THIRD SERIES, VOLUME 89, NUMBER 5
PARTS A AND B

CONTENTS

MAY 2014

*The Table of Contents is a total listing of Parts A and B.
Part A consists of pages 050101(R)–052715, and Part B pages 052801–059904(E).*

PART A

RAPID COMMUNICATIONS

Statistical Physics

- Ensemble inequivalence in systems with wave-particle interaction (*5 pages*) 050101(R)
Tarcísio N. Teles, Duccio Fanelli, and Stefano Ruffo

Granular Materials

- Jamming of frictional particles: A nonequilibrium first-order phase transition (*4 pages*) 050201(R)
Matthias Grob, Claus Heussinger, and Annette Zippelius

Colloids and Complex Fluids

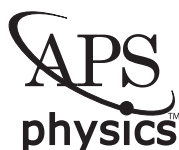

- Molecular dynamics simulation of short-wavelength collective dynamics of phospholipid membranes (*5 pages*) 050301(R)
Valeria Conti Nibali, Giovanna D'Angelo, and Mounir Tarek
- Shear viscosity and structural scalings in model adhesive hard-sphere gels (*5 pages*) 050302(R)
Aaron P. R. Eberle, Nicos Martys, Lionel Porcar, Steven R. Kline, William L. George, Jung M. Kim, Paul D. Butler, and Norman J. Wagner
- Polarization of active Janus particles (*5 pages*) 050303(R)
Thomas Bickel, Guillermo Zecua, and Alois Würger

Liquid Crystals

- Detection of an intermediate biaxial phase in the phase diagram of biaxial liquid crystals: Entropic sampling study (*5 pages*) 050501(R)
B. Kamala Latha, Regina Jose, K. P. N. Murthy, and V. S. S. Sastry

Biological Physics

- 🔗 Dynamic force patterns of an undulatory microswimmer (*5 pages*) 050701(R)
Rafael D. Schulman, Matilda Backholm, William S. Ryu, and Kari Dalnoki-Veress

Copyright 2014 by American Physical Society

1539-3755(201405)89:5:B;1-3

(Continued)

🔗 The editors and referees of PRE find these papers to be of particular interest, importance, or clarity. Please see our Announcement Phys. Rev. E 89, 010001 (2014).

Nonlinear Dynamics and Chaos

Front propagation in a bistable system: How the energy is released (<i>5 pages</i>)	050901(R)
V. V. Smirnov, O. V. Gendelman, and L. I. Manevitch	
Quantifying uncertainty in state and parameter estimation (<i>5 pages</i>)	050902(R)
Ulrich Parlitz, Jan Schumann-Bischoff, and Stefan Luther	

ARTICLES

Statistical Physics

Exchange fluctuation theorem for heat transport between multiterminal harmonic systems (<i>10 pages</i>)	052101
Bijay Kumar Agarwalla, Huanan Li, Baowen Li, and Jian-Sheng Wang	
 Relation between the psychological and thermodynamic arrows of time (<i>8 pages</i>)	052102
Leonard Mlodinow and Todd A. Brun	
High-precision work distributions for extreme nonequilibrium processes in large systems (<i>7 pages</i>)	052103
Alexander K. Hartmann	
DNA viewed as an out-of-equilibrium structure (<i>15 pages</i>)	052105
A. Provata, C. Nicolis, and G. Nicolis	
Macroscopically measurable force induced by temperature discontinuities at solid-gas interfaces (<i>6 pages</i>)	052106
Masato Itami and Shin-ichi Sasa	
Magnetically driven quantum heat engine (<i>8 pages</i>)	052107
Enrique Muñoz and Francisco J. Peña	
Nonadiabatic effect on the quantum heat flux control (<i>10 pages</i>)	052108
Chikako Uchiyama	
Critical phenomena in the majority voter model on two-dimensional regular lattices (<i>4 pages</i>)	052109
Ana L. Acuña-Lara, Francisco Sastre, and José Raúl Vargas-Arriola	
Ultralow diffusion in an exactly solvable non-Markovian random walk (<i>9 pages</i>)	052110
M. A. A. da Silva, G. M. Viswanathan, and J. C. Cressoni	
Sparre-Andersen theorem with spatiotemporal correlations (<i>4 pages</i>)	052111
Roberto Artuso, Giampaolo Cristadoro, Mirko Degli Esposti, and Georgie Knight	
Universality and time-scale invariance for the shape of planar Lévy processes (<i>5 pages</i>)	052112
Julien Randon-Furling	
Bayesian approach to inverse statistical mechanics (<i>7 pages</i>)	052113
Michael Habeck	
Nonlinear response for external field and perturbation in the Vlasov system (<i>14 pages</i>)	052114
Shun Ogawa and Yoshiyuki Y. Yamaguchi	
Dynamic metastability in the two-dimensional Potts ferromagnet (<i>6 pages</i>)	052115
Miguel Ibáñez Berganza, Alberto Petri, and Pietro Coletti	

(Continued)

