesoon Ha, and Byungnam Kahng                                                               |                                   |                |
| Fence-sitters protect cooperation in complex networks (5 pages) . . . . .                                 |                                   | 032127         |
| Yichao Zhang, M. A. Aziz-Alaoui, Cyrille Bertelle, Shi Zhou, and Wenting Wang                             |                                   |                |
| Theta-point polymers in the plane and Schramm-Loewner evolution (7 pages) . . . . .                       |                                   | 032128         |
| M. Gherardi                                                                                               |                                   |                |
| Minimal spanning trees at the percolation threshold: A numerical calculation (14 pages) . . . . .         |                                   | 032129         |
| Sean M. Sweeney and A. Alan Middleton                                                                     |                                   |                |
| Frieden wave-function representations via an Einstein-Podolsky-Rosen-Bohm experiment (23 pages) . . . . . |                                   | 032130         |
| J. Syska                                                                                                  |                                   |                |
| Frozen into stripes: Fate of the critical Ising model after a quench (4 pages) . . . . .                  |                                   | 032131         |
| T. Blanchard and M. Picco                                                                                 |                                   |                |
| Self-sustained clusters and ergodicity breaking in spin models (4 pages) . . . . .                        |                                   | 032132         |
| Chi Ho Yeung and David Saad                                                                               |                                   |                |
| Excited-state quantum phase transitions in Dicke superradiance models (12 pages) . . . . .                |                                   | 032133         |
| Tobias Brandes                                                                                            |                                   |                |

THIRD SERIES, VOLUME 88, NUMBER 3

SEPTEMBER 2013

|                                                                                                                                                                                        |        |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Effects of solvent-mediated nonelectrostatic ion-ion interactions on a streaming potential in microchannels and nanochannels ( <i>10 pages</i> ) . . . . .                             | 033014 |
| Aditya Bandopadhyay, Jayabrata Dhar, and Suman Chakraborty                                                                                                                             |        |
| Interaction between a fracture network and a cubic cavity ( <i>10 pages</i> ) . . . . .                                                                                                | 033015 |
| D. Sangaré, V. V. Mourzenko, J.-F. Thovet, and P. M. Adler                                                                                                                             |        |
| Instability of a rotating liquid ring ( <i>6 pages</i> ) . . . . .                                                                                                                     | 033016 |
| Sicheng Zhao and Jianjun Tao                                                                                                                                                           |        |
| Scaling and unified characterization of flow instabilities in layered heterogeneous porous media ( <i>12 pages</i> ) . . . . .                                                         | 033017 |
| M. Sajjadi and J. Azaiez                                                                                                                                                               |        |
| Experimental study of oblique impact between dry spheres and liquid layers ( <i>9 pages</i> ) . . . . .                                                                                | 033018 |
| Jiliang Ma, Daoyin Liu, and Xiaoping Chen                                                                                                                                              |        |
| Experimental investigation of the stability of the floating water bridge ( <i>6 pages</i> ) . . . . .                                                                                  | 033019 |
| Reza Montazeri Namin, Shiva Azizpour Lindi, Ahmad Amjadi, Nima Jafari, and Peyman Irajizad                                                                                             |        |
| Shape-dependent orientation of thermophoretic forces in microsystems ( <i>8 pages</i> ) . . . . .                                                                                      | 033020 |
| Qi Li, Tengfei Liang, and Wenjing Ye                                                                                                                                                   |        |
| Electric double-layer interactions in a wedge geometry: Change in contact angle for drops and bubbles ( <i>8 pages</i> ) . . . . .                                                     | 033021 |
| Siddhartha Das and Sushanta K. Mitra                                                                                                                                                   |        |
| Interface dynamics of immiscible two-phase lattice-gas cellular automata: A model with random dynamic scatterers and quenched disorder in two dimensions ( <i>13 pages</i> ) . . . . . | 033022 |
| R. M. Azevedo, R. R. Montenegro-Filho, and M. D. Coutinho-Filho                                                                                                                        |        |
| Relation between shape of liquid-gas interface and evolution of buoyantly unstable three-dimensional chemical fronts ( <i>7 pages</i> ) . . . . .                                      | 033023 |
| L. Šebestíková                                                                                                                                                                         |        |
| Model of dynamic self-assembly in ferromagnetic suspensions at liquid interfaces ( <i>9 pages</i> ) . . . . .                                                                          | 033024 |
| D. L. Piet, A. V. Straube, A. Snezhko, and I. S. Aranson                                                                                                                               |        |
| Electric-field-induced rotation of Brownian metal nanowires ( <i>8 pages</i> ) . . . . .                                                                                               | 033025 |
| Juan J. Arcenegui, Pablo García-Sánchez, Hywel Morgan, and Antonio Ramos                                                                                                               |        |
| Energy concentration and positional stability of sonoluminescent bubbles in sulfuric acid for different static pressures ( <i>9 pages</i> ) . . . . .                                  | 033026 |
| Juan Manuel Rosselló, Damián Dellavale, and Fabián José Bonetto                                                                                                                        |        |
| Theoretical investigation of a technique to produce microbubbles by a microfluidic T junction ( <i>10 pages</i> ) . . . . .                                                            | 033027 |
| M. A. Herrada, A. M. Gañán-Calvo, and J. M. Montanero                                                                                                                                  |        |
| <b>Plasma Physics</b>                                                                                                                                                                  |        |
| Counterexample of the magnetorotational instability in two-dimensional axial symmetry ( <i>6 pages</i> ) . . . . .                                                                     | 033101 |
| Giovanni Montani and Daniela Pugliese                                                                                                                                                  |        |
| Evaluation of slowing down of proton and deuteron beams in CH <sub>2</sub> , LiH, and Al partially ionized plasmas ( <i>6 pages</i> ) . . . . .                                        | 033102 |
| David Casas, Manuel D. Barriga-Carrasco, and Juan Rubio                                                                                                                                |        |

