THIRD SERIES, VOLUME 89, NUMBER 2
PARTS A AND B

CONTENTS

FEBRUARY 2014

The Table of Contents is a total listing of Parts A and B.
Part A consists of pages 020201(R)–022607, and Part B pages 022701–029908(E).

PART A

RAPID COMMUNICATIONS

Granular Materials

Instabilities in granular binary mixtures at moderate densities (*5 pages*) 020201(R)
Peter P. Mitrano, Vicente Garzó, and Christine M. Hrenya

Role of roughness on the hydrodynamic homogeneous base state of inelastic spheres (*5 pages*) 020202(R)
Francisco Vega Reyes, Andrés Santos, and Gilberto M. Kremer

Colloids and Complex Fluids

Spontaneous liquid-liquid phase separation of water (*5 pages*) 020301(R)
Takuma Yagasaki, Masakazu Matsumoto, and Hideki Tanaka

Liquid Crystals

Principles of thermal design with nematic liquid crystals (*5 pages*) 020501(R)
S. Fumeron, E. Pereira, and F. Moraes

Biological Physics

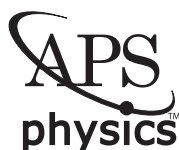

Mechanical transition in a highly stretched and torsionally constrained DNA (*5 pages*) 020701(R)
Janusz Strzelecki, Lukasz Peplowski, Robert Lenartowski, Wieslaw Nowak, and Aleksander Balter

Networks and Interdisciplinary Physics

Advection of passive particles over flow networks (*4 pages*) 020801(R)
Shigefumi Hata, Hiroya Nakao, and Alexander S. Mikhailov

Nonlinear Dynamics and Chaos

Semiclassical propagator to evaluate off-diagonal matrix elements of the evolution operator between quantum states (*5 pages*) 020901(R)
Eduardo G. Vergini

Copyright 2014 by American Physical Society

(Continued)

The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

Fluid Dynamics

Elliptical tracers in two-dimensional, homogeneous, isotropic fluid turbulence: The statistics of alignment, rotation, and nematic order (5 pages)	021001(R)
Anupam Gupta, Dario Vincenzi, and Rahul Pandit	
Globally aligned states and hydrodynamic traffic jams in confined suspensions of active asymmetric particles (5 pages)	021002(R)
Adrien Lefauve and David Saintillan	
Mean-field model of layering instability in shearing suspensions (3 pages)	021003(R)
J. I. Katz	
Nonlinear stability of laboratory quasi-Keplerian flows (5 pages)	021004(R)
E. M. Edlund and H. Ji	

Plasma Physics

Channeling of particles and associated anomalous transport in a two-dimensional complex plasma crystal (5 pages)	021101(R)
Cheng-Ran Du, Vladimir Nosenko, Sergey Zhdanov, Hubertus M. Thomas, and Gregor E. Morfill	

Classical Physics

Electron dynamics controlled via self-interaction (5 pages)	021201(R)
Matteo Tamburini, Christoph H. Keitel, and Antonino Di Piazza	

Computational Physics

Failure of logarithmic oscillators to serve as a thermostat for small atomic clusters (4 pages)	021301(R)
Daniel Sponseller and Estela Blaisten-Barojas	

ARTICLES

Statistical Physics

Universal time fluctuations in near-critical out-of-equilibrium quantum dynamics (7 pages)	022101
Lorenzo Campos Venuti and Paolo Zanardi	
Quantum information-geometry of dissipative quantum phase transitions (10 pages)	022102
Leonardo Banchi, Paolo Giorda, and Paolo Zanardi	
First-passage time of Brownian motion with dry friction (12 pages)	022103
Yaming Chen and Wolfram Just	
Minimal mechanism leading to discontinuous phase transitions for short-range systems with absorbing states (5 pages)	022104
Carlos E. Fiore	
Fourier's law from a chain of coupled planar harmonic oscillators under energy-conserving noise (11 pages)	022105
Gabriel T. Landi and Mário J. de Oliveira	
Truncated Lévy flights and weak ergodicity breaking in the Hamiltonian mean-field model (6 pages)	022106
A. Figueiredo, T. M. Rocha Filho, M. A. Amato, Z. T. Oliveira, Jr., and R. Matsushita	

(Continued)