CONTENTS - *Continued*

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 89, NUMBER 5

MAY 2014

 Generalized energy measurements and modified transient quantum fluctuation theorems (7 pages)	052116
Gentaro Watanabe, B. Prasanna Venkatesh, and Peter Talkner	
Exact computation of the maximum-entropy potential of spiking neural-network models (12 pages)	052117
R. Cofré and B. Cessac	
Intrinsic irreversibility of Markovian chains (6 pages)	052118
P. Di Porto, B. Crosignani, and E. DelRe	
Exact fluctuation theorem without ensemble quantities (5 pages)	052119
Gregory Bulnes Cuetara, Massimiliano Esposito, and Alberto Imparato	
Approximated center-of-mass motion for systems of interacting particles with space- and velocity-dependent friction and anharmonic potential (8 pages)	052120
Alain Olivetti, Guillaume Labeyrie, and Robin Kaiser	
Symmetry for the duration of entropy-consuming intervals (10 pages)	052121
Reinaldo García-García and Daniel Domínguez	
Cluster-size distribution in the autocatalytic growth model (14 pages)	052122
Jakub Jędrak	
Conway's game of life is a near-critical metastable state in the multiverse of cellular automata (5 pages)	052123
Sandro M. Reia and Osame Kinouchi	
Phase transitions in a system of hard rectangles on the square lattice (14 pages)	052124
Joyjit Kundu and R. Rajesh	
Onset of synchronization in the disordered Hamiltonian mean-field model (5 pages)	052125
Juan G. Restrepo and James D. Meiss	
Scaling analysis of negative differential thermal resistance (5 pages)	052126
Ho-Kei Chan (陳浩基), Dahai He (贺达海), and Bambi Hu (胡斑比)	
Pseudo- ϵ expansion and renormalized coupling constants at criticality (10 pages)	052127
A. I. Sokolov and M. A. Nikitina	
Quantum driving and work (7 pages)	052128
J. Salmilehto, P. Solinas, and M. Möttönen	
Decay of a linear pendulum in a collisional gas: Spatially one-dimensional case (14 pages)	052129
Tetsuro Tsuji and Kazuo Aoki	
Dynamical aspects of intermolecular proton transfer in liquid water and low-density amorphous ices (10 pages)	052130
Amani Tahat and Jordi Martí	
Inertial effects in adiabatically driven flashing ratchets (9 pages)	052131
Viktor M. Rozenbaum, Yuri A. Makhnovskii, Irina V. Shapochkina, Sheh-Yi Sheu, Dah-Yen Yang, and Sheng Hsien Lin	
Quantum coherence rather than quantum correlations reflect the effects of a reservoir on a system's work capability (11 pages)	052132
Hai Li, Jian Zou, Wen-Li Yu, Bao-Ming Xu, Jun-Gang Li, and Bin Shao	

(Continued)

Bose-Einstein condensation in diamond hierarchical lattices (<i>7 pages</i>)	052133
M. L. Lyra, F. A. B. F. de Moura, I. N. de Oliveira, and M. Serva	
Complete set of types of phase transition in generalized heterogeneous k -core percolation (<i>6 pages</i>)	052134
Huiseung Chae, Soon-Hyung Yook, and Yup Kim	
Probability distributions and associated nonlinear Fokker-Planck equation for the two-index entropic form $S_{q,\delta}$ (<i>9 pages</i>)	052135
Mauricio S. Ribeiro, Fernando D. Nobre, and Constantino Tsallis	
Delay-induced transport in a rocking ratchet under feedback control (<i>10 pages</i>)	052136
Sarah A. M. Loos, Robert Gernert, and Sabine H. L. Klapp	
Optimizing entropy bounds for macroscopic systems (<i>5 pages</i>)	052137
Jacob D. Bekenstein	
Generalized Landauer bound as a universal thermodynamic entropy in continuous phase transitions (<i>4 pages</i>)	052138
M. Cristina Diamantini and Carlo A. Trugenberger	
Mean-field behavior as a result of noisy local dynamics in self-organized criticality: Neuroscience implications (<i>8 pages</i>)	052139
S. Amin Moosavi and Afshin Montakhab	
Optimal finite-time erasure of a classical bit (<i>9 pages</i>)	052140
Patrick R. Zulkowski and Michael R. DeWeese	
Uncoupled continuous-time random walk model: Analytical and numerical solutions (<i>9 pages</i>)	052141
Kwok Sau Fa	
Finite-size effects on return interval distributions for weakest-link-scaling systems (<i>13 pages</i>)	052142
Dionissios T. Hristopulos, Manolis P. Petrakis, and Giorgio Kaniadakis	
Globally coupled stochastic two-state oscillators: Fluctuations due to finite numbers (<i>10 pages</i>)	052143
Italo'Ivo Lima Dias Pinto, Daniel Escaff, Upendra Harbola, Alexandre Rosas, and Katja Lindenberg	
Antiferromagnetic triangular Blume-Capel model with hard-core exclusions (<i>13 pages</i>)	052144
A. Ibenskas, M. Šimėnas, and E. E. Tornau	
Colored-noise Fokker-Planck equation for the shear-induced self-diffusion process of non-Brownian particles (<i>15 pages</i>)	052145
Laura J. Lukassen and Martin Oberlack	
Transient and stationary characteristics of the Malthus-Verhulst-Bernoulli model with non-Gaussian fluctuating parameters (<i>6 pages</i>)	052146
Alexander A. Dubkov and Anna A. Kharcheva	
Slow encounters of particle pairs in branched structures (<i>7 pages</i>)	052147
Elena Agliari, Alexander Blumen, and Davide Cassi	
Stochastic heat engine with the consideration of inertial effects and shortcuts to adiabaticity (<i>9 pages</i>)	052148
Z. C. Tu	
Granular Materials	
Hydrodynamic Burnett equations for inelastic Maxwell models of granular gases (<i>14 pages</i>)	052201
Nagi Khalil, Vicente Garzó, and Andrés Santos	