## BRIEF REPORTS

### Statistical Physics

|                                                                                                                                                         |        |
|---------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Order-disorder quantum phase transition in the quasi-one-dimensional spin-1/2 collinear antiferromagnetic Heisenberg model ( <i>4 pages</i> ) . . . . . | 034101 |
| Sabrina Rufo, Griffith Mendonça, J. A. Plascak, and J. Ricardo de Sousa                                                                                 |        |
| Restricted solid-on-solid model with a proper restriction parameter $N$ in $4 + 1$ dimensions ( <i>4 pages</i> ) . . . . .                              | 034102 |
| Jin Min Kim and Sang-Woo Kim                                                                                                                            |        |

### Biological Physics

|                                                                                                                   |        |
|-------------------------------------------------------------------------------------------------------------------|--------|
| Elastic models of the fast traps of carnivorous <i>Dionaea</i> and <i>Aldrovanda</i> ( <i>5 pages</i> ) . . . . . | 034701 |
| Marc Joyeux                                                                                                       |        |
| Phase-field approach to chemotactic driving of neutrophil morphodynamics ( <i>4 pages</i> ) . . . . .             | 034702 |
| Sara Najem and Martin Grant                                                                                       |        |

### Nonlinear Dynamics and Chaos

|                                                                                                               |        |
|---------------------------------------------------------------------------------------------------------------|--------|
| Dynamical tunneling of a Bose-Einstein condensate in periodically driven systems ( <i>4 pages</i> ) . . . . . | 034901 |
| R. K. Shrestha, J. Ni, W. K. Lam, G. S. Summy, and S. Wimberger                                               |        |
| Oscillation death in diffusively coupled oscillators by local repulsive link ( <i>5 pages</i> ) . . . . .     | 034902 |
| C. R. Hens, Olasunkanmi I. Olusola, Pinaki Pal, and Syamal K. Dana                                            |        |

### Fluid Dynamics

|                                                                                                                                          |        |
|------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Relaxation and intermediate asymptotics of a rectangular trench in a viscous film ( <i>5 pages</i> ) . . . . .                           | 035001 |
| Oliver Bäümchen, Michael Benzaquen, Thomas Salez, Joshua D. McGraw, Matilda Backholm, Paul Fowler, Elie Raphaël, and Kari Dalnoki-Veress |        |

### Plasma Physics

|                                                                                                                                  |        |
|----------------------------------------------------------------------------------------------------------------------------------|--------|
| Divergence of the Stark collision operator at large impact parameters in plasma spectroscopy models ( <i>3 pages</i> ) . . . . . | 035101 |
| J. Rosato, H. Capes, and R. Stamm                                                                                                |        |

### Classical Physics

|                                                                      |        |
|----------------------------------------------------------------------|--------|
| Finite-depth capillary-gravity dromions ( <i>5 pages</i> ) . . . . . | 035201 |
| Yong Liang and Mohammad-Reza Alam                                    |        |

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 88, NUMBER 3

SEPTEMBER 2013

|                                                                                                                                          |        |
|------------------------------------------------------------------------------------------------------------------------------------------|--------|
| Initial value problems of cylindrical electromagnetic waves propagation in a nonlinear nondispersive medium ( <i>4 pages</i> ) . . . . . | 035202 |
| Si-Yun Chen, Tong Li, Jun-Bin Xie, Hui Xie, Ping Zhou, Yang-Fan Tian, Hao Xiong, and Liu-Gang Si                                         |        |

### COMMENTS

|                                                                                                               |        |
|---------------------------------------------------------------------------------------------------------------|--------|
| Comment on “Constructing quantum games from nonfactorizable joint probabilities” ( <i>3 pages</i> ) . . . . . | 036101 |
| Piotr Frąckiewicz                                                                                             |        |

### ERRATA

|                                                                                                                                                                                                   |           |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| Erratum: Mean-field approximation to a spatial host-pathogen model<br>[Phys. Rev. E <b>67</b> , 047102 (2003)] ( <i>1 page</i> ) . . . . .                                                        | 039901(E) |
| M. A. M. de Aguiar, E. M. Rauch, B. C. Stacey, and Y. Bar-Yam                                                                                                                                     |           |
| Erratum: Fundamental issues in nonlinear wideband-vibration energy harvesting<br>[Phys. Rev. E <b>87</b> , 042129 (2013)] ( <i>1 page</i> ) . . . . .                                             | 039902(E) |
| Einar Halvorsen                                                                                                                                                                                   |           |
| Publisher’s Note: Antinematic orientational order produced by an extreme case of the generalized Straley<br>lattice model [Phys. Rev. E <b>86</b> , 020702(R) (2012)] ( <i>1 page</i> ) . . . . . | 039903(E) |
| Fulvio Bisi, Giovanni De Matteis, and Silvano Romano                                                                                                                                              |           |
| Publisher’s Note: Spectral analysis and slow spreading dynamics on complex networks<br>[Phys. Rev. E <b>88</b> , 032109 (2013)] ( <i>1 page</i> ) . . . . .                                       | 039904(E) |
| Géza Ódor                                                                                                                                                                                         |           |