CONTENTS - *Continued*

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 89, NUMBER 2

FEBRUARY 2014

Effect of noise and detector sensitivity on a dynamical process: Inverse power law and Mittag-Leffler interevent time survival probabilities (<i>8 pages</i>)	022107
Pensri Pramukul, Adam Svenkeson, and Paolo Grigolini	
Kardar-Parisi-Zhang equation with spatially correlated noise: A unified picture from nonperturbative renormalization group (<i>11 pages</i>)	022108
Thomas Kloss, Léonie Canet, Bertrand Delamotte, and Nicolás Wschebor	
Analysis of the non-Markov parameter in continuous-time signal processing (<i>10 pages</i>)	022109
J. J. Varghese, P. A. Bellette, K. J. Weegink, A. P. Bradley, and P. A. Meehan	
Universal long-time dynamics in dense simple fluids (<i>15 pages</i>)	022110
Gene F. Mazenko	
Finite-size effects on current correlation functions (<i>5 pages</i>)	022111
Shunda Chen, Yong Zhang, Jiao Wang, and Hong Zhao	
Understanding the mobility of nonspherical particles in the free molecular regime (<i>13 pages</i>)	022112
Mingdong Li, George W. Mulholland, and Michael R. Zachariah	
Reinforcement learning in complementarity game and population dynamics (<i>14 pages</i>)	022113
Jürgen Jost and Wei Li	
Extended order parameter and conjugate field for the dynamic phase transition in a Ginzburg-Landau mean-field model in an oscillating field (<i>5 pages</i>)	022114
Daniel T. Robb and Aaron Ostrander	
Zero-range process with finite compartments: Gentile's statistics and glassiness (<i>5 pages</i>)	022115
Artem Ryabov	
Duration of local violations of the second law of thermodynamics along single trajectories in phase space (<i>7 pages</i>)	022116
Reinaldo García-García and Daniel Domínguez	
Carnot cycle for interacting particles in the absence of thermal noise (<i>6 pages</i>)	022117
Evaldo M. F. Curado, Andre M. C. Souza, Fernando D. Nobre, and Roberto F. S. Andrade	
Boolean decision problems with competing interactions on scale-free networks: Equilibrium and nonequilibrium behavior in an external bias (<i>12 pages</i>)	022118
Zheng Zhu, Juan Carlos Andresen, M. A. Moore, and Helmut G. Katzgraber	
Loopless nontrapping invasion-percolation model for fracking (<i>11 pages</i>)	022119
J. Quinn Norris, Donald L. Turcotte, and John B. Rundle	
Interplay between spin-glass clusters and geometrical frustration (<i>6 pages</i>)	022120
F. M. Zimmer, C. F. Silva, S. G. Magalhaes, and C. Lacroix	
Surface phase diagram of the three-dimensional kinetic Ising model in an oscillating magnetic field (<i>4 pages</i>)	022121
Keith Tauscher and Michel Pleimling	
Numerical studies on critical properties of the Kosterlitz-Thouless phase for the gauge glass model in two dimensions (<i>10 pages</i>)	022122
Yukiyasu Ozeki, Satoshi Yotsuyanagi, Takuya Sakai, and Yuki Echinaka	

(Continued)

CONTENTS - *Continued*

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 89, NUMBER 2

FEBRUARY 2014

Nonequilibrium first-order phase transition in coupled oscillator systems with inertia and noise (<i>13 pages</i>)	022123
Shamik Gupta, Alessandro Campa, and Stefano Ruffo	
Role of parity transformation for the fluctuation theorem: Limit cycle and symmetry breaking (<i>5 pages</i>)	022124
Yasuyuki Matsuo	
Statistically preferred basis of an open quantum system: Its relation to the eigenbasis of a renormalized self-Hamiltonian (<i>11 pages</i>)	022125
Lewei He and Wen-ge Wang	
☞ Thermal excitations of warped membranes (<i>7 pages</i>)	022126
Andrej Košmrlj and David R. Nelson	
Time reversibility and nonequilibrium thermodynamics of second-order stochastic processes (<i>7 pages</i>)	022127
Hao Ge	
Quantum molecular dynamics study on the structures and dc conductivity of warm dense silane (<i>9 pages</i>)	022128
Huayang Sun, Dongdong Kang, Jiayu Dai, Jiaolong Zeng, and Jianmin Yuan	
Thermal conductivity of simple liquids: Temperature and packing-fraction dependence (<i>5 pages</i>)	022129
Norikazu Ohtori, Yoshiki Ishii, Yoshinori Togawa, Takuya Oono, and Keiichi Takase	
Ergodicity breaking and quasistationary states in systems with long-range interactions (<i>9 pages</i>)	022130
Ana C. Ribeiro-Teixeira, Fernanda P. C. Benetti, Renato Pakter, and Yan Levin	
Asymmetric coupling in two-lane simple exclusion processes with Langmuir kinetics: Phase diagrams and boundary layers (<i>5 pages</i>)	022131
Arvind Kumar Gupta and Isha Dhiman	
Tracer dynamics in a single-file system with absorbing boundary (<i>8 pages</i>)	022132
Artem Ryabov and Petr Chvosta	
☞ Dense periodic packings of tori (<i>5 pages</i>)	022133
Ruggero Gabbrielli, Yang Jiao, and Salvatore Torquato	
Restrictions on linear heat capacities from Joule-Brayton maximum-work cycle efficiency (<i>4 pages</i>)	022134
F. Angulo-Brown, Julian Gonzalez-Ayala, and L. A. Arias-Hernandez	
Superdiffusion and transport in two-dimensional systems with Lévy-like quenched disorder (<i>11 pages</i>)	022135
Raffaella Burioni, Enrico Ubaldi, and Alessandro Vezzani	
Nonequilibrium steady state of the kinetic Glauber-Ising model under an alternating magnetic field (<i>5 pages</i>)	022136
Seung Ki Baek and Fabio Marchesoni	
Nonequilibrium thermodynamics of the shear-transformation-zone model (<i>10 pages</i>)	022137
Alan M. Luo and Hans Christian Öttinger	
Interacting particles in a periodically moving potential: Traveling wave and transport (<i>6 pages</i>)	022138
Rakesh Chatterjee, Sakuntala Chatterjee, Punyabrata Pradhan, and S. S. Manna	
Searching for feasible stationary states in reaction networks by solving a Boolean constraint satisfaction problem (<i>10 pages</i>)	022139
A. Seganti, A. De Martino, and F. Ricci-Tersenghi	