(Continued)

CONTENTS - *Continued*

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 89, NUMBER 5

MAY 2014

Saltation of particles in turbulent channel flow (<i>14 pages</i>)	052202
Chunning Ji, Ante Munjiza, Eldad Avital, Dong Xu, and John Williams	
Initiation of immersed granular avalanches (<i>18 pages</i>)	052203
Patrick Mutabaruka, Jean-Yves Delenne, Kenichi Soga, and Farhang Radjai	
☞ Collapsing granular beds: The role of interstitial air (<i>7 pages</i>)	052204
Tess Homan, Christa Gjaltema, and Devaraj van der Meer	
Nucleation, aggregation, annealing, and disintegration of granular clusters (<i>7 pages</i>)	052205
Jorge González-Gutiérrez, J. L. Carrillo-Estrada, and J. C. Ruiz-Suárez	
Hydrodynamic granular segregation induced by boundary heating and shear (<i>9 pages</i>)	052206
Francisco Vega Reyes, Vicente Garzó, and Nagi Khalil	
Statistical theory of correlations in random packings of hard particles (<i>9 pages</i>)	052207
Yuliang Jin, James G. Puckett, and Hernán A. Makse	
Self-sustaining charging of identical colliding particles (<i>7 pages</i>)	052208
Theo Siu, Jake Cotton, Gregory Mattson, and Troy Shinbrot	
Homogeneous hydrodynamics of a collisional model of confined granular gases (<i>8 pages</i>)	052209
J. Javier Brey, P. Maynar, M. I. García de Soria, and V. Buzón	
Inhomogeneous quasistationary state of dense fluids of inelastic hard spheres (<i>21 pages</i>)	052210
Itzhak Fouxon	
Packing fraction of particles with lognormal size distribution (<i>12 pages</i>)	052211
H. J. H. Brouwers	
Topological analysis of tapped granular media using persistent homology (<i>9 pages</i>)	052212
S. Ardanza-Trevijano, Iker Zuriguel, Roberto Arévalo, and Diego Maza	
Analytical model for flux saturation in sediment transport (<i>15 pages</i>)	052213
Thomas Pähtz, Eric J. R. Parteli, Jasper F. Kok, and Hans J. Herrmann	
Colloids and Complex Fluids	
Dynamics and electrorheology of sheared immiscible fluid mixtures (<i>7 pages</i>)	052301
Takahiro Sakaue, Kyohei Shitara, and Takao Ohta	
Possible oriented transition of multiple-emulsion globules with asymmetric internal structures in a microfluidic constriction (<i>8 pages</i>)	052302
Jingtao Wang, Xiaoduan Li, Xiaoyong Wang, and Jing Guan	
Anomalous thermomechanical properties of a self-propelled colloidal fluid (<i>7 pages</i>)	052303
S. A. Mallory, A. Šarić, C. Valeriani, and A. Cacciuto	
Dynamic correlations and heterogeneity in the primary and secondary relaxations of a model molecular liquid (<i>8 pages</i>)	052304
D. Fragiadakis and C. M. Roland	
Melting of a finite-sized two-dimensional colloidal crystal (<i>9 pages</i>)	052305
Sayuri Tanaka, Yuma Oki, and Yasuyuki Kimura	

(Continued)

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 89, NUMBER 5

MAY 2014

Effect of interfacial viscoelasticity on the bulk linear viscoelastic moduli of globular protein solutions (<i>4 pages</i>)	052306
Zhenhuan Zhang, Sourav Barman, and Gordon F. Christopher	
Effects of hydrodynamic retardation and interparticle interactions on the self-assembly in a drying droplet containing suspended solid particles (<i>5 pages</i>).	052307
N. I. Lebovka, S. Khrapatiy, R. Melnyk, and M. Vygornitskii	
Rheology near jamming: The influence of lubrication forces (<i>8 pages</i>)	052308
Moumita Maiti and Claus Heussinger	
Dynamical role of slip heterogeneities in confined flows (<i>7 pages</i>)	052309
Anne-Laure Vayssade, Choongyeop Lee, Emmanuel Terriac, Fabrice Monti, Michel Cloitre, and Patrick Tabeling	
Relaxation of polar order in suspensions with Quincke effect (<i>7 pages</i>)	052310
M. Belovs and A. Cēbers	
Crossovers in the dynamics of supercooled liquids probed by an amorphous wall (<i>9 pages</i>)	052311
Glen M. Hocky, Ludovic Berthier, Walter Kob, and David R. Reichman	
Effects of a temperature-dependent viscosity on thermal convection in binary mixtures (<i>7 pages</i>)	052312
Markus Hilt, Martin Glässl, and Walter Zimmermann	
Films, Interfaces, and Solids	
History-dependent friction and slow slip from time-dependent microscopic junction laws studied in a statistical framework (<i>18 pages</i>)	052401
Kjetil Thøgersen, Jørgen Kjoshagen Trømborg, Henrik Andersen Sveinsson, Anders Malthe-Sørenssen, and Julien Scheibert	
Surface fluctuations of liquids confined on flat and patterned solid substrates (<i>6 pages</i>)	052403
Basile Pottier, Emilie Verneuil, Laurence Talini, and Olivier Pierre-Louis	
Phonon contribution to the entropy of hard-sphere crystals (<i>5 pages</i>)	052404
Veit Elser	
Liquid Crystals	
Liquid crystal alignment induced by micron-scale patterned surfaces (<i>7 pages</i>)	052501
E. Willman, L. Seddon, M. Osman, A. Bulak, R. James, S. E. Day, and F. A. Fernandez	
Double-well elastic theory for twist-bend nematic phases (<i>10 pages</i>)	052502
Epifanio G. Virga	
Discontinuous anchoring transition and photothermal switching in composites of liquid crystals and conducting polymer nanofibers (<i>5 pages</i>)	052503
M. V. Rasna, K. P. Zuhail, R. Manda, P. Paik, W. Haase, and Surajit Dhara	
Simulating defect textures on relaxing nematic shells (<i>5 pages</i>)	052504
Badel L. Mbanga, Kate K. Voorhes, and Timothy J. Atherton	

(Continued)

 Shape-dependent dispersion and alignment of nonaggregating plasmonic gold nanoparticles in lyotropic and thermotropic liquid crystals (<i>10 pages</i>)	052505
Qingkun Liu, Jianwei Tang, Yuan Zhang, Angel Martinez, Shaowei Wang, Sailing He, Timothy J. White, and Ivan I. Smalyukh	
Simulation of radiation transfer and coherent backscattering in nematic liquid crystals (<i>11 pages</i>)	052506
E. V. Aksenova, D. I. Kokorin, and V. P. Romanov	
Patterns driven by combined ac and dc electric fields in nematic liquid crystals (<i>7 pages</i>)	052507
Alexei Krekhov, Werner Decker, Werner Pesch, Nándor Éber, Péter Salamon, Balázs Fekete, and Ágnes Buka	
Spatiotemporal character of the Bobylev-Pikin flexoelectric instability in a twisted nematic bent-core liquid crystal exposed to very low frequency fields (<i>9 pages</i>)	052508
K. S. Krishnamurthy	
Ferroelectric order in liquid crystal phases of polar disk-shaped ellipsoids (<i>11 pages</i>)	052509
Tushar Kanti Bose and Jayashree Saha	
Electric-field modulation of liquid crystal structures in contact with structured surfactant monolayers (<i>7 pages</i>)	052510
Pau Guillamat, Francesc Sagués, and Jordi Ignés-Mullol	
Effects of fullerene addition on the thermo-optical properties of smectic liquid crystals at the vicinity of the nematic–smectic- <i>A</i> phase transition (<i>6 pages</i>)	052511
Lidiane Omena, Pedro B. de Melo, Maria S. S. Pereira, and Italo N. de Oliveira	
Polymers	
Origin of α and β relaxations of Nafion (<i>7 pages</i>)	052601
B. R. Matos, E. I. Santiago, J. F. Q. Rey, and F. C. Fonseca	
Computational study on the progressive factorization of composite polymer knots into separated prime components (<i>9 pages</i>)	052602
Luca Tubiana	
Localization of chain dynamics in entangled polymer melts (<i>5 pages</i>)	052603
M. G. Guenza	
Biological Physics	
Direct and remote constriction of membrane necks (<i>7 pages</i>)	052701
Bojan Božič, Jemal Guven, Pablo Vázquez-Montejo, and Saša Svetina	
Dynamics of polymer ejection from capsid (<i>9 pages</i>)	052702
R. P. Linna, J. E. Moio, P. M. Suhonen, and K. Kaski	
Traffic jams and shocks of molecular motors inside cellular protrusions (<i>13 pages</i>)	052703
I. Pinkoviezky and N. S. Gov	
Analytical modeling and experimental characterization of chemotaxis in <i>Serratia marcescens</i> (<i>11 pages</i>)	052704
Jiang Zhuang, Guopeng Wei, Rika Wright Carlsen, Matthew R. Edwards, Radu Marculescu, Paul Bogdan, and Metin Sitti

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 89, NUMBER 5

MAY 2014

Robust hypothesis tests for detecting statistical evidence of two-dimensional and three-dimensional interactions in single-molecule measurements (<i>8 pages</i>)	052705
Christopher P. Calderon, Lucien E. Weiss, and W. E. Moerner	
Geometry for a penguin-albatross rookery (<i>6 pages</i>)	052706
Fabio Giavazzi and Alberto Vailati	
Spatiotemporal dynamics of calcium-driven cardiac alternans (<i>24 pages</i>)	052707
Per Sebastian Skardal, Alain Karma, and Juan G. Restrepo	
Coherent feedforward transcriptional regulatory motifs enhance drug resistance (<i>9 pages</i>)	052708
Daniel A. Charlebois, Gábor Balázs, and Mads Kærn	
Approximating spatially exclusive invasion processes (<i>7 pages</i>)	052709
Joshua V. Ross and Benjamin J. Binder	
Interplay between the mechanics of bacteriophage fibers and the strength of virus-host links (<i>7 pages</i>)	052710
P. Ares, C. Garcia-Doval, A. Llauro, J. Gómez-Herrero, M. J. van Raaij, and P. J. de Pablo	
Macroscopic traveling packet and soliton states of quasi-one-dimensional flocks (<i>5 pages</i>)	052711
Nicholas Guttenberg, John Toner, and Yuhai Tu	
Link weight evolution in a network of coupled chemical oscillators (<i>5 pages</i>)	052712
Hua Ke, Mark R. Tinsley, Aaron Steele, Fang Wang, and Kenneth Showalter	
Initiation and blocking of the action potential in an axon in weak ultrasonic or microwave fields (<i>10 pages</i>)	052713
M. N. Shneider and M. Pekker	
Role of detritus in a spatial food web model with diffusion (<i>11 pages</i>)	052714
Andrzej Pękalski and Janusz Szwabiński	
Residence times and boundary-following behavior in animals (<i>5 pages</i>)	052715
Sebastian Weitz, Stéphane Blanco, Richard Fournier, Jacques Gautrais, Christian Jost, and Guy Theraulaz	