(Continued)

CONTENTS - *Continued*

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 89, NUMBER 2

FEBRUARY 2014

Tetrahedrality and structural order for hydrophobic interactions in a coarse-grained water model (<i>13 pages</i>)	022140
Aviel Chaimovich and M. Scott Shell	
Light diffusion in quenched disorder: Role of step correlations (<i>9 pages</i>)	022141
Tomas Svensson, Kevin Vynck, Erik Adolfsson, Andrea Farina, Antonio Pifferi, and Diederik S. Wiersma	
Extended Parrondo's game and Brownian ratchets: Strong and weak Parrondo effect (<i>9 pages</i>)	022142
Degang Wu and Kwok Yip Szeto	
Magnetization process, bipartite entanglement, and enhanced magnetocaloric effect of the exactly solved spin-1/2 Ising-Heisenberg tetrahedral chain (<i>10 pages</i>)	022143
Jozef Strečka, Onofre Rojas, Taras Verkholyak, and Marcelo L. Lyra	
Adiabatic elimination for systems with inertia driven by compound Poisson colored noise (<i>8 pages</i>)	022144
Tiejun Li, Bin Min, and Zhiming Wang	
Fluctuation-induced pressures in fluids in thermal nonequilibrium steady states (<i>11 pages</i>)	022145
T. R. Kirkpatrick, J. M. Ortiz de Zárate, and J. V. Sengers	
Granular Materials	
Pressure distribution and critical exponent in statically jammed and shear-driven frictionless disks (<i>5 pages</i>)	022201
Daniel Vågberg, Yegang Wu, Peter Olsson, and S. Teitel	
Influence of thermal convection on density segregation in a vibrated binary granular system (<i>6 pages</i>)	022202
C. R. K. Windows-Yule, T. Weinhart, D. J. Parker, and A. R. Thornton	
Grain fragmentation in sheared granular flow: Weakening effects, energy dissipation, and strain localization (<i>14 pages</i>)	022203
Charles K. C. Lieou, Ahmed E. Elbanna, and Jean M. Carlson	
Shaking-induced crystallization of dense sphere packings (<i>6 pages</i>)	022204
D. P. Shinde, Anita Mehta, and G. C. Barker	
Stochastic behavior of the coefficient of normal restitution (<i>6 pages</i>)	022205
Nina Gunkelmann, Marina Montaine, and Thorsten Pöschel	
Colloids and Complex Fluids	
 Active crystals and their stability (<i>14 pages</i>)	022301
Andreas M. Menzel, Takao Ohta, and Hartmut Löwen	
Nested sampling for materials: The case of hard spheres (<i>9 pages</i>)	022302
Livia B. Pártay, Albert P. Bartók, and Gábor Csányi	
Divergence of the long-wavelength collective diffusion coefficient in quasi-one- and quasi-two-dimensional colloidal suspensions (<i>9 pages</i>)	022303
Binhua Lin, Bianxiao Cui, Xinliang Xu, Ronen Zangi, Haim Diamant, and Stuart A. Rice	
Self-assembly of monodisperse CdS nanocylinders with an axial pore (<i>6 pages</i>)	022304
J. Kiruthiga and Apratim Chatterji	
Length scales and self-organization in dense suspension flows (<i>12 pages</i>)	022305
Gustavo Düring, Edan Lerner, and Matthieu Wyart	

(Continued)

Self-assembly of Janus particles confined in a channel (<i>6 pages</i>)	022306
M. Sobrino Fernández, V. R. Misko, and F. M. Peeters	
Scaling of cluster growth for coagulating active particles (<i>8 pages</i>)	022307
Peet Cremer and Hartmut Löwen	
Orientational glass in mixtures of elliptic and circular particles: Structural heterogeneities, rotational dynamics, and rheology (<i>14 pages</i>)	022308
Kyohei Takae and Akira Onuki	
Liquid-glass transition in equilibrium (<i>5 pages</i>)	022309
G. Parisi and B. Seoane	
Magnetorheological properties of a magnetic nanofluid with dispersed carbon nanotubes (<i>9 pages</i>)	022310
Leona J. Felicia and John Philip	

Films, Interfaces, and Solids

Kinetics of random sequential adsorption of nearly spherically symmetric particles (<i>4 pages</i>)	022401
Michał Cieřła and Jakub Barbasz	
Hydrodynamic shadowing effect during precipitation of dendrites in channel flow (<i>11 pages</i>)	022402
Christopher Hawkins, Luiza Angheluta, and Bjørn Jamtveit	
Dislocation mutual interactions mediated by mobile impurities and the conditions for plastic instabilities (<i>10 pages</i>)	022403
Fabio Leoni and Stefano Zapperi	
Effect of ridge-ridge interactions in crumpled thin sheets (<i>5 pages</i>)	022404
Shiuan-Fan Liou, Chun-Chao Lo, Ming-Han Chou, Pai-Yi Hsiao, and Tzay-Ming Hong	
Nucleation of a new phase on a surface that is changing irreversibly with time (<i>5 pages</i>)	022405
Richard P. Sear	
Water under inner pressure: A dielectric spectroscopy study (<i>5 pages</i>)	022406
Abril Angulo-Sherman and Hilda Mercado-Uribe	
 Crystallization in organic semiconductor thin films: A diffuse-interface approach (<i>9 pages</i>)	022407
Alta Fang and Mikko Haataja	