PART B

Networks and Interdisciplinary Physics

Networks in financial markets based on the mutual information rate (<i>7 pages</i>)	052801
Paweł Fiedor	
Nodal infection in Markovian susceptible-infected-susceptible and susceptible-infected-removed epidemics on networks are non-negatively correlated (<i>6 pages</i>)	052802
E. Cator and P. Van Mieghem	
Inhomogeneous point-process entropy: An instantaneous measure of complexity in discrete systems (<i>9 pages</i>)	052803
Gaetano Valenza, Luca Citi, Enzo Pasquale Scilingo, and Riccardo Barbieri	
Approximate von Neumann entropy for directed graphs (<i>12 pages</i>)	052804
Cheng Ye, Richard C. Wilson, César H. Comin, Luciano da F. Costa, and Edwin R. Hancock	
Low-dimensional functionality of complex network dynamics: Neurosensory integration in the <i>Caenorhabditis elegans</i> connectome (<i>6 pages</i>)	052805
James Kunert, Eli Shlizerman, and J. Nathan Kutz

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 89, NUMBER 5

MAY 2014

Catalytic reaction dynamics in inhomogeneous networks (<i>7 pages</i>)	052806
Akitomo Watanabe and Kousuke Yakubo	
Probabilistic physical characteristics of phase transitions at highway bottlenecks: Incommensurability of three-phase and two-phase traffic-flow theories (<i>13 pages</i>)	052807
Boris S. Kerner, Sergey L. Klenov, and Michael Schreckenberg	
Exit probability of the one-dimensional q -voter model: Analytical results and simulations for large networks (<i>8 pages</i>)	052808
André M. Timpanaro and Carmen P. C. Prado	
Diffusive evolution of experimental braided rivers (<i>6 pages</i>)	052809
Meredith D. Reitz, Douglas J. Jerolmack, Eric Lajeunesse, Angela Limare, Olivier Devauchelle, and François Métivier	
Kinetic Monte Carlo simulations of one-dimensional and two-dimensional traffic flows: Comparison of two look-ahead rules (<i>11 pages</i>)	052810
Yi Sun and Ilya Timofeyev	
Generalized epidemic process on modular networks (<i>7 pages</i>)	052811
Kihong Chung, Yongjoo Baek, Daniel Kim, Meesoon Ha, and Hawoong Jeong	
Stationarity of extreme bursts in the solar wind (<i>13 pages</i>)	052812
N. R. Moloney and J. Davidsen	
Degree mixing in multilayer networks impedes the evolution of cooperation (<i>8 pages</i>)	052813
Zhen Wang, Lin Wang, and Matjaž Perc	
Google matrix of the citation network of Physical Review (<i>22 pages</i>)	052814
Klaus M. Frahm, Young-Ho Eom, and Dima L. Shepelyansky	
Dimensionality reduction and spectral properties of multilayer networks (<i>9 pages</i>)	052815
Rubén J. Sánchez-García, Emanuele Cozzo, and Yamir Moreno	
Damage detection via shortest-path network sampling (<i>8 pages</i>)	052816
Fabio Ciulla, Nicola Perra, Andrea Baronchelli, and Alessandro Vespignani	
Programmable ion-sensitive transistor interfaces. III. Design considerations, signal generation, and sensitivity enhancement (<i>12 pages</i>)	052817
Krishna Jayant, Kshitij Auluck, Sergio Rodriguez, Yingqiu Cao, and Edwin C. Kan	
Nonlinear Dynamics and Chaos	
Mixing properties in the advection of passive tracers via recurrences and extreme value theory (<i>7 pages</i>)	052901
Davide Faranda, Xavier Leoncini, and Sandro Vaienti	
Unpinning of spiral waves by electrical forcing in excitable chemical media (<i>6 pages</i>)	052902
Malee Sutthiopad, Jiraporn Luengviriya, Porramain Porjai, Boosayarat Tomapatanaet, Stefan C. Müller, and Chaiya Luengviriya	
Bistability and hysteresis in an optically injected two-section semiconductor laser (<i>7 pages</i>)	052903
A. Pimenov, E. A. Viktorov, S. P. Hegarty, T. Habruseva, G. Huyet, D. Rachinskii, and A. G. Vladimirov

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 89, NUMBER 5

MAY 2014

Multiparameter bifurcations and mixed-mode oscillations in Q -switched CO ₂ lasers (<i>17 pages</i>)	052904
Eusebius J. Doedel and Carlos L. Pando L.	
Noise effects on a birhythmic Josephson junction coupled to a resonator (<i>9 pages</i>)	052905
R. Yamapi and G. Filatrella	
Dynamical robustness of coupled heterogeneous oscillators (<i>8 pages</i>)	052906
Gouhei Tanaka, Kai Morino, Hiroaki Daido, and Kazuyuki Aihara	
Wave reflection in a reaction-diffusion system: Breathing patterns and attenuation of the echo (<i>9 pages</i>)	052907
M. A. Tsyganov, G. R. Ivanitsky, and E. P. Zemskov	
Synchronization transition in networked chaotic oscillators: The viewpoint from partial synchronization (<i>11 pages</i>)	052908
Chenbo Fu, Weijie Lin, Liang Huang, and Xingang Wang	
Dynamics of reaction-diffusion patterns controlled by asymmetric nonlocal coupling as a limiting case of differential advection (<i>9 pages</i>)	052909
Julien Siebert, Sergio Alonso, Markus Bär, and Eckehard Schöll	
Damping filter method for obtaining spatially localized solutions (<i>8 pages</i>)	052910
Toshiki Teramura and Sadayoshi Toh	
Transmission phase of a quantum dot and statistical fluctuations of partial-width amplitudes (<i>8 pages</i>)	052911
Rodolfo A. Jalabert, Guillaume Weick, Hans A. Weidenmüller, and Dietmar Weinmann	
Transition from amplitude to oscillation death under mean-field diffusive coupling (<i>5 pages</i>)	052912
Tanmoy Banerjee and Debarati Ghosh	
Escape through a time-dependent hole in the doubling map (<i>8 pages</i>)	052913
André L. P. Livorati, Orestis Georgiou, Carl P. Dettmann, and Edson D. Leonel	
Observation and characterization of chimera states in coupled dynamical systems with nonlocal coupling (<i>8 pages</i>)	052914
R. Gopal, V. K. Chandrasekar, A. Venkatesan, and M. Lakshmanan	
Controlling rogue waves in inhomogeneous Bose-Einstein condensates (<i>7 pages</i>)	052915
Shally Loomba, Harleen Kaur, Rama Gupta, C. N. Kumar, and Thokala Soloman Raju	
Fast time-series prediction using high-dimensional data: Evaluating confidence interval credibility (<i>15 pages</i>)	052916
Yoshito Hirata	
Dynamical instability of a Bose-Einstein condensate with higher-order interactions in an optical potential through a variational approach (<i>13 pages</i>)	052917
E. Wamba, S. Sabari, K. Porsezian, A. Mohamadou, and T. C. Kofané	
Continuous and discrete Schrödinger systems with parity-time-symmetric nonlinearities (<i>7 pages</i>)	052918
Amarendra K. Sarma, Mohammad-Ali Miri, Ziad H. Musslimani, and Demetrios N. Christodoulides	
Localized nonlinear excitations in diffusive Hindmarsh-Rose neural networks (<i>10 pages</i>)	052919
F. M. Moukam Kakmeni, E. M. Inack, and E. M. Yamakou	
Fluid Dynamics	
Polymer-induced change in scaling behavior in two-dimensional homogeneous turbulent thermal convection (<i>8 pages</i>)	053001
Roberto Benzi, Emily S. C. Ching, and C. K. Wong

THIRD SERIES, VOLUME 89, NUMBER 5

MAY 2014

Influence of disjoining pressure on the dynamics of steadily moving long bubbles inside narrow cylindrical capillaries (<i>11 pages</i>)	053002
Kaustav Chaudhury, Palash V. Acharya, and Suman Chakraborty	
Energy harvesting through gas dynamics in the free molecular flow regime between structured surfaces at different temperatures (<i>10 pages</i>)	053003
Tobias Baier, Julia Dölger, and Steffen Hardt	
Traveling-wave convection in a binary fluid mixture under high-frequency vertical vibrations (<i>8 pages</i>)	053004
B. L. Smorodin, B. I. Myznikova, and S. M. Ishutov	
Long-term memory in experiments and numerical simulations of hydrodynamic and magnetohydrodynamic turbulence (<i>9 pages</i>)	053005
P. Mininni, P. Dmitruk, P. Odier, J.-F. Pinton, N. Plihon, G. Verhille, R. Volk, and M. Bourgoin	
Radial Hele-Shaw flow with suction: Fully nonlinear pattern formation (<i>9 pages</i>)	053006
Ching-Yao Chen, Yu-Sheng Huang, and José A. Miranda	
Treelike networks accelerating capillary flow (<i>7 pages</i>)	053007
Dahua Shou, Lin Ye, and Jintu Fan	
Mean force on a finite-sized spherical particle due to an acoustic field in a viscous compressible medium (<i>13 pages</i>)	053008
Subramanian Annamalai, S. Balachandar, and Manoj K. Parmar	
Solution to Rayleigh-Taylor instabilities: Bubbles, spikes, and their scalings (<i>7 pages</i>)	053009
Karnig O. Mikaelian	
Brownian motion of tethered nanowires (<i>10 pages</i>)	053010
Sadao Ota, Tongcang Li, Yimin Li, Ziliang Ye, Anna Labno, Xiaobo Yin, Mohammad-Reza Alam, and Xiang Zhang	
From antinode clusters to node clusters: The concentration-dependent transition of floaters on a standing Faraday wave (<i>9 pages</i>)	053011
Ceyda Sanlı, Detlef Lohse, and Devaraj van der Meer	
Gas-surface interactions using accommodation coefficients for a dilute and a dense gas in a micro- or nanochannel: Heat flux predictions using combined molecular dynamics and Monte Carlo techniques (<i>14 pages</i>)	053012
S. V. Nedeia, A. A. van Steenhoven, A. J. Markvoort, P. Spijker, and D. Giordano	
Depth-averaged model for hydraulic jumps on an inclined plate (<i>6 pages</i>)	053013
E. S. Benilov	
Instabilities in electromagnetic quasilevitation (<i>13 pages</i>)	053014
Kirk Spragg, Sebastien Letout, R. Ernst, Alfred Sneyd, and Yves Fautrelle	
Influence of electric-double-layer structure on the transient response of nanochannels (<i>8 pages</i>)	053015
Jarrod Schiffbauer and Gilad Yossifon	
Oscillating-grid experiments in water and superfluid helium (<i>11 pages</i>)	053016
Rose E. Honey, Robert Hershberger, Russell J. Donnelly, and Diogo Bolster