Liquid Crystals

Resonant x-ray diffraction spectrum for possible structures of the smectic liquid crystal phase with a six-layer periodicity (<i>5 pages</i>)	022501
LiDong Pan, R. Pindak, and C. C. Huang	
Modeling the field control of the surface electroclinic effect near continuous and first-order smectic- <i>A</i> * to smectic- <i>C</i> * transitions (<i>14 pages</i>)	022502
Kara Zappitelli, Dana N. Hipolite, and Karl Saunders	
Formation of liquid-crystal cholesteric pitch in the centimeter range (<i>5 pages</i>)	022503
Denis Kasyanyuk, Kostyantyn Slyusarenko, John West, Mikhail Vasnetsov, and Yuriy Reznikov	
Computational studies of history dependence in nematic liquid crystals in random environments (<i>14 pages</i>)	022504
Amid Ranjkesh, Milan Ambrožič, Samo Kralj, and Timothy J. Sluckin	

(Continued)

Geometrically unrestricted, topologically constrained control of liquid crystal defects using simultaneous holonomic magnetic and holographic optical manipulation (<i>12 pages</i>)	022505
Michael C. M. Varney, Nathan J. Jenness, and Ivan I. Smalyukh	
Twist-bend heliconical chiral nematic liquid crystal phase of an achiral rigid bent-core mesogen (<i>5 pages</i>)	022506
Dong Chen, Michi Nakata, Renfan Shao, Michael R. Tuchband, Min Shuai, Ute Baumeister, Wolfgang Weissflog, David M. Walba, Matthew A. Glaser, Joseph E. MacLennan, and Noel A. Clark	
Effect of an external electric field on the smectic- C_{tilted}^* phases (<i>7 pages</i>)	022507
M. Rjili, A. Gharbi, T. Othman, and J. P. Marcerou	
Soft memory in a ferroelectric nanoparticle-doped liquid crystal (<i>5 pages</i>)	022508
Rajratan Basu	
Lehmann rotation of the cholesteric helix in droplets oriented by an electric field (<i>6 pages</i>)	022509
Patrick Oswald and Slavomir PirkI	
Rheology of nematic liquid crystals with highly polar molecules (<i>6 pages</i>)	022510
J. Ananthaiah, Rasmita Sahoo, M. V. Rasna, and Surajit Dhara	
Maxwell-Wagner-Sillars effects on the thermal-transport properties of polymer-dispersed liquid crystals (<i>8 pages</i>)	022511
M. Kuriakose, S. Longuemart, M. Depriester, S. Delenclos, and A. Hadj Sahraoui	
Stepwise heat-capacity change at an orientation transition in liquid crystals (<i>5 pages</i>)	022512
Satoshi Aya, Yuji Sasaki, Damian Pocięcha, Fumito Araoka, Ewa Górecka, Kenji Ema, Igor Mušević, Hiroshi Orihara, Ken Ishikawa, and Hideo Takezoe	
Cholesteric liquid crystal gels with a graded mechanical stress (<i>8 pages</i>)	022513
Gonzague Agez, Sabrina Relaix, and Michel Mitov	
Polymers	
Ideal polymers near scale-free surfaces (<i>12 pages</i>)	022601
Yosi Hammer and Yacov Kantor	
Segmental and local dynamics of stacked thin films of poly(methyl methacrylate) (<i>10 pages</i>)	022602
Tatsuhiko Hayashi and Koji Fukao	
Free-volume hole relaxation in molecularly oriented glassy polymers (<i>12 pages</i>)	022603
Zhiyong Xia, Morgana Trexler, Fei Wu, Yan-Ching Jean, and J. David Van Horn	
Constitutive modeling of strain-induced crystallization in filled rubbers (<i>12 pages</i>)	022604
Roozbeh Dargazany, Vu Ngoc Khiêm, Emad A. Poshtan, and Mikhail Itskov	
Polymer dynamics near the surface and in the bulk of poly(tetrafluoroethylene) probed by zero-field muon-spin-relaxation spectroscopy (<i>6 pages</i>)	022605
Iain McKenzie, Zaher Salman, Sean R. Giblin, Yun Yu Han, Gary W. Leach, Elvezio Morenzoni, Thomas Prokscha, and Andreas Suter	
Dynamics of a semiflexible polymer or polymer ring in shear flow (<i>15 pages</i>)	022606
Philipp S. Lang, Benedikt Obermayer, and Erwin Frey	
Predictive maps for stochastic nonaffine stiffening and damage in fibrous networks (<i>9 pages</i>)	022607
A. S. Abhilash, Liang Zhang, Judah Stiefel, Prashant K. Purohit, and Shailendra P. Joshi	

(Continued)

PART B

Biological Physics

 Transitions between patterned states in vegetation models for semiarid ecosystems (<i>8 pages</i>) Karna Gowda, Hermann Riecke, and Mary Silber	022701
Lattice simulations of phase morphology on lipid bilayers: Renormalization, membrane shape, and electrostatic dipole interactions (<i>11 pages</i>) Jonathan J. Amazon and Gerald W. Feigenson	022702
Energy deposition of H and He ion beams in hydroxyapatite films: A study with implications for ion-beam cancer therapy (<i>9 pages</i>) Silvina Limandri, Pablo de Vera, Raul C. Fadanelli, Luiz C. C. M. Nagamine, Alexandre Mello, Rafael Garcia-Molina, Moni Behar, and Isabel Abril	022703
Disturbance accelerates the transition from low- to high-diversity state in a model ecosystem (<i>7 pages</i>) Filippo Botta and Namiko Mitarai	022704
Analog and digital codes in the brain (<i>8 pages</i>) Yasuhiro Mochizuki and Shigeru Shinomoto	022705
Coupling layers regularizes wave propagation in stochastic neural fields (<i>12 pages</i>) Zachary P. Kilpatrick	022706
Reliable binary cell-fate decisions based on oscillations (<i>6 pages</i>) B. Pfeuty and K. Kaneko	022707
Anomalous diffusion due to hindering by mobile obstacles undergoing Brownian motion or Orstein-Uhlenbeck processes (<i>9 pages</i>) Hugues Berry and Hugues Chaté	022708
Relationships between the winding angle, the characteristic radius, and the torque for a long polymer chain wound around a cylinder: Implications for RNA winding around DNA during transcription (<i>14 pages</i>) Boris P. Belotserkovskii	022709
Stability of bacterial toggle switches is enhanced by cell-cycle lengthening by several orders of magnitude (<i>10 pages</i>) Joanna Jaruszewicz, Marek Kimmel, and Tomasz Lipniacki	022710
Active Brownian agents with concentration-dependent chemotactic sensitivity (<i>15 pages</i>) Marcel Meyer, Lutz Schimansky-Geier, and Pawel Romanczuk	022711
Efficient fold-change detection based on protein-protein interactions (<i>6 pages</i>) W. Buijsman and M. Sheinman	022712
Diffusion coefficients in leaflets of bilayer membranes (<i>12 pages</i>) Kazuhiko Seki, Saurabh Mogre, and Shigeyuki Komura	022713
Effect of the microtubule-associated protein tau on dynamics of single-headed motor proteins KIF1A (<i>8 pages</i>) J. Sparacino, M. G. Fariás, and P. W. Lamberti	022714

(Continued)

CONTENTS - *Continued*

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 89, NUMBER 2

FEBRUARY 2014

Boson peak as a probe of quantum effects in a glassy state of biomolecules: The case of L-cysteine (5 pages)	022715
T. A. Lima, M. S. Ishikawa, and H. S. Martinho	
Mixed-salt effects on the conformation of a short salt-bridge-forming α helix: A simulation study (9 pages)	022717
Hao Shen, Wei Cheng, and Feng-Shou Zhang	
$1/f$ fluctuations of amino acids regulate water transportation in aquaporin 1 (6 pages)	022718
Eiji Yamamoto, Takuma Akimoto, Yoshinori Hirano, Masato Yasui, and Kenji Yasuoka	
Electronic states of DNA and <i>M</i> -DNA studied by optical absorption (7 pages)	022719
Makoto Tsuburaya, Hirokazu Sakamoto, and Kenji Mizoguchi	
Transition model for ricin-aptamer interactions with multiple pathways and energy barriers (10 pages)	022720
Bin Wang and Bingqian Xu	
Avian photoreceptor patterns represent a disordered hyperuniform solution to a multiscale packing problem (13 pages)	022721
Yang Jiao, Timothy Lau, Haralampos Hatzikirou, Michael Meyer-Hermann, Joseph C. Corbo, and Salvatore Torquato	
Singular perturbation solutions of steady-state Poisson-Nernst-Planck systems (14 pages)	022722
Xiang-Sheng Wang, Dongdong He, Jonathan J. Wylie, and Huaxiong Huang	
Unified description of solvent effects in the helix-coil transition (10 pages)	022723
Artem Badasyan, Shushanik A. Tonoyan, Achille Giacometti, Rudolf Podgornik, V. Adrian Parsegian, Yevgeni Sh. Mamasakhlisov, and Vladimir F. Morozov	
Lateral diffusion in a discrete fluid membrane with immobile particles (12 pages)	022724
Ziya Kalay, Takahiro K. Fujiwara, Akihisa Otaka, and Akihiro Kusumi	
Nonequilibrium steady states in a model for prebiotic evolution (10 pages)	022725
A. Wynveen, I. Fedorov, and J. W. Halley	
☞ Optimal estimation of diffusion coefficients from single-particle trajectories (31 pages)	022726
Christian L. Vestergaard, Paul C. Blainey, and Henrik Flyvbjerg	
Networks and Interdisciplinary Physics	
☞ Coexistence of phases and the observability of random graphs (12 pages)	022801
Antoine Allard, Laurent Hébert-Dufresne, Jean-Gabriel Young, and Louis J. Dubé	
Inequity aversion and the evolution of cooperation (6 pages)	022802
Asrar Ahmed and Kamalakar Karlapalem	
Inverse transitions in a spin-glass model on a scale-free network (11 pages)	022803
Do-Hyun Kim	
Evolution of extortion in structured populations (5 pages)	022804
Attila Szolnoki and Matjaž Perc	
Message-passing approach for threshold models of behavior in networks (9 pages)	022805
Munik Shrestha and Cristopher Moore	