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 89, NUMBER 5

MAY 2014

Criterion for vortex breakdown on shock wave and streamwise vortex interactions (<i>14 pages</i>)	053017
Toshihiko Hiejima	
Coupled self-organization: Thermal interaction between two liquid films undergoing long-wavelength instabilities (<i>12 pages</i>)	053018
Miklós Vécsei, Mathias Dietzel, and Steffen Hardt	
Elastic fingering in rotating Hele-Shaw flows (<i>8 pages</i>)	053019
Gabriel D. Carvalho, Hermes Gadêlha, and José A. Miranda	
Transient dynamics of confined liquid drops in a uniform electric field (<i>17 pages</i>)	053020
Shubhadeep Mandal, Kaustav Chaudhury, and Suman Chakraborty	
Instabilities in the wake of a circular disk (<i>8 pages</i>)	053021
T. Bobinski, S. Goujon-Durand, and J. E. Wesfreid	
Effect of the forcing term in the pseudopotential lattice Boltzmann modeling of thermal flows (<i>7 pages</i>)	053022
Qing Li and K. H. Luo	
Longitudinal and transverse dispersion in flow through random packings of spheres: A quantitative comparison of experiments, simulations, and models (<i>10 pages</i>)	053023
U. M. Scheven, S. Khirevich, A. Daneyko, and U. Tallarek	
Capillary filling dynamics of viscoelastic fluids (<i>10 pages</i>)	053024
Aditya Bandopadhyay, Uddipta Ghosh, and Suman Chakraborty	
Plasma Physics	
Use of multilayer targets for achieving off-Hugoniot states (<i>7 pages</i>)	053101
Abutrab A. Aliverdiev, Dimitri Batani, Luca Antonelli, Katarzyna Jakubowska, Riccardo Dezulian, Anise A. Amirova, Gaji M. Gajiev, Manoranjan Khan, and Hem C. Pant	
Semiempirical wide-range conductivity model with exploding wire verification (<i>5 pages</i>)	053102
J. Stephens, J. Dickens, and A. Neuber	
Excitation and control of chirped nonlinear ion-acoustic waves (<i>4 pages</i>)	053103
L. Friedland and A. G. Shagalov	
Electrostatic solitary waves and hole structures generated by bump-on-tail instability in electron-positron plasmas (<i>5 pages</i>)	053104
C.-S. Jao and L.-N. Hau	
Kelvin-Helmholtz versus Hall magnetoshear instability in astrophysical flows (<i>7 pages</i>)	053105
Daniel O. Gómez, Cecilia Bejarano, and Pablo D. Mininni	
Inhibition of turbulence in inertial-confinement-fusion hot spots by viscous dissipation (<i>5 pages</i>)	053106
C. R. Weber, D. S. Clark, A. W. Cook, L. E. Busby, and H. F. Robey	
Dynamical friction in a relativistic plasma (<i>5 pages</i>)	053107
O. J. Pike and S. J. Rose	
☞ Synchronization of particle motion induced by mode coupling in a two-dimensional plasma crystal (<i>8 pages</i>)	053108
L. Couëdel, S. Zhdanov, V. Nosenko, A. V. Ivlev, H. M. Thomas, and G. E. Morfill	

(Continued)

Classical Physics

Dissipative shocks in a chain fountain (9 pages)	053201
Epifanio G. Virga	
Granular chain between asymmetric boundaries and the quasiequilibrium state (5 pages)	053202
Edgar Ávalos and Surajit Sen	
One-way glass for microwaves using nonreciprocal metamaterials (5 pages)	053203
A. Degiron and D. R. Smith	