(Continued)

Damage spreading in spatial and small-world random Boolean networks (<i>8 pages</i>)	022806
Qiming Lu and Christof Teuscher	
Fluctuation analysis in complex networks modeled by hidden-variable models: Necessity of a large cutoff in hidden-variable models (<i>15 pages</i>)	022807
Massimo Ostilli	
Message passing and moment closure for susceptible-infected-recovered epidemics on finite networks (<i>6 pages</i>)	022808
Robert R. Wilkinson and Kieran J. Sharkey	
Dynamic multifactor clustering of financial networks (<i>8 pages</i>)	022809
Gordon J. Ross	
Multistate network for loop searching system with self-recovery property (<i>6 pages</i>)	022810
Kei-Ichi Ueda, Masaaki Yadome, and Yasumasa Nishiura	
Aging in complex interdependency networks (<i>9 pages</i>)	022811
Dervis C. Vural, Greg Morrison, and L. Mahadevan	
Nonlinear Dynamics and Chaos	
Geometrical analysis of the LiCN vibrational dynamics: A stability geometrical indicator (<i>9 pages</i>)	022901
A. Vergel, R. M. Benito, J. C. Losada, and F. Borondo	
Visualization and comparison of classical structures and quantum states of four-dimensional maps (<i>12 pages</i>)	022902
Martin Richter, Steffen Lange, Arnd Bäcker, and Roland Ketzmerick	
Dynamical responses to time-dependent control parameters in the presence of noise: A normal form approach (<i>14 pages</i>)	022903
C. Nicolis and G. Nicolis	
Manifold structures of unstable periodic orbits and the appearance of periodic windows in chaotic systems (<i>6 pages</i>)	022904
Miki U. Kobayashi and Yoshitaka Saiki	
Survey on the role of accelerator modes for anomalous diffusion: The case of the standard map (<i>12 pages</i>)	022905
Thanos Manos and Marko Robnik	
Analysis of a dc bus system with a nonlinear constant power load and its delayed feedback control (<i>8 pages</i>)	022906
Keiji Konishi, Yoshiki Sugitani, and Naoyuki Hara	
Topological analysis of chaotic transport through a ballistic atom pump (<i>15 pages</i>)	022907
Tommy A. Byrd and John B. Delos	
Dissipative structures induced by spin-transfer torques in nanopillars (<i>9 pages</i>)	022908
Alejandro O. León, Marcel G. Clerc, and Saliya Coulibaly	
Distribution of zeros of the Husimi function in systems with degeneracy (<i>7 pages</i>)	022909
I. Oregi and F. J. Arranz	
Detection and control of combustion instability based on the concept of dynamical system theory (<i>8 pages</i>)	022910
Hiroshi Gotoda, Yuta Shinoda, Masaki Kobayashi, Yuta Okuno, and Shigeru Tachibana

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 89, NUMBER 2

FEBRUARY 2014

Exploring the distinction between experimental resonant modes and theoretical eigenmodes: From vibrating plates to laser cavities (<i>9 pages</i>)	022911
P. H. Tuan, C. P. Wen, Y. T. Yu, H. C. Liang, K. F. Huang, and Y. F. Chen	
Fermi acceleration in chaotic shape-preserving billiards (<i>7 pages</i>)	022912
Benjamin Batić	
Entanglement tongue and quantum synchronization of disordered oscillators (<i>10 pages</i>)	022913
Tony E. Lee, Ching-Kit Chan, and Shenshen Wang	
Chimera states on complex networks (<i>4 pages</i>)	022914
Yun Zhu, Zhigang Zheng, and Junzhong Yang	
Origin of the exponential decay of the Loschmidt echo in integrable systems (<i>5 pages</i>)	022915
Rémy Dubertrand and Arseni Goussev	
Temperature-driven coherence resonance and stochastic resonance in a thermochemical system (<i>8 pages</i>)	022916
A. Lemarchand, J. Gorecki, A. Gorecki, and B. Nowakowski	
Mixing and clustering in compressible chaotic stirred flows (<i>5 pages</i>)	022917
Vicente Pérez-Muñuzuri	
Experimental observation of extreme multistability in an electronic system of two coupled Rössler oscillators (<i>4 pages</i>)	022918
Mitesh S. Patel, Unnati Patel, Abhijit Sen, Gautam C. Sethia, Chittaranjan Hens, Syamal K. Dana, Ulrike Feudel, Kenneth Showalter, Calistus N. Ngonghala, and Ravindra E. Amritkar	
Stochastic switching in slow-fast systems: A large-fluctuation approach (<i>8 pages</i>)	022919
Christoffer R. Heckman and Ira B. Schwartz	
Core solutions of rigidly rotating spiral waves in highly excitable media (<i>7 pages</i>)	022920
Mei-chun Cai, Jun-ting Pan, and Hong Zhang	
Kinetic theory of nonlinear diffusion in a weakly disordered nonlinear Schrödinger chain in the regime of homogeneous chaos (<i>22 pages</i>)	022921
D. M. Basko	
Nearest-neighbor-spacing distribution of prime numbers and quantum chaos (<i>11 pages</i>)	022922
Marek Wolf	
Advection modes by optimal mass transfer (<i>12 pages</i>)	022923
Angelo Iollo and Damiano Lombardi	
Breathers in strongly anharmonic lattices (<i>9 pages</i>)	022924
Philip Rosenau and Arkady Pikovsky	
Spectral properties of microwave graphs with local absorption (<i>6 pages</i>)	022925
Markus Allgaier, Stefan Gehler, Sonja Barkhofen, H.-J. Stöckmann, and Ulrich Kuhl	
Persistence and failure of mean-field approximations adapted to a class of systems of delay-coupled excitable units (<i>10 pages</i>)	022926
Igor Franović, Kristina Todorović, Nebojša Vasović, and Nikola Burić

Fluid Dynamics

Boltzmann rovibrational collisional coarse-grained model for internal energy excitation and dissociation in hypersonic flows (<i>13 pages</i>)	023001
A. Munafò, M. Panesi, and T. E. Magin	
Breaking of non-Newtonian character in flows through a porous medium (<i>4 pages</i>)	023002
T. Chevalier, S. Rodts, X. Chateau, C. Chevalier, and P. Coussot	
Energy flux measurement from the dissipated energy in capillary wave turbulence (<i>9 pages</i>)	023003
Luc Deike, Michael Berhanu, and Eric Falcon	
Turbulent channel without boundaries: The periodic Kolmogorov flow (<i>6 pages</i>)	023004
S. Musacchio and G. Boffetta	
Velocity slip on curved surfaces (<i>9 pages</i>)	023005
Weikang Chen, Rui Zhang, and Joel Koplik	
Scaling of heat flux and energy spectrum for very large Prandtl number convection (<i>12 pages</i>)	023006
Ambrish Pandey, Mahendra K. Verma, and Pankaj K. Mishra	
Two phenomenological constants explain similarity laws in stably stratified turbulence (<i>10 pages</i>)	023007
Gabriel G. Katul, Amilcare Porporato, Stimit Shah, and Elie Bou-Zeid	
Evolution of a spherical hydrate-free inclusion in a porous matrix filled with methane hydrate (<i>9 pages</i>)	023008
Kirill Tsiberkin, Dmitry V. Lyubimov, Tatyana P. Lyubimova, and Oleg Zikanov	
Entropy and energy spectra in low-Prandtl-number convection with rotation (<i>11 pages</i>)	023009
Hirdesh K. Pharasi, Krishna Kumar, and Jayanta K. Bhattacharjee	
Channeling and stress during fluid and suspension flow in self-affine fractures (<i>14 pages</i>)	023010
Tak Shing Lo and Joel Koplik	
☞ Regularized thin-fiber model for nanofiber formation by centrifugal spinning (<i>9 pages</i>)	023011
S. M. Taghavi and R. G. Larson	
Surface gravity-wave lensing (<i>6 pages</i>)	023012
Ryan B. Elandt, Mostafa Shakeri, and Mohammad-Reza Alam	
Circular band formation for incompressible viscous fluid–rigid-particle mixtures in a rotating cylinder (<i>13 pages</i>)	023013
Suchung Hou, Tsorng-Whay Pan, and Roland Glowinski	
Effect of contact angle on the orientation, stability, and assembly of dense floating cubes (<i>8 pages</i>)	023014
Robert Daniello, Kashan Khan, Michael Donnell, and Jonathan P. Rothstein	
Origin of periodic and chaotic dynamics due to drops moving in a microfluidic loop device (<i>5 pages</i>)	023015
Jeevan Maddala, Siva A. Vanapalli, and Raghunathan Rengaswamy	

Plasma Physics

Quantum molecular dynamics study of warm dense iron (<i>6 pages</i>)	023101
Cong Wang, Zhe-Bin Wang, Qi-Feng Chen, and Ping Zhang	
Simple estimation of thermodynamic properties of Yukawa systems (<i>8 pages</i>)	023102
S. A. Khrapak, A. G. Khrapak, A. V. Ivlev, and G. E. Morfill