Computational Physics

Application of level-set method for deposition in three-dimensional reconstructed porous media (16 pages)	053301
M. T. Vu and P. M. Adler	
☞ Three-dimensional simulation strategy to determine the effects of turbulent mixing on inertial-confinement-fusion capsule performance (14 pages)	053302
Brian M. Haines, Fernando F. Grinstein, and James R. Fincke	
Tensor Green's function evaluation in arbitrarily anisotropic, layered media using complex-plane Gauss-Laguerre quadrature (15 pages)	053303
Kamalesh Sainath and Fernando L. Teixeira	
Representative elementary volume assessment of three-dimensional x-ray microtomography images of heterogeneous materials: Application to limestones (11 pages)	053304
O. Rozenbaum and S. Rolland du Roscoat	
Local absorbing boundary conditions for a linearized Korteweg–de Vries equation (8 pages)	053305
Wei Zhang, Hongwei Li, and Xiaonan Wu	
Performance of numerical approximation on the calculation of overlap integrals with noninteger Slater-type orbitals (7 pages)	053307
A. Bağcı and P. E. Hoggan	
Lattice-Boltzmann method for the simulation of multiphase mass transfer and reaction of dilute species (14 pages)	053308
Antoine Riaud, Shufang Zhao, Kai Wang, Yi Cheng, and Guangsheng Luo	
Single-relaxation-time lattice Boltzmann scheme for advection-diffusion problems with large diffusion-coefficient heterogeneities and high-advection transport (9 pages)	053309
Janez Perko and Ravi A. Patel	
Lattice Boltzmann scheme for electrolytes by an extended Maxwell-Stefan approach (9 pages)	053310
Jens Zudrop, Sabine Roller, and Pietro Asinari	
<i>Ab-initio</i> reconstruction of complex Euclidean networks in two dimensions (9 pages)	053311
S. R. Gujarathi, C. L. Farrow, C. Glosser, L. Granlund, and P. M. Duxbury	
Non-Newtonian unconfined flow and heat transfer over a heated cylinder using the direct-forcing immersed boundary–thermal lattice Boltzmann method (13 pages)	053312
A. Amiri Delouei, M. Nazari, M. H. Kayhani, and S. Succi	
Optimizing thermal conductivity in functionalized macromolecules using Langevin dynamics and the globalized and bounded Nelder-Mead algorithm (8 pages)	053313
Abdellah Ait moussa and Bahaeddin Jassemnejad

PHYSICAL REVIEW E

THIRD SERIES, VOLUME 89, NUMBER 5

MAY 2014

Molecular dynamics algorithm enforcing energy conservation for microcanonical simulations (<i>10 pages</i>)	053314
Clara Salueña and Josep Bonet Avalos	
Improving the accuracy of simulation of radiation-reaction effects with implicit Runge-Kutta-Nyström methods (<i>10 pages</i>)	053315
N. V. Elkina, A. M. Fedotov, C. Herzing, and H. Ruhl	
Neural-network approach to modeling liquid crystals in complex confinement (<i>12 pages</i>)	053316
T. Santos-Silva, P. I. C. Teixeira, C. Anquetil-Deck, and D. J. Cleaver	
Regularized lattice Bhatnagar-Gross-Krook model for two- and three-dimensional cavity flow simulations (<i>8 pages</i>)	053317
A. Montessori, G. Falcucci, P. Prestininzi, M. La Rocca, and S. Succi	
Self-intermediate scattering function of strongly interacting three-dimensional lattice gases: Time- and wave-vector-dependent tracer diffusion coefficient (<i>7 pages</i>)	053318
Loukas Skarpalezos, Panos Argyrakis, and Vyacheslav S. Vikhrenko	
Calculations for the one-dimensional soft Coulomb problem and the hard Coulomb limit (<i>6 pages</i>)	053319
Daniel H. Gebremedhin and Charles A. Weatherford	
Phase-field-based multiple-relaxation-time lattice Boltzmann model for incompressible multiphase flows (<i>19 pages</i>)	053320
H. Liang, B. C. Shi, Z. L. Guo, and Z. H. Chai	

COMMENTS

Comment on “Modeling of electrode polarization for electrolytic cells with a limited ionic adsorption” (<i>4 pages</i>)	056401
A. L. Alexe-Ionescu, G. Barbero, and I. Lelidis	
Reply to “Comment on ‘Modeling of electrode polarization for electrolytic cells with a limited ionic adsorption’ ” (<i>4 pages</i>)	056402
Atsushi Sawada	

ERRATA

Erratum: Lattice Boltzmann method for multimode wave propagation in viscoelastic media and in elastic solids [Phys. Rev. E 83 , 066703 (2011)] (<i>1 page</i>)	059901(E)
George N. Frantziskonis	
Publisher’s Note: Use of multilayer targets for achieving off-Hugoniot states [Phys. Rev. E 89 , 053101 (2014)] (<i>1 page</i>)	059902(E)
Abutrab A. Aliverdiev, Dimitri Batani, Luca Antonelli, Katarzyna Jakubowska, Riccardo Dezulian, Anise A. Amirova, Gaji M. Gajiev, Manoranjan Khan, and Hem C. Pant	
Erratum: Regularized thin-fiber model for nanofiber formation by centrifugal spinning [Phys. Rev. E 89 , 023011 (2014)] (<i>2 pages</i>)	059903(E)
S. M. Taghavi and R. G. Larson	
Erratum: Segregation of diffusible and directionally moving particles on a polar filament [Phys. Rev. E 89 , 042713 (2014)] (<i>1 page</i>)	059904(E)
D. Johann, D. Goswami, and K. Kruse