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 89, NUMBER 2

FEBRUARY 2014

Observation of particle pairing in a two-dimensional plasma crystal (<i>7 pages</i>)	023103
S. K. Zhdanov, V. Nosenko, H. M. Thomas, G. E. Morfill, and L. Couëdel	
Network analysis of three-dimensional complex plasma clusters in a rotating electric field (<i>9 pages</i>)	023104
I. Laut, C. Räth, L. Wörner, V. Nosenko, S. K. Zhdanov, J. Schablinski, D. Block, H. M. Thomas, and G. E. Morfill	
Evolution of frequency clusters in the naturally occurring dust acoustic wave (<i>7 pages</i>)	023105
J. D. Williams	
Plasma pressure broadening for few-electron emitters including strong electron collisions within a quantum-statistical theory (<i>13 pages</i>)	023106
Sonja Lorenzen, Banaz Omar, Mark C. Zammit, Dmitry V. Fursa, and Igor Bray	
Thomson scattering from a three-component plasma (<i>6 pages</i>)	023107
W. R. Johnson and J. Nilsen	
Predictions of x-ray scattering spectra for warm dense matter (<i>12 pages</i>)	023108
A. N. Souza, D. J. Perkins, C. E. Starrett, D. Saumon, and S. B. Hansen	
Scaling of resistive guiding of laser-driven fast-electron currents in solid targets (<i>5 pages</i>)	023109
P. Leblanc and Y. Sentoku	
Classical Physics	
Imperfections in a two-dimensional hierarchical structure (<i>11 pages</i>)	023201
Daniel Rayneau-Kirkhope, Yong Mao, and Robert Farr	
Mechanism of wave breaking from a vacuum point in the defocusing nonlinear Schrödinger equation (<i>10 pages</i>)	023202
Antonio Moro and Stefano Trillo	
Time reversal for photoacoustic tomography based on the wave equation of Nachman, Smith, and Waag (<i>9 pages</i>)	023203
Richard Kowar	
Dynamical systems theory for the Gardner equation (<i>7 pages</i>)	023204
Aparna Saha, B. Talukdar, and Supriya Chatterjee	
Vector spherical quasi-Gaussian vortex beams (<i>8 pages</i>)	023205
F. G. Mitri	
Acoustic probing of elastic behavior and damage in weakly cemented granular media (<i>10 pages</i>)	023206
V. Langlois and X. Jia	
Topological properties of microwave magnetoelectric fields (<i>16 pages</i>)	023207
M. Berezin, E. O. Kamenetskii, and R. Shavit	
Acoustics and precondensation phenomena in gas-vapor saturated mixtures (<i>12 pages</i>)	023208
C. Guianvarc'h, M. Bruneau, and R. M. Gaviolo	
Solitary wave propagation through two-dimensional treelike structures (<i>8 pages</i>)	023209
William J. Falls and Surajit Sen

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 89, NUMBER 2

FEBRUARY 2014

Rational W-shaped solitons on a continuous-wave background in the Sasa-Satsuma equation (6 pages)	023210
Li-Chen Zhao, Sheng-Chang Li, and Liming Ling	
Computational Physics	
Wave propagation in disordered fractured porous media (10 pages)	023301
Hossein Hamzehpour, Fatemeh Haghsheeno Kasani, Muhammad Sahimi, and Reza Sepehrinia	
Evaluating functions of positive-definite matrices using colored-noise thermostats (7 pages)	023302
Marco Nava, Michele Ceriotti, Chaim Dryzun, and Michele Parrinello	
Choice of boundary condition for lattice-Boltzmann simulation of moderate-Reynolds-number flow in complex domains (13 pages)	023303
Rupert W. Nash, Hywel B. Carver, Miguel O. Bernabeu, James Hetherington, Derek Groen, Timm Krüger, and Peter V. Coveney	
Compression algorithm for multideterminant wave functions (7 pages)	023304
Gihan L. Weerasinghe, Pablo López Ríos, and Richard J. Needs	
Detrended cross-correlation analysis consistently extended to multifractality (13 pages)	023305
Paweł Oświęcimka, Stanisław Drożdż, Marcin Forczek, Stanisław Jadach, and Jarosław Kwapien	
Simulation of inhomogeneous distributions of ultracold atoms in an optical lattice via a massively parallel implementation of nonequilibrium strong-coupling perturbation theory (13 pages)	023306
Andreas Dirks, Karlis Mikelsons, H. R. Krishnamurthy, and James K. Freericks	
Implicit-correction-based immersed boundary–lattice Boltzmann method with two relaxation times (22 pages)	023307
Takeshi Seta, Roberto Rojas, Kosuke Hayashi, and Akio Tomiyama	
Free energy of melts and intermetallic compounds of binary alloys determined by a molecular dynamics approach (6 pages)	023308
M. Guerdane	

ERRATA

Erratum: Extracting connectivity from dynamics of networks with uniform bidirectional coupling [Phys. Rev. E 88 , 042817 (2013)] (1 page)	029901(E)
Emily S. C. Ching, Pik-Yin Lai, and C. Y. Leung	
Erratum: First-passage and escape problems in the Feller process [Phys. Rev. E 86 , 041116 (2012)] (1 page)	029902(E)
Jaume Masoliver and Josep Perelló	
Erratum: Equilibrium probability distribution of a conductive sphere's floating charge in a collisionless, drifting Maxwellian plasma [Phys. Rev. E 88 , 023110 (2013)] (1 page)	029903(E)
Drew M. Thomas and Michael Coppins	
Publisher's Note: Flocking with minimal cooperativity: The panic model [Phys. Rev. E 89 , 012718 (2014)] (1 page)	029904(E)
Kevin R. Pilkiewicz and Joel D. Eaves	
Publisher's Note: Understanding the mobility of nonspherical particles in the free molecular regime [Phys. Rev. E 89 , 022112 (2014)] (1 page)	029905(E)
